That's not why people break into computers, generally.

You still need to make sure you're fully protected.

In the UK we had (and still have) Emperor Rosko in the 60s/70s (& still on a few UK stations by satellite from LA today), he followed the Wolfman style, real name Michael Pasternack.

What happened to XERB/1090?

I'm not sure if this is the right Newsgroup to ask - but maybe someone can re-direct me if not - did anyone happen to record the Peter Pan programme on Radio Three last night with John Thaw as Captain Hook?

If they did, I would be very grateful if they could email me as, I am trying to get a copy of the last half hour, as somebody turned the satelite over before the end.

Anyone who can help can contact me at SnideUk@aol.com.

Many Thanks

Snide

Sorry the attempt at humor failed. I know where Ada is and I know how many unemployed PDs there are out there who were formerly running blowtorches. I know many PDs with titles that mean nothing because they take direction from above and would find Ada to be a welcome rest..

The concept of being a PD with no authority because the GM or corporate makes all the decisions is all too familiar. The title should be Gofer Director.

Why not pick a student, give him a PD business card and let him get back to class? It might impressive enough for a roll in the hay with some radio-challenged coed, but not much more.

Rich

out there who is interested in what I have on my home computer, no matter what OS I have installed on it.<

Think again. Hackers hack because of the Mt. Everest attitude: Because it's there. Yes, they don't give a hoot in hell what's on your machine, but if it's open to the Internet, you can bet they'll try to get into it.

Get yourself a copy of Zone Alarm, and then you can truly stop worrying.

You are totally missing the point. The hackers (or more properly
'crackers') aren't looking specifically for data. They want to wreak havoc
and cause you pain. If they get your social security # or credit card # in
the process, that's a bonus. If you think of them as terrorists (as the
thread was mostly dealing with) then you might understand better.

The FCC has always considered the 88-108 MHz FM band to be _local
service_. They only protect the primary service area from
interference. IMO, there is NO chance that the FM band will be expanded
in my lifetime, and probably not in yours (generic "yours").

Here in the East, the FM band was full 35 or 40 years ago. There have
been some "80-90" drop-ins since then, but they mainly just reduce
coverage of pre-existing stations.

You'll have to live with the present situation or get XM or Sirius
satellite radio.

>>

Wolfman Jack apparently registered "XERB" as a trademark, so when he left, the station's call letters were changed to XEPRS ("Express") and the station was reprogrammed for African-American audiences. It is presently programmed for Hispanic audiences.

Before Wolfman Jack, XERB was mainly brokered time with lots of race track shows and plenty of radio preachers. Rev. Ike, and the like ... LOL.

Wolfman's previous incarnation was on XERF, which had XERA as a prior call.

XERF (ex-XERA) was born as XER, and at that time it featured that "goat gonad" doctor, who was run out of Kansas by the FCC (KFKB).

When Wolfman Jack had control of the station, he was programming the station out of Los Angeles. At the peak he was running a 24 hour a day "live" operation employing several other DJs in addition to himself. They would record the programming on one hour reel to reel tapes in real time, just as if they were on the air live, then shuttled these tapes over the border to be played the next day at the transmitter site.

According to his autobiography he lost control of the station when the Mexican officials noticed the success of the operation and wanted more of a cut for themselves. Wolfman had just finished building a state of the art studio and production center and didn't have the cash to meet their demands. He was booted off the air and the house of cards came crashing down around him.

For a while XERB continued playing soul as XEPRS, the Soul Express. But it wasn't the same without the Wolfman and never achieved the same level of success. Today it's just another Mexican station beaming Spanish programming into the San Diego and L.A. markets.

In the 70's it changed back to Spanish programming as XEPRS. It is and always was licensed to Rosarito, Baja California Norte, M&#xfffd;xico.

Not "officials" but the license holder, Te&#65533;filo Bichara of Monterrey.
Through his agent, Jorge Wilkins, he tried to renegotiate a better rental
rate for the facility and was turned down. The station was eventually rented
to Teddy Fregoso at a higher rate and Fregoso continues to LMA it until this
day.

Actually, it is the only Tijuana Spanish language station programming
specifically for the US side of the border. The other Tijuana stations that
operate in Spanish program mostly for Tijuana, although they pick up some ad
revenue in San Diego.

As I recall, XEROK in Juarez ("X-Rock 80") did much the same thing during its Top 40 heyday. Why was this practice utilized? Were the stations unable (either legally or technically) to run a phone line to Mexico, or were there laws prohibiting an American operator from broadcasting live on a signal emanating from Mexico?

Clarke

Most sound cards since the 16bit Soundblaster allow you to run 'duplex' - the card can digitise at the same time as making analogue sound from whatever source (MP3, WAV etc.) - look in the mixer applet for 'stereo mix' (on the Crystal chipset on my home PC) or 'stereo out' (Yamaha chipset on my Sony laptop) as a recording source - select it and use your usual recording software to grab. I use CoolEdit to capture lots of streamed stuff from the Internet (principly Radio4 RealMedia programmes). With a little macro-scripting I've got it VCR style - it'll retrieve the stream, capture it uncompressed and save it out as a WAV. You can then do with it what you will (I make it into an MP3 for listening to on my Rio portable player).
One thing to watch for is level - this ain't a digital path so you need to make sure things aren't hitting the end-stop or too quiet to avoid the noise - but it does mean you can re-capture at 48khz stuff that was origionally sampled at 44.1khz (for example).

Regards, Phil.

The weakest most rotten AM section on the market. For some
reason there's zero sensitivity in both this and the Bose AM
radios. You'd think they could engineer it a little.

It still requires an American waver, called, I believe, a 325-b, to
transport a signal across an international border for rebroadcast back into
the USA. Through the 80's XEPRS transported tapes from LA to Tijuana for
rebroadcast a day later.

Bose has actually updated the WaveRadio for better AM reception. They improved the circuitry and installed a larger ferrite bar antenna. But still no AM Stereo, although it works beautifully when converted to receive AM Stereo with one of Motorola's decoder chips.

However, you are correct that the Kloss radio is horrible on AM. Even the C.Crane Company, which is usually paid off by their product suppliers to hype up these products even when they have marginal performance (i.e. the Sangean-made "CCRadio"), admits that the Kloss radio has poor AM reception. I guess Kloss isn't big enough of a product suppler to them to have them give it false praise (unlike all the Sangean radios they sell).

I have one too, or at least the latest version from his new "Tivoli" company. I really like it. The FM is very good and dial calibration seems quite accurate. The AM is also pretty good too, despite a previous post to the contrary. It's not as sensitive as the GE SuperRadio, but it is quite respectable. Many AM Stations sound as good as FM on this radio. It would be nice if they'd included terminals for an external AM antenna. There is a "F" connector for FM.

Bottom line: Worth the $100.00 asking price.

>What do ya think?

Very good sound in a very small package for a fair price. The FM section is pretty good, but needs an external antenna of some kind in order to maximize the DX possibilities. The AM tuner sensitivity is lukewarm, but I found one with an unusually good AM section (among several I gave as Christmas gifts) and kept it for myself. Overall, I'd recommend it for the audiophile as a good table or nightstand radio, but there are better receivers for AM/FM DX.

At one time, Dr. John Romulus Brinkley had a broadcast loop all the way from Milford, Kansas to Villa Acuna, Coah, MX. But no less than the United States Congress told him that he must stop the "remote control" broadcasts.

They also passed a law that prohibited electrical transcriptions from being transported across the border, and dispatched a federal agent to Del Rio to try to prove the doctor was in violation.

Everybody in Del Rio kept their mouthes shut, and the only people who got in trouble were MacGregor transcriptions of Hollywood, because while the law was clearly aimed at Brinkley, it didn't expressly say so.

MacLendon at XeTRA News in the 60s had to maintain an air staff in Baja to rip and read the UP Radio Wire, which could cross the border.

I want to purchase a digitally tuned AM/FM clock radio with a CD player.
I would like stereo FM and decent AM monaural sensitivity/selectivity
along with listenable audio. I am assuming that the FM tuner performance
will be good. It is the AM tuner performance that I am concerned about.
Can any one provide quantitative information? The "specifications" on
the internet are "useless" since they only tell you the size of the
speakers and number of preset buttons, etc.
Also, I would appreciate a comparison of these parameters against those
of the Panasonic RC-CD500 and/or the Zenith Z2020B.
Any other suggestions are welcome.
TIA,
Dave

Dear Dave:

Like the old joke about the man arrested for disturbing the peace in a nightclub and the charges being dropped by the judge cuz "there ain't no peace IN a nightclub to disturb"

There is no such thing with an AM tuner with performance! At least not in the price range an ordinary mortal can afford. This sarcastic remark coming from a semi-retired broadcast engineer whose last job was Chief Engineer for a NYC 5 KW fulltime AM!

There is no way that you will get anything but crap performance in the case of 99% of the consumer AM radios. I used to own a Dyma-Mckay HI-FI AM tuner. It cost about $300.00 in 1976 and was flat to 10 Khz. Even had narrow/wide selectivity, RF gain control, etc. etc. But alas that is the exception to the rule

So think like the judge in the joke!

73,

Meyer Gottesman, W6GIV (Ham since 1950)
Macon, GA

Not true. The GE Superadio is still sold, and it's a fine performer,
for about $50 US. Now if you want a _clock_ radio with AM
performance, (which is what the original poster wanted) you are indeed
out of luck.

Hey folks...

I post this only because we are all broadcasters here and there are somethings happening in Nashville that might be of interest to you. IT appears that Gaylord Entertainment Current licence holder for WSM AM 650 in Nashville which everyone might know of as one of the original Clear Channel AM stations established back in 1925. Well... IN short they are going to drop thier historic Country music format which has brought all of the history and Music Industry Establishment to Nashville over the past 75 Years for nothing more then ESPN SPORTS TALK RADIO.

If anyone is interested in more they can surf www.wsmv.com or www.tennessean.com for more information.

On a side note I think its a crying shame that this happens to one of the most historic radiostations of the past 75 years.

sigh just goes to show all that really matters is the MIGHTY DOLLAR

It was illegal to (without a 325B authorization) to send live programming from the US to Mexico for the purpose of targeting the US from a Mexican station.

I programmed XTRA (690) for a number of years. We had a Mexican gentleman (Sr. Gallegos) in a Volkswagen bug shuttling tape from our studios in San Diego to the AM transmitter site in Rosarito Beach and the FM (91X) in Tijuana. Later, we actually had the 91X jocks drive to Tijauna and do their shows live from there. They always loved trying to get back across the border into the US on a Sunday evening.

Even if it had been legal, getting a clear microwave shot would have been almost impossible. Most of us wondered how XETV (CH6) could get away with using a live STL. Our conclusion was that it had something to do with corruption.

Rich

>*sigh just goes to show all that really matters is the MIGHTY DOLLAR*<

Fine. You raise the money to buy them, and put the money-losing country format back on. See how long you last as the owner before you run out of money and have to go silent. It's really easy to criticize when you don't have to pay the bills every day.

One sure thing in this life is that nothing is forever. Times change, and (a truism in radio that shockingly few outside the business manage to grasp) audience tastes change. There are many people who fondly remember music formats on AM stations, but we also don't kid ourselves that the coming of FM wouldn't have changed that.

You are right... The Radio Locator also lists WLW as being owned by Jacor.
They are a bit behind the times, don't you think?

I don't.

The *FCC* still lists some of the licenses as being held by AMFM or
Jacor or other entities which no longer exist independently.

I would suggest that the entities that the licenses assign to still
exist as subsidiaries of Clear Channel, but to keep paperwork simple,
CC held on to the old names. I mean, would you really have wanted to
do the paperwork on several hundred AMFM licenses? No. Therefore, you
keep "AMFM License Partnership Inc." or whatever it was as a
distinct entity that is a subsidiary of the new parent.

I think when they do this; They should move Sports Night from WTN to WSM.
I also think that WSM-FM should take up their classic country format or get
out of country all together.

As bad as the change sounds I can see some advantages. I heard that there
may be a plan to broadcast the opry on the FM station and syndicate it.
This would enable the broadcast to reach more people than their clear
channel could. People in New Mexico and places in the west couldn't pick
up the station.

If they move sports night to WSM-AM after making the change it will fill a
void that was created in the south east when WLAC abandon their local
sports show The Sports Scene with Bob Bell and Bill King a year ago. I
thought WKDA 1430-AM could take up an all sports talk format but they are
going to become a public radio station as early as March

I enjoyed listening to the classic country on WSM-AM in stereo until they
turned off their stereo signal a year ago. For the past few months They
meaning Gaylord have been promoting the Opry's return to the rimon
auditorium. I wonder if this was in their original thinking to be the last
hooraugh for WSM-AM?

It's basically a killer FM Mono radio (BTW, AM Radio is gasping for air.) I use mine to listen to my Pioneer 903 XM radio which feeds rabbit ears with the 89.1 mHz FM modulated signal. I get about a hundred feet in good directions.

>I sincerely hope the above post is a hoax!<

This rumor has shown up in several other places too, but Gaylord has not made a decision yet.

It would be a shame, but there is nothing in the Constitution nor in the FCC rules that says a company has to lose money running a radio station...and there are many things more important in this world than whether one particular radio station runs a format available elsewhere.

To which I add:
I was glad to see I'm not the only one who thinks the original poster's attitide is wrong, Sid.
Everyone seems to think that because WSM is a heritage station, there is a legal responsibility for them to maintain the format no mater how much it costs (the owners). I agree... If these people want to see that format continue, they should buy the station and try to service the debt off the billing of a low rated country station on AM:
WQQK Urban 8.8
WSIX Country 6.8
WJXA AC 6.5
WRVW Top 40 6.2
WWTN Talk 5.4
WMAK Oldies 4.8
WUBT Christian 4.5
WBUZ Alternative 4.1
WKDF Country 4.1
WLAC-A News 3.9
WSM-A Country 3.9
I don't know is ESPN Radio can do much better than a 3.9, but I'll bet it is a lot cheaper to do ESPN than maintain a musicstation w/airstaff.
It's easy to feel resentment over someone sacrificing historical radio (even though WSM was actually Top 40 not too long ago) for "the almighty dollar"... especially if it's someone else's dollar paying the bills.

It's a shame, but it's not that surprising--people seem not to want to listen to music on AM nowadays. Although when going to www.wsmonline.com it's ironic to see that "Committed to country--always have been, always will be" slogan, at least the FM station will continue the format and broadcast the Opry.

Besides, it should be pointed out that WSM-AM has only been all-country in the last 20 years--they were a mainline NBC affil in the Golden Age and were more like an old-school full-service MOR station after that period (with the music becoming more AC in the 70s). Back in the 60s, a station executive interviewed for a magazine article on the Opry seemed almost apologetic: "Well, except for the Opry and some 5 a.m. shows, we're not a country music station. We're a *good* music station."

And it should be pointed out that the AM station's DJ bios have been taken off the web site. If Gene Christiansen can talk about it, it would be interesting to hear what's been going on from the inside.

Well I've noticed Gaylord is putting their name on everything in
Nashvile now. They may as well pull the plug on 650 and give a proper
burial if they go to ESPN. There is so much sports out there now and
there is NOTHING like WSM-AM except for WSM!

I looked at channel 4's site and emailed the station a couple times.
The toll free number just gives me a fast busy so hopefully it is
overused...

Remember what happened when the FCC was going to kill the clear status
of WSM? A lot of people got together and stopped it.

First Gaylord killed Opryland then TNN and now...

Ben
W4WSM
Waiting and hopefull that we won't have to start a boycott of
Oprymills and every other Gaylord property!

Yes, as long as the official city of license is mentioned first it doeasn't matter what else they tack on. It's perfectly fine to say WHTZ Newark/ New York as long as Newark (city of license) comes first.

From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <u3fn7261atg7c6@corp.supernews.com>
Source record: 12530

FOR SALE:

I am selling my 4 percent interest in a new AM CP for Blue Lake, CA. Fulltime, 1450 Khz, 250 watts non-DA. Can probably go to 1 KW.

Blue Lake is near Arcata with a big college and not too far from Eureka, CA. A lovely area on the coast.

Asking only $1,000.00 firm. (One thousand dollars)

I have spent $755.00 on the FCC filing fee and will be paying $113.50 on the required public notice.

I am barely breaking even!

We expect FCC approval of the transfer about January 24th so I can't take payment legally before that. It would be fraud on my part to sell something I don't own yet! HI! Since it is minority ownership, you will not need to pay any fees to the FCC.

|
| The GE Superadio is still sold, and it's a fine performer,
| for about $50 US. Now if you want a _clock_ radio with AM
| performance, (which is what the original poster wanted) you are indeed
| out of luck.

I have a Kloss Model 88 (from Cambridge SoundWorks) that I use
as a clock radio with the separate clock and remote control that's
available. The audio quality from the AM tuner is rather good,
almost at Superradio III quality. Sensitivity could be better, but
I'm assuming that's partially a trade-off for the bandwidth that's
available. Actually, it seems to be more a case that the unit needs
more aggressive AGC than it has.

While waiting on the bank drive up window line, I was tuned to 88.3 fm. That signal dropped out (because I think another carrier blanked it out). The new signal broadcast a telephone ringing. After about the fourth or fifth ring the phone is answered by a woman, and she is talking to a man who is barely audible and mostly unintellgible. This lasts about two minutes and that carrier leaves and the original 88.3 signal returns. I look around to see if anyone nearby is using a cell phone and I see none. What could have caused this phenomenon in central Nassau county New York while I was tuned to a NJ station?

For sale:

Joint venture broadcast ownership situation.

I am putting together a small group to acquire a very profitable three station group in the Missouri Ozarks. One AM/FM plus a standalone FM nearly. Both FMs are class "A" and the AM is fulltime with low (but sufficient) power at night.

Real estate and a vehicle are included.

Active or inactive investors with at least $20,000 each are welcome. The seller will consider a TBA(Formerly called LMA) at $8500.00 a month for all three stations.

Please contact me via email or telephone for more information.

Tel: (478) 741-1710 in Macon, GA

email is: wrecktech@yahoo.com

I am a semi-retired broadcast engineer.

I am so angry at the proposal to kill WSM as we know it that I am making my views public.

Dumping the long-established country format from WSM borders on treason!

Mind you, I am a nice Jewish boy raised in Brooklyn, NY and a ham since 1950. Last job was CE for a fulltime 5KW AM in NYC.

Gaylord must have taken leave of their senses. They have to right to change formats. This is a free society but again it is stupid to the max!

If they dump Grand Old Oprey I personally will sign a letter stating that their management is "certifiable"!!!

I'm quite surprised WSM(AM) and WDAF(AM)/KC hung on for this long in
the live, local country format. WSM, of course, probably only stayed
in the format as long because of its storied history and location...

The rumblings I've heard seem to indicate that if WSM DOES ditch the
country format on AM...it'll simply move it to one of its FM
frequencies. I believe WSM's owners have more than one country FM in
Nashville? One would remain current-based...the other would basically
be the new home of what was WSM/650. Makes sense to me.

> almost apologetic: "Well, except for the Opry and some 5 a.m. shows,
> we're not a country music station. We're a *good* music station."

As a longtime former resident of Nashville, that attitude was
reflected by perhaps the majority of the local population, taking great
pride in pointing out to vistors, ``well *I've* never been to the Grand
Old Opry''.

Until the the 70's, Nashville itself didn't even have a 24-hour country
station. WSM relegated it to late night (and the ``5 a.m. shows'') plus
the Opry broadcasts on weekends. The only facility offering country on
a fulltime basis (5 AM-midnight) was suburban WENO in Madison which
didn't effectively cover all of Metro Nashville/Davidson county.

WKDA (where I worked) was the first station in the market to really
commit to a country format. After years of strong numbers as a top 40
outlet, it changed in the early 70's. However, it never achieved anywhere
near the ratings it did even during its twilight doing top 40.

- A prevailing philosophy in Nashville during my time there was that
country music was strictly a product produced for export and not
at all meant for local consumption. :-)

Actually, you may be right. Though things like Radio Locator and BIA are very often used to create mailing lists. If AM/FM still exists to hold the licenses, Radio Locator should add another field to indicate the company that controls the operation of the station. In this case, Clear Channel.

I'm not sure what's behind it all legally or corporate-wise, but this is quite common. A whole bunch of the ex-Jacor-now-CC stations are still listed under some form of "Citicasters" ownership (which predates even Jacor). There's a legal/financial reason for this, I am sure...and for a whole truckload of these stations to file minor ownership changes from "Citicasters (old)" to "Citicasters (new)" just in the past few days...

Radio-Locator is simply putting a fancy front on the FCC database info
that's freely accessibly through CDBS. The "licensee" listed there can
be any of several holding company names used by Clear Channel; in
addition to AMFM in several flavors, there are also several variants of the
even older "Citicasters" still in use as part of the Clear Channel
organizational structure.

To get the edited version that actually shows who really owns what, you
need to pay a bit for the privilege and pick up an M Street directory or
similar. $80 isn't that much to pay for data that's several levels more
useful (in terms of showing ultimate ownership, and in terms of showing
actual station address and not the DC lawyer's office) than the FCC data,
which was never meant to be used for creating things like mailing lists.

You gets what you pays for.

Gaylord owns 2 FM stations in the nashville area. One is WSM-FM that plays the new stuff and the other WWTN all talk/news/sports/sports/sports

There is no way a station like WSM AM could be losing money if it is run right. I see comments from people that have never even heard the station. There is nothing like it in the country! It is in a class of it's own and from what I'm seeing Gaylord will be shooting itself in the foot again if it kills WSM....and it doesn't have a lot of feet left after killing Opryland and TNN!

AMATEUR RADIO NEWSLINE(tm) REPORT #1273 - January 4 2002
(Total Running Time with RAIN Promo: 24:48)

==========

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Three methods of delivery are available: Streaming audio using RealAudio, FTP RealAudio, FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

==========

Amateur Radio Newsline report number 1273 with a release date of Friday, January 4 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. A “V-E team” finds a way to test kids in one of the most remote regions of the country and the FCC again says no to expanding PRB-. These stories are first on Amateur Radio Newsline report number 1273 coming your way right now.

HAM RADIO TESTING REACHES WHITE MOUNTAIN ALASKA

Ham radio examinations have finally come to one of the remotest areas of the nation. This, after a team of examiners from the W5YI VEC perform a fly-in examination session in White Mountain Alaska. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the details:

--

White Mountain is a remote fishing village in the far North-West of Alaska. It’s major claim to fame is that its the next to the last checkpoint for the famed Iditarod dog sled race. And it wanted someone to come in and give ham

radio exams.

The closest big city is Nome. White Mountain is only about sixty miles from Nome but its over some rather treacherous terrain. There are no roads in or out and all supplies to White Mountain have to be delivered by plane or boat.

But White Mountain does ham a ham radio operator for its mayor. He is reindeer farmer Tom Gray KL0CQ. And one of its school board members is Eric Morris KL7HT. Both will tell you that a temperature of minus 40 degrees Fahrenheit and a wind-chill factor of minus 100 degrees is not uncommon in winter. These were the conditions faced by a four member W5YI VEC test team when it chartered a plane and flew in on December 11th to administer exams to four adults and fourteen youngsters who were determined to make ham radio a part of their life.

The trip which cost $800 for the flight alone was sponsored by the Seward Peninsula Amateur Radio Club. Braving the weather were examiners Ramon Gandia AL7X, Michael Nurse KL7UJ, Scott Webber AL7RJ and Thomas Busch NL7H. Al four are from Nome. Most of those to be tested came from the Bearing Strait School District’s only inland school. They had all been studying for their Amateur license as part of a search and rescue course. Neither the applicant or the VE team were disappointed. All eighteen passed the Technician class exam.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

Those involved in ham radio testing are keenly aware of the problems faced by remote areas of Alaska. At last July’s VEC Conference in Gettysburg Pennsylvania Jim Wiley KL7CC told the group that many applicants in Alaska are denied n Amateur Radio license exam due to the inaccessibility of their locations or the high cost of travel in that state. (W5YI)

**

HAM RADIO AND THE LAW: FCC SAYS NO ON PRB-1 EXPANSION REQUEST

Ham radio has lost yet another battle against deed restrictions, but the war is not over yet. At least that’s what the ARRL appears to be saying in a bulletin that describes the latest skirmish with the FCC over this politically volatile issue.

In the latest round, the FCC has affirmed a November 2000 staff-level decision that declined to include privately imposed deed covenants, conditions and restrictions under the limited federal preemption known as PRB-1. That’s the federal government policy requires municipalities to ''reasonably accommodate'' amateur communication in antenna-related zoning and regulation.

The ARRL last year appealed to have the full FCC review the earlier denial. The Commission turned down the League's Application for Review December 18 in a Memorandum Opinion and Order released December 26. As a result, it now looks as if the ARRL will bypass any further dealings on this issue with the FCC and will look for congressional relief instead.

The FCC itself even hinted that Congressional action by the ham community might be a next logical step. Its memorandum, opinion and order of dismissal did note that if Congress were to see fit to enact a statutory directive mandating the expansion of the FCC’s reasonable accommodation policy that the Commission would expeditiously act to fulfill its obligation there under. Translated: If Congress tells the FCC to include deed restrictions under the provisions of PRB-1, it will be more than happy to do so. (ARRL)

**

HAM RADIO IN SPACE: PROJECT JJ - HE EAGLE HAS LANDED

AMSAT-NA's newest satellite project, known as Project JJ for the past year, now has a new and official name. This, as AMSAT North America President Robin Haighton, VE3FRH, announces that effective January 1, 2002, the satellite will officially be known as 'Eagle'.

The name Eagle was submitted by Bill Allen, W7US, of Tucson, Arizona. It was selected from a list of forty-five names submitted by twenty-nine satellite operators.

For his winning suggestion, W7US will receive a free dinner at the annual AMSAT dinner held during the Dayton Hamvention. We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (AMSAT-NA, ANS)

**

BREAK 1

Welcoming in the new year with ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including the N7VGS repeater serving the Salt River Star Valley Wyoming and congratulating 13 year old Devin Cassity, on becoming the youngest ham in South West Wyoming. Devin is now KD7PHN.

(5 Sec Pause Here)

**

EMERGENCY PREPAREDNESS: NORTHERN CAL TOWN CHOOSES HAM RADIO

Ham radio started the year with some very positive public exposure in the Los Angeles Times. The January 1st edition featured an in depth article about a Northern California town that will tap into older technology to prepare for future emergencies.

Worried that a disaster will knock out e-mail and cell phones, Los Altos Hills has decided to turn to its local ham radio community and make it the primary back-up to normal disaster preparedness communications. And as you might expect, the hams are more than ready to oblige

The complete story can be read at the Los Angeles Times website. The complex URL is http://www.latimes.com/news/local/la-000000203jan01.story. (Highlighted by ARNewsline™)

**

AMERICA AT WAR: POPCOMM COLUMNISTS SAYS “DONT TURN THE OTHER CHEEK”

Popular Communications writer Eric Force has some strong words that are obviously aimed at the pacifists who oppose the United States military retaliation against Osuma bin Laden and his al-Quida terrorist network. As a response to those he calls the “do-gooders of the world” who promote turning the other cheek, Force says to look, really look at the attack that brought down New York City’s World Trade Center twin towers. He then says that it could have struck a lot closer to them.

Force says and we quote: “Consider that it could have been you, your mom, dad, brother, sister other relative or a close friend in those planes and buildings who were terrorized, murdered and buried in the rubble.” He adds that just thinking about the incomprehensible terror, suffering and losses incurred by innocent human beings a the cowardly hands of international thugs continues to tear at his heart.

Force has dedicated his latest I-Waves column to the sights and sounds of September 11th that are available on the Internet and to the victims of the tragedy. Its a very compelling article. You can find it starting on page 66 of the January edition of Popular Communications Magazine that’s on newsstands right now. (PopComm)

**

AMERICA AT WAR: FEDS TO AID NYC TV STATION REBUILD

New York television stations will be getting federal help rebuilding transmitters that were destroyed in the September 11th terrorist attack on the World Trade Center. A total of ten New York area stations will receive eight point two million to offset the thirty million to forty million dollar price tag for purchasing and
constructing a new transmission facility.

According to the Broadcasting and Cable newsletter, Senator Charles Schumer managed to secure the funding as addition to emergency aid appropriation for victims of the attacks. As previously reported, there is some speculation that the replacement transmitting facility could be a 1500 to 2000 foot high stand-alone tower constructed near the former site of the Twin Towers. (Broadcasting & Cable)

**

ENFORCEMENT: NAL CANCELED

The FCC has canceled a proposed ten thousand dollar fine that it had issued to Jeffrey Alan Pettrey, This, for his apparent violation of Section 301 of the Communications Act involving operation of an unlicensed radio transmitter.

Back on July 30, 2001, the District Director of the Commission's Columbia, Maryland Field Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Pettrey for the infraction. Pettrey filed a response to the N-A-L on August 7, 2001 accompanied by documentation regarding his

inability to pay the proposed fine. After reviewing Pettrey's response, the FCC conclude that cancellation of the proposed $10,000 forfeiture is warranted based on Pettrey’s inability to pay. (FCC)

**

ENFORCEMENT: FCC CANCELS CONVICTED HAMS LICENSE

The FCC has canceled the Amateur license of Kenneth P. Kelly, WT2FBI, of Greensboro North Carolina after Kelly failed to show up for a re-examination. But at the time of the FCC retest order Kelly was otherwise occupied. He was fighting criminal charges in relation to a jamming case in Ohio. We have this report:

--
On November 30, 2001, Kenneth Kelly, the ex-WT2FBI was sentenced to 5 years probation by the Judge H. J. Bressler in a Butler County Ohio court. He had previously been indicted on a 4 th degree felony charge of disrupting public service by his jamming and talking on the Middletown Ohio police radio system.

At his hearing, Kelly agreed to a plea bargain. He admitted his guilt to a reduced charge attempted disrupting public services. At the time the FCC pulled his ham radio ticket Kelly was being held in the Butler County Ohio Jail pending sentencing.

By way of background, a person later proven to be Kelly was first noticed on the Middletown police radio channel the third week of July 2001. Initially the police dispatch radio system was not recording him but that was soon remedied by city radio technicians. After several days of taping, it was observed that the voice on the police radio was similar to one heard on the local 2 meter Amateur frequencies.

Several members of the Dial Radio Club then assisted police by monitoring and taping Kelly on the 2 meter band. Tapes from 2 meters and from the police were then voice printed the aid of computers to check similarities. Dial club members also tried to direction find and locate the signal both on 2 meters and on the police channel.

Through some luck, detectives working with a metro housing police officer and discovered that Kelly was now living in their jurisdiction. After they interviewed him, they felt that he was the person interfering. As the investigation progressed, he admitted to detectives that he may have accidentally transmitted on their frequency by accident. He claimed that his signal may have been mixing with an FM broadcast station and another ham repeater.

But Police did not believe it was accidental, because he was taped trying to talk directly to the police dispatcher and the cars. Later Kelly did admit his guilt and entered into the plea bargain. Now sentence has been passed by both the local court and the FCC.

For the Amateur Radio Newsline, I’m Burt Hicks, WB6MQV, reporting.

--

When he was finally caught Kelly had a Yaesu VX-5 hand held in his possession that had been modified to transmit out of band. The assistance of the Dial Radio Club members is credited with helping to solve this case.

Note: Information and documents from the case can be obtained from the Butler County Ohio Clerk's office or online at: http://www.butlercountyclerk.org/ Click on Butler County Court Records Search. Then enter Kenneth Kelly. (FCC, Dial ARC, others)

ENFORCEMENT: MITNICK TO FIGHT TO KEEP HIS HAM LICENSE

Another ham who appears to be getting ready to do battle with the FCC is former computer hacker turned talk show host Kevin David Mitnick, N6NHG. Amateur Radio Newsline’s Bill Pasternak, WA6ITF has the latest:

--

As reported last week, the FCC is challenging Kevin David Mitnick's request to renew his ham radio license. The agency claims that his criminal background raises a substantial and material question of fact as to whether Mitnick possesses the requisite character qualifications to be and remain a commission licensee.

Now, N6NHG has told the U-K Newspaper the Register: "It's just another example of them trying to harass me. Now I've got to spend money to keep a ham license."

Mitnick insists that he has totally abandoned his former ways. The Register article notes that that he was recently called to testify before Congress on federal computer security matters. Also that he spent two days briefing the U-S Commission on National Security on these issues. Mitnick tells the Register that he cannot understand why the government is now questioning his character.

Mitnick is currently the host of the radio program called The Dark Side of the Internet. It airs in the Los Angeles area from 5 to 7 a.m. Sunday mornings over radio station KFI 640 AM. And in a recent appearance on Coast to Coast A-M hosted by Art Bell, W6OBB, Mitnick said that he is hoping for a career in computer security once his term of supervised release from prison has been completed.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

The complete Register story and interview with Mitnick is on the web at a rather long and complex U-R-L. You will find it at http://www.theregister.co.uk/content/55/23494.html (Adapted from the Register)

INTERNET SECURITY: CIA GOES OUT OF ENCRYPTION COMPANY FUNDING

And speaking of Internet security, word that a Central Intelligence Agency funded company that allowed Web surfers to browse anonymously has closed. According to news reports, Emeryville California based SafeWeb enabled Internet users to gain access to the World Wide Web and browse sites through its encrypted service. This made their on-line habits and history untraceable. In the 2000 - 2001 fiscal year, SafeWeb received one million dollars in funding from the U-S Central Intelligence Agency's venture capital arm. (published reports)

HAM RADIO BUSINESS: AMATEUR RADIO TRADER CEASES PUBLICATION

Ham radio Internet auction sites may be responsible for a twice a month ham radio equipment sales magazine going away. This, after Amateur Radio Trader magazine announces that it has ceased publication.

According to Editor Barbara Patterson, KF4MMV, the Amateur Radio Trader was no longer a viable product. She says that the firm will be redirecting its resources into other areas.

Meantime, the company has also pulled its amateuradiotrader.com website off line. But unlike other publications which have gone under, in this case subscribers are being reimbursed for any outstanding issues. In addition to handling buy and sell ads, Amateur Radio Trader also donated page space to advertising the annual Newsline Young Ham of the Year award. (ARNewsline™)

**

HAM RADIO HERITAGE: MAKING WCC A PART OF THE FUTURE

A ham is campaigning to preserve part of radios past and have it become a part of the future. This as Lewis Masson, K1LJ-S, says that the town of Chatham Massachusetts should convert the site of radio station WCC into an Amateur Radio station along with a training curriculum to teach the kids in the area about communications technology.

WCC is one of the original Marconi Marine Radio Stations. Masson is an ex-marine telex operator at WCC. The site was recently turned over to the town of Chatham and Masson believes it is important to preserve the operations building as an operating amateur radio station and keep the hotel building as a museum to preserve and display memorabilia.

Masson says over the Internet that he has formed a committee to work on this project and that they are looking for nationwide support for this campaign. If preserving the past as an investment in the future is of interest to you, please contact K1LJS by e-mail to lemasson@juno.com. (Internet)

**

SPECIAL EVENTS: HAM RADIO UNIVERSITY 2002

A reminder the third annual Ham Radio University event takes place on January 20, 2002. Location is the Babylon Long Island New York Town Hall Annex with the doors opening at 9 a-m Eastern time.

Ham Radio University is a day of education about Amateur Radio. This there will be twenty, one-hour presentations with special forums geared to the non-ham as well as the experienced Amateur Radio operator. The focus will be "hands on" with many demonstrations. Besides the forums, there will be tables set up with information about the different groups, ham radio classes, exam session schedules, public service and other activities.

For more information about Ham Radio University, please contact its Chairman Phil Lewis N2MUN by e-mail to n2mun@optonline.net. You can also get in touch with ARRL New York and Long Island Section Manager, George Tranos N2GA by e-mail to n2ga@arrl.org. Also check the Ham Radio University website for a full list of forums, directions and talk-in information. Its in cyberspace at www.arrlhudson.org/nli/hru2002.htm (N2DO)

HAM RADIO RECORDS: BEST OF THE WEST AND VHF CONTEST HONOR ROLLS

Tim Marek, K7XC, says that he has updated W6 / W7 & "Best In The West" VHF Contest Honor Rolls. They are now available at the following web sites.

http://k7xc.tripod.com/VHF_Records/index.html s the stand alone records page. http://k7xc.tripod.com/K7XCweaksignal/ is where individual links can be found to each contest. (VHF Reflector)

**

HAM RADIO SCIENCE: NEW 6 METER PROPAGATION BEACON IN WASHINGTON STATE

Rich Ewing, KO7N reports over the VHF Reflector that Bruce Shurtz, W7BAS, has installed a propagation beacon in gridsquare CN87TG near Kennmore Washington. It operates on 50.069 MHz putting out 10 watts to a 5 element yagi pointing 90 degrees. The beacon is operational 24 hours a day, seven days a week. QSN reports go to W7BAS, at his callbook address. (VHF Reflector)

**

HAM RADIO IN SPACE: VERY FEW LAUNCHES

Peter Guezlow, DB2OS, reported that 2001 has turned out to be the slowest year for space launches in nearly 40 years. Ham radio or otherwise. According to DB2OS, only 58 flights reached orbit, and there was one complete failure.

Guezlow says that historians note that we must look back to 1963 to find a year that produced fewer launches. He says that in 2000 there were 82 launches to orbit plus three failures. By contrast the most productive year was 1984 when 129 launches delivered payloads into orbit.

But there is at least one bright note. Russia successfully placed five satellites into orbit recently after launching them aboard a Zenit rocket. The cargo rocket, carrying three Russian, one Moroccan and one Pakistani satellite, took off from the Baikonur space center in Kazakhstan. (AMSAT, ANS)

**

HAM RADIO IN SPACE: NEW INDIA WEBSITE

The AMSAT-India website has been officially launched recently by the government of India and the Department of Space. VU2POP says that you can check it out by taking your browser over to www.amsatindia.org. (ANS)

**

CONTESTS: HUNTING LIONS ON THE AIR

The 31st annual Hunting Lions in the Air contest will take place on the weekend January 12th to the 13th. The contest period will be 48 hours and will run from midnight UTC Friday night to midnight UTC Sunday night, and all hams are welcome to participate.

According to its sponsors, the objective of this operating event is to create and foster a spirit of international understanding and cooperation among radio amateurs and members of the Lions Clubs through the use of world-wide radio communication. The contest also commemorates the birthday of Melvin Jones, the founder of the Association of Lions Clubs who was born at Ft. Thomas, Arizona on January 13, 1879. (Q-News)

**

DX

In DX, word that the recently postponed Ducie Island Dxpedition is on again for March. Ducie Island became a DXCC entity last November and it immediately jumped to the top of the most wanted contact list. But rough seas scuttle the first attempt to put it on the air. (RSGB)

Meantime 6 meters continues to be the V-H-F D-X band of choice. On Monday December 31st, Kevin Bishop WB8XX, says that he started hearing O-H-1-X-T at 1300 U-T-C on a backscatter path. From then on until 1620 U-T-C he worked 8 new countries and over thirty new grids in Europe and Asia. (VHF Reflector)

**

STRANGE TECHNOLOGY: ARE CELLPHONES KILLING GHOSTS?

Now, from radio communications to the effect of radio communications on supernatural communications. This, as a British expert who has spent years researching the occult says that cellular and other mobile phones are killing off ghosts. Don Wilbanks KC5MFA has the details:

--

No, we are not kidding you. In fact, Tony Cornell, of the Society for Psychical Research, has told the London Sunday Express that reports of ghost

sightings started to decline when mobile phones were introduced 15 years ago.

According to Cornell, ghost sightings had remained consistent for centuries. In fact, until three years ago the society received one or two new ghost sighting reports every week. But with the introduction of mobile phones 15 years ago, ghost sightings began to decline to the point where they are not receiving any.

And why are there no longer any ghosts being observed? Apparently paranormal events, which many scientists attribute to unusual electrical activity, my be drowned out by the electronic noise produced by cellular telephones and text messaging pager transmitters. And according to the newspaper, the lack of ghost sightings could adversely impact on the nations economy. It says that haunted tourist attractions in Britain could be under threat if the number of cellphones continues to grow from the present figure of about 39 million now in use in the U-K.

Don Wilbanks, KC5MFA.

--

And all of this begs that one question be asked. If ghosts are the spirits of the dead, how can anything actually kill them? (Science Today)

My dad and me were coming home from church today listening to WSM. A song
came on by some one called Craig Morgan. My dad asked who it was and I
said I didn't know it was one of the newer artists. I told him that that
was one of the changes WSM made a year or 2 ago. They are mixing new
artists in with their classics.

Until 20 years ago they were top 40 more like AC than top 40 in the day
time and country at night. Any one remember Pat Sajac on WSM in the
afternoons? I do and he didn't play country.

Maybe they'll swap WSM-AM to the WWTN frequency, and change the calls
on the current WSM-FM...or vice versa. Then they move all the
talk/sports stuff to the AM.

>There is no way a station like WSM AM could be losing money if it is

How can you have any idea if WSM is making money without seeing their
books? Heck, even I can't make more than an educated guess about
it... based on long-established data about AM music demographics.

I'd be shocked if WSM was that "different" that people under 50 listen
to it in droves.

I gots BIA for which I pays and pays. BIA has a function that allows mailing lists to be generated based on all sorts of search criteria. I also has M Street for which I paysed $80. The advantage of BIA is that I don't have to key in all the information I need for a 2,000 station mailing.

>wouldn't have changed that.

...Which shows how much YOU know about the subject. The force that
killed music on AM had nothing to do with FM and everything to do with
the idiotic assumption that you didn't need to bother with clear
channels and that you could hand out licenses to anyone with a
hankering to lose money. It also had to do with a very haphazard
approach to AM stereo.

There is nothing inherently bad about the MW band or the use of AM.
The problem had more to do with licensing and regulation policies.

As for WSM, they're only the latest casualty in this business. I
don't fault them for cutting their music and going to some cheap,
brainless and homogenized drek that doesn't cost them much. AM is
losing listeners because many people are moving farther and farther in
to the suburbs, where existing power levels and ground-wave patterns
don't cover well. And of course, the politics of relicensing several
coordinated patterns set up in the 1940s and 1950s is just too much
for the FCC (or anyone else) to deal with.

I'm going to miss WSM, though. BTW: I live in central maryland and I
often listen to them while commuting on mornings and evenings in the
winter. Most other "local" stations are either weak or suffer from
selective fading between ground and sky wave. WSM's strong sky-wave
often sounds better than the alternatives. That, and I must admit,
their format is something I just don't hear locally.

Jake Brodsky, mailto:frussle@erols.com

There were rumors that the AM section had been upgraded ... or at least
QC'ed better ... after the first production run or two. But then there
were denials.

Since Tivoli is well aware of complaints about the AM performance, I
wonder if the Model Two has been engineered with a better AM section.

I gots no problem with BIA! <g>

Their information is both edited and accurate; I've used them frequently
as a source for Radio World articles.

They're certainly more reliable than a service like radio-locator, which,
as best I can figure out, is now trying to build a business model by
charging for the very same information that's already accessible for
free at fcc.gov.

Yes, they did the same thing, except that the morning show was taped 4 hours in advance. That from a former night jock at the station, Jack Marcus. The stations were not able to use an STL or phone lines across the border to the transmitter site, hence this practice.

1296' 100 kw C

73 miles of signal

reaches from huntsville alabama to kentucky... and half way to jackson tn....

wwtn's tower is just east of murfreesboro and is a bit farther out than most nasville fm's but the signal is not bland... its a class c on a tall tower

For months I have been lusting for a Sangean radio as advertised by C.Crane,but some of your comments tell me I'll just stick to my GE Super. Can anyone recommend a good radio with a cassette recorder that I can use in the evening to record distant AM programs.I'd love to use the Super but can't find one with a recorder. Price range under $100 if possible. Thanks for your help.

105. Re: Wolfman Jack & XERB/1090

I once sat with "Wolf" doing an interview for the cover story of my fledgling local "music scene" magazine in San Diego. Some of his fondest memories were of his days in Del Rio with XERF, where he was Bob Smith the sales mgr. during the day, and at night smuggled records into Mexico for his show as "The Wolfman".

The most common misconception about him was his air name. He liked what the "moondog" was doing, so he decided to be the "wolfman". He told me where the Jack came in. He said:

"Back in those days, everyone called everybody 'Jack', so I'd be on the air saying something like XERF Del Rio Texas, and you got the Wolfman, Jack! And from that everyone started calling me Wolfman Jack, like Jack was part of my air name. It worked, so I kept it."

Toward the end of his radio career he made history when hired by XTRA (Noble owned) 69 XTRA GOLD (now xtra sports, 690) to due a regular daily airshift, he did the first ever legal broadcast from the U.S. side of the border into Mexico, and broadcast on a Mexican licensed station. Prior to that day, all broadcasts had to originate FROM Mexico. The change in the law allowed him to comrex his show from his home studio to the transmitter in Baja, and send it out over the 77kw frequency.

106. Non-Religious, Non-Government, Non-Profit U.S. Shortwave Broadcasters?

Newsgroup: rec.radio.broadcasting
Date: 2002-01-12 20:02:03 UTC
From: noring@olagrande.net
Message-ID: <u415hradi9e1d9@corp.supernews.com>
Source record: 12467
Cross-posted to: rec.radio.shortwave,rec.radio.broadcasting,alt.radio.broadcasting

I'm curious if there are any private, non-religious, non-profit licensed U.S. broadcasters on shortwave, especially who are not just into news or political advocacy?

And, distantly-related, what effort is involved in setting up such a station (licensing requirements/fees, FCC broadcast regulations, operating cost, etc.)?

After running across a few of the pirate stations (e.g., around 6950 khz), I became intrigued with the idea (which may end up being essentially silly) of setting up a private, non-profit, and of course fully legal shortwave broadcast station to provide a forum by which those with an itch of broadcasting their program ideas can find a legal place to do so. (Of course, some pirates enjoy the thrill of being "non-legal", but that's another issue -- I sense one can find a lot of very creative people interested in putting together very compelling programs for essentially free, and maybe even pay a little to air them. Such a station could become an "underground" favorite because it would no doubt be so out of the ordinary -- no one will know what will come next. If allowed, it could also provide time-delayed sound clips on the Internet -- sales of CDs of the "best of ..." may actually provide significant revenue once it gets going -- syndication of the "best of ..." to regular radio broadcasting stations, etc.)

Of course, as I would suspect, the various speedbumps the FCC would put in the way, not to mention how one funds such a station, may make this idea totally unfeasible, but I throw it out to the experts here. References to relevant online FCC regulations would be appreciated.

>

What Gaylord is proposing is treason. Just because you hate country music and the Opry does not mean other Americans and friends of Americans have to obey you or listen to this nonsense. There too many too stations programing the same old same old. WSM and the Grand ole Opry are to be cherished. Gaylord current management is on a mission to root out and destroy every accomplishment made by the Country Music community. They destroyed TNN <the cable station designated for the country music fan> Opryland <a theme park based on the Opry and Country music and was a training ground in the 1970's and 1980's for performers we have today like Chely Wright> They tried their hands on Acuff Rose publishing and made it a shell of what the Roses and Roy Acuff made of it.
This isn't just any radio station to be toyed with. No individual or organization or business group has the right to desecrate a cherished American icon /and destroy a musical genre on a whim. And yes I know that this is a business----this station CAN be run on a profit if run right and apparently the Gaylord gang don't know how to run their business, wheither it is their entertainment empire or the hotels. There is obvisously someone on the board who hates all things country and needs to have an "attitude adjustment" to quote Hank Williams, Jr.

No, I not from around there.

>Nope, WSM isn't just another AM'er that needs to go away. It is much
>more than that.

I don't know if you have figured out how the capitalistic system works in this country of ours, but basically, AM radio stations aren't free. They don't pay for themselves. Someone has to pay the electric bills. Someone has to pay the staff (even a small one) to keep it running. WSM and Gaylord are not a charity.

Now, if Gaylord feels it's a good investment for them to keep funding WSM despite the likelihood it isn't making any (or even enough) money, it's their license. The FCC does NOT, repeat, does NOT intervene in format matters. That's a long-standing policy of theirs. In fact, if you go to the FCC's very own Web site...you'll see this:

"FCC rules generally do not govern the selection of programming that is broadcast. The main exceptions are: restrictions on indecent programming, limits on the number of commercials aired during children's programming, and rules involving candidates for public office."

That, by the way, is a direct copy and paste from:

http://www.fcc.gov/mmb/

So, in a nutshell, they don't care if WSM is playing country music, polkas or Swahili music...or any music at all.

Mike

And there's too much general EMF in the atmosphere, and you add all
these things to the fact that under most circumstances the audio
quality sucks, and it pretty much kills AM radio except for talk. I
predict the audience will get so picky it will even eschew talk on AM.

Edwin Armstrong developed FM radio to circumvent the well known
problems with AM analog transmission in the 30s. It was bad then, and
its bad now, though we have made it lots better.

I can't believe some of the hail-mary arguments that have been used to
try and promote it as an equal to at least FM, and now to compressed
bitstream services.

>Does anyone know how to make an Optimod-Sounding compression on Cool Edit Pro?
Thanks in advance,
scott
blink@coxnc.rr.com

which optimod? suppose its the 8100A stock. you will have to compress at least twice.

start with one of the stock compressor settings (the 2:1 <20db for example) .. check the splines box to make the "knees" "soft".
go over to the band limiting tab and set it for 0 to 300.

compress once. then got to the band limiting tab and set it for 300 to 24000

this should simulate multiband compression. i suspect this will act like the independent-wideband control is in full independent mode

as all "orbans" are adjustable you will have to play with the settings to try to come close to the one you are using for reference.

im saying the end result will "sound just like the radio"

you might try the "gate that compressor" preset

for a final touch try the "limiter 20:1 @9db" preset either full range or set for just the highs to simulate the "HF limiting section"

in not claiming the above suggestion works. im just suggesting that it might work with some persistance and tweeking.

the basic theory of broacsct compression is: first slow AGC. full range slow attack slow release.
next single or multiband compression with meduim attack and release.
last hard limiting. fast attack and release.

>The force that killed music on AM had nothing to do with FM...<

Rant on if you like, but you're dead wrong. Folks who actually work in radio back then, and who are far more sage than I, blamed FM for the demise of music on AM stations. As for me, I lived through the transition, and the pattern was repeated everywhere. Once the listeners knew the difference, music on AM faded away exactly as it should have.

>...and everything to do with the idiotic assumption that you didn't need to bother with clear channels and that you could hand out licenses to anyone with a hankering to lose money.<

Yes, cramming more stations into the band fragmented the audience, but the same thing happened on the FM side too. Long before FM took over the music formats, the radio audience in most markets was already fractionalized.

>It also had to do with a very haphazard approach to AM stereo.<

Also incorrect. AM stereo would not have saved music on AM, because it does not address AM's shortcomings vs. FM (frequency response and interference being the big two).

I believe it would move to WSM-FM in Nashville and be offered for syndication for the rest of the country--but I'm not sure if the "Today's Hot New Country" stations would be interested in a show where Garth, Faith and Shania rarely appear.

XETRA only went to 77 kw a few years ago, long after the all-sports format
took over. It was a directional 50 kw before that.

> address AM's shortcomings vs. FM (frequency response and interference
> being the big two).

Many AM Stereo receivers follow the "AMAX" receiver standard which specifies an increased frequency response and various features to improve reception and reduce the effects of interference (manual or automatic bandwidth control, impulse noise blanking, intercarrier heterodyne filtering, etc.).

Thus, while these improvements are not inherent to the AM Stereo system itself, AM Stereo receivers are built to higher quality standards in order to provide a better level of performance on which to add the Stereo sound. The majority of ordinary monaural AM radios do not feature these improvements of reception and sound quality, aside from a few exceptions like the GE Superadio series.

In fact, there are some monaural AM radio stations who specifically recommend AM Stereo receivers to their listeners, because even these stations do not broadcast in Stereo, an AM Stereo receiver offers better reception and higher quality audio, regardless if the station it is tuned to broadcasts in Stereo or not.

Yes, they did the same thing, except that the morning show was taped 4 hours in advance. That from a former night jock at the station, Jack Marcus. The stations were not able to use an STL or phone lines across the border to the transmitter site, hence this practice.

The important point to consider is that Gaylord has not yet made a decision on WSM-AM.

In any case, WSM's daytime coverage is very limited, due tothe poor ground conductivity in Central Tennessee. Nighttime coverage is far less than the reported "38 states" that the newspapers have picked up on. There are powerful stations on 650 in Mexico, the Dominican Republic and the Caribbean Basin which severely interfere with a consistent reception of WSM in all but a group of states in the Central and Deep South.

What appears to be in the formula is syndication of the Oprey to stations nationwide. This would permit the show to arrive with good quality in any market where such a program might get good audience reaction. This would probably expand the reach of the Oprey and should have been done years ago.

Make that "after about 20 years as a country station in a market with 4
other country stations..."

WSM-Am was Adult Contemporary in the 70's and old-line network variety
through the 60's. It's only country programming was the Oprey for about 50
years or so of its existence.

AMATEUR RADIO NEWSLINE(tm) REPORT #1274 - January 11 2002

Amateur Radio Newsline report number 1274 with a release date of Friday, January 11th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. No more taxicab Q-R-M plaguing a popular ham satellite and lots of FCC enforcement actions highlight this weeks Amateur Radio Newsline report number 1274 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: TAXI TO SATELLITE QRM ENDED

Some good news for satellite operators. Thanks to some hard work by the International Amateur Radio Union, the troublesome F-M signals to ham satellites from Mexican taxi cabs are for the most part gone. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

According to the IARU Monitoring System newsletter it now appears that FM radio transmissions from the taxi drivers in the cities of San Luis and Sonora, Mexico area are no longer getting into the 2-meter uplink of the UOSAT 14 ham satellite.

The issue was raised by many involved in ham radio satellite communications including Ray Soifer, W2RS, of AMSAT North America. The newsletter says that it was Soifers plea to the VHF and Satellite Committee at the 2001 IARU Region 2 Conference in Guatemala City generated extra interest and concern about this and similar problems. This lead to some very productive discussions between the Mexican telecommunications administration and the Federación Mexicana de Radio Experimentadores which is Mexicos national Amateur Radio society.

Credit also is given to Alejandro Pereida, XE2BSS, for his thorough technical analysis of the problem and for his persistence in pursuing the matter from beginning to end. The end being the removal of the interfereing signals from the UOSAT 14 two meter uplink passband.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, not far from the U.S. - Mexico border in Scottsdale Arizona.

--

The newsletter reports that after a lot of correspondence and negotiations on this issue took place over the past eighteen months. It also credits Lorne Libin, XE1V, as being an important mediator during this period. (AMSAT)

**

HAM RADIO AND THE LAW: NEW HAMPSHIRE HAM WINS ANTENNA CASE

Meantime, a lot closer to the ground, the ARRL Letter reports that a New Hampshire ham appears to have won a battle to erect an antenna support structure on his property. But says the League, it remains to be seen, however, whether Jerry Muller, K0TV, of Hudson will be allowed to erect the extensive system of three towers that he'd originally planned.

Unlike many amateur antenna battles, this case did not pit Muller against the town. In December 1998, Muller applied for a permit to erect three 100-foot antenna structures on his property, and the town of Hudson granted the permit. Three of Muller's neighbors appealed the grant of the permit, but the Hudson Zoning Board affirmed the grant. The neighbors then sued the town and won, resulting in the order for Muller to dismantle the towers.

Now, in a 4-0 vote, with one justice abstaining, the Supreme Court of New Hampshire has reversed a lower court ruling but it is not a 100% victory. Writing for the court, New Hampshire Chief Justice David A. Brock concluded that the lower court's order requiring Muller to dismantle his towers violated the limited federal preemption known as PRB-1 as well as New Hampshire's statutory codification of PRB-1. However Brock also agreed with the lower court that Muller's three-tower installation did not qualify as a "customary, incidental and subordinate" accessory use permitted by Hudson's ordinance.

While another amateur in Hudson has a tower at the same height, there are no instances of three such towers on the same property. Nevertheless, Brock said that Muller's installation may be permitted within the framework of PRB-1, if Muller can demonstrate that his three towers are necessary to "reasonably accommodate" his communications needs. (ARRL)

**

THE WAR: 73’S GREEN SAYS US COMMUNICATIONS ILL PREPARED FOR TERROR ATTACKS

73 Magazine El Supremo Wayne Green, W2NSD -- thats his title not ours. El Supremo Green says that the United States is ill prepared to handle communications in the event of another terror attack. Writing in his Never Say Die editorial column, Green says that no matter how the terrorist network hits us, the one thing we are going to need is communications. And this says Green, this is another item that the government has been lax in providing.

Green notes that anytime there is an emergency, the first things to disappear are electric power and telephone service. This includes cellular as well as wired phones. He notes that police, fire, rescue and other services have no way to inter-communicate until ham radio operators arrive on the scene. He says that if ham radio is going to be called on to provide services anywhere and at any time, then we need at least 600,000 licensed hams trained and ready to help, and not just the 100,000 or so that are now really active.

Green’s comments begin on page four of the January issue of 73 Magazine. (73 Magazine)

**

THE WAR: PIRATE HAM OPERATION FROM AFGHANISTAN

You may find this hard to believe, but even with a war going on some joker is pirating the YA5T call-sign and pretending to be on the air from war-torn Afghanistan.

According to Peter Casier, ON6TT, and the Radio Society of Great Britain all the operators who had previously put YA5T on the air have left Afghanistan. Casier tells the RSGB that he expects to travel back to Islamabad on the 20th of January and then to Kabul within the following few days. Until then, any station you work claiming to be on the air from Afghanistan is most probably somewhere else in the world.

We will have more D-X news later on in this weeks newscast. (RSGB)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including the Condor Connection repeater intertie thanks to KC6SFP and heard throughout the South-Western United States.

(5 Sec Pause Here)

**
FCC: THE VANITY CALL SIGN PROGRAM MAY RESUME SHORTLY

Some god news for hams waiting for vanity call signs. According to an ARRL bulletin, the vanity program which was put on hold since October 14th as the result of the post 9-1-1 Anthrax mail scare may could be in operation shortly.

The vanity gridlock got started after mail received between October 15th and November 1st was diverted from the FCC's Gettysburg, Pennsylvania, office for decontamination in the Washington, DC, area. That mail, believed to contain more than 100 vanity applications filed on paper, has not been returned to Gettysburg.

Current FCC policy says that paper and electronic vanity applications get equal processing priority, so the Commission halted vanity processing altogether until it could resolve the mail snafu.

FCC staffers in Gettysburg have been attempting to work around the roadblock. Using vanity fee payment data from the FCC's fiscal agent, Mellon Bank in Pittsburgh, the FCC's Wireless Telecommunications Bureau in Gettysburg has been contacting applicants directly to have them resubmit their applications. The FCC now is asking applicants whose paper vanity filings may have arrived at Mellon Bank between October 15th and November 1st and who have not been contacted to get in touch with the FCC to find out if they need to forward a copy or facsimile of their original paperwork. The request affects only vanity applicants who filed on paper and not electronic filers.

More information on whats happening in the ham radio vanity call sign program can be found at the ARRL Website. Its in cyberspace at www.arrl.org under W1AW

Bulletins for the year 2002.

And late word in. The FCC has begun processing some vanity call signs as this newscast is prepared. (ARRL)

**

ENFORCEMENT: EX-KV4FZ'S NEW LICENSE APPLICATION DESIGNATED FOR HEARING

I'm Bill Pasternak, WA6ITF. The FCC has designated a new ham radio license application filed by Herbert L. Schoenbohm, the ex-KV4FZ, for a public hearing. According to the order released on January 9th, the hearing will determine whether Schoenbohm possesses the requisite character qualifications to be a Commission licensee. Schoenbohm lost a series of appeals during the 1990's and was ordered off the air last year. He was given twenty days to request that the hearing on his new application be held. If he fails to do so, his application will be dismissed. More on this story, next week. (FCC)

**

ENFORCEMENT: YOU CANT SEND FELONY COMPLAINT AFFIDAVITS TO OTHER HAMS

The FCC wants to hear immediately from any ham who receives notification that a felony complaint has been lodged against him or her by Glen Baxter, K1MAN. This after the government tells the Belgrade Lake Maine operator to stop sending other radio operators so-called Standard Felony Complaint Affidavits. Speaking on his Rain Enforcement Log, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth says that this is not the first time Baxter has been warned:

--
Hollingsworth: "We reiterated a warning issued by the United States Attorney in Maine to a Belgrade Lakes operator who had sent so-called Felony Complaint Affidavits to licensees who had refused to clear the frequency for his broadcasts, or bulletin shows or whatever they are. Complaints about the nature of the transmissions are also under review as well, and we will be looking at those. That went to Glenn Baxter, K1MAN.

The United States Attorney in that case has warned Baxter that if he continues sending the so-called Felony Complaint Affidavits he may be subject to federal criminal charges for misrepresentation and for using the U.S. Mail to make threats."
--

If you receive one of these Standard Felony Complaint Affidavits, or notification that one has been filed against you please contact Riley Hollingsworth as soon as you can. He can be reached by e-mail to fccham@fcc.gov. (FCC)

**

ENFORCEMENT: FCC - ALLEGEDLY UNCOORDINATED IN CALIFORNIA

Still with enforcement news, the FCC has notified Dean K. Perrins, N6HWI, of Freemont California that his alleged uncoordinated repeater on 443.725 MHz is causing interference to the coordinated K6TWI system. This is a repeater which operates on the same frequency.

The FCC says that it has information that Perrins has been notified several times
regarding the interference problem but that he has not taken any steps to resolve the problem. Perrins was given twenty days from the date of notification to respond to the FCC. (FCC)

**

ENFORCEMENT: FCC - ALLEGEDLY UNCOORDINATED IN FLORIDA

In still another repeater interference case Joseph Bushel Jr., W2DWR, of Live Oak Florida has been directed by the FCC to respond to a complaint that he is operating a repeater on 146.94 MHz after being denied coordination by the Florida Repeater Council. The FCC says that Bushel's repeater is causing interference to the coordinated K4EHM system and the government wants him to explain his actions. The FCC also wants W2DWR to respond to an allegation that he was observed transmitting a digital voice recording an that frequency without ever identifying the transmission. (FCC)

**

ENFORCEMENT: FCC- DON'T TALK ON THAT REPEATER

Meanwhile, another Florida ham identified as Thomas Banks, KB4AN of Port Saint Lucie Florida has been notified by the FCC that he is to refrain from using an area repeater. Specifically, the FCC has told Banks that he is not to be heard over the Saint Lucie Repeater Association's AF4CN machine as requested by the system's trustee. (FCC)

**

AWARDS: ARRL EDUCATOR AWARDS NOMINATIONS SOON CLOSE

According to the American Radio Relay League, nominations close January 31st for League awards that recognize excellence in teaching. The ARRL Instructor of the Year, Educator of the Year and Professional Instructor of the Year awards will be presented, as well as the ARRL Excellence in Recruiting Award. All winners receive engraved plaques. Complete information and nomination forms are available at www.arrl.org. (ARRL)

**

AWARDS: DARA NOMINATIONS TO CLOSE

The nominating period for the 2002 Dayton Hamvention Awards is quickly coming to an end. The deadline for nominations is also January 31st.

There are three awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence. All amateurs Novice through Extra are eligible.

Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned.

Nominations can be sent to Post Office Box 964, Dayton Ohio 45401. They can also be filed electronically by completing the e-form on the web at www.hamvention.org. (DARA)

**

BREAK 2

**

AWARDS: NEWSLINE NAMES FOUR AS SUPER SUPPORTERS

The Amateur Radio Newsline has named four hams who will receive its first Super Supporter Award certificates. Don Wilbanks, KC5MFA, has the names:

--

In alphabetic order, the first certificate goes to Roy Blanchard, N5YHS, right here in New Orleans. It was Blanchard whose assistance made it possible for Amateur Radio Newsline to become a federally tax exempt coropration.

The second is earmarked to Dale Cary, WD0AKO for his decade plus work in putting the Amateur Radio Newsline on the Internet and creating the Amateur Radio Newsline website.

Sandy Donahue, W4RU, receives a Super Supporter certificate for his many years of coordinating the arrival of the Newsline Young Ham of the Year Award in Huntsville Alabama, and the recipients registration at Spacecamp. And for the last several years he has also helped to defray the cost of the mini-banquet held to honor the winners.

Last but by no means least, Todd Hitzeroth, N6ZXJ, was recognized for his years of volunteering with Newsline at its Dayton Hamvention booth and engineering the Ham Radio Town Meetings. What makes his contribution unique is that Hitzeroth lives in California and pays his own way to and from Dayton each year.

With congratulations to all four recipients, I’m Don Wilbanks, KC5MFA.

--

Approval for the creation of the Amateur Radio Newsline Super Supporter certificates and naming of the first four recipients took place at the organizations Board of Directors Meeting held in Glendale California on December 30th 2001. A synopsis of the minutes of that meeting will be posted to our website within the next few weeks. (ARNewsline(tm))

**

INTERNATIONAL-ISRAEL: “FIRST” BRINGS IN NEW HAMS

A new group of radio amateurs has emerged in Israel from a rather unexpected place. According to Hagal International, the new Israeli hams are from an all volunteer Search and Rescue group called First.

First members are on call to provide wilderness rescues in areas such as the Israeli desert and canyons. For communications, First members have long carried two-way hand helds operating in point to point simplex mode. The limitations of simplex in rugged terrain means that there are times when they cannot keep in touch.

Recognizing a need for improved communications, First contacted to Israel Amateur Radio Club to ask if the nationwide repeater system could be made available for search and rescue use. And according to veteran ham radio instructor Moshe Inger, 4Z4PF, when First members learned that they would first have to pass an Israeli ham radio exam, they did not flinch one bit. They studied, passed the test and there are now dozen new hams from Eilat in the South to Golan in the North. (Hagal International)

**

INTERNATIONAL-UK: G3YJO BECOMES SIR MARTIN SWEETING

Meantime, over in the United Kingdom word that Martin Sweeting, G3YJO, on being knighted. Sweeting is the Chief Executive of Surrey Satellite Technology and Director of the Surrey Space Centre. He will join Sir Jimmy Young and Sir Ben Kingsley to collect his Knights Bachelor medal from the Royal Palace. Professor Sir Martin Sweeting, F.R.S., was knighted for his services to the U-K in microsatellite engineering. (RSGB)

**

HAM RADIO IN SPACE: QUIET HOURS FOR AO-40

AMSAT reports that AO-40 satellite ground controllers have begun adjusting the spacecraft's attitude as it enters a period of adverse sun angles. The satellite is currently in a long period during which Earth eclipses the sun near perigee. These periods will continue well into next June. As a result, AO-40's operating schedule has been modified to reflect the decreasing attitude longitude. (AMSAT)

**

HAPPY BIRTHDAY: JOHANNES KEPLER AT AGE 470

VK2KGM notes the 470th recorded birthday of Johannes Kepler last December. Kepler was the first astronomer to determine a mathematical relationship existed that could be used to predict the motion of planets. This became the basis for the Keplerian data we use today for satellite orbits. (AMSAT)

**

DX

In DX, word that F2JD is active from the Philippines as DU1 slash G0SHN on 20, 15 and 10 meters SSB and CW. Listen for him from now until June of this year. QSL as directed on the air. (RSGB)

Three Finnish operators will be active from Tonga through the 15th of January, with an emphasis on 160 to 30 meters. They will work CW, SSB and RTTY with three stations using verticals and dipoles. (Modern DX)

**

THAT FINAL ITEM: FANTASTIC VOYAGE REDUX

And finally this week, the world of medical communications research has finally caught up with the lights of Hollywood. This, as the government approves a tiny radio camera-in-a-capsule that patients can swallow. It is a camera that will transmit pictures to give doctors a close-up view of what is inside of you. Amateur Radio Newsline’s Mert Garlick, N6AWE, has more:

--

The new transmitting video pill is made by Given Imaging Ltd. in Israel. It is called the M2A Swallowable Imaging Capsule. It is also exceeding tiny. In fact it is so small that it is easily swallowed by the patient.

Its inventors say that it then painlessly winds its way through the digestive tract and uses wireless technology to transmit full color pictures to a belt pack receiver worn by the patient. That unit also decodes the signal and records the information as the patient goes about his or her daily routine.

A U.S. spokesman for Given Imaging says that doctors who wish to use the video imaging pill will have to buy a specialized $20,000 computer workstation. Each camera capsule costs about $450.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE, in Los Angeles. Roy.

--

The entire system is reminiscent of the science fiction movie "Fantastic Voyage." In that film a submarine and its crew of medical specialists are miniaturized and injected into the bloodstream of a critically injured man to perform an operation to save his life while receiving instructions by two way radio. (Science Today)

The important point to consider is that Gaylord has not yet made a decision on WSM-AM.

In any case, WSM's daytime coverage is very limited, due tothe poor ground conductivity in Central Tennessee. Nighttime coverage is far less than the reported "38 states" that the newspapers have picked up on. There are powerful stations on 650 in Mexico, the Dominican Republic and the Caribbean Basin which severely interfere with a consistent reception of WSM in all but a group of states in the Central and Deep South.

What appears to be in the formula is syndication of the Oprey to stations nationwide. This would permit the show to arrive with good quality in any market where such a program might get good audience reaction. This would probably expand the reach of the Oprey and should have been done years ago.

For months I have been lusting for a Sangean radio as advertised by C.Crane,but some of your comments tell me I'll just stick to my GE Super. Can anyone recommend a good radio with a cassette recorder that I can use in the evening to record distant AM programs.I'd love to use the Super but can't find one with a recorder. Price range under $100 if possible. Thanks for your help.

"It is in a class of it's own and from what I'm seeing Gaylord will be shooting itself in the foot again if it kills WSM....and it doesn't have a lot of feet left after killing Opryland and TNN!"

Gaylord didn't kill The Nashville Network -- Viacom did, when it decided that it needed a general-interest cable channel to go up against FX, TNT, TBS and USA.

>>
In any case, WSM's daytime coverage is very limited, due tothe poor ground conductivity in Central Tennessee.
>>

True. And the same with WSB/750.

>>
Nighttime coverage is far less than the reported "38 states" that the newspapers have picked up on.
>>

Ah, yes ... the magic 38 state claim. Claimed by so many Class Is ... achieved by so few Class Is.

This was perhaps true after the great 1941 AM frequency "cage kick".

But, this is not true with the advent of modern appliances and personal computers, all of which sport one or multiple microprocessors, and which increase the interference in the AM band such that it now takes 50 kW to do what 5 kW would do in 1941.

A reminder that "making money" in the absolute is of interest to small operators or those who are mainly running their stations for love. A typical owner's concern is return on equity. For example, if he can get an offer of $40 million for the station, an annual net of $2 million is insufficient. Managers know that heads will roll unless numbers are brought in line with what comparable properties are bringing in.

Hi Again Everyone,

We hope that everyone is enjoying the new year, These are our first 3 shows online on Rock-it Radio for the new year. There was a bit of a mix up at the Post office and thought our mail traffic had been real slow so far and was just discounting it for being the holidays. Actually what happend was that we were never notified that our local post office box was full and actually everything in the p.o. box had been stored in the back of the post office for 3 weeks! So, now we have to get busy and play catch up of all the latest programmes here on Rock-it Radio. The 3 newest programmes we are featuring are Rock-it Radio shows #394, #395 and #396. They are all in our archives page at:
http://www.palmsradio.com/rockittext.htm
and here are the playlist below!

==========

Cool Daddy Al returns with a Great show from Studio C!

>From Brampton, Ontario Canada -- Al "Cool Daddy" Smith brings us Rock-it Radio show #394. This show is a mix of all the great stuff we love to hear and includes rare tracks from SUN Records as well as some great doo wop, blues and R&B. And Thrown in for good measure as well we Al pays tribute to a great "mother" of Rock & Roll -- Dinah Washington!

Here is the playlist:

1. Move It -- The Chantays 1962
2. Pipeline -- The Chantays 1962
3. Tonights the night -- The Teenagers 1960
4. Crying -- The Teenagers 1960
5. Right or wrong -- Buddy Cunningham 1954
6. Ubangi Stomp -- Warren Smith 1956
7. Black jack David -- Warren Smith 1956
8. Salty Papa Blues -- Dinah Washington 1947
9. Trouble in Mind -- Dinah Washington 1952
10. Fat Daddy -- Dinah Washington 1953
11. I don't hurt anymore -- Dinah Washington 1951
12. It's too soon to know -- Dinah Washington 1948
13. Gloria -- Brian Setzer Orchestra 2000
14. A foolish fool -- Benn Zeppa & the Zephers 1956
15. Dig Boy Dig -- Freddy Hart 1956
16. Ah, poor little baby -- Billy "Crash" Craddock 1958
17. Midnight Blues -- Howlin' Wolf 1958
18. You can't put me out -- Howlin' Wolf 1958
19. Long John Blues -- Dinah Washington 1947
20. Baby Get lost -- Dinah Washington 1949

21. I only know -- Dinah Washington 1950
22. Drummer Man -- Dinah Washington 1949
23. What a difference a day makes -- Dinah Washington 1959
24. Out in the Cold again -- Dinah Washington w/ Ravens 1951
25. Hey Good Lookin' -- Dinah Washington w/ Ravens 1951
26. Now she's Gone -- The Beaumarks 1962
27. Boss -- The Rumblers 1962
28. Sick and Tired -- Jerry Lee Lewis 1961
29. Silly Dilly -- The Pentagons 1958

If you would like to E mail Al at Studio C up there in Canada you sure can at:
aandb.smith@sympatico.ca

Thanks Al for another Great Show!

==========

Mike Taylor from St. Louis comes out with Rock-it #395!

Mike Taylor comes out with another Rockabilly Rockin' show with a feature called "Twin Spins -- Guys vs. Gals" Of both male and female vocalists and there different versions of the same songs! A couple of cool rarities on this show include Huelyn Duvall doing Jerry Lee Lewis' - Whole Lotta shakin' goin on, and an alternate Take by Johnny Horton of North To Alaska... Our First Nations Broadcasting affiliates in thruout Alaska & The Yukon should enjoy that one... here is the playlist...

2. If you can't Rock me -- The Strikes
3. If you can't Rock me -- Debbie Stevens
4. Anyway you do -- Roy Wayne
5. Anyway you do -- Linda Brannon
6. Shake Rattle and Roll -- Patsy Cline
7. Shake Rattle and Roll -- Elvis Presley
8. Rock me my baby -- Dorothy Collins
9. Rock me my baby -- Buddy Holly
10. I gotta go get my baby -- Marvin Rainwater
11. I gotta go get my baby -- Rose Maddox
12. Rock a my soul -- Lonnie Donnigan
13. Rock a my soul -- Martha Carson
14. Home of the Blues -- Johnny Cash
15. Home of the Blues -- Lorrie Collins
16. I'll be true -- Bill Haley
17. I'll be true -- Charlotte Hunter
18. Love me, Love me Honey do -- Patsy Cline
19. Love me, Love me, Honey do -- Frank Ole' Shay
20. Whole Lotta Shakin' Goin' On -- Tommy & The Tom Toms
21. Whole Lotta Shakin' Goin' On -- Sheree Scott
22. Whole Lotta Shakin' Goin' On -- Huelyn Duvall
23. North to Alaska -- Johnny Horton (alt. take)
24. North To Alaska -- Rose Maddox

If you would like to E Mail Mike out there in St. Louis you can at:
metbet@prodigy.net

==========

Cool Bobby B returns for more of the Doo Wop Stop

Ok you Doo Wop lovers out there -- Cool Bobby B has his latest show at Rock-it radio show #396 in our archives.
Here is the playlist....

1. Rockin' with the clock -- Shirley and Lee
2. Oh gee oh gosh -- The Kodaks
3. At the Hop -- Danny & The Juniors
4. True True Love -- The Corvairs
5. Play those Oldies -- The Sophmores
6. At my front door -- The El Dorados
7. All night long -- The Du Mauriers
8. Rip Van Winkle -- The Devotions
9. Woe is Me -- The Cadillacs
10. Wait a Minute -- Tim Tam & The Turnons
11. Why do Fool fall in love -- Frankie Lymon & Teenagers
12. Little Girl -- The Young Lions
13. Never let you go -- The 5 Discs
14. Rubber Biscuit -- The Chips
15. Hong Kong Jelly Wong -- The Royaltones
16. Whispering Bells -- The Del Vikings
17. Always be faithful -- The Monarchs
18. So Fine -- The Fiestas
19. Remember Then -- The Earls
20. Heaven and Paradise -- The Meadowlarks
21. A Wonderful Dream -- The Majors
22. Puddin' N Tain -- The Kit Kats
23. On Sunday Afternoon -- The Harptones
24. Over the Weekend -- The Essentials
25. Life can be beautiful -- The Cineramas
26. Blue Moon -- The Marcels
27. The Letter -- The Medallions
28. Trickle, Trickle -- The Videos
29. Lonely Room -- Lee Andrews & The Hearts
30. Moonlight -- The Vanguards
31. Coney Island Baby -- The Excellents
32. Gee -- The Crows

If you would like to E Mail Cool Bobby B with any comments etc. you can at:
Coolbobbyb@doowopstop.com
and tell him you heard him on Rock-it Radio!

Women on Rockabilly to Air this March on PBS!

We just received a very interesting e mail from the Publicist of a new PBS- TV special here in the States called WELCOME TO THE CLUB -- THE WOMEN OF

ROCKABILLY. Featuring four of the most influential rockabilly
women - Wanda Jackson, Janis Martin, Lorrie Collins and Brenda Lee - WELCOME TO
THE CLUB will air nationally in March. The film features great archival
footage and interviews with the women, who talk about the fascinating
trajectory of their lives and careers and about what it was like to be red-hot
mamas in a Donna Reed world.
We will keep our Rock-it Radio listener club members posted as more information
becomes available on what should be a real Rockin' Show!

==========
Rock-it Radio show #384 -- The Ballots are in!

Last Month we featured Lane Quigley and the Memory Lane show doing his annual
East Coast vs. West Coast Music show.
With Co- Host Bill Green. We asked our Rock-it Radio Listeners for those who
wanted to vote for each song they thought was best. Here are the results

The results are in for the third Memory Lane Show East/West Battle. In the
first two contests, Bill Green's east coast selections emerged victorious.
This time around, in a very close battle, our Lane Quigley and his West Coast
selections prevailed 6-to-5 with two ties.

In case you missed Show #384, the selections are below. Be on the lookout for
the fourth bi-coastal battle this spring.

Here are the complete results:

ROUND ONE: Let's Go Dancin'
69% EAST: Dancin' Party - Chubby Checker
31% WEST: Dancin' Holiday - The Olympics

ROUND TWO: Everybody's Gone Surfin'
62% WEST: Miserlou - Dick Dale & The Deltones
38% EAST: New York's A Lonely Town - The Trade Winds

ROUND THREE: Soulful Ladies of October 1964
69% EAST: Oh No Not My Baby - Maxine Brown
31% WEST: Baby Baby All The Time - The Superbs

ROUND FOUR: It's Cheaper When You Don't Have To Pay Any Musicians
62% EAST: I Thank The Moon (A Capella Version) - The Crests
38% WEST: Travelin' Stranger (A Capella) - The Calvanes

ROUND FIVE: No Need To Apologize
62% WEST: Don't Feel Sorry For Me - Jimmy Beasley
38% EAST: Gee Baby I'm Sorry - The Three Degrees

ROUND SIX: They're Barry, They're White, But They're Not Barry White
69% WEST: I Wonder What She's Doin' Tonight - Barry & The Tamerlanes
31% EAST: How Will It End - Barry Darvell

ROUND SEVEN: Wah-Watusi
69% WEST: The Watusi - The Vibrations
31% EAST: El Watusi - Ray Barreto

ROUND EIGHT: And Now, A Word from the Sponsor
77% WEST: Earth Angel - The Penguins
23% EAST: Little Boy Blue - The Elegants

ROUND NINE: They're Responsible for Lots of Million Sellers
62% EAST: It Might As Well Rain Until September - Carole King
38% WEST: To Know Him Is To Love Him - The Teddy Bears

ROUND TEN: My Reaction to a Politician's Promise
54% WEST: I Can't Believe What You Say - Ike & Tina Turner
46% EAST: This Can't Be True - Eddie Holman

ROUND ELEVEN: ‘50's R&B Hits That Became #1 Pop Records in 1963
50% EAST: Blue Velvet - The Clovers
50% WEST: I'm Leavin' It All Up To You - Don & Dewey

ROUND TWELVE: Jeepers Creepers, Where'd You Get Them Peepers
54% EAST: Eyes - The Earls
46% WEST: Smoke Gets In Your Eyes - The Platters

ROUND 13: ‘60's Superstars Do ‘50's Tunes
50% WEST: Why Do Fools Fall In Love - The Beach Boys
50% EAST: Alone - The Four Seasons

Thanks Lane those are always alot of fun!
And Congradulations to Ed Wilson from Newport News Virginia, a long time Rock-it Radio listener that whose name was picked out of the Hat by Lane's Wife to win the
Music package and he should receive it by the end of next week! Of some great Oldies and Doo Wop music including Harlem Rock N Blues; Fats Domino Live at Gilley's and Charlie Gracie's New CD- I'm All Right.

++

New Pics in the DJ page....

We have new pictures of our latest DJ's out of the UK
in our DJ page at:
http://www.palmsradio.com/bio.htm
You can check out the pictures of Ian Levene and Rockin' Robin both out of Essex, England and our latest Rock-it Radio DJ's We should be receiving there latest shows also soon here on Rock-it Radio.

++
Here is the list of our latest members of our Rock-it Radio listeners club. We are now up to 1083 members!
If you haven't joined yet you can by just going to our main website at:
http://www.rockitradio.net
and at the top of the page... click on the icon that asks if you want to join our mailing list. Here are the latest subscribers from 29 December to 5 January!
A big welcome to Danny Craigo from Arkansas, USA; Eddie H from New York, USA; Maggie Sampford of Great Britain; Rosie H out of California USA; Ed Watson of Florida, USA; Steve Ark of Ontario, Canada; Ronny Mpcow from the Netherlands;

Steve Ricklefs of Iowa, USA; Denis Mac Dougall of Ontario, Canada; Bill Nash of Texas, USA; Peter Sandmark from Quebec, Canada; Daniel George from New York, USA; Gene G also from New York, USA; and Pete Wagner in Colorado, USA.

Welcome all and hope that you all enjoy Rock-it Radio.
Remember if you ever have any requests, or dedications etc. please feel free to let us know here at the Station!
Our e mail address is Rockitradio@aol.com

** We lost over 30 Rock-it Radio listeners from E Mails that are no longer active or bounced back from our server as undeliverable this last week.
Remember if you change e mail addresses please rejoin our listeners club with your new address -- we hate to loose you!

Also, don't forget if you have Yahoo Messenger keep an eye out for us and put us on your buddy list our Yahoo ID is:
"Rockitradio"

Keep Rockin' Everyone and all the best,

Until Next time!

XETRA only went to 77 kw a few years ago, long after the all-sports format took over. It was a directional 50 kw before that.
>>

XETRA/690 went from a Tiajuana site with 50 kW DA-2 to a Rosarito Beach site with 77 kW-D, 50 kW-N, DA-2 a few years ago, under Jacor "ownership".

Although more than 50 kW is against treaty for Class I-Bs, such as XETRA, many Mexicans operate with more than 50 kW, days only. XETRA is but one among several which do so.

XETRA's new DA is apparently intended to increase service to BC.

XETRA's 77 kW day power provides about what XETRA's old Tiajuana site provided to the L.A. area with its former 50 kW power.

WFEC was a good station, but was always in the shadow of powerhouse WKBO. If I'm not mistaken, for many years WFEC had its tower atop the Penn Harris or one of the downtown hotels.

I have a 1976 aircheck of WFEC featuring the "Wild Man" (apparently the night guy) who sounds like one of the last great Top 40 screamers. Thoroughly entertaining.

Those later call letters were WHGB. They switched to a Big Band format using those calls in 1984, by which time hit music on AM radio was pretty well dead.

Sorry. Wrong on two counts.

There are frequent posts on AM (or, more properly, Medium Wave) DX and gear on rec.radio.shortwave. That forum is about the reception of distant signals. This one is more properly about the business of commercial broadcasting.

Not that I personally object to your bringing the subject there... I just thought you might get a more satisfactory response on the other group.

Right. I'm so young I can remember receiving New Zealand on 1000 kHz and Australia on 660 from Ohio; verifying 78 countries and receiving 2,200 verifications from MW stations on 5 continents. I can remember the Hallicrafters SX-99 and the Hammurlund HQ-180 hollow state receivers, the original air-core loops and frequency checks where stations signed on to be monitored hundreds of miles away. I can remember being a founder of the IRCA in '63 and a member of the National Radio Club since '59.

You were saying?

On Sat, 12 Jan 2002 20:03:07 -0000, sids1045@aol.comnospam (Sid Schweiger) wrote:

>Also incorrect. AM stereo would not have saved music on AM, because it does not >address AM's shortcomings vs. FM (frequency response and interference being the >big two).

First, frequency response and interference are functions of the number of licensees on the air. There was a time not long ago when stations were allowed to put 15 kHz or more of modulation bandwidth to the transmitter. Nobody's allowed to do that today; and even if they were, with all the stations on the adjacent channels, it's not worth the trouble.

Second, there is much more to AM than plain old envelope detection. A decent Costas Loop synchronous detector will not only improve the linearity of the incoming signal, it is helpful at reducing adjacent channel interference. This is why some AM stereo radios will improve the sound of even a monophonic AM transmitter. Had AM stereo become a standard sooner, it might have prevented some of the demise we've seen today.

Third, an anecdote to prove a point: I built a synchronous detector a few years ago, and the audio we heard from it was surprisingly good when tuned to local stations. The audio was at least as good as what we heard on FM broadcast stations --maybe even better. (Of course, given what many FM stations do to their audio streams these days, that's not saying much) And I want to point out that we were using a 30 kHz wide IF filter designed for NBFM reception...

To reiterate, I don't think the MW AM broadcast industry's problem is due to anything technological. It has much more to do with foolish licensing policies. And if you believe the NAB, the FCC is about to do it again with LPFM.

Of course, if you believe that VHF FM broadcasts killed MW AM because of technology rather than licensing too many for too few resources, then you have nothing to fear from LPFM --right?

I rest my case.

Here's a link that will take you to Amazon.com's music downloads section where you can get a free copy of Jonathan Bickel's rousing rock guitar instrumental dedicated to the troops in Afghanistan. You'll love it!

Get it at: http://artist.amazon.com/jonathanbickel

Hint - the picture shows Jonathan in front of an A-10 Thunderbolt. Should give you an idea of the power in this recording.

It's intended to be enjoyed by any and all of the US Armed Forces, as well as civilian supporters, so, if you like it, please post the link to any appropriate newsgroup or any other Internet venue and broadcast it wherever programming practices permit.

More background info is available at:
http://www.johnbickel.com/jonathan.htm

Thank you and God Bless America

I helped get The Touch on the air in the early 90s while I was production director for WINK 104 (WNNK-FM). The "station" was built into a corner of the backup production room and used an early Computer Concepts DCS spot storage and playback (DOS) computer. The format was/is ABC Radio's "Touch" soft urban AC.
The day we were to have the mayor and local NAACP representatives "throw the switch" to officially put The Touch on the air, we went thru a solar outage. They hit a dummy switch, engineer Tom Walker secretly turned a fader up, and solar rush noise was the only thing to come out of those speakers for 20 minutes.
Big salute to Walker, also original station PD Joe Dalto, spokesman and production genius Don "Double D" Davis for getting this puppy on the air in the first place.

162. The AM Stereo Liberation Front

Newsgroup: rec.radio.broadcasting
Date: 2002-01-16 16:06:15 UTC
From: Kevin Tekel <kevtronics@compuserve.com>
Message-ID: <u4b97n478bj606@corp.supernews.com>
Source record: 12424
Cross-posted to: rec.radio.broadcasting,alt.radio.broadcasting,alt.radio.broadcasting.open,alt.radio.pirate

The AM Stereo Liberation Front is a new web site dedicated to demonstrating the high quality sound of AM Stereo radio, using the worldwide standard Motorola C-Quam system, and how it compares to conventional monaural AM radio and the experimental AM Digital Audio Broadcasting ("IBOC DAB") system.

Visit The AM Stereo Liberation Front at:

http://www.geocities.com/dieselweb/amslf.htm

AM Stereo is a proven technology in use for two decades around the world, with hundreds of stations broadcasting it and millions of radios receiving it. AM Stereo is a robust system that has benefited from new technology since its debut in the early 1980s, and now can consistently outperform in-band AM digital broadcasting systems with superior reception and audio quality, especially in weak/long-distance signal conditions.

Help liberate AM radio from poor sound quality and reception with AM Stereo!

<kevtronics@compuserve.com> wrote:

>Visit The AM Stereo Liberation Front at:
>
> http://www.geocities.com/dieselweb/amslf.htm

>From the website:

These recordings were made from a C-Quam AM Stereo transmitter as
received on a Delco model 16043614 car radio, recorded to MiniDisc,
and then transferred to MP3 format for your listening enjoyment. The
audio in these recordings conforms to the North American standards for
frequency response and bandwidth. If you have a Delco AM Stereo radio
in your car, this is exactly the quality of sound that you can hear
from stations broadcasting in AM Stereo!

>From me:

There's no information about where the transmitter and receiver were
when these tests were conducted. Were they next to each other in a
lab, or were they 20 miles away from each other in an urban setting in
a sea of cellphones and high tension wires.

I have a great deal of trouble with capturing digital audio on a MD,
transcoding it to 128 kbps MP3 and then claiming "this is exactly the
quality of sound you can hear from stations broadcasting in AM
stereo."

I'm trying to find the 2 inch (3 inch including the flange) knobs that fit the pots on the Russco Studiomaster 505S mixer. A search for used broadcast equipment suppliers didn't help much. Any suggestions? Did somebody buy out Russco and keep a warehouse full of parts? See a picture of the console and the knobs I'm searching for at

http://home.kscable.com/dickgrafe/russco.html

Thanks in advance for your help. Please remove the extra @ in my email address if you reply that way.

Anyone know where I can get e-mail addresses of radio stations so I can send press releases? If there's a directory online it's best.

The only addresses I've been able to buy are FAX. It's cheap to send, but free is better. Any ideas will help.

Thanks, Group.

Cline.

Given the acceptable distortion specs of AM stereo, especially
under C-Quam, with the recording and presentation chain you
describe, this can be considered a legitimate claim.

>From the spec sheet of Motorola's latest C-Quam AM Stereo decoder chip, the MC13028:

THD (Total Harmonic Distortion):
Stereo 0.6 %
Mono 0.3 %

Stereo Separation:
at 100 Hz 21 dB
at 1 kHz 39 dB
at 10 kHz 43 dB

Signal-to-Noise (S/N) Ratio:
Stereo 62 dB
Mono 59 dB

These figures all easily meet or exceed the specifications of most "consumer-grade" FM Stereo receivers. FM especially tends to have a rather high level of distortion in Stereo mode, as well as narrower Stereo separation at high frequencies. And of course the signal-to-noise ratio of FM degrades quite a bit in Stereo mode, unlike AM which actually has a better S/N ratio in Stereo mode because the audio processing that is used in C-Quam transmitters makes the audio about 3 dB louder when received in Stereo mode (thus the 3 dB difference between Stereo and Mono S/N in the figures above).

The C-Quam system gained a false reputation for distorted sound in the 1980s because the Sony "multi-system" radios that were highly popular, especially with fans of the other systems (i.e. Kahn), did not have proper decoding of the C-Quam or Harris signals. Instead, on these radios all signals were run through a decoder designed for the Magnavox AM Stereo system, which did not incorporate the "cosine compensation" that is the key to providing good, undistorted sound out of C-Quam.

Thus, when using a Sony multi-system radio, like the popular SRF-A1 and SRF-A100 models, Kahn AM Stereo did actually sound quite a bit better than C-Quam AM Stereo -- but that's only because the radio was not properly decoding the C-Quam system! On a *true* C-Quam receiver, there is noticeably less distortion and overall a much fuller, cleaner sound. And the latest generation of C-Quam decoders have advanced this even further with a superior cosine compensation circuit for even lower

distortion and wider Stereo separation.

Some "golden ear" people are always going to find something to complain about the sound of any kind of audio technology. There are still many people who maintain that LP records sound better than CD's, and on some points they do have a valid case. But this is really irrelevant because the point of AM Stereo is not to have the sound quality live up to some arbitrary benchmark, such as "as good as FM". The point of AM Stereo is to allow listeners to enjoy the highest possible quality of audio fidelity and reception on the AM band. Obviously, conventional monaural AM radios are woefully inadequate in this respect, and even after years of experimentation, the "IBOC DAB" digital AM broadcasting systems have yet to live up to their claims.

AM Stereo is a proven technology that over the past two decades has shown itself to be more than adequate at fulfilling listeners' desire for higher quality sound on the AM radio band. So why not use it, and make the best of it, until something better comes along?

HI,

IMHO, I would use windows media encoder with multiple sound cards.
Windows Media Audio v8 can storage approx 2 weeks of audio @ approx 20 gig

Depends on your application but if mono is acceptable you could split your
left and right and double your capacity.

I hope this helps.

Dale Sharp.

What makes you think anybody wants to receive e-mail press releases? Or faxes.

I didn't get the Station's e-mail but press releases by fax annoyed the hell out of me.

If there's a person in a newsroom you want to reach, call him on the phone and ask for his e-mail address. Tell him what you propose to send and ask if he's interested. If he says no, don't pester him. If he says yes, you will be sure that you have a chance that your material will be used.

It's PR 101. The rules are no different for electronic communication than for old-fashioned snail mail.

Ed (and all others)
Please try it again. The links work. Must have been a temporary
glitch at Amazon. I just hit them off the original posting and got
right in.

"The Hunt for Bin Laden," after only 3 days on Amazon, is already No.1
under Rock Guitarists. On the overall chart, it started at 9,332 the
1st day, went to 1,043 the 2nd, and is 380 as of this AM, the 3rd day.
It's got a 5 star HOT rating as well.

More of Jonathan's tracks were uploaded this AM and should appear
within 2-3 days (Amazon's delays)

Thanks for checking.

178. FOR SALE: FM station in Nevada. Full class "C"

FOR SALE: FM in Nevada.

I am trying to put together a joint venture to acquire
a full class "C" FM in Nevada. One of the most
powerful stations in North America based on the power,
ERP and height parameters.

Asking price is $595,000. Terms may be possible.

Active or inactive investors with at least $25,000
each are welcome. All investors would be on the board
with full voting rights.

Station holds a CP for even better site and is on the
air now.

Please email or call (478) 741-1710. Early AM, Tues.
to Sat. best (EST). I live in Macon, GA.

I will not be dislosing much to those who will not
properly identify themselves and be willing to sign
and non-disclosure agreement.

73,

Meyer Gottesman, W6GIV
(semi-retired radio engineer)

AMATEUR RADIO NEWSLINE(tm) REPORT #1275 - January 18 2002

Amateur Radio Newsline report number 1275 with a release date of
Friday, January 18th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new ham antenna on the I-S-S and a new microwave record down-under are first on Amateur Radio Newsline report number 1275 coming your way right now!

(Billboard Cart Here)

**

HAM RADIO IN SPACE: NEW ANTENNAS INSTALLED ON THE ISS

An American astronaut and a Russian cosmonaut ventured into space on Monday January 14th to move a construction crane and install a new set of ham radio antennas on the International Space Station. Roy Neal, K6DUE, has the details.

--

THERE IT WAS, ON NASA TELEVISION, TWO WHITE SPACE SUITED CHARACTERS, DWARFED BY THE IMMENSITY OF THE INTERNATIONAL SPACE STATION. FOR THE 32ND TIME ASTRONAUTS AND COSMONAUTS WERE OUTSIDE THE HUGE SPACECRAFT TO ASSEMBLE HARDWARE.

THEIR PRIMARY OBJECTIVE WAS TO MOVE A BIG CARGO CRANE FROM ITS TEMPORARY BERTH ON THE UNITED STATES SIDE OF THE ORBITING OUTPOST TO A PERMANENT LOCATION OUTSIDE THE DOCKING COMPARTMENT OF THE RUSSIAN CONTROL MODULE.

THAT ACCOMPLISHED, THEY WENT ON TO UNFURL A HAM RADIO ANTENNA. ASTRONAUT CARL WALTZ, KC5TIE AND COSMONAUT YURI ONUFRIENKO, RK3DUO, DEPLOYED THE RIBBON OF TAPE THAT SOON WILL BE IN USE ON A HAM RADIO STATION IN THE SERVICE MODULE,. WHERE THE CREWS LIVE AND SLEEP. A SECOND STATION HAS BEEN IN SERVICE FOR SOME TIME INSIDE THE SO CALLED FUNCTIONAL CARGO BLOCK, ANOTHER SECTION OF THE I S S.

FRANK BAUER, KA3HDO, THE CHAIRMAN OF ARISS, THE GROUP THAT IS RESPONSIBLE FOR AMATEUR RADIO ON THE SPACE STATION, CONGRATULATED THE INTERNATIONAL TEAM OF LICENSED HAMS FOR THE SUCCESSFUL CONCLUSION TO MONTHS OF HARD WORK.

ON JANUARY 25th ONUFRIENKO IS SCHEDULED TO GO OUTSIDE AGAIN, WITH FLIGHT ENGINEER DAN BURSCH, KD5PNU, TO INSTALL 3 MORE HAM RADIO ANTENNAS OUTSIDE THE MODULE THEY CALL ZVEZDA, THE CREW COMPARTMENT THAT'S THE SIZE OF A PASSENGER BUS HERE ON EARTH.

HAM RADIO IS GROWING RAPIDLY IN SPACE, ALONG WITH THE INTERNATIONAL STATION ON WHICH IT'S INSTALLED.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE

--

The Expedition 4 crew will remain on board the ISS until May. And according to Frank Bauer, KA3HDO, another important task is to bring the automatic packet system back on line. He says that ground technicians are working with the astronauts and cosmonaut on that project and that task will continue as crew time permits. (ARNewsline from information provided by ARISS, NASA.)

**

HAM RADIO RECORDS: 24 GHZ DOWN-UNDER

A new distance record is set on a band where even commercial interests are only now starting to tread. And its a group of Australian hams who have set it. Q-News Graham Kemp, VK4BB, has the details:

--

A new Queensland distance record on 24.048.1 GHz USB was established morning of Tuesday 08 January over a 72.8 Km path. Location 1 was at Wellington Point, with VK3ZQB and VK4ZHL portable. Location 2 was at Caloundra, with VK3XPD and VK5DK portable operating.

Signals strengths up to 5x5 after initial optimization with typical daytime QSB. The visiting team are continuing with local propagation experiments. The challenges of building and operating microwave amateur radio equipment are wonderfully rewarding in many ways!

>From Q-News Australia, I’m Graham Kemp, VK4BB, for the Amateur Radio Newsline.

--

Further experimentation is expected to bring even more record setting contacts in this very microwave ham radio band. (Q-News)

**

RESTRUCTURING: BIG LICENSING SUCCESS IN THE UK

A new slow-code license recently introduced in the United Kingdom is also setting records. This in the area of people flocking to get it. Jeramy Boot, G4NJH, days that the new British Foundation License is on its way to becoming a major success:

--

The Radio Licensing Center reports that, as of the 7th of January, exactly 600 of the new M3 Foundation Licenses had been issued.

In the 'QSO Party' for Foundation Licensees that took place on the 1st of January it is estimated that about 100 M3 stations were active. Many joined the one-minute-past-midnight 80-meter net and many more were heard working DX during the subsequent days.

One person active on the 1st of January was Mike Marsden, M3BQH, who also holds the callsign G8BQH. Mike reports that he worked Alex, UR5EDU, in the Ukraine at

two seconds past midnight, using 10 watts on 40 meters. The report was 59+10dB. After a few hours' sleep M3BQH worked 66 stations on the first day, with only two short CQ calls.

"The pile-up queue was never ending, I even managed to work seven other M3s", Mike said.

Jeramy Boot, G4NJH

--

To put this in perspective. The UK has 57,814 hams so 600 is about 1%. Here in the United States we have close to 625,000 licensees. That’s the equivalent of getting 6250 hams signing up for a new license class here in the USA in only a few short days. (GB2RS)

RADIO REGULATIONS: FCC'S APPROVES DRAFT WRC PROPOSALS

The FCC’s Advisory Committee for the year 2003 World Radiocommunications Conference has approved its preliminary draft proposals. The document has been assigned as D-A-02-101 and deals mainly with satellite and terrestrial allocations in the UHF and microwave bands. Amateur Radio is only briefly mentioned in the area of 890 to 1350 MHz allocations.

The Advisory Committee itself was formed in January of 2001 to assist in the development of United States proposals for WRC 2003. DA-02-101 is based primarily on the committee report. Comments on it are due on it no later than January 28th.

The complete of 55 page text of DA-02-101 is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-02-101A1.txt (FCC)

**

ENFORCEMENT: CLEAN UP THE INTERFERENCE - PLEASE

The FCC has written to an A-M radio station and an electric power provider to help resolve an unusual and long-standing interference situation. One affecting local amateurs in the Cincinnati and Mason Ohio areas. Amateur Radio Newsline’s Don Wilbanks, KC5MFA, brings us up to date:

--

The letter suggests that multiple sources may be involved in this interference case. Also that two that are possibilities are Cinergy Corporation and radio station WLW. Cinergy is the electric company to the affected area and WLW is a Clear Channel Communications owned power-house AM station serving the greater Cincinnati area from a transmitter in Mason.

WLW operates on 700 kHz with 50,000 Watts into a single element diamond shaped half-wave vertical tower. This is only one of two such towers left in the United States, the other belonging to WSM AM in Nashville Tennessee. Both were constructed in the early 1930's by the now defunct Blaw Knox Construction Corporation.

One of the amateurs affected is Bob Reiff, WA8ULW, of Mason. Reiff told the ARRL Letter that while the noise is most noticeable on 160 meters, it's showing up elsewhere. He says that some local hams suspect it is even causing problems even on a two meter repeater.

In its letters, the Commission says that it recognizes this to be an unusual case. It says that the source of the interference could turn out to be something else unexpected. But the Commission adds that it is turning to the radio station and electric utility company and asking for their help in finding the source of the noise plaguing the Mason ham community. It's also asking that both cooperate with the technical experts from the American Radio Relay League in solving the problem.

For the Amateur Radio Newsline, I'm Don Wilbanks, KC5MFA.

--

By the way, More information on this very interesting Blaw Knox diamond tower design and the ones installed at both WLW and WSM is available on-line. Simply take your browser to http://www.wsmonline.com/w_homepage/tower/index.html. Its very interesting reading. (FCC, ARRL, Amateur News Weekly)

**

ENFORCEMENT: UNLICENSED OPERATOR TOLD TO EXPLAIN

A former ham that the FCC says may have been on the air without a license has been asked by the agency to provide an explanation. The person posing the questions is FCC chief ham radio rules enforcer Riley Hollingsworth, K4ZDH. And in a recent Rain Enforcement log, Hollingsworth outlined the situation:

--
Hollingsworth: "We requested clarifying information from Brian Bailey, ex-KD5PXQ. His license was set aside by the Wireless Bureau on October 19th. We want to know his exact whereabouts on two specific days in September. Bailey has been in touch with us and is deciding weather to provide the information."
--

According to Hollingsworth, the information that the FCC wants from Bailey relates to allegations of unlicensed operations and malicious interference. (FCC, RAIN)

**

HELPING HAMS: HAMDIHAMS NEW E-MAIL ADDRESS

This note: The Courage HandiHam System has a new electronic mail address. You can now reach the group at handiham@courage.org. You may also contact its Director Pat Tice directly at wa0tda@arrl.net. (HandiHams)

**

CONVENTIONS: HAMVENTION SAYS BRING YOUR BUS AND LAVE THE PARKING SPOT TO US

Free parking at the HARA Arena for Hamvention? Well, kind of. Its free if you leave your car at home and charter a bus to bring in a pretty large group of people to the event. Amateur News Weekly's Phil Thomas, W8RMJ has the not so complex details:

--

For Amateurs who charter a bust to make the annual journey to Hamvention, the Dayton Hamvention Committee will reserve a parking place for your chartered bus for the entire three days of Hamvention. The reserved parking will be close to the HARA Arena Complex, allowing not only a place to secure your valued purchases, but also a place to rest those weary feet after walking many, many miles of Hamvention. Space is limited for the new charter bus parking area. Pre registration is required. Availability is on a first come, first served basis.

--

For more information on the new on-site charter bus parking offer or to reserve a space, please contact the Dayton Hamvention office. It's open normal business hours Eastern Standard Time at are code (937) 276-6930. You can also fax your request toll free at
1-800-491-4267. (Amateur News Weekly)

**

CONFERENCES: SE VHF SOCIETY IN APRIL

Greg Robinson KB4NVD says over the VHF Reflector that the Sixth Annual Southeastern VHF Society Conference will take place April 26th through the 27 Th. in Oak Ridge, Tennessee. The conference, hosted by the Southeastern VHF Society, promises to be an interesting and exciting event with presentations from accomplished VHF and up amateur radio enthusiasts from several parts of the country. Registration, program details, hotel and travel information can be found in cyberspace at www.svhfs.org. (SE VHF Society)

**

HAM RADIO EVENTS: KIDS DAY A BIG MID-WEST SUCCESS

The first Kids Day operating event for 2002 was a rousing success in many venues. But in one Mid-West city a bit of coverage on a local T-V station helped to make it even better. Again to Amateur News Weekly and reporter Jack Parker, W8ISH:

--

Kids Day at the Indianapolis Chapter of the American Red Cross got a boost when event coordinator Stece Wendt, KB9RDS, made an appearance on a local TV news program. During the two minute segment. Wendt told viewers that all kids and their parents were welcome to share in the Amateur Radio experience, including an introduction to Morse Code, VHF repeaters and HF:

--
Wendt: “And then we turn around tand take them over to the big radios -- the big base station radios where they can talk -- literally -- around the world.”
--

This is the second year the local Red Cross chapter has shown young people how to tune in the world.

Reporting from Indianapolis Indians for Amateur News Weekly, This is Jack Parker, W8ISH.

--

This is just one of many Kids Day success stories. We will have more in future Amateur Radio Newsline reports. (Amateur News Weekly)

ARNEWSLINE(tm) FINANCIAL UPDATE WITH N6TCQ

It’s time for a report on the financial situation here at Amateur Radio Newsline. With it is our Support Fund Administrator and Corporate Treasurer, Andy Jarema, N6TCQ:

--

It is January of 2002. A brand new year for ham radio. And the beginning of another year for us here at the Amateur Radio Newsline. And as we start off the new year, here are the current finances.

Looking in the new corporate checkbook, the balance shows us at about $700 give or take a few bucks. Not very much when you consider that it takes over a thousand dollars a month to produce these weekly 20 minute Q-S-T’s.

Obviously, Amateur Radio Newsline is going to need your help -- and -- need it quickly to keep it from going away and to keep the news of ham radio coming your way.

We have done all that is possible from our side to keep costs under control. But, some fixed expenses like the telephone and long distance calling are a must have. So are electronic mail and world wide web access. There is the cost of the routine maintenance on the tape machines and editing gear. And in a few months the Newsline sponsored Young Ham of the Year Award will be rolling our way. All of this adds up and some costs just keep going up. When you add it all up and average it out, it comes to that $1000 a month figure I just mentioned.

So now is the time when Amateur Radio Newsline has to ask to ask that you help to keep its newscasts coming your way. Your tax deductible contributions can be sent to the Newsline Support Fund, Post Office Box 660937, Arcadia California. The Zipcode is 91066.

Ill be back within the next few weeks with an update on how things are going. For now from the Amateur Radio Newsline support center, I'm Andy Jarema, N6-Tiny-California-Quake.

--

Don't worry if you missed the address. It will be repeated in a few minutes at the end of this weeks newscast. (ARNewsline(tm) Support Fund)

**

ARNEWSLINE(tm): WE ARE GOING MP3

One other piece of news concerning Amateur Radio Newsline. As of March 1st, we will be dropping Real Audio and going exclusively MP3. Why the change? Well ever since we began posting a downloadable MP3 file at our own FTP site along side the Real Audio file, 9 out of 10 people have chosen the MP3. And with good reason. MP3 simply sounds a lot better than Real Audio to most of you. And by dropping the Real Audio, we can make the MP3 sound even better by encoding at a higher bit rate.

Right now, you can still compare the two formats if you like. Until February 22nd we will continue to post both Real Audio and MP3. Take the time to download both. And don't worry. Most modern media players including Real Audio, Microsoft Media and Winamp play MP3 so the chances are that you are already equipped to cover of the digital format change. (ARNewsline(tm))

SCIENCE AND TECHNOLOGY: THE NOISE OF EARTH

According to Space Daily, researchers have known for three decades that the Earth is a potent radio transmitter, but they were never able to pinpoint where the noise was coming from. Recently, by using data from the four spacecraft of the European Space Agency's Cluster mission, NASA-funded scientists have precisely located the source of the radio noise along the magnetic field lines. The noise originates several thousand miles above bright regions in the Earth's
northern lights. (AMSAT, Space Daily)

INTERNATIONAL-CANADA: ARE AGREEMENT IN B.C.

Turning to international news, Radio Amateurs of Canada which sponsors that nation’s Amateur Radio Emergency Service has signed a Letter Of Understanding and the British Columbia Provincial Emergency Radio Communication Service. The letter represents the collaboration between Radio Amateurs of Canada’s British Columbia Section Manager Fred Orsetti VE7IO and Supervisor of Information and Communications Technology for the Provincial Emergency Program Andrew Bryan VE7KSN, to provide a cooperative plan to carry out emergency communication. The letter also further enhances the work of the Canadian ARES program and compliments the Memorandum of Understanding signed May of 1994 between Radio Amateurs of Canada and Red Cross. (RAC)

**

INTERNATIONAL - CANADA: VE1AWA RESIGNS AS MARITIME PROVENCES SM

Due to personal reason Roy MacIntosh, VE1AWA has stepped down from the position of Section Manager for the Maritimes. Tom Caithness, VE1GTC has been appointed acting Section Manager pending outcome of the upcoming election call. (RAC)

**

INTERNATIONAL - UK: AMSAT-UK COLLOQUIUM

The 17th AMSAT-UK Colloquium will be held at Surrey University in Guildford from the 26th to 28th of July this year. AMSAT-UK is now inviting speakers to submit papers about amateur radio space and associated activities for this event and for the Proceedings document. Offers of papers should be submitted as soon as possible and should be sent only to Richard Limebear, G3RWL. His e-mail goes to g3rwl@amsat.org. (AMSAT-UK)

**

HAM RADIO IN SPACE: WEBSITE UPDATE

AMSAT reports that IK8XLD has updated his website with information about satellite operations, EME, the ham radio operation on the International Space Station, ATV and homebrew equipment. You can visit Rocco’s website at www.qsl.net/ik8xld. (ANS)

**

DX

In DX, DJ4KW and DK9GG are active from Belize as V31YN and V31GW respectively until about the 2nd of February. Activity is on CW, RTTY and PSK 31. (GB2RS)

And KE1F will be active on 10 to 160 meters CW, SSB and perhaps RTTY as ZF2LM from Grand Cayman Island from the 14th to 30th of January. (GB2RS)

Also R1ANF began operations as CE9 slash R1ANF on the 29th of December from a Chilean base in the South Shetland Islands. He is active on 10 to 28 MHz with 100 watts to an R6000 vertical. For all three, QSL as directed on the air. (OPDX)

Last but by no means least, word that JX7DFA, is on a job assignment to Jan Mayen. He is operating as LA7DFA. QSL via his home call. He will reply when he returns home in the Spring. (Modern DX)

**

THAT FINAL ITEM: A CALL FOR ARDF HUNTERS FOR THE WORLD GAMES

And finally this week, 2002 may be the biggest year yet for fans of hidden transmitter hunts, especially the ones that are all on foot. Amateur Radio Newsline’s Joe Moell K0OV helps coordinate happenings like these and has news of two major events.
--

Every two years, hams from around the world gather to see who is best at on-foot hidden transmitter hunting, also called foxtailing, radio-orienteering and ARDF. There are separate events on eighty meters and two meters, each with five transmitters scattered in a forest that can encompass 1000 acres or more.

Competitors are divided into five categories for males and four categories for females. Each country may have up to three persons per category on its team.

Back in Y2K, the championships were in China, with a dozen stateside hams among the competitors from 26 countries. This year, the excitement moves to Slovakia and takes place from September 2 through 7. Once again, ARDF Team USA will be there.

Would you like to be on that team? If so, contact me right away, because USA must submit its Letter of Intent to the Slovakian hosts by the end of January.

Of course you'll need lots of practice beforehand, and you can get plenty by attending USA's own national ARDF championships, which will be April 19-21 in Pine Mountain, Georgia, near Atlanta.

Find out about both championships -- Slovakia and Pine Mountain -- by visiting my Web site: www.homingin.com. Homingin is one word. Then apply for the Team USA roster at my e-mail address on that site, or by postal mail to my callbook address.

Maybe you'll bring home a medal this year. From southern California, where this year's local radio-orienteering training sessions will begin soon, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

In case you missed it, Joe’s website is www.homingin.com. “homeingin” is one word. (K0OV, ARNewsline(tm))

The fax machine has made it possible for all sorts of political and corporate graffiti artists to spread their execrable self-promotion while shifting the cost to the recipient. During political campaign season and when the state legislature is in session, my fax machine can go through a ream of paper every two days, and the toner cartridges are not cheap. And of course, there's the time we waste, going through the dreck for the occasional item of importance. More than 99 percent of the faxes I get go directly into the round file.

As for e-mails, mercifully most of these people haven't caught on to that yet. At least e-mail is easily deleted and causes no increase in cost on a corporate high-speed internet connection, but there's still the waste of time in looking at it. Of course, if I get e-mail from an unrecognized source, I delete it unread as a virus hazard--so spamming me with press releases will not do any good.

Back when people had to spend their own money and buy stamps, we didn't get anywhere near as much of this crap.

Unsolicited faxes and e-mails are not a way to make friends and influence media.

Most stations I know of have a dedicated fax machine specifically for press releases. At Talk stations a press release can offer good ideas for guests and information on stories.

What really annoys me are email press releases that come to my personal email address. They get deleted immediately. If you ever find my name on a list, remove it. Your press release will be ignored. I will have created a filter to delete anything further from you almost instantly.

The best thing is to connect an old computer with WinFax installed to that
line. One can peruse on screen at leisure and then print anything
interesting, and after a few days, delete the rest.

I dont see your point? Ive run WME and it runs well.

Infact I have setup WME and a couple of ISDN routers for use with Outside broadcasts for one of the brisbane community stations and when a "el-cheapo" "kmart-solution" is required you cant go past WME.

and how much does it cost???? FREE!!!!

Actually, unsolicited faxes are illegal. There was one scam that claimed to be a poll. You were asked to return their fax with your answer. It went to an 800 number that wasn't free. There was a number on their fax to call to get yourself removed. It didn't work. I called the New York State Attorney General's office and was told they were inundated with complaints about this company.

It appears there's no communications medium free of scamability.

This sounds more like you want to spam.

If you contact the station(s) with which you are interested in appealing,
you would probably achieve better results.

Then again, some smaller stations will put on anything. Word it right, and
you could have a bunch of free spots. A minimum wage board-op doubling as
a Public Affairs Director wouldn't know the difference.

191. Commercial SW- WBCQ

Newsgroup: rec.radio.broadcasting
Date: 2002-01-19 22:28:55 UTC
From: lpptjh <lpptjh@mobiletel.com>
Message-ID: <u4jsp7lliql24c@corp.supernews.com>
Source record: 12353

HI all, I'm also posting this question to alt.radio.broadcasting.

I have been coming to these groups for well over a year, and as I said I'm sure that many of you recognize me as an OK guy- I don't get involved in controversy, flaming, or any such activities. That's why I'm not asking this question on the SWL group. I left that group long ago because of all the nutty stuff going on over there. I have done some pretty good research, and although I missed my state's window for LPFM 100 applications, I am patiently waiting for the FM 10 window to open, which, the FCC assures me, it will. For many reasons I believe that I have a very good shot at my group obtaining an CP in our community. I sign my posts New Orleans, so everyone will have a general idea of where I am located. However, I actually live near the Gulf coast, on Bayou Lafourche, about an hour south of the New Orleans airport in Kenner, LA.

Anyway, I have all my ducks in a row waiting for that window to open. Meanwhile, I would like to do something in radio just for the fun of it. SW has far too much propaganda and religious stuff, and I thought It would be cool to do a weekly, professionally produced hour long variety show (novelty songs, classic rock, comedy, and "news of the weird" or "strange but true" kind of material, inviting the audience to send in their material.

Since I have the equipment and resources, I thought,"why not"? What I need to know is- what do you folks think of my using WBCQ? They seem to have good "unintentional" coverage of the US, and I can easily receive them in my area. To the best of my understanding their antenna array boosts their 50,000 watt out to over 100,000 watts ERP.

I realize that there are folks out there who have gripes against the owner and his wife for all kinds of reasons, and I'm not interested in that (that's why I'm not over in the SWL group asking this question). What I would like to know is, what do you think of their audio quality and signal in your neck of the woods? Air time is very inexpensive, and this is just for a personal hobby for myself and one of our group. Can anyone give me a solid opinion on what they think of WBCQ in general? Please no flames about Weiner. I know he has his enemies. I don't know the man so I can't comment. Even if I could, I wouldn't.

Thanks for taking the time to read this- it's so long because I wanted to make it clear what it is I plan to do. I would appreciate any opinions and also ant alternative suggestions as to what station I might use with good coverage of the US. If this goes over well, I may also take it to Western Europe via one of the relay services. Thanks in advance for your opinions, and thanks for your time.

More likely it was after its time. Once the MW band goes digital, stereo
will probably be included, and will likely be accepted.

Does anyone have any back copies of shows from the now defunct WLLT FM (now known as WARW) in their collection? Specificaly looking for an appearance by Mary Chapin Carpenter back in 1987. 8/23, i think, with Dick Cerri. Thank you.

Unfortunately the Americans are pushing the IBOC system on both the AM and FM bands which is totally the wrong way to do it on both bands! If you are going to have AM digital, it should be the DRM (Digital Radio Mondial) system which has proven to be an acceptable solution, rather than IBOC which is riddled with problems in both digital and analog reception of the "hybrid" signal. And on the FM band we shouldn't even bother with any kind of digital signals because the band is just too crowded to allow it and the improvement isn't significant enough. Europeans are already using a completely separate band for digital broadcasting ("DAB") but in the USA the government owns this frequency range for military use and is not giving it up!

In the meantime, before all this digital mess is solved (if it ever will), analog AM Stereo continues to be a popular time-proven method of providing the highest audio quality on the AM band. So why not use it?? Why deprive listeners of the quality on the AM band that they have all the right to be hearing from their favorite stations? AM shouldn't have to sound dull and lifeless just because the technophiles aren't done working on digital systems!

>and thanks for your time.

It should have been a little longer. because to me the most important
question about whether any station is "right" for you depends on how
you want to use it.

First, I gotta ask the crass question, "Where's the money in this?"
Trust me, things will come out a whole lot better if there's a way to
make money. It will make a relay service sound like a good thing,
instead of of just another bill to pay.

>From what I read around here (I have no shortwave antenna), the
shortwave bands these days are full of the kind of stuff that used to
be on KTYM-Inglewood, KEST-San Francisco, WOPA-Oak Park.

Since you can't be assured of any lead-in audience on brokered
programming stations, you have to find another way to attract an
audience. Its tough, and I wish I had a glimmer of a suggestion for
you.

Again, if the public were to make a demand for it, AM Stereo would
be the defacto standard for AM broadcasting, and groups like Clear
Channel and Disney would both be hammering out ways of making it
work for them, to satisfy the demand.

But the public isn't making a demand for AM stereo.

If you really want to make that difference, start preaching to the
public. Not to broadcasters. After all, as anyone who's ever worked
in radio will tell you, there are no clients in the building. You
have to make your sales on the street.

201. Contact closure software

Newsgroup: rec.radio.broadcasting

Has anyone come across a utility or software that can translate contact closures on a parallel or game port to pre-programmed key strokes?

I want to be able to take a contact closure from a console and have it fire a function on the PC. Most software has keyboard shortcuts, and I was thinking that you could take a closure and have that fire a keyboard input (the spacebar in this case).

Kam.

206. FOR SALE: Class "C" FM in Nevada. Joint venture.

Newsgroup: rec.radio.broadcasting
Date: 2002-01-20 18:15:36 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <u4m2a8e50r8db2@corp.supernews.com>
Source record: 12368

FOR SALE:

Full class "C" FM in Nevada serving one of the nicest cities in America! (Not Reno or Vegas, silly!)

Joint venture. Active or inactive investors with $50,000 min. wanted. Selling price is $475,000. All investors would be on the board with full voting rights. This is an honest deal. All monies would go to my FCC attorney's escrow account or the equivalent.

The studios are located in a city that is known as "The best small city in America"!!! There are casinos there. It is the wealthiest county in Nevada. There is Amtrak service there to Reno, Sacramento, San Francisco.

I will expect you to fully identify yourself and be willing to sign a non-disclosure agreement before I tell you a lot about this deal. Believe me, it is a good one.

I am a semi-retired broadcast engineer age 66. Ham since 1950. FCC commercial ticket since 1951 (age 16). Former CE in NYC for 5 KW full-time AM. Past President and founder of non-commercial KPOO(FM), San Francisco. On the air since 1973. Held a SECRET level security clearance with Dept. of Defense.

The transmitter is above flight level 70!!! (7000 ft. you fruitloop! HI!)

Please email or call me anytime at: (478) 741-1710. I live in Macon, GA.

If you or your client do not have $50,000 available in a matter of weeks, please do not contact me about this.

Special ground rule and this applies to me too! No individual may hold more than 49% of the stock. This is avoid bullying of the group by one person. This should only upset bullies! (grin!)

73,

Meyer Gottesman, W6GIV

Not only is the lead in potentially -0- but some of the shows on these SW stations are of the type that KEST, WOPA and KTYM would have refused! A careful perusal of the WBCQ program listings shows everything in a range starting with bland, ego-satisfaction programs to virulent racism and radical political views.

And, of course, KEST, WOPA and KTYM have far higher rates because someone is actually listening to them.

Uncle Lar's back in retirement. He was doing a Saturday morning show via ISDN from New Mexico for WUBT in Chicago until about this time last year, when the station flipped from urban oldies to Clear Channel's pre-fab KISS FM CHR format (the calls are WKSC). They simply cancelled the contract and Lujack just went on from there.

SoundExpert is a rating system that helps internet community to evaluate perceptual quality of audio codecs by means of blind testing. You can participate - download your personal test file (1.5 - 2.5 Mb), listen it and send back your judgment (more details inside test file). "Blind testing" means that participants have no information about the codecs used to prepare sound material in their test files. SoundExpert automatically unblinds all received data and presents them in the form of ratings. Remember, that reliability of ratings depends upon the quantity of participants and the "quality" of their grades. So, be more precise and active!

| But the public isn't making a demand for AM stereo.

Most of the "general" public couldn''t care less. they are listening to FM
unless they are hooked on talk radio. Or maybe not listening to radio at
all.. MP3's, CD's, tapes, etc.

| If you really want to make that difference, start preaching to the
| public. Not to broadcasters. After all, as anyone who's ever worked
| in radio will tell you, there are no clients in the building. You
| have to make your sales on the street.

You guys don't care what the listeners want. Its the lowest common
denominator programming that is acceptable by whoever is buying ad time.
with a couple of minor exceptions.

And the mfgrs of mass market AM/FM radios could care less what the AM
section sounds like today. The cheaper the better. You need the extra
pennies to make the product some neon color with multiple skins, to add the
bass boost switch to the CD player built in, etc..

>in your neck of the woods?

I live in the Baltimore area and use a Drake PRN-1000 and indoor antenna for SW. WBCQ has a program on Friday afternoons (Low-Budget Radio, aka The Pan-Subgenis Project) which I would like to listen to, but signal fading and "phasing" makes it difficult.

Of course, part of the problem is that the show features a lot of amateur-made recordings; these are generally unintelligible over WBCQ even though they may sound passable if heard over FM. There are some really well-produced amateur recordings which are enjoyable (such as Eric Houg's "Internet Radio", which just came barreling out of the speaker the last time I listened to the show). Professional recordings do OK, but the more music oriented they are, the more difficult they are to listen to.

The trance/techno show that follows Low-Budget Radio is just about pointless to listen to, due to the signal quality.

Sounds to me like you could improve the odds a bit if you did some processing of your sound before delivering the show.

For Sale: Symetrix 402 Dual Digital Delay

Four units available. Like New - used only briefly in broadcast facility.
With manuals and original boxes. Asking $275 each. Reply by email, please.

"The Symetrix 402 Dual Output Delay is a 1-input, 2-output digital delay intended for acoustical alignment of distant speaker systems, video post production, and other applications requiring top-notch audio performance. In many sound systems, the 402 is necessary due to the delay caused by distance when multiple speakers are spread throughout a large room. In any multi-path situation, large or small, the different arrival times for sound arriving at the listener's ears via the main speakers and "fill" speakers can greatly reduce the audio quality of the program. The 402 allows you to delay the remote speakers to match the time it takes for the signal coming from the main speakers to reach the listener positioned near the remote speakers."

Patskywriter sez:

> i still remember his last show, where he instructed the listeners to get in the
> bathtub while he played soothing music.

...you remember the show wrong -- that was merely the final Top 40 show he (or anyone else) did on WCFL on 15 March 1976. It wasn't "soothing music" that Lujack was referring to, it was a loop of ocean sounds that WCFL used as a two-hour buffer between their Top 40 and Beautiful Music formats. Lujack was back the following day, playing BM utility announcer (cracking the mic open for only a minute per hour) for his old Top 40 salary. He continued as BM utility announcer for another few months, when it finally became obvious that (a) Lujack wasn't going to settle with the Chicago Federation of Labor for less money than he'd originally contracted for and (b) WLS needed a replacement for Fred Winston in morning drive. WLS bought Lujack's contract from WCFL, renegotiated with him for more money and plugged him in morning drive that September. (Airchecks of Lujack's last Top 40 and first BM shows at WCFL and his return to mornings on WLS can be found online at http://www.reelradio.com)...

...Lujack's last show was over the old WUBT Chicago just over a year ago...since then, he's back to retirement in Santa Fe and couldn't care less about broadcasting...

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

What was the reason that CFL changed format to (or all things) Beautiful Music?

Were they doing they that badly? Worse than LS and BBM.

Thanks!

> things) Beautiful
> Music?
>
> Were they doing they that badly? Worse than LS and BBM.

It was partially a political thing--the Chicago Federation of Labor, the station's owners, were never that comfortable with the Top 40 format. They were particularly uncomfortable during the Vietnam era, when Ken Draper was running the station and would do anti-war editorials that they didn't approve. Later, when Jeff Kamen was doing in public affairs time Pacificaesque documentaries on politics and Vietnam, the Federation got him fired. And in the mid-70s, when WLS began decisively drubbing 'CFL in the ratings (after one last spurt for 'CFL during Lujack's first days at the station and the "Last Contest" promotion) and WDHF, the first major FM Top 40 in the city, nibbled at both station's numbers, they took the drubbing as an excuse to get out--and it was a spur-of-the-moment decision by the Federation.

How spur-of-the-moment was it? Promotions had already set up a contest with Mars candies and Kiss for a high school candy-wrapper collection competition. The school with the most wrappers won a concert by Kiss at their school (and this was when Kiss was just taking off on the charts). Only a few weeks after the contest started, the format change was announced. If you listen to Lujack's beautiful music check on reelradio.com, you'll hear a promo for the contest and assurance that the station would still give away the concert.

In the end, 'CFL's attempt to beautiful music was unsuccessful--by the end of 1977, the station had morphed into MOR and had become pretty much an AC station by the time the Federation sold the station to Mutual in 1979. Mutual then put on the air the disastrous "Lifestyle Radio" format--but that's another story.

227. Newbie help requested - 'netcasting

Newsgroup: rec.radio.broadcasting
Date: 2002-01-24 17:15:59 UTC
From: AC <NOSPAMjunk@fomoco.com>
Message-ID: <u50gaflkc0ef95@corp.supernews.com>
Source record: 12389

Folks,

Hi, there. I'm hoping for lots of input on 'netcasting
for beginners. I'm proficient with HTML & ASP, but
this recording stuff is news to me.

I'm looking into the possibility of producing a short (?)
15 - 20 minute "talk show" as a promotional vehicle
for my business. The basic idea is that I can answer
listeners' questions, interview people in the industry,
etc. Obviously, this doesn't require a 'live' feed but I'd
like to restrict distribution so I get the traffic.

Problem is, I have zero experience in recording and
broadcasting over the Web, not to mention stuff like
streaming audio...unless you count using a portable
cassette deck in high schoool. Meanwhile, the bulk
of on-line instructional materials are four+ years old
and (it would seem) of little use, today.

So, I'm at a loss about where to begin. I'd appreciate
any assistance with these questions:

(1) Any on-line references you'd recommend for those
just starting out with do-it-yourself 'netcasting?

(2) For "basic" recording, what's required beyond my
computer, a decent microphone and a sound card?
Do I need a mixer? What's the bottom line on sound-
quality in DIY recording, so my source at least starts
out sounding good?

(3) I looked into some of the "package" providers (ie:
live365.com) but haven't ruled out hosting it myself.
And Clipstream's (clipstream.com) technology looks
interesting, too. Any comments on these options?

Thanks for the read. All opinions or words of wisdom
gratefully accepted.

Regards,

AC

Hi Cal:

Sure, I remember hearing you on WYSL-FM back around 1970. You were the standout air personality on that station and really did a superb job! I was at the campus radio station at Buffalo State (WSCB - AM 620), and many of our jocks loved WYSL-FM/WPHD. It was, after all, the dawn of the progressive rock FM era, and we'd never heard that type of radio! One of our jocks, in particular made a point of trying to emulate the Cal Brady "stream-of-consciousness" style of on-air presenation.

I seem to recall that Jeff Lubick was on WPHD about that time. I later worked with him at WWOL. Quite a jump for Jeff....from stoner progressive rock to country.

I also worked at WBUF-FM, but during the beautiful music era. I was there from May of 70 'til sometime in 72. I've always been grateful to Carl Spavento for giving me my first radio job.

Did you continue to do radio after WPHD?

Nick Seneca

231. Peter Gzowski (ex-CBC Radio) has died

Newsgroup: rec.radio.broadcasting
Date: 2002-01-25 14:01:29 UTC
From: be343@freenet.carleton.ca
Message-ID: <u52p9psd2s4q32@corp.supernews.com>
Source record: 12393

Taken from the CP Wire:

Peter Gzowski, a noted Canadian broadcaster best known for having been the host of CBC Radio's "Morningside" from 1983 through 1997, has died. He was 67.

Gzowski had recently been battling lung disease. Mr. Gzowski's was a smoker for 50 years before quitting in 1999.

233. Re: Buffalo Progressive Rock 70's-80's

Newsgroup: rec.radio.broadcasting
Date: 2002-01-25 14:01:37 UTC
From: "C.B." <yournewmaster@hotmail.com>
Message-ID: <u52pa1sl1mmk43@corp.supernews.com>
Source record: 12395

After WYSL/PHD went to Hartford (WHCN) (its sister station in Boston, WBCN) , then back home to Buffalo where I was P.D. for WBUF when it went progressive rock in 1975 or so....loved Carl, wonder if he's still around It was like working for "Big Guy" at WKRP ...he got messed over when some idiot bought the station (lost the G.M. slot), typically ego-new -station-owner thing, couldn't be happy being # 1 in men 18-34, went for the brass ring and lost everything,

And that my friends is what happened to so many of the original progressive rock stations.

Typically... began life as a "no listenners Muzak style operation", dead last in their market, built up by a bunch of poorly paid but dedicated kids to a respectable #4 in their Market by going AOR or Progressive, then the stations owner sells it (he's been trying to unload it for years anyway) and some new jerk buys it and decides with his brillance anmd an overpaid consultant, they can be number one in their market, and do it without those pesky- independent minded hippie kids.
2 years latter, the original AOR audience is gone, the station is sold for a loss and the "Wave" has another affiliate.

I used to do it, but I really hate consultants, they took the spunk and unpredictability out of Top 40, then AOR. They travelled the country with their stupid theories and secret formulas and made a good station get a little better number, and made it a whole lot more boring...

anyhow,

..... I got into TV (as a director) and headed to L.A. eventually....

thanks for the compliments by the way

I've lost touch with everybody from the radio daze, mmmm days

Cal

>was referring to, it was a loop of ocean sounds that WCFL used as a two-hour buffer
>between their Top 40 and Beautiful Music formats.

I was the person who programmed that "soothing music." It came from
one of my formats at TM Programming, Dallas, and was customized for
WCFL when Lew Witz was GM. The Ocean surf lasted the entire weekend
until Mayor Daly "flipped the switch" to start the "soothing music."

As I recall, the book following the change went up by about a tenth of
a point which led me to believe not many Top 40 listeners were still
around. I also recall that the head of the Federation of labor would
fall asleep during meetings even when they played Top 40.

The last moments of Top 40 were the opening of "the envelope" where
Larry was to give his endorsement to another station in the city.
Stored somewhere in my "high moments in radio" box is a copy of
Larry's last Top 40 words before the surf began.

> one of my formats at TM Programming, Dallas, and was customized for
> WCFL when Lew Witz was GM. The Ocean surf lasted the entire weekend
> until Mayor Daly "flipped the switch" to start the "soothing music."

...couldn't have -- the switch took place on a Monday (15 March 1976), not a weekend. The surf sounds lasted only two hours (5:00 to 7:00 PM)...

> As I recall, the book following the change went up by about a tenth of
> a point which led me to believe not many Top 40 listeners were still
> around.

...not quite sure about that. In December 1975, Big Tree Records reissued Suzi Quatro's British #1 single from '73, "Can the Can" (which stiffed here when Bell released it that year). WCFL was, as far as I've been able to see, the only notable station in the U.S. to play the reissue, and that record's path on the Billboard Hot 100 (reached the mid-40s nationally, IIRC) largely echoed by two weeks its pattern on WCFL's playlist (added January 24, peaked at #30, dropped February 21)...

> I also recall that the head of the Federation of labor would
> fall asleep during meetings even when they played Top 40.

...William Lee was in that post within a few years of Ed Nockels' death (circa '38), so after 30+ years I would imagine he wasn't the most energetic guy in the room :-) ...however, as I understand it, dropping Top 40 was more the board's idea than Lee's himself, as Lee still thought (until the very end) that WCFL could still be a major money maker for the Federation. As it turned out, Lew Witz wasn't quite up to the task and Lee was given the order by the board to unload the station (which was done with the help of Mayor Daley and one of WGN's ex-GMs, IIRC)...

> The last moments of Top 40 were the opening of "the envelope" where
> Larry was to give his endorsement to another station in the city.

...actually, he never said it was going to be another station in Chicago that he would endorse, which turned out to be the gag -- he wound up endorsing KHJ, which has never been audible in Chicago. The very last Top 40 recording played, immediately afterwards, was "Life is a rock" by Reunion (customised -- "...but 'CFL rolled me"). Then came the legal ID and the surf sounds, a few seconds into which Lujack yelled, "Now, get off your clothes and jump in the tub!"...

...BTW, while you may have customised the format for WCFL, they still weren't sure how to program it -- during Lujack's first hour the following day, there were two versions, separated by only two other pieces, of "What kind of fool am I?"...

Hey Cal,
I remember those days. I came on board at WYSL-FM in 1969 as the all-night weekend guy and then there was this big mass firing and you and I were the only two jocks for what seemed like forever -- I was on for 6 hours and then you for 6 and back to me for 6 then . . . fun times. Then you hired me on at WBUF after which I took off for California.
But you know that because we were both working blocks apart from each other on Melrose Ave. in Hollywood. Today I run a media oriented computer lab at California State University, Long Beach.

There was a syndicated New Age music show on the air awhile back....hosted by someone named "Forrest"...(???)

There was another called something like "Musical Star Streams" (or something like that).

It was aired on our local CBS FM here back in the 80's(?)

Anyone know anything about them?

Is it still being produced? Is it on the air anywhere?

Is it available online anywhere?

Thanks for your help!

Exactly, he was never going to endorse another Chicago station. I do remember a party to celebrate the first full book. We were pleased that the numbers didn't go down with a complete and totally incompatible format change. I seem to recall an over all "jump" of 3.3 to 3.4. That was a very long time ago. I'll have to do some research to get the exact numbers.

>...BTW, while you may have customised the format for WCFL, they still weren't sure how >to program it -- during Lujack's first hour the following day, there were two versions, >separated by only two other pieces, of "What kind of fool am I?"...

That was always the problem with customizing an existing tape format for a station. There were 3 or 4 categories of music on separate tape machines. By customizing it the way we did you lose the ability to control title repetition because more than one version - different tempo or vocal - was in the library protected by a numbering system. When a station varied from the schedule of tapes all that went down the drain. Normally we would have had 3 categories but added another for WCFL. The combinations couldn't work without reprogramming the original format which was on almost 150 stations. The original was called the TM 1000 format. The TM 2000 format was matched flow with complete segments on a single reel. It used 3 machines. 2 for the alternating segments and one for fill. Same as Schulke.

With today's digital systems we could have done a better job because the system wouldn't have had to be linear. The other option might have been to use IGM Instacarts. That would have been an early version of non-linear programming. Too expensive.

While I was thrilled to have WCFL as an affiliate I never believed it could achieve anything more than cost reduction. It was too sterile. It was a constant battle to keep it sounding decent. The station was in Chicago. We were in Dallas. We had a high priced jock working off a contract and making fun of the whole thing. That turned out to be the most entertaining part of the whole thing. Just another part of my career learning path.

I believe you're right about the two hours of surf. I remember another station doing an entire weekend of it. You're also right about the

timing of the flip of the switch. Either way, the switch over was a Monday.

Now you have my curiosity up. I'll have to locate the Operations Manager of TM at the time and get the start time of the surf. I have no idea where he is.

Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the plots or
themes of OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
```

Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. What ever happened to the person that played [insert character] on [insert name of show]?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. Where can I buy 1970s CBS Radio Mystery Theater programs?
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories,

comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html/

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

A comparative price chart, listing many vendors, is available at the www.old-time.com site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

Just to get a little perspective in this
controversy, copyrights do expire. Under the old
copyright law, a copyright was good for 28 years
from the date of first publication, renewable for
another 28 years, for a total of 56. Under the 1976
act, those copyrights were extended to 75 years,
provided they were renewed. Copyrights under the new
law, which took effect on 1 January 1978, are good
for the life of the author plus 50 years. Copyrights
on anonymous works, works made for hire, etc. are
good for 75 years after first publication.

So, since otr has just barely been around for 75
years, little or none of it is in the public domain
yet by reason of having been around for a long time.
The question of what constitutes publication, and
the fact that sound recordings could not be
independently copyrighted until the new law took
effect add additional complications.

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

The days of radio being ruled by the artisans is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors

on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.

The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.

Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!

Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!

You need to keep in mind that some types of stations are more likely to air OTR than others. If your local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog)

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

David Hassell maintains a growing selection of program summaries at
http://members.aol.com/DavidLHsl/otr/otrlist.html

Also check Frank Passage's logs at the old-time WWW site; most
contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only
the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more
information?

A16. Yes, there are several WWW sites. Each site contains different
information, so you might want to visit them all. The major OTR WWW
sites all have links or pointers to each other, so you can explore
many topical areas within old time radio. Good places to start
exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

A fairly lengthy list of WWW sites with some kind of OTR affiliation
is maintained at www.pe.net/~rnovak/jack.htm

An excellent database of OTR-related WWW sites, with an explanation
of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the
best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very
popular and freely available electronic newsletter, delivered
nightly. Its purpose is to foster general discussions about the hobby
of collecting, preserving and listening to OTR. To subscribe, send an
email

TO: old.time.radio-request@oldradio.net
SUBJECT: subscribe
(The body of the message is ignored)

Q18. What ever happened to the person that played [insert character]
on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home
pages of several well-known OTR personalities. Also check the Where
Are They Now pages at www.440int.com.

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: vintage@infohouse.com (Andy Blatt)

I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax

machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or

video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating

alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish (lodeston@bluemarble.net) also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70s, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-'80s. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono news
group, created by Bill Robie. A pointer to his FAQ may also be found
at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) -
Focuses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that) - Has
a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious /
professional researcher. It can be accessed through the old-time WWW
site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios.

Some readers have had good success with the Select-A-Tenna antenna
advertised in several magazines, and the Grove Catalog. The S-A-T
seems to be rather directional, and may eliminate off-axis
interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Some pointers to instructions on how to build
them are at http://www.old-time.com. Also, Dan Hughes
(dan@soltec.net) left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, visit my website
at http://members.soltec.net/~dan

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: www.artc.org
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop http://www.mrtw.org/mrtw

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic file server. At present, it can handle only a few files. If you have ONLY email access to the Internet, and want more information on what is available by email, send an email in EXACTLY this format:

To: files@old-time.com
Subject: send help.otr

do NOT put anything in the body of the message (it won't be read)

Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system. There is also a news group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR shows (news groups are notoriously inefficient at transferring large binary files, however).

You can select from many moderate-length soundbytes at Jerry Haendiges' Preview Listening Lounge at www.otrsite.com/ra/preview.html
---

Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

They have two catalogs: one for audio and one for
video. Cassette albums are available in a large
number of different styles, sizes and capacities.
The 8-cassette albums I use are CPCN.4+4M/WHT in
white and CPCN.4+4M/RBLU in royal blue. Outside
dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit
well on a bookshelf. This model also seems to cost
less per cassette than any of the other models,
though logic might lead you to the conclusion that
the larger capacity ones would cost less.
[Polyline has a website at www.polylinecorp.com, and their new
address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

Q27. All this new software is a bit difficult for me to use, as I am
blind. Can you give me any assistance on how to read your page?

A27. Yes. Although my WWW page is best viewed with Netscape or
Microsoft Explorer, most pages render well with LYNX and associated
reader software.

Blind visitors who depend on DOS-based software to access the net, or
who use a reading program to audibly display their computer's output
might be interested in a program called "Nettamer". The Nettamer home
page is at www.nettamer.net/

Q28. I am interested in re-creating some OTR drama. Where can I get
scripts?

A28. Check your local or national OTR clubs. Many have a "print
library" that includes scripts. You can also point your browser at
the University of Maryland's script page, at
www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

One excellent source is the book. "One Hundred Non-Royalty
Radio Plays" compiled by William Kozlenko, Greenberg Publ of
NYC 1941. It's certainly out of print now, but many libraries
would have a copy. I bought mine at a used book store a few
years ago. The 100 radio plays in the book include adventure,
mystery, fantasy, comedy and historical. Most were originally
produced on educational stations in the 30s. Authors include
Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages
dedicated to on-line OTR scripts at http://www.genericradio.com
---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970s & early '80s when most collectors traded on open reel tapes which were quarter-track mono -- there were different (separate) programs on left & right channels. This allowed 6 hours of shows to be placed on one reel. Unfortunately, many collectors would duplicate L & R shows simultaneously. Depending on the quality of the equipment (and its condition) it was common for one program to bleed into the opposite channel...especially if the collector was careless and allowed over-modulation.

Crosstalk results when a tape is recorded (or played back) on a machine with mis-aligned tape heads. It can also occur when trying to record over a 1/2 track recording with a 1/4 track machine with dirty or mis-aligned erase head. You usually will hear another program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or track at a time. As for crosstalk, make certain your machines are kept in proper alignment. Use a high quality BULK ERASER if you re-use old tapes... this is especially true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws once they are there.

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please get software and instructions from your favorite Internet Service Provider or shareware/freeware software site, or connect to www.old-time.com/irc.html for basic instructions.

Q31. I'm looking for copies of old "CBS Mystery Theatre" radio programs, primarily from the 1970s era. Does anyone know where I can call or write to obtain such items? I'd like to purchase a complete set if possible.

A31. Jack French (OTRpiano@erols.com) left the following information:

You most certainly do not want a complete set of this series, because you couldn't afford it. There were 2,970 shows aired so even if you could find them for a buck an episode, you'd have to cough up three Gs. The series ran from 1-6-74 to 12-31-82 and since it came so late in radio history, every episode was recorded by somebody. All episodes are still copyrighted, and CBS enforces their copyrights. Therefore no dealer is going to list them, and collectors are reluctant to sell or rent them. Your only hope is to find some way to get copies in a fashion not in violation of copyright law.

Editor's note: By my count, there were about 1400 different CBSRMT shows. The rest may be duplicates.

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since many news servers ignore alt.groups, you may need to contact your ISP to get that news group listed locally. See www.old-time.com/newsgroups.html for more information. Also try www.deja.com to sample some of the messages.

Q33. OTR network shows were usually heard at the same local time, no matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show from the studio to transmitter sites. The show was done live at least twice - once for the East coast, once for the West. After Bing Crosby spearheaded the introduction of recorded shows (about 1948), the East coast show was recorded for later telephone transmission to the West coast.

Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed on pieces of processed dead tree) written about what we now call "OTR". See answers A7 and A37. If you would like to contribute an original article about one or more facets of OTR, many of the webmasters of on-line OTR sites would be happy to consider archiving

it.

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
* Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
* Radio Classics Live, Brockton MA (May)
* Annual Lum and Abner Society Convention (June)
* REPS Radio Showcase (June)
* Friends of Old-Time Radio (October)
* SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will

answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material. Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.

Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees,

Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter. You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)

It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money than with the entity which has done more for the physical preservation of broadcasting history than any other organization in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless to say, you may not make any commercial use of the recording in whole or in part -- and you had to sign a contract to that effect in order to get access to it. Commercial permissions are a whole separate case.

Like I said, this is not for everyone -- but if you're working on a serious project, it can be a valuable resource for getting access to material that simply isn't available anywhere else and which is unlikely ever to be released on the commercial market.

Elizabeth

Only one I know of is a show called "Echoes" hosted by John DiLiberto. It
camoes from Public Radio Intrnational (not NPR).

250. The new Star 107.3 will burn out.

Newsgroup: rec.radio.broadcasting
Date: 2002-01-28 13:42:46 UTC
From: 240_Robert <sean_ingram@tds.net>

This so-called locally-owned/operated may play the best music from the 80s on the weekend, nevertheless the radio personalities (formerly known as Djs) ignore requests that are not on their assigned playlist.

However- someone will call and ask for a request that is not on the playlist and that radio station WILL Play It!! Sounds like discriminatory favoritism towards the listening audience.

They don't even know their music.
Herbie Hancock's "Rock - It" came out in the 80's not the 1990s.

How can a radio station stay on the air by avoiding requests by the audience.

Hey, how about publishing the playlist for that day in the week end paper and then listeners won't have to be treated in a communist-like attitude.

I have called for the song, "Voices That Care"by the group "Voices That Care" (remember in 1991 during the Gulf War this song was created and got nationally recognized and always played.

It should also be played for those over in Afghanistan fighting the war on Terrorism.

Not one of (listed below) these stations EVEN remembers that song.
- V1037
-Q-94
-Star 107.3

I even quoted the chorus to jog their memory.....
Nothing.

This goes to show that radio stations DO NOT care about their listeners....just the MONEY and the chance to be an "ASS on the AIR!!"

I have the song.

I will record it onto another tape and take it to each radio station and get them to play it- instead of that "What's Going On" song.

That is why I choose to avoid listening to these "Top-40 radio station wannabes"

HEY!!
Dick Clark remembers that song!
Kasey Kasem remembers that song!

What's your problem?!!

Folks from outside of the area where CBC radio or TV can be monitored
probably have no idea of his contribution to the Canadian culture. I was
lucky enough to have spent 15 miles from the border for 17 years. I
enjoyed him ever so much. I've missed him for over almost 3 years and am
saddened that I'll not see/hear him again when visiting the area.

One thing I noticed on all of the airchecks I have heard of the switch was the incredible amount of compression and other processing that was in the signal. Seemed to make the smooth and easy sounds of the new format...a tad too strident....

Was any attempt to retool the station from the ground up...?

RP

255. The Great Gary Dee!

Newsgroup: rec.radio.broadcasting
Date: 2002-01-28 13:43:02 UTC
From: accounts@n1dk.com
Message-ID: <u5alb6t5kebge1@corp.supernews.com>
Source record: 12317

February 14th, 2002 will mark the 30th anniversary of Gary Dee's premier on The Cleveland Radio airwaves, and thus forever changing the way this city looked at itself.

Gary Dee Played a major role in the transformation of Cleveland, Ohio from what was wrong, to what is right (IMHO).

This is a reminder to mark your calendar for Sunday February 3rd, 2002 at 1600 UTC (11:00 AM EST). On that day during the streaming netcast CyberShortwave, we will be exploring the life and times of the most dynamic and controversial personality to ever grace the airwaves of Cleveland, Ohio - The Great Gary Dee!

There are several methods that you can use to listen to CyberShortwave: First, is to go directly to http://www.live365.com/stations/10164 (Don't forget to make CyberShortwave one of your presets!)

A shortcut would be set your Winamp or Real Player "Open Location" (CTRL-L) to http://66.28.48.190:9020 (NOT in your web browser)

Another way is to go to http://www.live365.com and do a search for CyberShortwave

Currently the CyberShortwave Netcast from January 20th is running 24/7 so you can get your bookmarks and presets ready ahead of time. Don't wait until air time to set up your streaming audio player. Streaming audio technology is not an exact science. The first airing of the Gary Dee Special will be live, and we usually experience some dropouts and rebuffering, so I record and replay the netcast on a regular basis. If you miss the first airing, you will be able to hear the replay beginning about 3 hours after the netcast ends.

Another thing we do during the Live netcast is meet in Internet Relay Chat room #cybershortwave via a Starchat server, so you may want to get your IRC software up to date. We'll be looking for your comments about Gary Dee at that time.

For IRC information:
http://www.mirc.com/

The Gary Dee Tribute Page:
http://www.geocities.com/n1dkirby/index.html

Keep watching The Gary Dee Update page for any last minute changes

The Gary Dee Update Page:
http://geocities.com/n1dkirby/update.html

Your comments about Gary Dee are welcomed at:
garydee@n1dk.com
I will try to read as many e-mails as I can during the live netcast.

Additional information is on my main web page:
http://www.n1dk.com

Joe Frank v7.2u
Frequently Asked Questions 9/01

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr, rec.radio.broadcasting, rec.radio.noncomm, rec.answers and news.answers. This document was created by Richard Looney with assistance from many Joe Frank fans who are net.citizens. The latest version is also available on the web at http://wfmu.org/JF/joe_fran.html .

Additional information is welcome - please send to richard@wunderland.com .

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about CDs, video, writings and Internet?

4. Is he still on the radio?

5. Are tapes or CDs of the radio programs available?

---

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a different Joe Frank (Carollo) was responsible for those top-40 hits from the early 1970s. Joe Frank is best known for the weekly radio show called "Work In Progress" he created in the studios of KCRW, Santa Monica between 1986 and 1992. His programs are picked up by some of the more progressive public radio stations, since KCRW made it available 'on the satellite' via SASS.

The following biography from KCRW was dated April 1990:

Joe Frank was born in Strasbourg, France of a Viennese mother and a Polish father. His family immigrated to New York City where Frank was raised and educated. Frank, who received a B.A. from Hofstra University, attended the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches,

and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

Starting in 1993, Joe changed the title of his weekly show to In The Dark. In early 1995 it was announced that Joe Frank would be 'taking a break' from In The Dark, and the program was removed from the KCRW schedule. Joe Frank began a new program called Somewhere Out There on KCRW in January 1996. The shows that year were all monologues, but afterwards, unlike previously, recycling of his old material became common. In August 1997 Joe announced his departure from radio. In 1999 he returned with a new series, The Other Side, which is more reality-based, more confessional, a window into Joe's life (as well as others). A cornerstone of this series is "Karma" -- its story spills over into many other programs. About the time of "Karma," The Other Side programs invariably began to contain excerpts from the lectures of Buddhist teacher Jack Kornfield.

2. What has he done? Chronological List of Joe Frank's radio programs

This listing began as the Work In Progress Program List received from
KCRW in 1987. That list was then augmented by the author of this FAQ
as new shows were broadcast. The productions were originally listed by
KCRW as either monologues (M), dramas (D), or both (MD). This FAQ continues
that tradition, but simplifies it such that programs with a single vocalist
are listed as monologues (performed by Joe Frank unless noted otherwise)
and programs featuring multiple performers are marked as dramas.

Additional information augments this listing:

[musical artist and title is noted between square brackets]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

>>> various NPR Productions <<<

1978

The 80 Yard Run
monologue - one hour
{ KCRW's program list placed this show in the middle of the 1979 entries,
but a KCRW announcer's introduction to this program claimed this to
be Joe Frank's very first show, initially broadcast in 1978. }

1979

A Call in the Night

drama - one hour
cast: Beth Dixon, Eric Sears, Arthur Miller, Bernie Mantell, Irene
Wagner & Joe Frank

Arena

drama - one hour
cast: Annalee Jefferies, Arthur Miller, Bernie Mantell, Rosemary
Foley, Eric Sears, Joe & Tim Jerome

The Death of Trotsky

monolog - one hour
[Miles Davis, "Solea", from "Sketches of Spain"]
{ the 'nada poem' can also be found in Ernest Hemingway's
"A Clean, Well-Lighted Place" }

'Til You're Gone

drama - one hour
cast: Arthur Miller, Robin Bartlette, Tim Jerome, Bernie Mantell,
Irene Wagner, Eric Sears, Rosemary Foley, David St. James, Marcel
Rosenblatt & Joe Frank

Summer Notes

drama - one hour
cast: Tim Jerome, Beth Dixon, Arthur Miller, Lester Nafzger, Rosemary Foley, Bernie Mantell, Fran Dorn, David St. James & Joe Frank

1980

The Rare Recording

drama - half hour
cast: Bernie Mantell, Eric Sears, Arthur Miller, Irene Wagner, F. Murray Abraham, Christina Moore & Joe Frank

Joe Frank in Concert

monolog - half hour
{ live segments recorded at Bushido, a gallery in NYC }

1982

The Decline of Spengler

drama - one hour
cast: Joe Frank, Barbara Sohmers, Joseph Palmieri, Lester Nafzger, Irene Wagner, Tim Jerome, Leslie Katz (or Cass), David Rapkin, Rosemary Foley, Charles Potter, Arthur Miller & Brother Theodore
[Steve Reich, from "Music for Eighteen Musicians"]

Lies

drama - one hour

Anthology of Love

drama - one hour
cast: Part 1 - Tim Jerome & Beth Dixon, Part 2 - Tim Jerome & Arthur Miller

Jerry's World

drama - 1.5 hours
cast: Jerry Klein, Mannie Klein, and Meryl
{ During a KPFA fundraiser telephone interview Joe was aked who Jerry was, and what it was all about. His response was "Jerry was a man who lived in New York City. He lived in an apartment, alone and was very depressed; and what he did was record his phone conversations, with everybody, for years. and when people came over to visit at his apartment he'd record them, too. He bacame so depressed he couldn't leave his apartment. His brother Mannie (who you also hear in that show) would come to his place with food, to keep him alive; and ultimately he died, a relatively young man in his early forties, of a brain aneurysm. After he died, his brother had all these tapes, hundreds of tapes of these phone conversations and he knew that his brother Jerry had been a fan of my program and he thought 'Well, maybe Joe can use some of this material maybe he'll put it on the air.' So he sent me a excerpts ... and I found this material very compelling and decided to make a radio series based on those recordings. So what you hear in 'Jerry's World' is Jerry, who is now dead, and his brother Mannie who very much admired him... and this girlfriend earlier of Jerry and then of Mannie and now she was going out on her own, and her name was Meryl, and there was another woman involved, but these were all tapes of real conversations and real life being played out from various times in the life of a man who died rather tragically." }

Loner

drama - half hour
{ vocalists unidentified }

The Last Run

drama - half hour
cast: David Cross, Ryan Cutrona & Joe Frank

Margarita

one hour

3. How about CDs, video, writing and Internet? Listing of non-radio work

Joe Frank on screen:

A short video was presented at the Santa Monica Public Library
in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a
pay phone and making the calls heard in "Thank You, You're Beautiful",
and material from "Pretender", including the scene of Joe with the
pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe
did a short for CBS for a late-night summer-replacement show called 'The
Midnight Hour'. The piece was 'Memories', a re-working of a WIP story.
It aired (as I recall) late August or early September 1990, on the final
night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station,
KCET, showing a montage of urban images (among which is Joe at the
microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series,
released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe provided the voice of the computer in "Galaxy Quest" (1999).

He also had a small role (just a few lines)
in "The Game" (a 1997 film), and has reportedly
provided narration for the following
cable television documentary programs:

"Wild Rescues" on Animal Planet
"Conspiracies" on A&E
"Ends of the Earth" on the Learning Channel
"Hurricane X" on the Discovery channel

Joe Frank in print:

An article about Joe called "Radio Noir", by Jamie Diamond, can be found
in the Los Angeles Times Magazine of Sunday, November 22, 1987. The
Wall Street Journal profiled him in an article in their March 15, 1988

edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more verbiage (generally quite favorable) appeared in the wake of the release of his book of short stories, _The Queen of Puerto Rico_, which was published in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night
Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter has similarities to "When She's Asleep, She Looks like an Angel" }

Joe Frank on disk - commercial recordings:

Commercial Recor4dings:

"Strange Cargo Hinterland" is a 1995 William Orbit production.
The track "Montok Point" contains some brief monologues by Joe Frank.

The group Brazzaville released a "2002" CD in 1998 which features Joe on the "Ocean" track.

Other Recordings:
Some CDs issued on the European Moonraker label contain pieces of Joe Frank programs.

The "Epilogue" on their First Sampler (Moonraker 050) is a piece from "Smile"
The "Segue" and the "Epilogue" on their Second Sampler (Moonraker 100) are from "A Tour of the City"

And all his shows are available on CD from KCRW (see below).

Joe Frank Online:

KCRW's web page, not much text, but many links to shows in RealAudio:
http://www.kcrw.org/cgi-bin/db/kcrw.pl?tmplt_type=program&show_code=jf

http://www.joefrank.net/

Pointers to many more sites are available at Joe Frank Link Central:
http://community-2.webtv.net/turbocrazed/JOEFRANKLINKCENTRAL/

The online magazine "Salon" featured an article by Susan Emerling in March 2000, "Public Radio's Bad Dream":
http://www.salon.com/ent/feature/2000/03/07/joe_frank/index.html

4. Is he still on the radio?

Hear Joe Frank on the following stations:

KCRW 89.9 FM http://www.kcrw.org
Santa Monica College
Santa Monica, California
Sundays at 11AM, repeated Saturday at 7PM

WFMU 91.1 FM http://wfmu.org
WXHD-FM, 90.1
East Orange, New Jersey
Thursdays at 7PM

KDVS 90.3 FM http://www.kdvs.org
Davis, California
Saturdays at 11PM

KPFA 94.1 FM http://www.kpfa.org
Berkeley, California
Sundays at 7PM

5. Are tapes or CDs of the radio programs available?

Joe Frank's programs are available on CD from KCRW
(they no longer do cassette tapes). Write the station for
more information at:

KCRW
1900 Pico Blvd, Santa Monica, CA 90405
attn: Jennifer Ferro.

or call 310-450-5183 or 800-392-8855

Some of the programs are available on KCRW's Joe Frank
web page (http://www.kcrw.org/c/jfrank/jfrank.html) in the
Real Audio format.

Hi, can anyone help me with my settings for my 8200?
I've tried everything to get a nice loud sound for CHR,
and all i get is a flat muddy sound.

Tony

Was the thousands of line in your plug\spam, which adds up to 92K, really necessary? As for your website, 32 bucks for a simple "bug" kit which could be knocked together for under 5 bucks? I don't think many people on this NG will be placing orders somehow.

Dave

My question is, "How can a station stay on the air that regularly plays requests?"

Let's take an average mid-tier Los Angeles station: Cume of about 900,000 and average listenership of around 60,000 persons at any moment (AQH). Let's say they take 3 requests an hour. From 6 AM to 7 PM, that is roughly 40 requests and about 25% of the total music played. OK so far?

Why would a station put a quarter of its music in the hands of people whose only interest is having their favorite song played for them? The station's interest is in playing as close to everyone's favorite songs all the time, not in satisfying the listeners one by one. Why would the station put the overall texture and feel of the station be upset by the intrusion of songs that are only played because one listener out of 900 thousand wanted to hear each of them?

At that rate, it would take a few decades to play everyone's favorite... and often obscure... song.

And that is without taking into account that requests generally violate song rotational guidelines and force the average, non-calling listener to often hear the same tune over and over at the same time every day.

All this is why radio stations assemble groups of listeners to find out which songs are generally liked and which ones are only of interest to a few people. The ones that a few like and the majority dislikes are not played, ever.

Perhaps an analogy would be appropriate: would you expect a New York City TV station to cover the news form Ishpeming, Michigan, on a daily basis just because one viewer called in and said that news from that desolate location was of importance to them? Same answer goes for songs.

Of course, if some people on this newsgroup had a decent broadband IP
they could download 92K in the wink of an eye. It would be a
non-issue...as it is for most of us.

[Note: There are still plenty - PLENTY - of people who can't get DSL
or cable *or* any kind of decent broadband connection. I'm on telco
DSL because nothing else is available out of the CO that serves me. But
size of the post is not really the issue... if I'd known the original
post was going to generate a flamefest, I wouldn't have let it through to
rec.radio.broadcasting... jeez, guys.. chill out... **SJS, r.r.b moderator]

I"m in suburban Chicago, and DSL is not available in my location.
Neither is Cable Internet. And the satellite internet purveyors have
withdrawn from this area, opting for DSL instead.

So the issue is often not that some people do or do not have
broadband IP, but whether such is even available to them. Even in
and around big cities.

Hi all,
I've just bought a Aphex domintor for infront of my 8200.
Does anyone here on this group have experience with the
Aphex? If so, can you give me some pointers?
I need a help with setting it. I find the sound
I'm getting is a little to much mid.

Any help would be greatly appriciated....

Tony

Another thing to consider is that news servers are configured to
store a set amount of space on a hard drive. the larger the posts, the
quicker the messages fall off the other end, making it hard for people
who can't check a news group every day. Its also considered bad manners
to post huge files on non binary news groups, and some ISP's will pull
your account if they get a complaint.

List your web site in your sig file. Mention it in small posts, or
respond if someone asks about any of your items by telling them you may
be able to help. If you piss off too many people, some will complain to
your ISP, while others will just kill filter you. Do what you want, but

only people who like or trust you will deal with you.

The person who was complaining about downloading a whopping 92K of data
must be running a 14,400 modem. Seems like there's more important things
to fuss about.

Hey Gary -- I live in a rural area on a bayou about an hour south of New Orleans- real cajun country. We have no cable Internet, but the small local phone company is now beginning to offer DSL. In your post, though, you state that satellite Internet purveyors have withdrawn from your area. So go to Chicago and get a satellite system of whichever brand or service you want. We have no sellers of such systems right here, so I would have to go to new Orleans itself to buy a system and set up service. But you can receive satellite Internet service just about anywhere you can get direct broadcast satellite TV. You need only a direct view of the southern sky. There's no need for you to settle for dialup. I'm using dialup right now and we'll be switching soon. Right now we're just trying to figure out what the better value would be for us- satellite, or DSL. Either way, we can then drop our dedicated phone line. We have a fax machine, but we don't use it often and it would be fine on one of our other 2 lines (we have a kid's line also). So Gary, just because you can't get broadband service by cable modem or DSL, there's no reason why you can't go to the city, purchase a (my recommendation would be two-way) satellite system. You don't have to settle for dialup, dude. We won't be- not for much longer, that is! Peace and Happy Mardi Gras.

102.5 Haven FM, the new and only local commercial radio station in Pembrokeshire, Wales is looking to recruit an experienced Sales Manager and three Sales Executives. We want to hear from motivated, team-players who recognise the potential of a market currently unserved by local radio or a daily local newspaper.
102.5 Haven FM's area includes the historic towns of Pembroke, Tenby and St Davids, beautiful sandy beaches and the outstanding natural beauty of the Pembrokeshire Coast National Park . It is a great place to work and you'll be an important part of a close-knit team in our locally owned and managed radio station.
102.5 Haven FM launches in the Summer, so send your CV by Feb 12th to Keri Jones, Managing Director, 102.5 Haven FM, St Agathas, The Esplanade, Tenby, Wales SA70 7DU or call 01834 849086 for a confidential chat or email havenfm107@aol.com

You seem to imply that most people have broadband, I don't think so. I don't particularly care about spam or plugs on NGs, and some have interesting links. The point here is 92K of unnecessary padding which for many people is a pain, it may as well have been a binary. I am lucky enough to have had broadband for the last couple of months, but not everyone is as fortunate. As for the website, these organisations take standard oscillator circuits straight out of books or off the web, knock up a pcb, throw in a few components and an instruction sheet, call them "bugs" and charge a small fortune.

Nice thought. But the satellite carrier would not accept the
subscription. What a lot of people don't know, and the satellite
carriers don't tell you, is, that they meter your usage with
satellite. And if you download a lot of material, or upload a lot of
material, they clip your bandwidth to slow modem speeds. So in the
end, there is no gain. And you're stuck with dialup speeds, whether
you get dialup or not.

> We have no sellers of such systems right here, so I would have to go to new

Whether you can receive it is one thing. Whether they will accept
subscription is another matter. Direct TV is the carrier I tried to
connect to. They denied service in favor of their own local DSL, in
conjunction with Earthlink. Unfortunately, I"m outside of DSL
radius. No DSL carrier, including local exchange, serves where I am.

Have ADSL here and when you go back to using a dial-up (when I travel
with the notebook) it's pretty frustrating. Good thing, just like we
used to use 9,600 and 14,400....in a few years it'll be a moot point for
all of us.
Now...is there some way to avoid the advertising pop-ups..now those are
a bite!

True enough, there are far more important things in life to worry about, I trust you will now go and read every word of that 92K won't you? If it was 92K of useful info I doubt most people would have been too worried about it.

280. Voice-tracking: A threat to local / natl' security?

Newsgroup: rec.radio.broadcasting
Date: 2002-01-30 02:51:17 UTC

VT: a threat to Natl' Security?

If you feel, as I do, that automation and VT'ing could be a threat to the public safety of your local community and/or national security, read on:

I encourage you to forward this letter to your representative, especially if he/she is on the Telecommunications Subcommittee. [You can find out if your Congressman is on this committee at the following site: http://energycommerce.house.gov/107/members/timembers.htm]

Do NOT send this via email; customize it, print it, sign it, and snail-mail it. Much more effective that way.

Dave Chicago
==========

Representative _____,

I am a long-time professional of the radio broadcasting industry, from (YEAR) to the present. As you are a member of the Subcommittee on Telecommunications, I would like to bring something to your attention that could be of interest to our continued national security.

Over the last few years, many radio stations owned by large broadcasting chains have started using "voice-tracking" technology to automate their radio stations during the evening and overnight hours. Voice-tracking ("VT") allows a station to pre-record announcer breaks, allowing for an airshift that is completely automated, and effectively cost-free. The breaks are recorded either in-house, or remotely in another city, and delivered by a high-speed digital network.

Voice-tracking does make good business sense; a single radio announcer in one market can record the breaks for radio stations in one or more cities in a very short amount of time. The breaks are meant to sound "local" to those markets, and are usually quite effective in that regard. (And, quite often, stations now use VT technology to automate their stations beyond just the nighttime hours, for up to 18 hours a day.)

However, the first and primary mission of a radio station's existence should be to serve the community interest. A station that is voice-tracked from 7PM to 6AM cannot effectively broadcast warnings of interest to the local community. Quite often, an entire chain of local stations is automated from 7PM to 6AM, with no one in the building. In many (if not most) markets, a sheer majority of the local radio stations are simply unable to broadcast timely warnings concerning tornadoes, derailed chemical tank cars, or even terrorist activities. There is simply no one in the building to do so; by the time that someone does arrive, the damage will have been done.

Moreover, the technology employed by voice-tracking allows for an afternoon announcer in, say, Chicago to sound as if he is broadcasting live from (INSERT MARKET IN YOUR AREA) even though all the breaks were recorded the previous day before noon, in a city hundreds of miles away. To sound as local as possible is the intent, and danger, of Voice-tracking. Local citizens are led to believe that they have a local, live, viable source of information; their reliance on this leaves them with something far worse than no information at all. (The Emergency Alert System, the recent replacement for EBS, is not, in my opinion and experience, up to the task of disseminating urgent, immediate, local information.)

I am still in the employ of (Infinity, Entercom, Clear Channel Radio); it is a wonderful company, and I have been with them for _____ years. In any business, down-sizing and cost-cutting are often quite necessary, especially in the current economic climate. However, the corporations that own the lion's share of our nation's radio stations have allowed their need to maximize the bottom line to obscure radio's first and primary role: to serve the interests of its community of license. The ability of a radio station to immediately disseminate vital local information to the listener, whether in the home, office, or auto should be more than just a marketing tool; it should underpin the standards upon which we grant broadcast licenses.

Sooner or later, voice-track technology could quite conceivably cause harm to the general public, and may cost lives. Indeed, it is not inconceivable that those who have an interest in further harming our country could try to take advantage of this weak link in our information chain.

Sincerely,

281. Re: Voice-tracking: A threat to local / natl' security?

In article <u5ent5ardbrr08@corp.supernews.com>, davechicago@aol.com
says...
> VT: a threat to Natl' Security?
>
> If you feel, as I do, that automation and VT'ing could be a threat to the
> public safety of your local community and/or national security, read on:
In the 60's and 70's it was automation, 80's and 90's was satellite
and now it's voice tracking. It's more a question of job security than
national security.
If the EANS stuff is hooked up correctly, the emergency alerts will
be broadcast automatically. Of course, that's a big if. I heard it in
action once on an automated station in Corpus Christi delivering weather
warnings and in that case it worked great. (It sounded stupid but got
the message out.)
Give credit to the listeners. If something is going on they know
where to tune for "News and official information." In and around major
markets there is usually one or more stations equipped to deal with this
stuff. Look at the number of stations that broke format and/or
simulcast during the 9/11 attacks. They didn't have to do it, but they
reacted as they should in an emergency.
Small markets are probably screwed over. To be quite honest many
Small market stations have the lowest-common-denominator-disc-jockey-
wanna-be working an air shift, have little if any backup staff and would
be useless in an emergency situation anyway.
No, I don't like voice-tracking and I'm not fond of satellite program
delivery or automation. But they're all here and are not going away.
For the most part, listeners don't care if the announcer is next door or
in the next state as long as the tunes or talkshow or whatever keep
coming out of the radio.
The license says "serve the public" but is very non-specific on how
the public should be served. If the target audience wants music that's
serving the public -- in addition to whatever the requirement is now for
"public affairs" type programming which is buried in overnights or
Sunday mornings.
Radio is a business. If a station doesn't make money it goes off the
air. Many stations would go silent if forced to pay an air staff 24-
hours a day. Even the conglomerates would have problems managing the
huge increase in payroll. If voice-tracking and the like was eliminated
you might find more jobs, but the pay would be minimum wage, a number of
stations would sign off or continuously change ownership because they
could never be profitable.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

WCBN Fun-Razor starts Feb 12 - tune in now and tune in then

284. Sixties Channel on XM Radio

Newsgroup: rec.radio.broadcasting
Date: 2002-01-30 16:45:40 UTC
From: kentaur@aol.comnospam
Message-ID: <u5g8pk12jiti66@corp.supernews.com>
Source record: 12346

(As a background, I bought an XM radio for my car in early November, 2001. Since then, it's been a boon to my commute, and came in handy during a family drive from Los Angeles to Houston, Texas. One of the channels is exclusively music from the 1960s, presented in a form as Top 40 radio was then, complete with jingles, promos, and classic commercials of the era.)

I continue to be pleasantly amazed at the large and varied playlist offered on this channel. It truly does feel like I've been listening to a sixties Top 40 station from that era, sans commercials.

Here are some of the songs I've heard in the last week on XM Radio's Sixties Channel:

Attack - The Toys
Just Once In My Life - The Righteous Brothers
Next Plane to London - The Rose Garden
Love Me With All Your Heart - The Ray Charles Singers
It Must Be Him - Vikki Carr
Little Ole Man (Uptight - Everything's Alright) - Bill Cosby
The Men in My Little Girl's Life - Mike Douglas
Cotton Candy - Al Hirt
Walk Don't Run '64 - The Ventures
Flowers On the Wall - The Statler Brothers
You Can't Roller Skate in a Buffalo Herd - Roger Miller
Sweet Dreams - Patsy Cline
Hey Leroy, Your Mama's Calling You - Jimmy Castor
Choice of Colors - The Impressions
All Along the Watchtower - The Jimi Hendrix Experience
Whole Lotta Love - Led Zeppelin
She's a Rainbow - The Rolling Stones
2,000 Light Years from Home - The Rolling Stones
Sky Pilot - Eric Burdon & the Animals (both versions)
White Bird - It's a Beautiful Day

And this is just casual listening, in-car, while commuting. Who knows how many more I'd hear if I listened more often. Also, the sixties channel isn't the only channel I listen to in the car. The BBC World Service is probably on longer than anything else, and I also listen to the mainstream jazz channel, an eclectic channel called "Fine Tuning," and the other decades channels from time to time.

How many of the above titles, all charting in Billboard's national charts, do you hear played on your local oldies station? I can tell you, on KRTH in L.A., the answer is 0.

285. Setting The Record Straight

Newsgroup: rec.radio.broadcasting
Date: 2002-01-30 16:45:41 UTC
From: lpptjh <lpptjh@mobiletel.com>
Message-ID: <u5g8plp9ajo767@corp.supernews.com>
Source record: 12348

Everyone,
On other newsgroups,to which I am also posting this message, a couple of gentlemen posted investment opportunities
for radio stations in Pennsylvania. I am originally from that state, and so I emailed each of these gentlemen asking where the properties were located. Each one insinuated that I am a pirate radio operator, probably because I post to and read the alt.radio.pirate newsgroup. I have done so for about a year and a half.
My initial interest was in Part 15 operation, until the LPFM Rulemaking was passed and I formed a group to go that route. That decision was made after the FM100 filing window was closed for Louisiana, where I live now. So we are awaiting the opening of the FM 10 filing window.

For over a year, I have come to this newsgroup and received valuable insight on rf theory and how to set up the broadcast chain. I have never claimed to operate a pirate station nor have I ever done so or intend to. I like most of the people there and they have been very helpful, but now I am worried about our group having our construction permit denied because of this gossip. If
anyone here is contributing to this, I ask you as one human being to another to please stop.

As far as I know, I have never hurt anyone and always tried to ask intelligent questions about radio. I am aware that the FCC probably reads this group and that's fine with me. I have always used my real name and email because I haven't nor do I intend to break the law. I came to this newsgroup to learn, as there are very knowledgeable people here.

Also as far as I know, I haven't made any enemies and have certainly have never tried to hurt anyone here in any way. Yet someone is apparently spreading the rumor that I have a pirate station. I don't want this untrue gossip to hurt our group's chances of getting an FM 10 construction permit.

I live an small town called Cut Off (that's the correct name) about an hour south of the New Orleans airport. I sign my posts New Orleans so that people will have a general idea of my location. There is an FCC field office in New Orleans, and I invite them to come to my home and pay me a visit. They can have my address by emailing me.

If you take a look at the archival record, plainly I share the view of many here that big business has taken control of the airwaves and that there is a great need for communities, especially small rural ones where I live to have some locally oriented radio, even if it's nonprofit, which is OK by me. I have never hurt or insulted anyone here and I can only pray that my participation in alt.radio.pirate hasn't ruined my chance of our little group to get a

small 10 watt FM station on the air here to serve our small community of Cut Off.

To whomever identified me as a pirate operator to these men or anyone else, I beg you to be a decent person and please stop. Please stop for the sake of a dream I have had since I was a teenager. Please stop because our little town could really benefit from this little radio station we plan to operate. Please stop because somewhere I know there is goodness in your heart. Please stop because it's the right thing to do. I appeal to that sense of rightness that exists in all of us. Find that place in your heart and stop hurting this one chance we have to get our little 10 watt tin can in Cut Off. What harm can come to you from our little legal radio station where our old folks will have the opportunity to hear some programs in the dying Cajun language and that we can use to help teach younger people about their heritage and air positive programming that might help keep one or two of them off drugs and get them into college? What harm can come to you if some of our high school students can come over to help out at the studios to learn a little about radio communication? What harm can come to you if a local elementary school class had the chance to visit a "real" radio station?

These are the things I care about and now someone is running around saying that I am a pirate operator. Well, I defy them to prove that I ever ran such an operation, because I never have. I admire those of you here who are having the courage to serve your communities license free. Many of you would have applied for an LPFM license if you hadn't gotten "the visit" in the past. That language in the Rulemaking is wrong, and I disagree with it. But whomever is saying that I run a pirate station, you're wrong. I don't own a transmitter or antenna and I have never been on the air illegally. Please, for God's sake stop saying so.

With Hope,

Larry Pritchard

Cut Off, LA (New Orleans area)

I'm afraid you missed my point. I am not arguing in favor of job security; automation is a fact of American life, and does in fact lower the cost of business. That's a given, and no business should be forced to carry dead weight.

But with VT, the listener is getting something worse than no information at all: they are led to assume that they have a live, local, topical announcer. (This is intentional; VT breaks vaguely mention the time, "current" weather, etc.)

No matter the format, I have received daily calls from listeners on every imaginable topic of local inquiry. Rightly or wrongly, listeners look to radio as a source of valid local information. (The first flake of snow in the winter usually generates myriad "do we have school tomorrow" calls, for instance.)

When the power goes out because a chemical train has derailed in a listener's neighborhood, and they tune to their VT'd station(s), all they are going to hear is..."what a great evening it is, here's your request for Alabama." So, they step outside into a cloud of chlorine.

Some markets/chains have quite good 24/7 news coverage, with the ability to broadcast simultaneously on all the stations in the chain. (Actual news cut-in's, not talking EAS here.) But these are the exceptions, rather than the rule. We've seen the failure of EBS/EAS; the same rules that have deregulated radio have undermined any effectiveness EAS might have had.

Hello-
I'm looking for anyone who might have recordings of two DJs at WLS
-Chicago from the late 70s / early 80s. I'm looking for .....

Bill Price (Weekends in 1978)
Kevin Molloy (Weekends in 1981)

Drop me a line and i'll send a list of recordings that I have.
Thanks, Chris

Dave, I have to side with you on this one. Although it's not a National Security issue imo, it is a public safety issue and given the fact that alot of FCC rules exist for emergencies, I wonder why exactly this issue isn't addressed. EAS is ok for tstorms, but for anything serious vt stations I think would be liable for misrepresenting themselves as live and endagering the public should some disaster occur that costs lives because of that misrepresentation. I am not a lawyer and I don't play one on the radio, but maybe someone with some legal expertise could chime in here...

> all of us.

I know this is way off topic for r.r.b. but I havd to chuckle when I read
about 14,400 and 9,600 being the "good old days".
When I had my first PC (a TRS80 Model II), I paid $500 for a modem, in
which the telephone handset fit in a rubber cradle. The connect speed was
300 baud (that 300 bps in today's lingo). The only services available were
CompuServe, the Source and Dow Jones News Retreival Service.
There was no local connect number for any of them, so I called long distance
(at 1980 prices, not today's 4 cents a minute) and paid something like 5
bucks an hour on ComupServe, for text-only that scrolled about one-fourth
the speed a person could read.
When I got a 1200 baud modem (and a more expensive long distance call
because now I had to call Chicago, which was one of only a half-dozen cities
with 1200 bps access), I quadrupled my speed and was in seventh-heaven,
except CompuServe had a 1200 baud surcharge.
Methinks today's online people are a bunch of cyber-sissies (spoken in fun,
no flames please).

As a first class radio nut. I had to have kerbango, but it never made a successful appearance. So I turned to XM and am completely satisfied with it. Although I do listen to various channels and scenned them all in the beginning, I usualy (as a 76 year old) put on channel 4 (music of the 40s) while I do desk work and read the paper. This is home use via the adaptor. I do not have it on ca radio. In the car, I still prefer certain programs (including Rush), favorite radio stations, OTR, and the variety from all stations everywhere even with static.

Yep, back in '78 I used to sometimes work from home with a TI Silent 700 terminal. Had a 300 baud acoustic coupler. Man could that thing spit out thermal paper when you were playing "Adventure" on the Dec-10.

At work, we were more fortunate. We had a 9600 baud leased line to Oak Ridge, that fed a smart-mux to split it into 8 1200 baud lines. Man, with a tektronix 4014 and 1200 baud, we were in graphics heaven. Or so we thought, LOL.

At our local workplace, they finally removed the CDC 3100 that ran card decks and installed a used CDC-6600 (great machine--designed by Seymour Cray when he was at Control Data) which had an "interactive" operating system. Then we could make maps at 4800 baud! Man did that sing!

I guess "good old days" are relative...

I can't help you as I worked at the AOR competition, WCCC, from 1976 to
1978. I'd also love to hear from people like Country Paul Payton and
Ronnie Berger and some of the other names I forget from WHCN.
Interesting that WCCC (now active rock) is now at WHCN's (now classic
rock) studios.

I was an avid WHCN listener in the early 1970s. I can't help but think
satellite radio is providing the same service that stations like WHCN
and WPLR did in the 1970s.

I worked an automated station which was unattended at night. We set up a way to get on the air from any touch tone phone.

It was pretty simple. You dialed in the hotline, punched in the pass code, and the automation system made the phone next to play on the air. It even fed audio back down the line to you. When it got quiet, you knew it was your turn to talk. You did your bit and hit # and the system would roll on.

I had a weather alert radio at home and a pager from the local Emergency Management Office. I was set. I don't see why the voice tracked stations can't do the same thing.

My absolute all-time favorite is Jack Gale, whose greatest fame came
at WAYS in Charlotte, N.C. in the 60's. But I listened to him on
WITH and later WWIN in Baltimore, before he went to Charlotte. Jack's
humor was zany, absurd, whimsical, and clean. He was side-splitting
funny without ever insulting or hurting anyone. He also knew how to
make a station sound HUGE, even if it was a peanut-whistle 250-watter
on a "graveyard" frequency. IMHO one of the greatest entertainers on
radio, ever.

Jack is now semi-retired in Florida, but still produces commercials in
a home studio, and has a book out, which I highly recommend,
especially if you're from any of the markets where he worked or are a
fan like I am. You can find out more on Richard Irwin's reelradio.com
web site. Go to the "Jack Gale Collection" page.

Jack Gale inspired me to get into broadcasting. For whatever I've
accomplished, he gets some of the credit.

I don't own XM, but I had considered it until finding out that the main classical channel does not have an extended advance schedule (as most good classical radio stations have done for decades); that they will not carry BBC Radio 3 -- the international gold standard in classical broadcasting, but rather have programming based on commercial recordings; that the bitrate is little better than Radio 3's internet stream, and considerably less than the bitrates for digital radio in the UK; and that while it will feature in-studio appearances by well-known musicians, it will not license the best productions of American classical radio stations (the Met Opera on Saturdays; the Boston Symphony live relays from WGBH or WCRB). For the classical lover, then, XM offers nothing worth paying for.

I've long wondered about this, whether stations carried digitally can produce advance program listings for classical radio without violating the Digital Millennium Copyright Act. If they carry the Metropolitan Opera, will digital stations not be permitted to tell you which opera without incurring new liability to the artists whose work they're distributing?

Well, you can recreate the experience again. Just go visit a few russian sites, you'll soon find one that downkoads at about 300 bps. Switch the pics off on your browser - pics are beyond hope at 300 baud. Sit back and enjoy.

Really today's conections make me wonder how I ever used a 300 baud modem, but it worked, long as you didn't expect much I guess.

I don't think so. I recall WCFL being known for it's heavy processing.
I believe none of it was changed even though experiments done at the
time by people like Jim Schulke clearly showed heavy process sing and
high end distortion drove women away. It was simply a change in format
rather than a new radio station.

That DMCA restriction only applies to recordings, and only if the compulsory license is claimed. If you have the permission of the copyright holder of the recording (or own it yourself) you can do what you like.

"If they carry the Metropolitan Opera, will digital stations not be permitted to tell you which opera without incurring new liability to the artists whose work they're distributing?"

No problem there with a live broadcast.

My original 300 baud connection was with an acoustic modem attached to a dumb terminal with an RS-232 cable.. I remember having to change the parity bit for the different BBS's (that's all I used it for).

But that sounds like a major restriction; all recorded concert music that is listed in advance must be negotiated in advance. And suggests a certain cultural loss; appointment listening was a great part of the fun of classical radio. It built up the market for more challenging pieces.

Don,

Your comment on the bitrates is very interesting. At their opening press event a few years back I noticed some confusion about which rates and which digital compression schemes were going to be used and where. I never did get a solid answer.

I figured the consumer would eventualyy sort it out and sign off on it if they didn't care for the quality. I guess we'll see.

Amateur Radio Newsline™ Report 1277 – February 1, 2002

Amateur Radio Newsline report number 1277 with a release date of Friday, February 1st, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The President of the United States speaks to hams in Florida and is ham radio seeing a second Solar Max? These stoies are first on amateur Radio Newsline report number 1277 coming your way right now.

(Billboard Cart Here)

**

BREAKING NEWS: PRESIDENT BUSH COMES TO HAM RADIO

The President of the United States has come to ham radio. Bill Burnett, KT4SB, has the details:

--

President George W. Bush has taken to the ham radio airwaves. This, to thank the Florida Amateur Radio community for being ready to serve the public when it is needed.

The President’s comments were made during a stopover the morning of January 31st at the Volusia County Fire Services and Training Center near Daytona. Around 9:15 AM Eastern Time, President Bush checked in to the Northern Florida Amateur Radio Emergency Service Net on 3.950 MHz using a portable station set up John Schmidt, AF4PU. Then the President made these remarks to the 40 or so stations listening to the net:

--

President George W. Bush:

"I want to thank all the volunteers who help make sure that Florida is prepared for any kind of emergency. I also want to assure you that your Federal government is doing everything we can to make sure that there is not an emergency--starting with unleashing the mighty U.S. military overseas to bring evil ones to justice. But should there be a need for a response, I want to thank you all for helping our communities be prepared. And finally, I want to tell you--we are lucky to be Americans and may God continue to bless this great land of ours. Thank you very much."

--

Needless to say the net members were delighted to have the President of the United States address them. More important, hams nationwide can now be sure that President Bush knows that Amateur Radio operators are ready to serve whenever he, and the nation, needs to call on them for help.

In Miami, I'm Bill Burnett, KT4SB, reporting for the Amateur Radio Newsline.

--

The complete story is on the web at
http://firstcoastcommunity.jacksonville.com/northfloridaamateurradiosocietynofars (Tnx NU4F, CQ Magazine)

**

HAM RADIO SCIENCE: TWO SOLAR MAXIMUMS THIS SEASON

In case you are wondering why the current solar cycle is still providing such amazing VHF and UHF DX, one researcher may have the answer. He says that the current cycle appears to be having a second peak and that this is really not very unusual. Henry Feinberg, K2SSQ, looks at the scientist and his latest data.

--

The most recent and ongoing Solar Maximum -- or Solar Max -- theoretically crested in mid-2000. Sunspot counts were higher than they had been in 10 years, and solar activity was intense. One remarkable eruption on July 14, 2000 caused brilliant auroras as far south as Texas. But after that, sunspot counts slowly declined and the Sun was relatively quiet for month-long stretches. Most scientists said that the Solar Max was over. But was it?

Now, as 2002 unfolds, the National Aeronautics and Space Administrations solar foorecasters say that it looks as if the Solar Max is back with us again. The Sun is again peppered with spots, eruptions are frequent and hams notice that the VHF DX keeps rolling in.

Why is this happening? Well David Hathaway, a solar physicist at the NASA Marshall Space Flight Center in Huntsville Alabama has one theory. Hathaway says that the current solar cycle appears to be double-peaked, and the second peak has arrived.

--
Hathaway Audio Here
In-Q: We have seen other cycles...
Out-Q: ...define this maximum
--

Scientists track solar cycles by counting sunspots and Hathaway is an expert forecaster of sunspot numbers. He says that sunspot counts peaked in 2000 some months earlier than we expected. He says that the subsequent dip toward solar minimum seemed premature and before long, sunspot counts reversed course and began to climb toward a second maximum that now appears to be only a few percent smaller than the first.

--
Hathaway Audio Here
In-Q: Its a bigger than average...
Out-Q: ...smaler than 19, 21 and 22.
--

Hathaway notes that there is a widespread misconception that solar activity varies every eleven years like a pure sinusoidal wave. It isn't. He says that solar activity is chaotic and there can be more than one peak in any given period. Translated for ham radio: Enjoy the VHF DX while you can.

For the Amateur Radio Newsline, Henry Feinberg, K2SSQ.

--

Hathaway says that the Solar Max eleven years ago was much the same as this one. The first peak arrived in mid-1989 followed by a smaller maximum in early 1991. And if you are interested in hearing more about this interesting phenomena from David Hathaway its as easy as taking your web browser over to www.rainreport.com. Or you can call on the phone to area code 847-827-7246. (NASA, RAIN)

**

HAM RADIO IN SPACE: HF ANTENNA INSTALLED ON ISS

High Frequency ham radio operations from the International Space Station could be on the not to distant horizon. This, after a successful space walk on January 25th to install another antenna on the orbiting outpost. Amateur Radio Newsline's Roy Neal, K-6-D-U-E, has the details.

--

The spacewalkers have had another good day in space. On Friday the 25th of January, Cosmonaut Yuri Onufrienko, RK3DUO and Astronaut Dan Bursch, KD5PNU, successfully mounted a second ham radio antenna near a docking port amidships on the International Space Station. It is made of flexible tape and is similar to but longer than another antenna installed on January 14th. That one tunes both VHF and UHF frequencies. The new antenna will tune HF frequencies.

ARISS Board Chairman Fran Bauer, KA3HDO, says it definitely will work on ten meters and may even be made to work on 15 and 20 meters. BUT right now there is no gear on board to handle those frequencies. Experiments using the lower frequencies are on the list of futures for ARISS but no timetable has been assigned to design and build them.

Owen Garriott, W5LFL, the first man to operate ham equipment in space, once prophesied that a five watt transmitter in orbit might well be heard simultaneously world wide. The great number of hams with good stations on the lower frequencies also makes them enticing to ARISS. It's a safe bet that serious consideration now is being given to expedite such a project. Once a station is sent up, the antenna will be waiting.

The new antenna is the second of four to be installed on board the space station. No timetable has been announced for the final installation. All of

these amateur antennas were built by Italy, tested and qualified in the US, to fit ports built by Russia, as befits the international nature of the ISS.

For the Amateur Radio Newsline, Roy Neal, K6DUE

--

Installation of the 2.5-meter long flexible tape antenna involved not only the mechanical deployment but routing cables and establishing the R-F connection as well. (ARISS)

**

HAM RADIO IN SPACE: THAT ANNOYING SATELLITE IS OFF 2 METERS

An annoying mystery satellite transmitting AFSK, frequency modulated Morse on 144.100 MHz for several days has been identified. It turned out to be a signal from the MAROC-TUBSAT satellite. This is an Earth-sensing spacecraft owned by a Moroccan government agency called he Royal Center for Remote Sensing. It was placed into a polar orbit by a Russian launcher on December 10, 2001.

As soon as he learned of the interference to amateur operations, Professor Udo Renner of the Center had the 144.100 MHz transmitter turned off. He then notified AMSAT Germany that TUBSAT was no longer on two meters.

But TUBSAT also has a downlink at 436.075 MHz. This system is only busy over North Africa and Europe and only when the control stations in Rabat and Berlin are activated. It has not been heard elsewhere in the world. (AMSAT-NA)

**

SPECTRUM PRESERVATION: ARRL SAYS IT WILL FIGHT TO KEEP RFID OFF 70 CM

The ARRL says that it will go all the way to protect the 70 centimeter ham band from a threat brought by commercial interests. At issue is a plan from SAVI Technology and already tentatively agreed to by the FCC to deploy unlicensed transient R-F identification tag transmitters operating between 425 and 435 MHz. These tags run at much higher field strengths and duty cycles than Part 15 rules now permit.

According to a League bulletin issued on January 29th, ARRL officials have already met with members of the FCC staff as part of the League's effort to stave off a band threat. The bulletin says that General Counsel Chris Imlay, W3KD, and ARRL Technical Relations Manager Paul Rinaldo, W4RI, delivered an ex parte presentation to FCC Office of Engineering and Technology staffers January

14th outlining the opposition of the ham radio community. (ARRL)

**

FCC: CHAIRMAN POWELL HOME AFTER HOSPITAL TESTS

Federal Communications Commission Chairman Michael Powell was discharged from the hospital on Friday January 25th. This, after a two-night stay in the to undergo tests because of a lingering stomach bug.

Stomach discomfort caused him to cancel appearances at the Consumer Electronics Show in Las Vegas on January 8th and again at the annual conference of the National Association of Television Program Executives on Wednesday January 23rd. Doctors advised precautionary tests that required overnight stays at Walter Reed Army Medical Center in suburban Washington. (Published news reports)

**

ENFORCEMENT: THAT SONG WAS NOT AS BAD AS WE THOUGHT

The Federal Communications Commission has dropped an indecency fine against a Colorado radio station. KKMG FM of Colorado Springs had been fined seven-thousand dollars for airing the edited version of Eminem's "The Real Slim Shady." This, after a listener wrote the regulatory agency to complain.

At the time the fine was issued federal regulators said the edited version still included some expletives and references to violence and graphic sex. But the FCC now says it has reconsidered. It now says that the lyrics in the edited version didn't violate its rules by being "patently offensive." (FCC)

**

RESCUE RADIO: BRAZIL RADIO OPERATORS HELP IN POWER OUTAGE CRISIS

A major electricity blackout hit at least five Brazilian states on January 21st, and it was hobby radio enthusiasts that let people know about it.

The blackout, which began at 1:30 p.m., hit hardest in the industrial southeast and the major cities of Sao Paulo, Belo Horizonte, Rio De Janeiro, Goiania, Vitoria and the capital, Brasilia.

According to news reports, Brazil’s National Energy Agency blamed the outage on transmission line failures. The same news report credited Brazilian hobby radio operators as informing authorities that subways in Rio De Janero and Sao Paulo were halted and that traffic lights were out snarling commuters in several areas.

The outage was caused by a failure at the Itaipu hydroelectric station in southwestern Brazil. A power-line failure caused thirteen of the dam's eighteen turbines to stop, cutting off nearly 20 percent of the country's energy. Power was restored about three hours later. The news story did not identify the radio operators as being hams. (Various shortwave news reports)

**

RESCUE RADIO: NEW INTER-JURISDICTION RADIO SYSTEMS BEING INTRODUCED

Santa Clara County California, police, fire and emergency medical personnel have never been able to communicate with one another at the scene of a major disaster. This is because each agency uses a separate radio system. That is expected to change this year.

Santa Clara County will be leading the nation in using new digital radio technology to solve the inter-agency communications problem. The new system will allow up to eighteen participating jurisdictions in any county to talk to one another instantly.

By way of example, once the system is up and running, officers involved in one of California's famed high-speed car chase will be able to talk directly to police in the neighboring jurisdiction as the suspect approaches that town. They won't have to switch channels or go through dispatch centers. This means less time wasted and the probability that lives will be saved.

While Santa Clara county is at the head of the pack in adopting this new digital communications technology, the same news reports say that and Washington, D-C is not far behind. (Cal-State Info.)

**

PUBLIC RELATIONS: A CHEAP SATELLITE

A Cheap Satellite is the name of an Associated Press item that highlighted the work of the faculty and students at the United States Naval Academy in the development and launch of the P C Sat ham radio satellite. The story tells how the twenty-five pound bird was built using off the shelf products including a tape measure for its antenna and rechargeable double A cell batteries for power.

The story was written by Tom Stuckey and moved on the wire on Wednesday January 23rd. It noted that PCSat, was the 44th amateur satellite put in orbit. It is one of more than a dozen built by university students around the world. (VHF Reflector)

CONVENTIONS & HAMFESTS: ORLANDO HAMCATION WEAK SIGNAL FORUM

The Orlando HamCation will host its first ever Weak Signal VHF and UHF forum. Beginning at 2 p.m. on Saturday Ferbruary 9th, the one hour session will be moderated by N2CEI, of Down East Microwave. Also, Tom Haddon, K5VH, will be on hand to motivate more Florida hams to become active on the Microwave bands.

If you are in the Orlando Florida area on February 8th to the 10th drop in on the Orlando Hamcation. For more details and or advance reservations, go to oarc.org/hamcat.html on the World Wide Web (W2BZY)

**

CONVENTIONS & HAMFESTS: DATE CHANGE FOR RADIOFEST 2002

Brian Broggie, W6FVI, asks that we pass along a date change for RadioFest 2002 sponsored by the Naval Post Graduate School Amateur Radio Club in Monterey California. The new date is February 23rd. More information is in cyberspace at k6ly.org/radiofest. (W6FVI)

HAM RADIO SCHOLARSHIPS: THE DARA SCHOLARSHIPS

The Dayton Amateur Radio Association is one of three ham radio organizations seeking nominations for its scholarship program for the 2002-2003 academic year. According to DARA, applicants must be graduating high school seniors in 2002 and hold any class of an FCC issued mateur Radio license. The scholarship awards run up to $2000, as determined by the scholarship committee. Money must be used toward tuition at an institution of higher education.

To obtain an application, send a self-addressed, stamped envelope to the Dayton Amateur Radio Association Scholarship Program, 9873 Lower Valley Pike, Medway, Ohio 45341. You can also obtain an application by e-mail to n8emo1@msn.com. Completed applications must be postmarked no latter than June 1st to be eligible for this years scholarship program. (DARA)

**

HAM RADIO SCHOLARSHIPS: THE FOUNDATION FOR AMATEUR RADIO

Another organization offering scholarships to hams id the Foundation For Amateur Radio. The Washington, D.C. area group will administer sixty-two scholarships for the academic year running from 2002 through 2003. Licensed Radio Amateurs may compete for these awards if they plan to pursue a full-time course of studies beyond high school and are enrolled in or have been accepted for enrollment at an accredited university, college or technical school. The awards range from $500 to $2500 with preference given in some cases to residents of specified geographical areas or the pursuit of certain study programs. Additional information and an application form may be requested by letter or QSL card to the FAR Scholarships, Post Office Box 831, Riverdale, Maryland, 20738. (Foundation For Amateur Radio)

INTERNATIONAL - SOUTH AFRICA: SA RADIO AMATEURS OF THE YEAR NAMED

Turning to international news, South Africa is honoring two of its own as that nations Radio Amateurs of the Year. Q-News Graham Kemp, VK4BB, brings us the details:

--
The South African Amateur Radio Development Trust have announced the winners of the 2001 Siemens Radio Amateur of the Year Award. This award is made annually to a Radio Amateur who has made a major contribution to the Amateur Service either on a technical or development basis in ZS land.

The award has been bestowed jointly on Bradley Phillips, ZS5BP, and Garth Wilson, ZR6CY. ZS5BP for his work on the introduction of Iphone and the development of the Internet Radio Linked project. ZR6CY for his continuous efforts to develop communication skills amongst the youth. He has to date presented no less than 80 camps for Voortrekkers to learn the Morse code and basic communication skills.

For Q-News Australia, I'm Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.

--

This award is considered as South Africa's equivalent to the Dayton awards presented here in the United States. (SARL News, Q-News)

**
INTERNATIONAL - UK: KENWOOD TROPHY AWARDED TO G3XWH

Meantime, over in the U-K, Richard Horton, G3XWH, who chaired the RSGB's Future Licensing and Examination Forum has been awarded the Kenwood Trophy. This, for his significant contribution to training and development in amateur radio.

Horton recently retired from the Radio Society of Great Britain's Board where he was responsible for amateur radio development. His committee was responsible for much of the work that went into the creation of the new U-K Foundation Class license. (GB2RS)

**
DX

In DX, DJ4KW and DK9GG are currently active from Belize as V31YN and V31GW, respectively, through early February. Activity is on CW, RTTY and PSK 31. (RSGB)

And IN3QBR will be active from Vientiane as XW3QBR until the 31st of July. He will be joined, from the 20th of April until the 10th of May by IN3ZNR operating as XW3ZNR. (OPDX)

And R1ANF began operations as CE9 slash R1ANF on the 29th of December from a Chilean base in the South Shetland Islands. He is active on 10 to 28MHz with 100 watts to an R6000 vertical. For all three QSL as directed on the air. (RSGB)

**
THAT FINAL ITEM: CELEBRATING THE LIFE OF ED CLEGG W2LOY

And finally this week, if you were on the VHF bands in the 50's, 60's and 70's then the name Clegg Labs touched your ham radio operations. And as we hear in

this report, the family of the man behind the gear is inviting you to help celebrate his life.

--

Even if you did not own any Clegg gear, the chances are that you talked to someone on the air who did. Whether it was the top of the line Interceptor receiver and Zeus transmitter or the entry level 99'er transceiver, it was easy to spot a Clegg signal by its almost overpowering modulation that seemed just right for the R-F carrier it was on.

Almost every product that carried the Clegg label was designed by the company's founder Edward T. Clegg, W2LOY. When he moved the company to Pennsylvania in the 1970's, Ed took the call W3LOY. Likewise, after retiring to Ohio he traded the 3 for an 8, but kept the famed L-O-Y suffix.

And regardless of the call area, Ed Clegg was first and foremost a communications designer well ahead of his time. Even more important, he was a positive influence on just about everyone with whom he came in contact.

Ed Clegg left us last September at age 80. Now, his wife Martie will be hosting a gathering in March near the Clegg home in Lancaster Ohio. The purpose is to celebrate the life of Edward T. Clegg. And they are asking you to help.

Martie, her daughter Linda and Linda's husband Rob MacGuffie, K2HZN, are asking anyone who knew Ed to share in the celebration. They know that most of you won't be able to be in Lancaster Ohio on March 30th. But some of you do have memories, stories, photos and other Ed Clegg memorabilia that would help to make this day even more unforgettable.

If you have something to share, please contact Linda and Rob before the end of February. Their address is 70 Province Road, Gilmanton New Hampshire with a zipcode of 03237. Rob's cyperspace address is K2HZN@yahooo.com.

For the Amateur Radio Newsline, I’m Cathy Anno, KB0FDU.

--

By the way, a number of us here at the Amateur Radio Newsline began our ham radio careers using gear designed by Ed Clegg. In fact, our producer Bill Pasternak, WA6ITF, got to know Ed while Bill was still a teenager operating A-M on the 6 meter band. (Clegg family)

I still have a Texas Instruments terminal that uses thermal paper,
weighs about 40 pounds, and is the size of a large but thin suitcase.
It has an acoustic modem, which I believe was 110 baud.

Message-ID: <u6060a41cr2t0b@corp.supernews.com>
Source record: 12209
Body handling: HTML body converted to readable text

Hello

I have just enrolled on a 3-month evening course in Sound Engineering and Recording with North Sydney TAFE and would like to get a position as an audio engineer's assistant within a studio to get more hands-on experience both during and after this course.

The course covers the following aspects of audio engineering:

- sound theory (acoustic and electrical);

- microphone technology;

- recording systems and processes;

- mixing consolte theory and practical usage;

- multitrack recording for acoustic and electronic music;

- signal processing, special effects;

- sound for the screen, and;

- post production.

I would be really grateful if you could let me know if you have such a position available over the next few weeks.

I have not worked in a studio before, but have been producing music for the last couple of years at home using midi sequencing and sampling with cubase, soundforge, fruityloops etc. (examples can be found on this weblink: http://soulphonic.tripod.com/soulphonic/id3.html)

I'm available to start work immediately. If you would be interested in offering me work please contact me on 0438 459389.

Kind regards

Kate Williams

I don't believe so. But the 8200's clipper is pretty effective. Also you'd destroy the filtering and peak control which is the essential point of the Optimod line.

Apologies if this is a stupid question, but have you tried just cranking up the clipping control on the 8200?

I am doing some preliminary research for a video documentary on the National Barn Dance, a radio program that aired live on WLS in Chicago and was broadcast across the nation from the late 1920's through the 1950's. I was wondering if anyone out there might have some knowledge of the National Barn Dance and this early era of live radio and if you might know of possible resources for audio archives, film footage and people that I might want to speak
with who remember the Barn Dance? Also any ideas for current country performers who could talk about the importance/influence of the Barn Dance?

Your input would be greatly appreciated.

352. Mitch Albom Show...Dull or Just Irrelevant?

Newsgroup: rec.radio.broadcasting
Date: 2002-02-06 01:12:54 UTC
From: BernardSa55@hotmail.com
Message-ID: <u610ommqkvmu3f@corp.supernews.com>

Hey Michiganders!
I've heard how many are getting fed up with Mitch Albom on WJR, and I can see their point. He's got a perfectly plum position right after Rush Limbaugh and he just doesn't deserve it.

This is the asshole who advocated gun show massacres as a way of changing the minds of the U.S. Senate on the Second Amendment rights debate. Sheez!

But I still can't get over his particularly cruel ridicule of G. W. Bush for letting the Secret Service divert his plane on September 11. Albom kept up this "Bush is a coward" drumbeat for days.

Then this Albom jerk spent the next 4 weeks mocking the President and Attorney
General (John Ashcroft) for alerting the public of possible future terrorism. Albom's reasoning was "if you can't be more specific on what I should look out for then don't bother to say ANYTHING". Each day was the same thing...I had to begin thinking Albom was dull and couldn't think of anything else to say.

It was so odd because even when anthrax was being mailed all around the county
and people were dying, Mitch Albom kept relentlessly bashing away at Bush and Ashcroft for being 'alarmist'.

Ultimately, I was anticipating that Albom would acknowledge that he misread Bush and Ashcroft...that they really were doing the right job and they weren't over-reacting. But he never said a word. I think the guy has no conscience or something. Or maybe is just cares about padding his pockets and keeping his bigshot job even if it's at the expense of others.

Anyway I think the guy is an embarrassment to Michigan and should be off the air. Not just is he a mediocre talk show host, but he is obviously irresponsible as well.

It's great that a person can have a cool gig and make allot of money and live in a FINE house in a tony, historic SEM Village. But this guy is an abuse of the public airwaves and he should be yanked. WJR needs to wake up. They aren't doing their listeners any favors with Albom.

Source record: 12215

GregS <szekeres+@pitt.edu> wrote:

"They should make it easy to transport from vehicle to house??"

It is, though somewhat expensive. Sony's XM tuner plugs into special cradles for both home and car use, so you just pull the tuner out of one cradle and put it in the other to move between the home and the car (or between multiple vehicles). However, this means that you have to pay for cradles and antennas for each location. (Sony also sells two different car kits, one with an FM RF modulator -- which works with any FM car radio, but has to be installed somewhere behind the dash -- and the other with a cassette adapter, which doesn't need special installation but isn't usable if you don't have a cassette deck in the car.)

354. good LA Times article on XM and Serius

Newsgroup: rec.radio.broadcasting
Date: 2002-02-06 16:45:17 UTC
From: charles hobbs <chobbs@socal.rr.com>
Message-ID: <u62nctmg6at8e@corp.supernews.com>
Source record: 12216

http://www.latimes.com/business/la-020402xmradio.story

The article has an interesting passage regarding plain old
terrestrial radio as well:

Satellite radio is arriving just as a torrent
of new radio competition is ready to
flood the market.

Two years ago, the FCC authorized low-powered
radio--a service that could
create up to 1,000 new stations. Their signals
won't travel very far, but they will
spawn a great deal of new content.

The FCC also is planning to auction up to 350
now-dormant FM stations this
year and set a standard for the nation's AM and
FM stations to switch to new
digital technology, which would allow
broadcasters to offer better-quality
sound as well as new programs and services.

"There is going to be a tremendous increase in
competition, and broadcasters
are going to have to increase their focus on
format diversity--you can't have
five country stations in a market all making
money," said Mark O'Brien,
executive vice president at BIA International,
a radio and television industry
research firm.

Uh, ok, we'll see...

355. Re: portable AM stereo receiver manufacturers

I found the site difficult to navigate and understand. The poster, I believe is looking for a portable (boombox type, maybe?) receiver that decodes regular US AM stereo. The only units that could be "portable" are the car units-- I am not impressed with the site, and don't believe it offers what the poster was asking for. Mr. Casey I think it's a good thing that you didn't buy anything there. I don't know enough to criticize, I guess, but the whole site just doesn't "sit right" with me. They talk about doing mods and such, and one of the receivers they offer (for several hundred dollars, by the way..) apparently gets AM Stereo, but not FM stereo. What is that all about? Mr. Casey was trying to be helpful-- I don't know where one could buy such a radio myself, and I wouldn't mind having one. But as far as the site in question goes, I would run the other way. Just an opinion.

There were a number of portable, non auto units on that site.

Mods were to change channel spacing from 9khz to 10khz, and expand
FM coverage from Japanese band plan, to include the entire NA FM
band.

This is what is required to get a variety of AM stereo receivers
into this country, a tribute to the absolute apathy of the public
for this commodity.

If a demand for AM stereo portables existed, or a wide variety of
AM stereo capable receivers of any kind for that matter, the
industry would be breaking their backs to make them available. Even
broadcasters would be distributing them.

358. Muzak on the Internet

Newsgroup: rec.radio.broadcasting

I'll probably get slammed for this, but e-bay has a lot of old Muzak vinyl recordings that demonstrates their old concept of stimulus progression. This was when Muzak played their own versions of songs, and not the actual songs like they do now with their satellite system.

Has anyone bothered to make MP3s out of these for internet downloading? I'd like to hear that old stuff without having to buy the disk and a turntable.

Is there any way to monitor the current Muzak DBS without subscribing? This is not an effort to get something for free, but it's for home use and Muzak won't sell subscriptions for home use, and won't explain why.

Thanks.

Sounds like the guy is OK to me. From what I've heard any criticism of Bush et all has pretty much gone out the window these days due to self-censorship, so if someone is daring to express their opinions freely (especially on commericial radio- what group owns WJR these days??) he should be treasured, not trashed.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

364. Question: what influences a programmer's choices for his station's repertoire?

Newsgroup: rec.radio.broadcasting
Date: 2002-02-07 17:27:39 UTC
From: butler.brian.b@bhp.com
Message-ID: <u65e8bj3k6rgb1@corp.supernews.com>
Source record: 12226

This is borne from my growing frustration with my local "Point" station, Houston's 106.9. I know from my Internet travels that there are other Point stations nationwide; are these stations part of a franchise that governs the type and variety of music that may be played? Or is it still more or less up to the program director at an individual station? Basically, 106.9 the Point is just wearing so thin with me because of the VERY limited 80's/sometimes 70's music to be found there. Obviously, any station that dedicates itself to a decade will have a finite amount of music to select from, but there is still PLENTY to choose from that this station apparently ignores. The Point has neglected SEVERAL songs by an artist that the station is content to represent with only a song or two (I'm pretty sure, for example, Information Society hit the charts with 2 or 3 more songs after "What's on Your Mind"), and even entire repertoires by an artist (for instance I NEVER hear Michael Jackson, Billy Ocean, Janet Jackson, New Kids on the Block, Milli Vanilli, Debbie Gibson, Jodi Watley, Rick Astley.... the list goes on). Now that the Point has demonstrated that they are willing to stick with a certain style of music within the larger 80's paradigm (dance/pop/fast tempo stuff), what does it take from me, as a listener, to get them to expand selections within that style? Surely if they're already playing Billy Joel from the late 70's, they can play something else from "An Innocent Man" besides "Uptown Girl!"

I know this sounds like it's just a gripe session, but I really am interested to know if we listeners can really make a difference. I have posed this question twice to the program director via e-mail and not gotten much satisfaction from the response - you know, the we-always-encourage-our-listeners-to-provide-feedback-so-we'll-know-better-how-to-serve-you routine without any real answer as to what's going on inside the guy's head.

So if anyone has just some general feedback on the process a programmer goes through in building his station's repertoire, I'd much appreciate it. I'll devote more time to the discrimination angle in my next post.

365. Re: Question: what influences a programmer's choices for his station's repertoire?

Newsgroup: rec.radio.broadcasting

Source record: 12227

Short version of the probably long response your question merits:

Radio stations that play "oldies" of any genre or era generally do some kind of research with a broad, representative sample of the people who will listen to that type of format with any regularity. They do this by having the people get together and playing pieces of many, many songs for them and getting a score. Generally, again, stations will pick only the songs that score well with a broad group of listeners. And songs that do not score well are considered dangerous and not played, since low scoring songs tend to drive listeners away.

The fact that a son was a hit "then" does not make it a hit "now." Many songs in any format of that type are not desirable now. In one case where I was involved, I tested over 1800 classic rock and rock tunes from 1967 to the 90's and came up with 430 that could be played. The remainder were undesirable today, even if they were hits then.

From: Robert Jeffares <robert@pnn.org.nz>
Message-ID: <u65skb7lc31742@corp.supernews.com>
Source record: 12228

Somewhere in the world there must be SOMEONE who still makes Short Wave broadcast transmitters.

We are not looking for megawatt power.

Our allocations will provide for 5kw - 10kw

We will operate on 3.4MHz 3.9MHz and maybe 7.2MHz

This project would run to 5 transmitters

If you can help us locate a manufacturer who has a suitable product we would appreciate the assistance.

please reply to transmitter@pnn.org.nz

thanks in advance

Robert

So this guy expresses opinions that you don't like, so he should be taken off the air? Hey, thats real American.

The reason Albom is on the air is because his show gets ratings and those ratings get advertisers who pay all the bills. He could be advocating having sex with turnips but if it got ratings and advertisers dollars he'd be on the air.

It looks by reading your post, you listen to him everyday and hang on his every word. DUH!

The makers of American Radios have done this remarkable thing. They have put at least two buttons on those radios that will solve your problem. One turns the radio OFF, the other turns it DOWN. If you don't like Albom either turn him off or down, but ranting about taking him off the air is asinine. If you can get more listeners and advertisers, by all means, show up at the station and let it rip. Otherwise try Dr. Laura!

"I'll probably get slammed for this, but e-bay has a lot of old Muzak vinyl recordings that demonstrates their old concept of stimulus progression. This was when Muzak played their own versions of songs, and not the actual songs like they do now with their satellite system."

Muzak has a large number of satellite channels now, but they still do "foreground music" as they have for many years.

"Is there any way to monitor the current Muzak DBS without subscribing? This is not an effort to get something for free, but it's for home use and Muzak won't sell subscriptions for home use, and won't explain why."

DISH Network offers many of Muzak's satellite channels to the public as part of the America's Top 100 and America's Top 150 packages; this doesn't include "foreground music" or some of their other business-oriented services, but reportedly those are not encrypted and can be picked up by using a "free-to-air" DVB receiver with a DBS dish pointed to the DISH Network satellites at 119 degrees West.

There is your problem: low power shortwave. There are plenty of transmitters available in the normal SW power ranges of 100 to 500 kw, mostly form European manufacturers.

If the unit is for fixed frequency tropical band usage (the frequencies you suggest are there), most US manufacturers can tune a production model to these SW frequencies. I know of no frequency agile low power SW transmitters. Nautel of Canada sold a station I am close to an SW transmitter a few years ago in the 10kw range. Might try them.

Sounds like "The Point" is another programming service like "The Edge", or even "Z Rock" with headquarters in (most likely) Los Angeles, NYC, or Chicago. The individual stations pay the programming service to tell them what to play. Once they sign up for the particular service, no deviation is allowed. I bet they don't even have any live announcers at your local station. Talk about "local service"! Not!

While the name is a copyright mark, and licensed by many staitons, the
execution of the format is basically local. There are a couple of
consultants like Randy Kabrik who have specialized to an extent in the
fomrat, but it is neither syndicated nor networked.

Z-Rock died years ago; it was an old SMN format. "The Edge" stations,
similarly, are not generally like each other. It is simply that the name is
catchy and memorable for that sort of, well, edgy, music.

> The individual stations pay the programming
> service to tell them what to play.

No they don't.

> particular service, no deviation is allowed.

Since there is no "service" this is also untrue.

> I bet they don't even

Most do.

> Talk about "local
> service"! Not!
>

Why would the hits in a particular genre be that radically different form
city to city anyway? Some of this stuff goes back to early MTV, and is very,
very national in appeal. Still, the stations are mostly researched and
programmed locally.

388. Attn XM radio listeners

Hi, I am a college student doing a research paper on XM radio. Specifically I am looking into how it has been marketed/advertised. Can you tell me how you first heard of it? I've seen the 2 TV commercials with BBKing and David Bowie. Have you seen ads for it in magazines, for example? Local newspapers? on AM/FM radio? Did you hear of special offers or promotions to entice you? Thanks muchly in advance for your help.

What planet are you from? Ever been in commercial radio?

Maybe in Puerto Rico the listeners pick the music but not in the real
world. No broadcaster gives a hoot about the listeners. They follow
the almighty dollar, so they listen to the sponsers instead. If the
advertising dollar likes Milli Vanilli, the station will play it even
if the listeners don't like it.

Ya gots ta remember: listeners don't give the station money.
Advertisers do.

Not true. The advertising dollar doesn't give a damn about what kind of lure is being used, only about what kind of...and how many...fish are being caught.

>Ya gots ta remember: listeners don't give the station money.

True. Listeners are the product.

John Webster

>
> What planet are you from? Ever been in commercial radio?

Obviously you have not been. It shows.

I, on the other hand, have been in commercial radio for over 40 years.
Thanks for asking. Presently I am involved with stations in mainland US
markets 1, 2, 3, 4,6, 10, 12, 15 and 16 plus a number of smaller ones, as
well as market 13 which is not on the mainland.

The normal procedure, with or without a consultant, is to do local research
with local listeners to find out what music is widely acceptable within a
specific format and which songs have significant negativity. The station is
then programmed based on listener input form local listeners. If the station
plays currents, it is likely that they do call-out research on a regular
basis whereby the station gets a weekly or regular read on the newer songs
or the recurrents in the format on a local basis.

A consultant, in these situations, generally would assist local staffers in
research interpretation, since local stations may do only one or 2 projects
a year (larger markets may do 3 to 4 large tests a year, though) while the
consultant may see 50 or so different tests a year and gets a better ability
to interpret based on a variety of experiences.

The consultant does not pick the music, but they certainly may help the
local staff determine how to best implement a research project. A consultant
may also be involved in the initial research to determine format
selection... a study often called something like a Format Opportunity Survey
or something similar. And the station, if it is a good one, will probably do
at least one perceptual each year to make sure that the station images, air
talent and such are not suffering from incipient problems.

In some smaller markets, a consensus of stations in the general area may be
used in place of costly local research simply because the market does not
bear the cost (an Auditorium test may run form the low $20 thousand to mid
$30 thousand range per test and call-out can run over $1000 a cycle). So, a

station in Grand Junction might use research done by the same radio company in Boise and Colorado Springs to determine the song lists... as some knowledge is better than none at all.

>
> Maybe in Puerto Rico the listeners pick the music but not in the real
> world.

In Puerto Rico I use the same companies that are available to US broadcasters to do local AMTs and call out. The station probably spends in the vicinity of $100 thousand a year on music research... typical for stations in markets that size (top 20).

> No broadcaster gives a hoot about the listeners.

Actually, most do. That is why the spend on research.

> They follow
> the almighty dollar, so they listen to the sponsors instead. If the
> advertising dollar likes Milli Vanilli, the station will play it even
> if the listeners don't like it.

The ad dollar does not like any kind of music. The ad dollar like bodies, people, listeners. So stations pay to talk with listeners to find out what they want to hear. And then they play it.

I am very sorry your favorite songs are not getting played. It must be that you are alone in likening them, because if they were truly popular, research would pick up on them and they would be played.
>
> Ya gots ta remember: listeners don't give the station money.
> Advertisers do.

We have known that for a while. Thanks for sharing. Radio is a classic case of bimodal marketing. There are textbooks filled with data on how that is done. Most of us have read many of them. You obviously have not.

I am not a subscriber (at this time) to XM radio, but I thought I could answer your question anyway.

I first heard of it in this newsgroup. I still have not seen any TV commercials or magazine ads for it. I have seen articles about it in newspapers, like the Washington Post, and maybe the Baltimore Sun.

The most promotion I have seen for it has been in Best Buy advertising supplements, where they emphasize the cable-TV-on-radio channels (ESPN, CNN, etc.). This emphasis has been the biggest reason I haven't looked into it further.

Some comments on this group suggest that some of it may be worthwhile, but the thought of paying for those other channels is a major turnoff.

I haven't been convinced that I'd benefit from XM since I can program my own channel. (It's called CD-R.)

The chap that posted is in New Zealand, in case you did not see his e-mail address. I doubt he could get 5 old Collins rigs. And I doubt that converting them would be cost-effective. And 1 kw on the tropical bands is simply not enough for reliable coverage even in the semi-local area. Which is why I presume he was looking for 5 to 10 kw units.

My experience with MW transmitters is that there are simply too many modifications of the oscillator/driver as well as the final to make it practical to do conversion. I'm sure hams with a lot of time on their hands plus the resultant sense of achievement may find taking MW commercial gear up to 4 MHz rewarding. For a broadcaster, it is not fun.

I would disagree. Radio, like newspapers, TV, even cable today, is a bimodal marketing model.

Let's go back to the newspaper. We know that newspapers lose money on every copy sold, yet they insist on increasing circulation. But the product is still a newspaper. The bimodal part has to do with usage. An advertiser uses the newspaper to reach consumers while a reader uses the newspaper to get information, which may include that information included in advertisements as well as the news, commentary, opinion and other features. So, the newspaper could not exist without both users, the reader and the advertiser. So, the product must of necessity be the paper itself, not the reader.

Same applies to radio. Without advertisers, the listeners are useless in the model for a commercial station. Without listeners, the radio station is useless to the advertiser. The product is thus the programming.

The programming of a radio station generates both listenership and revenue if successful. If it only generates the former, it is not. There are cases of stations with minimal listenership that achieve high revenue, so to say the product is strictly the listener is not really proven true.

> > Consultants don't pick music; listeners do.

Perhaps in an ideal world this would be true -- but as a practical matter, it seems this represents more of an ideal than a reality. To a degree, this is inevitable -- after all, how you ask the questions will effect the answers you get. Also, how accurately does the sample group reflect the actual target audience? I suspect that sampling errors are inevitable, since a good chunk of the population are difficult to reach due to caller ID and answering machines.

Lastly, the idea that corporate agendas don't effect the sound of a statoin impresses me as wishful thinking. It does seem that (for example) Clear Channel has a general idea of how they want their "Kiss" and "Mix" stations to sound, and while there is certainly some variation from market to market, I think this is probably limited by the general constraints of how these formats are defined by corporate management. For example, in pre-Clear Channel days, the Dallas-Fort Worth "Kiss" station would throw in an occasional late seventies/early eighties disco song during the daytime. That those songs disappeared probably has more to do with Clear Channel's cluster strategies than any real listener feedback.

Lastly, cost and budget issues will be a consideration. I wonder how the folks in Tyler, TX would feel about their local CHR station only having one local DJ if they were asked?

> Richard Cranium wrote:

> Ya gots ta remember: listeners don't give the station money.

And I suppose that smoke would be coming out of them after a short time
with fully modulated AM.

I'm out of touch with Continental Electtronics recent products. Do they
still modulate at moderate power and follow that by a linear amplifier?
Or was that found to be hopeless in freqyency-agile HF transmitters?

Their old modulated power level might be about what our Kiwi friend
needs.

Wrong. "KISS-FM" sounds exactly the same in LA as it does in St Louis
as it does in NYC. Same voices, same music. It's satellite fed to
local subscribing stations.

> > I bet they don't even
> > have any live announcers at your local station.
>
> Most do.

Maybe for the morning show, and only if the station doesn't carry
Howard Sternum or Don Imus. After that most stations are satellite fed
from a studio complex in a major city.

> > Talk about "local service"! Not!
> >
> Why would the hits in a particular genre be that radically different form
> city to city anyway?

Every market has different taste(s) in music. A tune that was a smash
in LA may have never been played in NYC. Consultants don't understand
that.

Some of this stuff goes back to early MTV, and is very,
> very national in appeal. Still, the stations are mostly researched and
> programmed locally.

That's a load of bull hockey. The vast majority of stations are
programmed from a major city and fed by satellite link. If they do a
single "survey" per year, that's a lotta work for them. Remember, it
costs money to do that and the name of the game is making it, not
spending it on surveys.

And don't get me started on MTV. They were good (if over-homogenized)
for a few years. They suck bigtime now. Nobody watches it except in
the ghetto.

thanks for the observations David you are 100% right, anything second hand available in this market is going to need a LOT of work to make it useable, and then we have to maintain it.

I would rather build the Tx from the ground up and then I know the history of the power transformers, the caps, and the other components that do age over time.

problem with design and build is an investment in workshop and test gear which will cost more than the units we build, and which will have zero use and value at the end of the production run.

If we thought there was a market for this stuff it would be worth establishing a manufacturing business. For some reason all the companies who have been in this for years don't make what we want probably because there are not too many broadcasters who are looking for 800km primary service area coverage.

The Country Music Hall of Fame and Museum here in Nashville has
extensive archives and footage.

WLS's National Barn Dance was the original old time music broadcast.
The Grand 'ol Opry was copied from the National Barn Dance by George
Hay who had been an announcer at WLS.

>Also any ideas for current country

Amateur Radio Newsline Report 1278 – February 8, 2002

Amateur Radio Newsline report number 1278 with a release date of Friday, February 8th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Another Anthrax scare halts mail to the FCC in D.C. and ham radio growth may not be as good as it seemed. These stories are first on Amateur Radio Newsline report number 1278 coming your way right now.

(Billboard Cart Here)

**

AMERICA AT WAR: FCC STOPS D.C.MAIL DELIVERY DUE TO NEW ANTHRAX SCARE

The Federal Communications Commission says that it will not accept paper mail in the Washington D.C. area until further notice. This, after a trace amount of the Anthrax virus was found during a routine test. Amateur Radio Newsline’s Paul Courson, WA3VJB, is in the nations capitol with the details
--

The scant amount of anthrax contamination found at a Federal Communications Commission mail facility in Maryland last week was consistent with cross-contamination of mail. At least that’s what the result of tests conducted by the Center for Disease Control and Prevention showed.

The FCC's mail processing facility in Capitol Heights Maryland, outside Washington, was tested about a week and a half ago as a routine precaution. One sample taken tested positive for Anthrax. The C-D-C blames the problem on cross contamination of mail. This means one or more pieces of mail from another facility may have inadvertently brought the contaminant to the Maryland site.

The agency is arranging for the facility to be decontaminated and re-tested. Mail deliveries, which have been halted, will not resume until the area is found to be anthrax-free. For ham radio, this only affects such things as requesting or commenting on rules change requests.

The FCC said it would also test the mail room at its Gettysburg, Pennsylvania, facility to make sure that it is Anthrax free. Gettysburg is where most Amateur Radio related mail including license applications and renewals are sent and is not affected by this latest paper mail suspension order. At least not so far.

For the Amateur Radio Newsline, I’m Paul Courson WA3VJB in Washington.

--

Late last year five people, including two postal workers, died of the inhalation form of anthrax and more than a dozen were infected in a series of attacks that followed the terrorist raids on the World Trade Center and the Pentagon. So far no arrests have been made in that case. (Published news reports)

**

SPACE AND SCIENCE: ON-ORBIT COMPUTER FAILURE CAUSES ISS OUTAGE

Ham radio was there but it was not needed. That’s the basic wrap up after a computer failure aboard the International Space Station sent the 17-story complex into a slow drift for a few hours on Monday February 4th.

The temporary outage also disrupted voice communications with the ground using normal channels. It also brought science research to a halt. But NASA officials said that neither the station nor its crew ever were in any danger.

The station drift was halted about 17:00 GMT. That enabled the crew to begin the job of re-orienting the stations solar panel arrays. Once normal power levels were restored, systems and experiments that had been shut down were brought back on line.

The computer shutdown was eventually traced to a defective hard drive. James Hartsfield, a spokesman for NASA's Johnson Space Center in Houston said that the three ham crew was never in any danger as a result of the failure. He termed it nothing more than an interruption to their normal work day.

Launched last December 5th on board the shuttle Endevour, Russian cosmonaut Yuri Onufrienko RK3DUO and U.S. astronauts Daniel Bursch KD5PNU and Carl Walz KC5TIE are the forth crew to inhabit the I-S-S. In addition to all of the high tech communications gear the crew also has ARISS - the ham radio station on board the International Space Station as backup voice and data communications. It was available, albeit not needed this time around. (ARNewsline(tm) from NASA Release)

**

HAM RADIO GROWTH: CENSUS REDUX

Some dark news following the good news on ham radio growth patterns. The numbers may not be as good as we reported two weeks ago. So says Fred Maia, W5YI, who follows growth trends in ham radio. And Fred says that the numbers we presented are overly optimistic:

--
Fred Maia:

“The FCC database is a database of all amateurs who have been licensed for twelve years. Thats ten years for the license term and an additional two. The reason it stays in the database for the additional two is so that it can be renewed diring the grace period. Thefefore, the licenses in the database are two years more thanthe ten year term or twenty percent inflated.”

--

In our story we used statistics from several sources including QRZ, W5YI and others. But Fred says that there are more recent numbers that show things may not be as good as they may seem on the surface.

According to Fred, as of January 15th 2002 there are actually only 98,030 holders of the Extra class license, 86,425 legacy Advanced, 138,546 Generals, 318,603 Technicians and legacy Tech plus and only 39,972 Novice class. The total is 681,576. That is considerably lower than the 720,194 in the latest QRZ census and 10,424 lower than the adjusted 692,000 we believed to be accurate.

The bottom line. Once you take away the expired licenses that are in their grace renewal period, the club and military recreation stations and the like the numbers tell a different story. One thats not nearly as rosy as we and others thought only two weeks ago. (ARNewsline(tm))

**

WINTER OLYMPICS 2002: COMMEMORATIVE STATION ON THE AIR

The Winter Olympics are in Salt Lake City Utah and ham radio is helping to celebrate the games with a special events station. Linda Reader, N7HVF, has more:

--
“Its going to start on Thursday at 5 PM Mountain Standard Time and it will go until the 25th of February. It will be available on all bands, so people will only need to listen around. The station call will be W7U and the trustee is W7EO.”
--

Again, listen for W7U celebrating the 2002 Winter Olympics through February, 25th. (N7HVF)

SPECTRUM: WHITE HOUSE PROPOSES PAYOUT TO CHANGE FREQUENCIES

The Bush administration says that it will propose setting up a $715 million fund to reimburse federal agencies that relocate their RF operations. This, for moving away from spectrum that has already been auctioned to commercial service providers.

In the past, federal agencies have had to negotiate with the winning bidders to cover relocation costs. In fact, following the September 11th terror attacks the Pentagon said it would not move off bands that it uses for military training and other purposes without sufficient funds to pay for relocating.

This created a stalemate over making available airwaves hotly desired by mobile telephone companies like Verizon Wireless. Now, in his budget just sent to congress, President Bush proposes setting up a fund to streamline the reimbursement process. Auction receipts to cover agency's relocation costs would be paid into the fund and federal agencies would be reimbursed for their relocation costs out of the proceeds.

What does this mean for Amateur Radio you ask? Simply that more spectrum that hams share with the government and military could be up for grabs sooner than most thought it might happen. But even with the subsidy some analysts of military communications say that it still could take several years before you see any spectrum moves take place. (Published reports)

**

FCC: OLYMPICS CAN USE 2300 MHZ HAM BAND FOR OLYMPICS

Broadcasters at the 2002 Winter Olympics have been granted a Special Temporary Authority from the FCC to use a ham band for their coverage of the Salt Lake City games. The S-T-A was made available at the request of the Salt Lake Organizing Committee R-F coordination group to use 2300 to 2305 and 2390 through 2450 MHz for remote pick-ups at various Olympic venues.

Unlike Australia two years ago, this FCC action does not take hams off the air nor does it forbid amateur use of the band during the period of the S-T-A. Instead it took action reminiscent of one that helped to establish ham radio's "National Frequency Coordination Council." The agency told all spectrum users that it had designated the Salt Lake Organizing Committee is the single point of contact or "SPOC" in regard to all Olympics radio frequency requirements. This delegated authority continues with the committee through March 31st. (FCC, Broadcasting & Cable, ARNewsline(tm))

**

PUBLIC SERVICE: HAM RADIO AT THE SUPERBOWL

Last week's Super Bowl played in New Orleans between the St. Louis Rams and the New England Patriots was a squeaker to the very last play. With the game tied at 17 to 17, in the 4th quarter, New England opted for a Field Goal that brought them victory in the very last seconds of normal play. It was a game seen by millions, but what t-v viewers did not see was the work of a group of New Orleans area hams who were a part of the behind the scenes communications effort for the game. Amateur Radio Newsline's Don Wilbanks, KC5MFA, lives in the Big Easy and has this look at the role that ham radio played:

--
While thousands cheered on the Rams and Patriots inside the Superdome and millions watched on television around the world, a handful of New Orleans hams were busy outside in the streets of the Crescent City.

--
“K5OEP go ahead.” “Checking in, nothing to report. Everything’s normal. WA5RT 2104 aaah, Poydras and South Claiborne.” “K5OEP roger, 2218. Other station?”
--

K5OEP is the call sign of Southeast Louisiana ARES. New Orleans area hams assisted the American Red Cross as they provided tracking for those sent to area shelters or hospitals should the unthinkable occur. Several Emergency Response Vehicles were in use feeding the workers and standing by in reserve should they be needed in an emergency. The ERV’s had a staff of 2 plus a ham with voice capability and APRS tracking. There were “Action Teams” standing by with a ham and a dual band HT. Hams also manned a command post trailer at City Hall as well as the Red Cross operations center on Canal Street and another Red Cross office in suburban Metairie. The communications operations began on Friday, February 1st and continued Saturday as well as Super Bowl Sunday. Tom Miller, AC5TM, ARRL Louisiana Section Emergency Coordinator and Keith Barnes, W5KB of the Red Cross were instrumental in putting the effort together. The local CBS affiliate, WWL-TV channel 4 did a lengthy report on the Red Cross, of which about a minute was focused on the hams. Several hams were featured on camera in the piece. Thankfully, this is representative of most of the radio traffic.
--
“K5OEP this is W5GAD.” “W5GAD, K5OEP go ahead.” “Just checking in Josh and, um, if it’s possible could we get a cup of coffee next time the truck comes down this direction?” “This is KC5BCR, we’re gonna take care of that coffee request.”
--

Only three things occurred that could be considered out of the ordinary... a semi-nude escapee jumped off a bridge to evade capture, a Rolodex in the Superdome caught fire from being too close to a light and the New England Patriots finally won the big game. And isn't it fitting that an underdog team called the Patriots would be victorious on this first Superbowl since September 11th. Next on the agenda for the city... Mardi Gras on Tuesday, February 12th. From Party Central in New Orleans, Louisiana, I'm Don Wilbanks, KC5MFA.

--

Before we leave this one we have some interesting statistics. According to the Broadcasting and Cable newsletter, Super Bowl 36 delivered the Fox Television Network a 42.5 rating and 61 share in what are called the metered Nielson overnight market ratings. This means that about 67 percent of United States households with television sets had them tuned to the game at some point during the telecast. (ARNewsline(tm) - Produced by KC5MFA with sound provided by KD5BLV)

**
RESCUE RADIO: HAMS ASSIST FOLLOWING QUAKE IN TURKEY

Amateur Radio operators in Turkey were among the first to respond in the wake of a earthquake that rocked the province of Afyon on Sunday February 3rd. More than forty were killed and at least 170 were injured injuries were reported in

the aftermath of the 6 point zero tembler. Structures were destroyed and lines of communications were cut. Enter Amateur Radio.

According to an ARRL bulletin members of Turkey's Civil Defense Search and Rescue Team responded following the quake. The bulletin quotes Aziz Sasa, TA1E, the president of the Turkish national Amateur Radio society as saying that S-A-R communicated with it's headquarters in Ankara and within the affected area. This was because ham radio was the only long and medium-range communication resource available until normal lines of communications were restored. Most ham radio communications was on VHF using a system of linked repeaters. (ARRL)

**

RESCUE RADIO: AMATEUR RADIO OPERATORS HELP SAILBOAT IN DISTRESS

The ARRL Letter says that Amateur Radio played a role in the rescue of two people aboard the sailing vessel Antigone. This, after it ran aground off Honduras on Thursday, January 24th.

Ed Petzolt, K1LNC, of Hobe Sound, Florida, told the Letter that, despite some apparently deliberate interference, members of the Intercontinental Net on 14.300 MHz helped relay communications from the vessel, which was equipped with an High Frequency marine radio.

David Walz, AG4LI/HR6, in Honduras was in contact with the boat and passed traffic from the stranded mariners to the Net. Petzolt said he was able to patch the US Coast Guard in Miami through to Walz, so the Coast Guard could obtain additional information and coordinate with Honduran authorities.

Petzolt said the two passengers aboard the 40-foot vessel were safe, and the boat was on the beach. The FCC is reportedly investigating the interference issue. (ARRL)

**

HAM RADIO SCHOLARSHIPS: QUARTER CENTURY WIRELESS ASSOCIATION

The Quarter Century Wireless Association has announced its funding several scholarship for 2002. There are eleven QCWA scholarships valued at $1000 each and five valued at $1500 each to be awarded later this year. Hams interested in applying for the QCWA Scholarships should contact the Foundation for Amateur Radio. The Foundation administers the scholarships sponsored by the QCWA. Additional information and an application form may be requested by letter or QSL card to the FAR Scholarships, Post Office Box 831, Riverdale, Maryland, 20738. (QCWA)

**

HAMFESTS: LIMARC N.Y. FEBRUARY 24TH

LIMARC -- New York's Long Island Mobile Amateur Radio Club will hold its annual indoor Ham Radio flea-market On Sunday, February 24th. Location is the Levittown Hall beginning at 9 a-m. More information is on the web

www.limarc.org. (N2DO)

**

THE HANDI-HAMS: 2002 CALIFORNIA CAMP FULL

The Minnesota based Handi Hams say that their California Radio camp is now full. This year, campers will be treated to presentations by Jeff Reinhardt, AA6JR, for Alinco, and everybodys favorite ham radio instructor Gordon West, WB6NOA. The dates for the 2002 Handi Ham California Camp are March 3rd to the 10th at Camp Joan Mier in Malibu. More is in cyberspace at www.mtn.org/handiham/workshop.html. (HandiHams)

**

BREAK 2

Here when you need us 52 weeks a year. We are the Amateur Radio Newsline, with links to the world from our only official website at www.arnewsline.org.

(5 sec pause here)

**

EMERGING TECHNOLOGY: SUPER NET HAS ARRIVED

Australia’s new super-net has had its first successful demonstration, proving it can carry an enormous amount of data between two locations. In fact, its not just fast. It is virtual reality come to life. Q-News Graham Kemp, VK4BB, has a look at what super net can do:

--
In its 'maiden voyage,' the new high speed networking technology --10 Gigabit per second Ethernet -- ran a revolutionary combination of technology that allowed two people, in different locations, to work together on a virtual 3D object, each being able to feel the object and see what the other person was doing to it. At the same time they could use a studio quality video link to communicate.

These two functions were tested in a situation where they had to compete against a volume of network traffic equivalent to Sydney's telephone system at peak levels.

The demonstration involved networking a virtual environment from two separate sites, CSIRO's Virtual Environments laboratory at the Australian National University and CSIRO's corporate headquarters several kilometres away.

--

According to Graham, networks such as this will allow users in several locations to feel computer generated objects such as body organs. Among other things, this tactile ability means a surgeon could train many students in different cities at the same time. (Q-News)

**

EMERGING TECHNOLOGY: CENTRAL STATES VHF SOCIETY CALL FOR PAPERS

The Central States VHF Society will be holding it's 36th Annual Conference later this year. The dates are July 26th to the 28th at the Sheraton Four Points Hotel in Milwaukee, Wisconsin.

And now comes an invitation to those interested in making presentations at this event. You are invited to submit an outline to Marc Holdwick, N8KWX, who is this years Technical Program Cairman.

Holdwick says that any topic related to weak-signal VHF operation is welcome and can be submitted in either paper or electronic format. But says N8KWX, those submitting will be required to have the finished work in his hands by May 5th to be included in the printed Proceedings.

If you are interested in taking part, you can contact Mark Holdwick by e-mail n8kwx@csvhfs.org. His snail-mail address is PO Box 6051, Buffalo Grove, Illinois, 60089. More information is on the web at www.csvhfs.org/CSVHF02.HTML (CSVHFS)

**

EMERGING TECHNOLOGY: RF CONTROL OF BIOMOLICULES

Scientists from the Massachusetts Institute of Technology Media Lab report that they can now control biomolecules with radio frequency energy. Bruce Tennant, K6PZW, reports:

--
Biomolecules such as proteins and nucleic acids are basic building blocks in nature. They carry out a wide variety of nano-scale functions, many of which have proven useful in drug discovery, drug delivery, biocatalysis, and bio-materials. But to optimally exploit these capabilities, researchers must be able to rapidly control their activity.

Now in the paper, titled "Remote Electronic Control of D-N-A Hybridization Through Inductive Coupling to an Attached Metal Nanocrystal Antenna, researchers describe a unique method to do this. One that employs the phenomenon of inductive coupling to metallic nanoparticles by radio frequency energy to specifically and remotely control DNA molecules. And they say, it works.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW.

--

Their paper was published in the January 10th issue of the journal Nature. More information is available at www.engeneos.com. (Technology Today)

**

INTERNATIONAL - UK: NEW RSGB PRESIDENT

The Radio Society of Great Britain has a new President. As of January 1st, Bob Whelan, G3PJT, has taken up the leadership position at the United Kingdom’s national ham radio society.

Whelan says that he is looking forward to the challenges ahead in raising the awareness of the value of Amateur Radio as a way of interesting the next generation of radio engineers and scientists. He will serve a two year term leading the RSGB. (GB2RS)

**

INTERNATIONAL – SOUTH AFRICA: NEW SHORTWAVE GUIDE

Media Network reports that a new comprehensive country-by-country guide to domestic and external shortwave broadcasts from sub-Saharan Africa, including opposition broadcasts to the African continent, has been added to the British DX Club web site. The guide, compiled by BDXC editor Tony Rogers and fully updated for the winter schedule period, is available in by-country and by-frequency versions. It can be found on the Articles index page of the web site at www.bdxc.org.uk. (Media Network)

**

CONTESTS: GREAT LAKES QSO PARTY

The Great Lakes QSO Party will begin on Saturday, March 9th at 17:00 UTC and run through Sunday March 10th at 04:00 UTC. The object of this contest is to work as many Great Lakes States as well as VE3 and VE4 Canadian provinces as possible during the allotted time. C-W and SSB are the only modes permitted and operation is on all bands except for WARC. Logs must be submitted by mail before April 25th to the address listed at the contest website. Look for more information at www.geocities.com/mdxa1/qsoparty.html. (E-mail)

**

DX

In DX, the Trindade 2002 PWØT team reports that several major sponsors have come forward providing vital support for the upcoming DXpedition. ICOM America will be providing a number of ICOM IC-756 PRO II transceivers. ICOM will also be sending along an IC-910H for satellite operation. Possibly the first-ever satellite activity from Trindade.

But that’s not all. Electril, a Brazilian manufacturer, has begun shipping antennas to the team staging area and Bob Heil, K9EID, of Heil Sound has personally made arrangements to insure that the DX’ers will have new reliable headsets. Meantime, JA1FGI and JA1WSK have covered the cost of purchasing and shipping a complete RTTY, PSK-31 and SSTV equipment package. Lastly, its reported that the Six Meter Amateur Radio Klub and the Chiltern DX Club are the first organizations to provide the D-Xpedition with financial support.

The operators will leave Rio de Janero on February 15th for Trindade. More information is at the DXpedition website located in cyberspace at www.trindade2002.com (PW0T release)

**

THAT FINAL ITEM: THE SWOOPER

And finally this week, a loud buzzing noise being heard in the international shortwave band is apparently a new RADAR system used to measure wave height. According to Mark Fine, the system is located at Barnegat Bay New Jersey and transmits a one megahertz wide signal in varying five megahertz wide segments. Take a listen:

---
swooper audio here
--

Fine tells Amateur Radio Newsline that he made that recording on 4.795 MHz at 1850 UTC on February 5th. He was listening on a Drake R 8 A receiver set to upper sideband and a 2.3 kHz bandwidth. He says that during the evenings this beast takes over a whole band and is heard as far away as Europe and South America.

Already, some SWL’s have nick-named the noise a "swooper" because it sweeps quite fast making a "swoop" noise as it goes by in SSB. Others have called it the Windshield Wiper Network, which they say is very apropos. (DXLD, CGC Communicator with “Swooper” audio provided by Mark Fine).

**

NEWSCAST CLOSE

Not really unless you want to permanently mount the cradles and
antennas! The antenna is portable, the audio connection is a
walkman-style jack and you can buy a wall-wart at Radio Shack.

408. am broadcast antenna height

Newsgroup: rec.radio.broadcasting
Date: 2002-02-11 14:38:41 UTC
From: Robert Jeffares <robert@pnn.org.nz>
Message-ID: <u6flrhbjt5nn82@corp.supernews.com>
Source record: 12169

I am looking for views on the optimum height for am AM antenna to deliver the best possible signal to the primary service area [ground wave] and minimise sky wave radiation.

My tutor, a very respected "old school" engineer favoured a 1/4 wave vertical and both of our sites [1280kHz and 630kHz] had 1/4 wave verticals.

They work, they are relatively easy to construct and they are moderately expensive.

But in the course of time I have discovered that a 5/8 radiator really sends out a better local signal.

Actually in the lessons he gave us in the makeshift classroom he had in the abandoned building next to our studios he did tell us that a 5/8 would work better.

Why don't we use them everywhere on AM?

Is it cost?

Or is it more difficult to get them up.

Or are 5/8 radiators too "narrow".

We are looking at a project where we will have to erect a new site because all the existing sites are either full or in the wrong place.

We will be 10km further out of town so we need to deliver as good a signal as possible.

Looking at "What Works" I can see that there are all sorts of tower heights being used.

Your comments will be appreciated.

I know this sounds weird, but a group of us grew up working at the A&P
during our college years, back in the late 70's and early 80's. We
stayed friends after we quit, and I found a used SCA receiver at a
second hand radio shop, which had the crystal installed for Muzak. I
hooked it up in my apartment with a couple of mounted wall speakers,
and when my buddies would come over for a party, I'd crank in on as a
joke.

Now, 15 years later, I was curious why the old SCA didn't work anymore
when I dug it out of the attic. Then I found Muzak was brodcast on
DBS. I guess it's part of the monitoring buff in me, but I'd like to
try and receive it again. I would love to crank it up again when my
buddies, now older but not wiser, come over. What is interesting
about your comment, though, is that I can't remember the last time I
was on an elevator that played any kind of music.

Take care.

Thanks very much, Ed for your response. Satellite reception seems
like an expensive hobby, so I'd like to research it before I jump in.
I am curious about "free-to-air" DVB reception, and would like to
learn what else is out there. I had a list of Muzak channels for
EchoStar, and I'm interested in the "background" channel. I'd really
like to verify that it's not encrypted. Is this something that can
easily be tested out in a satellite sales showroom?

Thanks!

412. Re: Attn XM radio listeners

XM has used heavy outdoor advertising in the Dallas/Fort Worth area, which was one of their first markets. That makes sense since radio is an out-of-home media primarily anyway and Dallas is a long-commute market for many people.

They also have bought television advertising as well.

Hope this helps a little.

For sale: Percentage of nice AM station in
Williamsport, PA.

We are still looking for an investor or two to
finalize the funding to acquire a nice little fulltime
AM in Williamsport. It is on 1050 Khz, 1 KW days, 500
watts PSA and 36 watts nights. Non-directional. On the
air since 1951. Dark now.

We can get it for a price little more than the value
of the real estate. 10 acres and a transmitter shelter
come with the deal as well as a 220 ft. guyed and
lighted tower.

Active or inactive investors with at least $10,000 are
welcome. You would own stock in the corporation.

Please email or call me at: (478)741-1710 in Macon,
GA.

I am a semi-retired broadcast engineer.

Recently I have suffered from some cowardly detractors
that have (with no evidence whatsoever!) implied that
I am some sort of scam artist! I would like to add
that I have held a SECRET level security clearance and
was Chief Engineer for a NYC 5 KW AM! I was the past
President and founder of an FM in San Francisco, CA
which is on the air since 1973. Does that really
"sound" like a thug?

Those of you wishing to flame are not welcome. If you
have a question, even a hard-hitting one, please ask
but I don't need to be "put on trial" for trying to
fund an honorable venture!

73,

Meyer Gottesman, W6GIV
Macon, GA

What you are or are not is for us to judge. Calling someone else
names isn't very professional either.

The old moderated group would not tolerate your posts, but since we
have no moderator, I guess we have to put up with your incessant FS
posts in this group. Luckily, the delete key works.

Now, if I were looking for a station, I would just simply go the usual
brokers in the marketplace and inquire. Why do I need you to put it
together?

Carl Navarro

We do, in fact, have a moderator (me). And I have asked before whether business-related posts and for-sale posts are ok or verboten, since Bill had a policy of being very liberal about what he would accept and did not have a ton of guidelines about content. I've not received replies from more than a half-dozen participants.

So again, since I'm just here to post what the rest of you deem appropriate, let me know whether you guys think the station-for-sale posts from Mr. Gottesmann are OK for me to pass through to the newsgroup. Majority rules.

Obviously, I already know what Mr. Navarro wants...

A 5/8 wavelength tower would only be around 150 feet high on the 75
meter band; half that for 39. I doubt if you'll be getting much ground wave
in the lower SW bands due to attenuation. It's essentially the skin effect
applied to the earth. For your frequencies it's really a narrow-lobed direct
wave signal with near-zero degrees elevation.
When I used 5/8 wavelength arrays (AM daytimers) for 75/80 ham usage, I
lost some effectiveness over a horizontal dipole for closer in locations
(300 to 1000 miles or so), but clearly made out FB in the 3000 to 10,000
mile range. Even worked a ZL3 on 75 once with WAUK's two-tower phased array.
Argentina was a piece of cake...

Where do you get your information?

Kiss-FM in LA is a hit oriented CHR and Kiss in NY is black/urban oreiented.

They not only are not sateelite fed...but wouldn't even be mistaken for the
same station.

> Maybe for the morning show, and only if the station doesn't carry
> Howard Sternum or Don Imus. After that most stations are satellite fed
> from a studio complex in a major city.

Most? more than 50% of all stations are sat fed after AM Drive? Again,
please quote your source.

Maybe in markets #100+...

> > > Talk about "local service"! Not!
> > >
> > Why would the hits in a particular genre be that radically different
form
> > city to city anyway?

Not necessarily radically....but somewhat different. And if you are in a
competitive stance in your market...you wanna know which songs are dogs with
your audience...even though they are big elsewhere. This is the competitive
edge.
(BTW...as far as your gold library...When a song was first
released...depending on the market's make up...it may not have been
aired...and therefore is an "unknow" to many.)

> That's a load of bull hockey. The vast majority of stations are
> programmed from a major city and fed by satellite link.

Again, please cite your source. Apparently you've worked in small market
radio your entire career?

My earlier post made no mention of your MW frequencies. I described a bit of my actual experiences on 75/80, since you also plan to broadcast there. Since you expect to cover a range up to around 500 miles, you might be losing at these distances with the vertical. Of course, you could broadcast with both horizontal and vertical radiators simultaneously if you have the frequency allocations and enough equipment. However, it makes more sense if you needed it to cover a much farther distance.
Obviously, a 5/8 wavelength would be very tall (and expensive) for your lower MW frequency. And then there are airplanes to consider. The one for 1280 KHz might be practical if you can afford it. Still, you're going to lose some effectiveness in the short-skip area over the 1/4 wavelength vertical due to the narrow vertical lobe. These shorter distances probably also involve your bread-and-butter audience...

Dear Mr. Navarro:

I respect your input. Some people apparently don't like my postings. I am puzzled why as they are harming nobody and nobody is forced to read em. I see lots of threads I have no interest in and delete them without even reading them.

As I said earlier today, if I get a sense that a lot of people on this forum dislike my postings, I will not run em anymore.

Alas, the last place I expected intolerance is from broadcasters who stand behind the first amendment!

Cordially,

Meyer Gottesman

> Gottesmann are OK for me to pass through to the newsgroup. Majority rules.
>
> Obviously, I already know what Mr. Navarro wants...

I've always felt these newsgroups were for information. A station for sale is information. You don't have to either buy into the station, or read the post, but given the state of the smaller stations financial plights, I think its great that someone can post an opportunity here publicly. This is after all rec.radio.broadcasting. Buyer beware is the operative word, but broadcasting is about more than just playing the hits and who your favorite DJ is and why everyone hates Clear Channel ect, ect, ect.

By all means, let people who have station investment opportunities post here. No one is making anyone spend any money and if you invest without finding out about not only who you are investing with, but what you are investing in, you deserve to get ripped off.

The smalltown stations, the mom-n-pops need all the help they can get, why trash them or the people who appear to be trying to save them? If you don't like seeing the FS posts, DON'T READ THEM.

Its always been amusing to me that the very people who make their living off of Freedom of Speech are some of the first that want to deprive others of that right when they see, hear or read something they don't like.

My earlier post made no mention of your MW frequencies. I described a bit of my actual experiences on 75/80, since you also plan to broadcast there. Since you expect to cover a range up to around 500 miles, you might be losing at these distances with the vertical. Of course, you could broadcast with both horizontal and vertical radiators simultaneously if you have the frequency allocations and enough equipment. However, it makes more sense if you needed it to cover a much farther distance.
Obviously, a 5/8 wavelength would be very tall (and expensive) for your lower MW frequency. And then there are airplanes to consider. The one for 1280 KHz might be practical if you can afford it. Still, you're going to lose some effectiveness in the short-skip area over the 1/4 wavelength vertical due to the narrow vertical lobe. These shorter distances probably also involve your bread-and-butter audience...

> average middle-upper class teen girl.

I've been an avid radio listener and broadcaster all my life. And you?

Bzzzzzt! Wrong again. MTV's current audience would seem to be the
black inner city. Rap, hip-hop, and gangsta crud exclusively. Have YOU
watched it lately? No "average middle-upper class teen girl" would or
should bother with that.

I don't watch it, for certain. There's too much good music to listen
to. Unfortunately, nobody plays good music on the radio any more. All
the good stations have been bought out by Clear Channel and gone to
crap. Much to the detriment of broadcasting in general.

And I don't "try" to doubt David. His experience may be different from
mine. I "do" doubt David. He spouts platitudes and banal generalities,
but they don't reflect what I see and hear every day.

You're sure about that? Which satellite channel is the feed on? I'd like to tune it in and compare it to New York's "KISS." You might be thinking about Tom Joyner's morning show, though he did a combo deal with Isaac Hayes for New York alone. Was Hayes heard on all "KISS" stations?

Rich

[Moderator's Note: Rich, perhaps ALL Kiss stations are not the same. I'd venture to say that all Kiss stations owned by a certain group - Infinity, CC, whoever - probably all sound the same. My classic example is 96.5 Kiss FM in Cleveland, 96.7 Kiss FM (formerly KHFI) in Austin TX, and WNCI 97.9 in Columbus, which, although it isn't *called* Kiss, runs the format. They all sound exactly the same down to the jingles, with the possible exception of 96.5 which doesn't do weather at the bottom of the hour. Oh yeah, you can throw in WFKS in Jacksonville FL, another Kiss station which I believe is run by Clear Channel also. I'm sure there are plenty more. Who's running Kiss in NYC?]

I believe the majority rules. I have my thoughts about this and I'm not dead set against it. You happen to be the only one posting and you post the same stuff every time. If I were looking for a property, I'd start at www.buysellradio.com or my real-estate broker.

Notice that the ENTIRE sales amount is published and perhaps a little more information is provided than your "investors looking for a joint venture AM station in Williamsport that's now dark".

O.K. What percentage does 20K get me? Whoops, that's the broadcaster and investor in me :-). I forgot you're an engineer.

I don't know, perhaps I had a bad e-mail day. This group is small enough that we can tolerate the FS traffic from one or two individuals. I hope I don't regret every saying that down the road.

Let Mr. Gottesman keep on posting.

This is a broadcasting discussion group, right? If people can look for jobs in here, or post positions, why can't Meyer try to put together a deal? Without going through a broker?

Muzak is still available in some markets on SCA, but your receiver may
not be set up for the subcarrier they use in your area. Stations can
have as many as three SCA services on different subs. You'd have to

find someone in the broadcasting arena and find out what station carries it and what subcarrier it is on. Indeed, they are now on satellite as well; many fast food franchises have a small direct satellite dish on the roof to pick it up (Burger King does this in some places).

It used to be referred to as "elevator music", thus my comment. I guess you'd hafta live in a major city with tall buildings (like NYC) to run into that now.

Good luck!

There are no questions in music research, just the grading on a uniform
scale of songs listeners actually hear.

As to selection of sample, the sample is as accurate as the Arbitron sample,
which is all that it has to do. Radio rathings are used to buy ad time, and
that stated purpose has to be kept in mind when drawing a sample.

Good recruiters, whether they are Arbitorn or researchers for radio
stations, get around the things like unlisted numbers well enough to get a
representative sample. No study has proven that the person with caller ID
uses radio differently... or the one with an unlisted phone... or the one
with an answering machine.

> feedback.

I'm guessing that CCU brought good research (Critical MAss Media) and found
that those disco tunes were too old and out of synch witht he CHR listeners,
and just ashcanned them. Most of that kind of playlist decision is made
very, very locally. For example, CCU's jammin oldies station in MIami is
very different from any other one that exists or has existed naitonally due

to the huge dance partisanship in that market as well as the ethnic breakdown of the market. Has nothing to do withy corporate.
>
> Lastly, cost and budget issues will be a consideration. I wonder how

They probably would not car or consider it important unless you biased the question. I had a 100% automated station in the late 70's and 80's that was #1... listeners did not care, did not know that that was "wrong" to begin with.

Bravo!!!!!!!!!!! God radio does suck - I gave up in 1998. I'm stuck with
one non-profit Classical. I like Alt. Rock!! WTF is any decent Rock
station????????? not "classic" damnit, current - and not hip-hop!!! ;-(. Oh
well.

Look into contributing your posts over in (alt.radio.broadcasting) and
support Pirate Radio and any other form of civil protest!!!!!!!!!!
Contribute to the "sign the petition" thread. We need more folks who hate
radio in that group!!!! Hope to see you there.

--
An unjust king asked a devotee what kind of worship is best? He replied:
'For thee the best is to sleep one half of the day so as not to injure the
people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;

But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

Dear Steve:

With reference to the FS supplied by Mr. Gottesman, it appears as though it is one of the functions of a radio broadcasting discussion group. As I have yet to see an offer in which I might be interested, there might be a visitor to the group who may benefit from a relationship that started on one of the offers posted here. In the era of "how many radio stations can I own" deregulation atmosphere, it is evident not all stations are owned by the conglomerates. Although, a Real Estate agent or even a conversation with the local broadcasters may not yield the desired results, this would seem to be a natural place for these posts.
A professionally run operation can still be profitable.

The usual disclaimer applies, " If you don't look before you leap, you deserve the broken leg, you dope!"

I have a complete Pepper production library (Red 3 ring binders and many 33 1/3 ET's), that may be rare to find in a complete form. Many radio stations traded them out with Pepper, and had had to return them at the end of the contract. The station owner at the time was able to get the Pepper salesman to include in the contract the library would remain the property of the station. I would say this deal occurred about 1959 or 60.

I am sure many of you may remember the slick, shiny suites the of fast talking Pepper salesman, there never was a used car salesman that could compare.

I even have some of the old Woody Woodpecker sounding jingles that were custom made for the station when I was a young jock in the early 60's.

I am cleaning house of some of this old stuff and am trying to figure out a way to get the word out to those who may interested is collecting 50's and 60's vintage radio memorabilia.

> Wrong. "KISS-FM" sounds exactly the same in LA as it does in St Louis
> as it does in NYC. Same voices, same music. It's satellite fed to
> local subscribing stations.

Wrong. While KIIS in LA syndicates the Rick Dees show to a number of
markets, the station itself is not syndicated (although a version of it is
on XM Satellite).

Some of the KIIS jocks do voice tracks for other staitons. SOme are also
called KISS, others are not. In any case, the staitions using these voice
tracks program local music selections and do local promotions and such.

>
> > > I bet they don't even

> > >
> > Most do.
>
> Maybe for the morning show, and only if the station doesn't carry
> Howard Sternum or Don Imus. After that most stations are satellite fed
> from a studio complex in a major city.

Wrong. In smaller markets, syndicated satellite formats are used in some
cases, but in larger ones there may be a lot of voice tracking, but the
station runs locally, not directly off a satellite. VOice tracks are sent
over the net or a line and integrated locally into the local format with
local commercials and local weather and drops and liners and such.

> Every market has different taste(s) in music. A tune that was a smash
> in LA may have never been played in NYC. Consultants don't understand
> that.

Consultants don't have to understand. Music tests determine what songs
people want to hear in each market. And in most cases, there is huge
national correlation. Add in the fact that something like 40% of working age
Americans have moved in the last 10 years means that most people in most
cities did not grow up there.
>

> spending it on surveys.

I know stations that do 2 to 3 music tests a year in medium markets and ones
in larger markets that do 3 to 4, plus weekly call out.

I know of no significant station in the top 20 markets that is 100%
satellite programmed. Of course, there are shows, like Rush, Howard, Laura,
etc., that are satellite delivered. But music formats? Nope. I even started
thinking of markets below #100 and I don't recall anyone that is 100%
satellite all the time that is in the top or middle ratings tier that is
centrally programmed bia a satellite-to-transmitter system.

If anyone knows of one, please post it... I scanned Duncan and BIA and could
not see anything in markets over 250 thousand that was not basically locally
programmed that was in any type of significant ratings positon with the
exception of a couple of Adult Standards outlets in smaller markets.
>
> And don't get me started on MTV. They were good (if over-homogenized)
> for a few years. They suck bigtime now. Nobody watches it except in

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

WCBN FUN-Razor starts Feb 12 - tune in now and tune in then

2002 is the 30th birthday year of WCBN-FM
AND
we celebrate 55 years of student broadcasting at UM
join us for reunion festivities June 21-23 2002

> black inner city. Rap, hip-hop, and gangsta crud exclusively. Have YOU
> watched it lately? No "average middle-upper class teen girl" would or
> should bother with that.

Hey, check any chart. What is selling and what is playing on CHR radio is
urban oriented r&b or hip-hop. MTV is essentially a CHR TV service, and they
reflect what is happening musically.

>
> I don't watch it, for certain. There's too much good music to listen
> to.

In your opinion. Remember, music is a subjective, personal issue. I'd
probably hate the music you like... in fact, I am nearly postitive of that
statement.

> Unfortunately, nobody plays good music on the radio any more.

In your opinion.

>All
> the good stations have been bought out by Clear Channel and gone to
> crap.

9% of total stations is not "all."

> Much to the detriment of broadcasting in general.

In your opinion.
>
> And I don't "try" to doubt David.

No, you don't. You post stuff like your statements on "NTSC"(sic) radio standards that are simply wrong. Then you state that the KISS staiton in LA is like the KISS staiton in NY, even though one is CHR and the other is basically Urban. Nice try... your arguments would benefit form a review of facts, though.

>His experience may be different from
> mine.

I did not know you had any broadcast experience. Kindly enlighten us.

> I "do" doubt David. He spouts platitudes and banal generalities,
> but they don't reflect what I see and hear every day.

In your opinion....

445. Re: For sale: AM radio station. Joint venture.

Methinks broadcasting is also about advertising. Though there's no Arbitron for this group, so we can't prove vast ratings among potential buyers, we can always promise results for advertisers, like we do on the air.
Guess the bottom line is, do the promoters of stations shares for sale get any results?
If they get email from serious potential buyers and wind up closing deals, good for us all.
If not, then like all advertisers who don't get results, they'll find some other venue.
If they get no results and still advertise, guess they're like P.I. spots. You just live with 'em.

446. Re: Meyer Gottesman

>>
Notice that the ENTIRE sales amount is published and perhaps a little more information is provided than your "investors looking for a joint venture AM station in Williamsport that's now dark".
>>

Go into the FCC files and see how some of Mr. Gottesman's deals have been structured in the past.

The information is there for public viewing.

His deals don't interest me, but I think his deals are above-board and he's not hiding anything.

I can well understand his insistance on a non-disclosure agreement after reading some of the posts on this NG from others.

447. Re: Meyer Gottesman

Newsgroup: rec.radio.broadcasting

I read Meyer's posts and wonder how he manages to get hooked up with so many deals, but as far as I'm concerned, his posts are fine.
I also believe that Bill Pfeiffer would not have had a problem with his posts.
As Steve wrote, Bill was extremely tolerant in his "moderating".
No problem with Mr. Gottesman's posts on my end, although I don't think I would be interested in investing...

> expensive.

I presume you mean INexpensive, compared to 5/8ths.

> But in the course of time I have discovered that a 5/8 radiator really sends
> out a better local signal.

A 5/8ths vertical will have a lower angle of radiation than a 1/4
wave. This may or may not benefit you in your application. The 5/8ths
wave will get you out better into fringe areas, but if your purpose is
to better serve the local area it's probably a waste of money.

> Actually in the lessons he gave us in the makeshift classroom he had in the
> abandoned building next to our studios he did tell us that a 5/8 would work
> better.
>
> Why don't we use them everywhere on AM?
>
> Is it cost?

Partially. A 5/8ths is more than twice as tall as a 1/4 wave, so there
is more expense in the physical structure as well as the installation.
Not to mention more possible problems with low-flying airplanes as
another poster mentioned.

> Or is it more difficult to get them up.

That too.

> Or are 5/8 radiators too "narrow".

Not "narrow", but they are "gain" antennas (over 1/4 wave).

> We are looking at a project where we will have to erect a new site because
> all the existing sites are either full or in the wrong place.
>
> We will be 10km further out of town so we need to deliver as good a signal

> as possible.

Hmmm. 1/4 wave should work fine. But a question: What will the total
distance from town be? You only say 10km further out.

> Looking at "What Works" I can see that there are all sorts of tower heights
> being used.

If you cannot install a good grounding system, I'd recommend a 1/2
wave since they are pretty much ground-independent and work quite
well. Both 1/4 wave and 5/8 wave require an extensive ground system.

> Your comments will be appreciated.

Let us know how things work for you.

449. resolution, Re: For sale: AM radio station. Joint venture.

>From 'StellaStar' <stellastar@aol.com>:
>Methinks broadcasting is also about advertising.

OK... Seems to be unanimous (*gasp*). Carl said privately to me that
if a majority of people ARE ok with Meyer's posts than he will not make
a big deal out of it, so it looks like they stay on the group...

There is, however, a technical issue. Since Meyer's posts about the stations
are substantially the same (similar bodies and message headers), Supernews's
spam filters have started catching them. I used to be able to push them
through by posting twice, but that doesn't work anymore.

I'll figure out a workaround for this, though.

A friend of mine is cleaning out the attic of a local AM station that has been on the air since 1942. There are hundreds of 10-inch 78 RPM promo discs in there. Most appear to be early-1950s vintage releases by such artists as Doris Day, Vic Damone and other singers popular around that time. They've been stored in a cool place and probably haven't been touched in years. Is there a collectible market for that type of record?

GTT

A 5/8 wave is better locally and will give you 3 DB of gain doubling your power level. I don't think AM station power is listed as ERP, so you will be ahead. You might check but I think a 5/8 is voltage fed so you would have a very high voltage at the feed point.

> Kiss-FM in LA is a hit oriented CHR and Kiss in NY is black/urban oreiented.

Hmmmm. Eduardo sez precisely the opposite. Which is it?

[Moderator's Note: Check www.kiisfm.com and then check www.kissfm965.com,
which is WAKS-FM in Cleveland, which is Top 40/CHR. Note the similarities
in the two Clear Channel Top-40 corporate websites. Note the similarities
between the two logos. Note the fact that KIIS has Rick Dees in the morning
and Sean Valentine on afternoon drive, and that Sean Valentine also does a
morning show for several other CHR stations including WAKS. Then, finally, note
the fact that KIIS calls itself "L.A.'s #1 Hit Music Station." My guess is
that KIIS is CHR.]

> They not only are not sateelite fed...but wouldn't even be mistaken for the
> same station.

See elsewhere in the thread. Most (I'll hedge here) "KISS" stations
sound the same. Same liners, same almost exact format. The entire idea
was so the listener could travel across the country (or move) and get
the same thing in Portland, Maine, as he had in Portland, Oregon.

For some reasons they've canceled this URL. You'll have to go to;

www.radiospirits.com
- then On the radio
- then Superhero Weekend

For some reason, the www.whenradiowas.com URL stopped working three or four days ago. So the correct URL is;

www.radiospirits.com
---------On the Radio
-------------Superhero Weekend

I, for one, would not pony up $20k for "a share" (unspecified) as a
silent partner in a daytimer with Post Sunset Authority in
Williamsport, PA. Williamsport may be a college town, but there aren't
any major markets without listening distance of the station.

Maybe in Harrisburg, or closer to Philly. But not Williamsport.

Actually ERP could make a difference to a licensing concern such as the
FCC. When ancient WHA moved from its old site during the 1970s to a terrific
site (in a marsh) with a new antenna in the University of Wisconsin
Arboretum it had to lower its power from 5 KW to 4300 watts for a time.

I thought AM station power was limited by the interference it caused, so a
higher antenna gain is going to mean lower power will have to be used to
keep the same field strength. It seems unlikely that you would just be
able to install a more efficient antenna without running into interference
preoblems that would require cutting back on the power.

> Hmmmm. Eduardo sez precisely the opposite. Which is it?

I said that LA's KISS stationis CHR. NY has a KISS that is urban leaning.

In other words, I said the same thing as RP.

KIIS in LA has been the home of Rick Dees, a very "white" morning show, for
over a decade. KIIS in NY is nothing like that!!!!

That is not the idea. Most listeners don't travel, and even if they do, they
don't fill in local diaries for the ratings. Out of towners are not of any
interrest unless you run a TIS.

What is at issue is an effective brand, and one that has lots of creative
and promotional material that can be shared. But the formats are not the
same.

Some are similar, some are slightly different, some are radically different.

There is a KISS-FM in Caracas, Venezuela. Do you mean they are taking the
programming off a satellite, too?
>

How can I disprove something that has no proof? Take the top 10 stations in every one of the top 100 markets. Heck, take the top 200 markets. You can get lists in the rronline site. I will bet that there are not more than a handful of stations that are 100% satellite programmed in the whole bunch of 2000 stations. Sure, there are Rush and Laura and Don and Howard. But not entire days of carrying a syndicated or networked show via satellite, land line or walkie-talkie. It just is not so. Period.

> Hey, check any chart. What is selling and what is playing on CHR radio is
> urban oriented r&b or hip-hop. MTV is essentially a CHR TV service, and they
> reflect what is happening musically.

I see. Your experience is strictly in CHR? That explains a lot. Sorry,
I grew up with Top 40 radio and the format hasn't changed much, only
the music has. Any broadcaster who seriously believes that the
audience only wants to hear 40 or 50 tunes over and over and over is a
simpleton - but that's why they do it. It's cheap and doesn't take
much talent. Besides, the record companies love it! They get to
control the music we hear, when it's the listeners who should control
that.

What "is selling" is not necessarily what is good. It's only what is
popular. And it's "popular" because that's what the record companies
want the stations to play.

I might agree with your description of MTV if only you had said VH1.
MTV is for urban blacks. Period. It has no relation to CHR at all.

> >

Note that I didn't make a blanket statment of "all" - that's your
phrasing. I said, "all the good stations". There is a difference.

> > Much to the detriment of broadcasting in general.
>
> In your opinion.

And in the opinion of a good many people who don't bother to listen
anymore. But you wouldn't know about those people; they don't sit in
on your research sessions. In fact, most stations don't have such
sessions. they do telephone surveys of a handful of (hopefully)
randomly selected people. Sometimes they succeed, sometimes they
don't. And more often than not if they don't like the results of the
survey they toss it and call other people to get the results they
want.

> > And I don't "try" to doubt David.
>
> No, you don't. You post stuff like your statements on "NTSC"(sic) radio

Perhaps I should correct that statement. He spouts textbook generalities that don't reflect the reality of radio today, let alone what I see and hear every day.

> In your opinion....

No, in my experience. Again, there is a difference.

I see that you are practicing engineering without a license.

A half wave needs a ground. Just like a 5/8 or a 1/4 wave.

You may be thinking about a Franklin or Franklinized antenna, which is sectional and somewhat like a vertical dipole. Or, perhaps, a station with counterpoise.

Where do you come up with these ideas?

Any antenna without a good ground will have poor to miserable efficiency. A shorter antenna with good grounding, or, particularly a humid or salt-water ground, will be more efficient. A half wave vs. a 5/8 wave have differences that in part have to do with the secondary (skywave) lobe. Read about them.

Stations are officially licensed for a specific combination of
``nominal power'' (something which is defined in the regs) and antenna
system efficiency. Since the AM rules were changed to allow ``odd''
power ratings (as in, not part of the sequence 100, 250, 500, 1000,
2500, 5000, etc.), there is really no need (other than ego) to be
licensed for a specific power. In the past, however, stations have
had to simulate very lossy transmission lines or inefficient antennas,
using resistors, in order to keep their nominal power at the licensed
level without increasing prohibited interference to other stations,
after replacing a component of their antenna system. Some stations
still do this today, sometimes for marketing reasons, sometimes
because they simply have had no need to modify their facilities.

Bzzzzzt! Wrong!. The vast majority of rap music is sold to white teenagers. The sales figures are something in the neighborhood of 80%.

I'm 17.. if you doubt me, that's your problem, but I know what's going on in the heads of the "average middle-upper class teen girl" and boy and everyone else my age... they watch MTV, M2, and BET. They don't watch VH1 or CMT. Extreme rap (BET) is what's in now.
I work at a Hot AC/Adult Top 40 station (have for a year and a half now) and almost every other call is from some kid or teen for some current rap song. That's what's in right now and that's what MTV plays.
I know I've probably lost any credibility anyone ever gave me in any argument here now by confessing my age, but in this argument I have you beat.

-I remember the Woodpecker jingles. How in the world anybody could
have come up with that logo and thought it was good.

One of the stations where I worked had Mars Jingles. They were also a
Pepper product, but I think they were supposed to be a cut above their
other stuff. The jingles we had featured Pete Drake on the steel guitar
and a suito sonovox with the theme "The station that's all heart." We
also had a small Pams package and I thought we ought to run the half
dozen Pams cuts we had and bulk erase the whole reel of Pepper junk. Of
course, you wouldn't have wanted to use the blank tape for anything
else. The tape they used was also cheap stuff.

Perhaps the appropriate solution is that he vary the text and message headers of his posts sufficiently to avoid being caught in the spam filters. It seeems that this would be the best solution from his viewpoint as well, since it would likely reduce the delay between when he submits a message and when it actually appears.

Sad but true. I see this in my little town too. Rap's been killing rock since the late 80's - only now it's complete. I could have liked rap in the 80's (the right age) - just never could like that noise.

--
An unjust king asked a devotee what kind of worship is best? He replied: 'For thee the best is to sleep one half of the day so as not to injure the people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;
But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

I have done more formats than I can remember. And in some cases, 40 or 50
songs is all that folks want to hear in some ages and some moments in time.
To say it is moronic is to insult not the programmer but the listeners. The
most listened to station in America, WABC, had cumes into the 4 million
range in the 60's. Just in NY metro. So all those folks were idiots?

The record companies have mixed emotions on this... the playlists are so
short and the stations so researched that there is a love hate relationship.

> What "is selling" is not necessarily what is good. It's only what is
> popular. And it's "popular" because that's what the record companies
> want the stations to play.

COntemporary CHRs do not use asales for much of anything. First, there is
not a way of telling the cut on a CD since singles for all pourposes went
away. So most play is based on research.
>
> I might agree with your description of MTV if only you had said VH1.
> MTV is for urban blacks. Period. It has no relation to CHR at all.

Hip Hop and R&B is CHR in many places. When and if I listen to CHR, those
are my choices. Beats Ricky and the Backstreets. And I listen for
curioosity, not personal preference.

> > In your opinion. Remember, music is a subjective, personal issue. I'd

I am willing to bet that I hate it. My preference is, in somewhat of an order, vallenato, cumbia, tango, rock argentino and a few other lesser gennres. These are your favorites? I think not.

>
> And in the opinion of a good many people who don't bother to listen

> want.

Radio stations research people who might listen to the radio.They don't fish where there are no fish to be caught. In many cases, I research people who are disenfranchised and light users due to the absence of a favorite format on local radio. In any case, the folks who don't listen are less than 6% of the population.

> what I see and hear every day.

Well, I actually work at a few stations. So your reality is meaningless unless you show some credentials.

> No, in my experience. Again, there is a difference.

Your experience as a listener? You obviously don't work in radio or, if you do, should consider an alternative career.

>>
> I thought AM station power was limited by the
> interference it caused, so a higher antenna gain is
> going to mean lower power will have to be used to
> keep the same field strength.
>>

Pretty much.

However, once the interference restrictions are met, the antenna efficiency is required to be at least:

1) 225 mV/M/kW at 1 mile (362.10 mV/m/kW at 1 km) for Class A stations,

2) 175 mV/M/kW at 1 mile (281.63 mV/m/kW at 1 km) for Class B and D stations, or

3) 150 mV/M/kW at 1 mile (241.40 mV/m/kW at 1 km) for Class C stations.

It is conceivable that a stations could be licensed to a specific power, but also be required to dissipate considerable power in a resistor because its antenna efficiency is too high.

There is a Class A station which moved to a significantly more efficient antenna, and as with all Class As it must operate with 50 kW transmitter power output at all times, but a little more than 11 kW is dissipated in to a resistor in order to compensate for the antenna efficiency. Therefor, about 39 kW goes into the antenna.

This is what can happen when your station is "grandfathered" at 362.10 mV/m/kW at 1 km, but the actual efficiency of your antenna is more like 410 mV/m/kW at 1 km.

This can work in reverse, too, in which case the station could operate with more than its formerly licensed power, provided the transmitter power output did not exceed the maximum for the class.

There is station which had a 225 degree stick (efficiency about 440 mV/m/kW at 1 km) which moved to a 90 degree stick (efficiency about 281 mV/m/kW at 1 km).

The station was a Class III, which had a limitation of 5 kW.

But as a Class B, the power could be increased to 12,250 watts.

The resulting field was the same, and the resulting interference, therefore, was not changed, even though the power was inceased by nearly 2.5 times its former power.

Other than a "poor man's" vanity object, why would anyone other than religious organizations be pumping good money into AM radio? I still listen to MW. However, when I ride in other's cars, AM is almost never on. Even my 76 yo uncle listens to Purtan's oldies on Detroit's FM.

That is not ERP. AM conducts via groundwave inthe local service area, and antenna systems are measured by efficiency based on a standard. If your antenna is more efficient than the maximum licensable value, then you reduce power input to achieve the same field strength as a standard antenna would provide.

Peter, are you here to put straight what I have probably confused or muddled?

So your assuming I disslike your musical tastes above - even (especially)
though I've not heard this type of music in my life? I only know what type
of music and do and don't like by listening to it!!!!!!!!!!!!!!!!!!

Peru-type Indian music I like, Mexican Accordion Mariatchi(sp) I hate, your
type - I just might love! (if I hear it, I'll know). Until then assuming
folks don't like your musical taste is biased.

I have no source to find out for myself if I'd like your type of music -
since the radio nor the record stores carry such eclectic catagories. ;-(

Right Gary... When calculating power on existing service, they use ERP, thus the antenna type is taken into consideration and power levels are adjusted accordingly. That's one reason why we have so many strange power levels on MW these days. It used to be 250w, 500w, 1kw, 5kw, 10kw, 50kw now the power levels are like FM's...

Does anyone know a supplier who will ship to the UK this item ?? The Terk AM1000 MW loop antenna is well knwon in the USA. Can't think why this excellent loop is'nt sold in the UK..

Story is I ordered one from 'Wholesale Advantage' but the loop packed up only after a week and the company have credited me the cost of the loop only but will NOT order another one. ~very helpful are'nt they ? Also they hardly ever respond to emails.

I hope not all US setups treat the customer like this. So can someone please point me in the right direction to obtain one of these loops ?

483. Deadline 2/19/02 to save independent smaller broadcast signals from IBOC-DAB

Newsgroup: rec.radio.broadcasting
Date: 2002-02-13 20:41:44 UTC
From: wrfr@aol.com
Message-ID: <u6ljs824dvdqa6@corp.supernews.com>
Source record: 12145

Its a testament to how much despair I have at ever having my LPFM application move at all under FCC CHairman Powell that I let this one almost slip by!!

The latest batch of tests of IBOC-DAB (In Band On Channel Digital Audio Broadcasting) (that in my opinion will DESTROY RADIO AS WE KNOW AND LOVE IT ... FOREVER) is now out.

THE FCC IS ASKING FOR PUBLIC INPUT.

The deadline for comments is 2/19/02 at midnight via the FCCs buggy-as-a-crate-of-oranges ECFS system.

To see the comments now available see Docket 99-325 Comments and notices in reverse chronological order:
http://svartifoss2.fcc.gov/cgi-bin/websql/prod/ecfs/comsrch_v2.hts?ws_mode=retrieve_list&id_proceeding=99-325&start=1&end=10&first_time=N]

Most interesting is that according to an article in Radio World:
http://www.rwonline.com/reference-room/trans-2-digital/rwf-digial-05.09.01.shtml

one of the major supporters of LPFM, David P. Maxson has apparently gone over to the Dark Side and now openly advocates jamming smaller radio stations in pursuit of "datacasting"!!

Actually in that article he doesn't say anything really about the jamming effect of doubling the bandwidth of a high power radio station from 200kHz to 430kHz on a smaller station nearby on the dial a few ten miles away.

What a contrast from Maxson's earlier comments on the official FCC record on IBOC:
http://svartifoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6010955386

that recommend moving DAB to a seperate band just as we established FM on a separate band from AM and for the same crowding and jamming reasons.

That's the problem, From what I can tell, there is no real apparent concern for the adjecents.

For example: What happens to the residents of Williamsburg Va when WAUQ89.7 in Charles City Va (a few dozen miles to the West) and WHRV89.5FM (A few dozen miles to the East) double in bandwidth?? THey are immediately adjacent right now and for listeners in-between, a good car radio can discriminate between them. But when they OVERLAP,

forget it!!

Luckily, if you like I have been down in the dumps and not paying attention, there is still the Reply-Comment period of usually a month following this Comment Period.

WE NEED TO CRANK OUT THE QUESTIONS!

It really boggles common sense to think that doubling the bandwidth of a station is not going to cause huge problems for anyone close to them on the dial!! Woe betide anyone in-between two large first or second adjacent stations! Ye of small town or suburban life will lose BOTH of those stations!!

Sincerely, Christopher Maxwell
http://www.DigitalDisaster.Org

Ricky, a former member of Menudo, has a lot of his stuff written or
co-written by Robby Draco Rosa, another ex-Menudo. Menudo was a real boy
band, formed in the late 70's in Puerto Rico by a guy named Edgardo Diaz.
The concept was that every band member would leave when they became 18. I
was asked to partner withthe band when it formed, and thought the concept
was limited... showing you why I am not in the music biz.

I'm still pretty positive you will not like it.
>
> Peru-type Indian music I like, Mexican Accordion Mariatchi(sp) I hate

If it has an accordeon, it is not mariachi.

Vallenato, cumbia, tango all have accordeons as the principal instrument in
the original form of the music. Argentine rock is highly mixed with threads
of folkloric music, which is why so little of it ever exports well.

>, your
> type - I just might love! (if I hear it, I'll know). Until then assuming

No, they do not. And I don't blame them. Again, there are kinds of music
that are just not for broad consumption that radio can not play but that can
be easily obtained via online retailers.

Actually, there is enough profit to be made by increasing circulation to
cover the per-copy loss with increased ad rates. Nearly no newspaper covers
the hard costs through sale of the paper itself.

>excellent loop is'nt sold in the UK.

Have you tried the loop antenna sold by Radio Shack? I find it to be quite good, although not quite as selective as the Select-A-Tenna. Plus, mine shows no sign of packing up.

I don't have a specific recommendation for a seller. A Google search brings up a long list of companies offering the antenna; I can't imagine it would be difficult to have one shipped to the UK. This one seems to offer a good price: http://shop.store.yahoo.com/shoppingmatrix3/teram1000.html

Does anybody know which jingle package did Peach 94.9 from Atlanta
used before
they are using the Groove Addicts package? If so, do you know which
jingle company the station got it from?

Has to be between 1989 and 1997.

You can also put a wire cage around a 1/4 aantenna so that it "sees" 5/8
wave. Less $$$$ than a new antenna. 817 341-0036The taller antenna
keeps the signal on the ground....the shorter one increases skywave.

I was a chief engineer (and an electrical engineer) during the 1960s and later. I loosely used the non-MW term "ERP" because I chose not to correct the poster I responded to. However, you take offense to the term, as if there is no radiation component to MW broadcasting. Obviously it is the nighttime radiation that poses the largest interference to co- and adjacent channel stations.
In these dying days of MW broadcasting, the FCC seems to freely allow power increases up to 50 KW to former peanut whistle daytimers that surely wouldn't fly even 10 years ago. This illustrates the relative non-importance of surface conduction contrasted to radiation. If conduction were so major a factor, the broadcasters would pump all of their power into the ground as American radio hams did during the radio-silence days of WWII.
Furthermore, the New Zealand broadcasting company is also concerned with covering a 500 mile range, probably with SW only. He didn't exactly state how. To achieve this, he will definitely require radiation over surface conduction.

Peter over in ba.broadcast is very knowledgeable in this. But I know of quite a few stations with lowered transmitter output or some device to make the efficiency of the system the equivalent of a standardized system. I don't know how many use resistors now, since the FCC allows irregular powers. there are quite a few of what used to be called Cass IV stations that have less than the 1000 watt power standard on those channels since they have overperforming radiators.

More expensive, but the Quantum loop from Radio + Electronics is one of the
preferred loops by MW Dxers. Look for "Quantum loop antenna" in a search and
you will find it. One version is about $200 and the other is $300. The Kiwa
loop is handsome,a nd more expensive. Both are far superior to the consumer
stuff.

I don't have a problem with the postings, though it reminds me of the
late Sonny Bloch trying to sell shares in a station in CT. for much
more than the value of the station. It was a sort of "The Producers"
scenario.

Sonny was eventually sent to jail after being convicted of bilking
listeners out of $21 million. He was diagnosed with cancer and
released early. He died shortly after being released. I believe it's
still in litigation. Will be for many years.

Broadcasting in Venezuela is totally profit-driven, except for the government stations which are the equivalent of NPR. KISS fm is one of the most successful stations in Venezuela, garnering huge ratings with a pop type of format with a short, apparently researched playlist. It is locally owned and programmed, and live 24/7. The owner also has 4 other FMs, most national networks, and 3 or 4 AM stations with national coverage via repeaters.

Latin American broadcasting is, in general, far more profit driven than has been tradition in the US. Most countries never had duopoly legislation or rules, so large groups have existed there for many decades. And, there have been few controls over content, commercial loads and such (except under the occasional and unfortunate totalitarian regime).

I can illustrate what it is like through a few anecdotes:

In the late 70's I was consulting an owner who then had 4 AMs and 3 FMs in Mexico City. While sitting in the manager's office, a group of sellers came in wailing and moaning; the government had reduced the maximum commercial load per hour from 42 to 36 minutes!

In Chile, several of the leading FM stations have as many as 40 different full power transmitters, covering the nation form Punta Arenas at the South to Arica, nearly 2600 miles to the North.

In 1967, I had an old residence converted into a broadcast facility in Quito, Ecuador. There, we had 6 stations (three were AM/FM simulcasts) with 6 formats in a row of studios. There was no restriction on commercial load, no restriction or requirement for news. The government saw broadcasting as a business and simply took the position of regulator of interference. In my case, I had the lowest commercial loads in the market, as low as 2 minutes an hour on the indie FMs, and was very successful.

In Colombia, with about 1000 total AM and FM stations, three groups own about 200 stations each. This percentage of totals has been fairly constant since the 60's. Interestingly, in the country that had the earliest concentration of media control, we find that radio takes 18% of all ad

budgets, while in the US the figure is less than half that. In addition, tune-in is higher than nearly anywhere in the Western hemisphere... nearly 30 hours per person per week.

Broadcasting is an entertainment service, with commercialmotivation. Just like the US.

I appologize if I was at all offensive. I was a group CE back then also. To me, an AM radiator does not have ERP in the manner that the term is used today, which simply means tailoring the beam of a radiator.

Since the FCC set regulations equating power with certain levels of field strength, it may be better to stick with field strength and equivalent power levels.

> In these dying days of MW broadcasting, the FCC seems to freely allow

Most of that, I believe, was due to the artificial limitations on the diffrerent channels. Regionals at 5 kw, clears at 50 kw and locals at 1 kw. Long ago, Canada started putting directional stations on local channels with up to 10 kw, and 50 kw on ther regionals. Mexico followed suit inthe 70's, and the US finally made the change afterwards.

I am guessing that they will use either short verticals or a T type antenna hung between vertical masts in the expressed band...known as the Tropical band, I once had a license for one of those stations in South America, and, while I never built it, I had it designed to use a pair of 40 meter masts with a T shaped dipole withthe sides facing N and S to put the signal up and

down the Andean corridor of Ecuador. We figured 3 kw would get us reliable day and night coverage for about 500 to 600 km. I ended up putting the money in an early FM station instead.

I have seen quite a number of tropical banders with this setup, as well as others with 30 to 40 meter masts r;unning non-directional. At one point, there were several hundred low band SW stations running commercially in South America.

> that.

Well--I'm surprised to hear that Dan Ingram, Larry Lujack, Alan Freed, Cousin Brucie, Jack Armstrong, John Landecker and scores of other great Top 40 jocks didn't have much talent.

And the long and distinguished list of successful Top 40/CHR stations over the years proves that a lot of people want to hear their favorite songs and hear them NOW!

All throughout this whole thread (and after reading the "sign the petition" thread at a.r.b), the Four Truisms of Music Radio Programming come to mind again:

1. There are two kinds of listeners to music formats--the Actives and the Passives.
2. There are always a lot more Passives than there are Actives.
3. Therefore, radio stations generally program music for the Passives, because there are more of them.
4. This pisses off the Actives royally.

What we often tend to forget (and particularly in these groups, which are primarily made up of musical Actives) is that most people want nothing more of radio than their definition of a pleasant background sound and whether it's going to rain today. And most commercial radio stations basically have provided those two things in one form or another, because that's what

potentially brings in the most money. Always have, always will. And before Lowry Mays and Mel Karmazin began playing Monopoly with radio stations, the FCC deregulated radio and Mr. and Mrs. Mom and Pop started cutting back to make money. And musical Actives have always complained about radio--beginning with classical music buffs back in the 40s and joined by other musical Actives as music balkanized itself into innumerable sub-genres. People were complaining about how bad radio was when Randy Michaels was still in grade school.

The only differences between now and then is that fewer companies own the radio stations and the companies that do don't seem to have the best people skills. Also, the formats like classical that used to be programmed to Actives--even on commercial stations--are being programmed to Passives--even on noncoms. Thus, the Actives complain even more--and despite the development of Actives-friendly satellite radio, some Actives either don't want to spend the money or have become so radicalized that they'd rather play Junior Anarchist by breaking the law and running a pirate station.

What I guess I'm getting at is that it doesn't matter if Lite Rock 98 is owned by Clear Channel or Mom and Pop and has a live local midday jock or a jock Propheting in his or her liners from a remote location--they're still going to play "I Hope You Dance" and 499 other consulted and tested songs because that's what gets the ratings. Kool Oldies 100 will continue to just play "You've Lost That Lovin' Feelin'" and "Satisfaction." Classic Rock 106 will keep playing "Stairway to Heaven." Continuous Country 94.5 will keep playing Garth and Faith instead of George and Merle. Hot 93.1 will still play Destiny's Child rather than the local punk band. And Classical 107 (if you have a commercial classical station) will play Strauss waltzes instead of Stockhausen and Cage. Not because Randy Michaels is an evil corporate asshole. It's because the majority of the American public doesn't want to be challenged when they turn on the radio--they want something comfortable and familiar. If the owner wants to make money, that's what they provide to the listener. And that's not going to change in the foreseeable future.

When it comes to commercial music radio, the Passives will beat the Actives every time. Count on it.

listeners who should control

> that.

Well--I'm surprised to hear that Dan Ingram, Larry =
Lujack, Alan Freed, Cousin Brucie, Jack Armstrong, John Landecker and =
scores of other great Top 40 jocks didn't have much talent.

And the long and distinguished list of successful Top =
40/CHR stations over the years proves that a lot of people want to hear =
their favorite songs and hear them NOW!

All throughout this whole thread (and after reading =
the "sign the petition" thread at a.r.b), the Four Truisms of =
Music Radio Programming come to mind again:

1. There are two kinds of listeners to music =
formats--the Actives and the Passives.

2. There are always a lot more Passives than =
there are Actives.

3. Therefore, radio stations generally program =
music for the Passives, because there are more of them.

4. This pisses off the Actives royally.

What we often tend to forget (and particularly in =
these groups, which are primarily made up of musical Actives) is that =
most people want nothing more of radio than their definition of a =
pleasant background sound and whether it's going to rain today. =

And most commercial radio stations basically have provided those two =
things in one form or another, because that's what potentially brings =
in the most money. Always have, always will. And before =
Lowry Mays and Mel Karmazin began playing Monopoly with radio stations, =
the FCC deregulated radio and Mr. and Mrs. Mom and Pop started cutting =
back to make money. And musical Actives have always complained =
about radio--beginning with classical music buffs back in the 40s and =
joined by other musical Actives as music balkanized itself into =
innumerable sub-genres. People were complaining about how bad =
radio was when Randy Michaels was still in grade school.

The only differences between now and then is that =
fewer companies own the radio stations and the companies that do don't =
seem to have the best people skills. Also, the formats like =
classical that used to be programmed to Actives--even on commercial =
stations--are being programmed to Passives--even on noncoms. =
Thus, the Actives complain even more--and despite the development of =
Actives-friendly satellite radio, some Actives either don't want to =
spend the money or have become so radicalized that they'd rather play =
Junior Anarchist by breaking the law and running a pirate station.

What I guess I'm getting at is that it doesn't matter =
if Lite Rock 98 is owned by Clear Channel or Mom and Pop and has a live =
local midday jock or a jock Propheting in his or her liners from a =
remote location--they're still going to play "I Hope You =
Dance" and 499 other consulted and tested songs because that's =
what gets the ratings. Kool Oldies 100 will continue to just play =
"You've Lost That Lovin' Feelin'" and =
"Satisfaction." Classic Rock 106 will keep playing =
"Stairway to Heaven." Continuous Country 94.5 will keep =
playing Garth and Faith instead of George and Merle. Hot 93.1 =
will still play Destiny's Child rather than the local punk band. =
And Classical 107 (if you have a commercial classical station) will =
play Strauss waltzes instead of Stockhausen and Cage. Not because =
Randy Michaels is an evil corporate asshole. It's because the =
majority of the American public doesn't want to be challenged when they =
turn on the radio--they want something comfortable and familiar. =
If the owner wants to make money, that's what they provide to the =
listener. And that's not going to change in the foreseeable =
future.

When it comes to commercial music radio, the Passives =
will beat the Actives every time. Count on it.

I am not an engineer. So, I have a few questions about this topic. (1) why did no one suggest a directional, phased array to put more signal into the target city 10 km further away? Don't they do that anymore? (2) There has been a lot of interest in Near Vertical Incidence Skywave (NVIS) propogation for regional coverage among amateur and military users of SW frequencies. Is there any applicability to MW? Typically, this is achieved by low, horizontal wire antennas.

This has become an interesting discussion.

"David Eduardo" amdavid@pacbell.net commented ..

>>
I see that you are practicing engineering without a license.
>>

Good one, David.

>>
A half wave needs a ground. Just like a 5/8 or a 1/4 wave.
>>

All MW antennas need a ground.

A minimum conforming ground system is 120 burried copper radials, each 90 degrees long. Additionally, shorter radials are often placed between the required 90 degree radials.

Longer radials than 90 degrees, and more radials than 120 have been employed.

>>
You may be thinking about a Franklin or Franklinized antenna, which is sectional and somewhat like a vertical dipole. Or, perhaps, a station with counterpoise.
>>

A Franklin is two 180 degree verticals stacked one on top of the other, and is center fed.

A counterpoise can be utilized in any situation where the base voltage is very high, which is true of a 180 degree vertical.

>>
Where do you come up with these ideas?
>>

I'll pass on that question.

>>
Any antenna without a good ground will have poor to miserable efficiency. A shorter antenna with good grounding, or, particularly a humid or salt-water ground, will be more efficient. A half wave vs. a 5/8 wave have differences that in part have to do with the secondary (skywave) lobe. Read about them.
>>

A-men!

I have worked on two unipoles. They have several supposed advantages. They are, in essence, a shunt fed folded dipole. A matching point is located somewhere up the skirt. It makes short sticks easier to tune. The width of the skirt should increase bandwidth, but the radiation I have seen is roughly comparable to a well installed 1/4 wave with a good ground. Generally, more are found on single tower ND stations. I have not seen a directional system with unipoles, but I'm sure one must exist somewhere. Anyone?

Peter, can you find the stats on any unipole installations? One I know intimately is WDSR-1340 in Lake City, FL. The tower is in the lake,a nd the ground system is not very good as it tends to corrode fast in the brackish lake.

P,S. I aborted the spell check as every instance of "unipole" suggested "nipples" as a replacement; do unipoles suck?

"David Eduardo" amdavid@pacbell.net asks ...

>>
Peter, are you here to put straight what I have probably confused or muddled?
>>

I am indeed.

>>
If your antenna is more efficient than the maximum licensable value, then you reduce power input to achieve the same field strength as a standard antenna would provide.
>>

That's assuming you are restricted by either interference considerations or by grandfathering of your antenna system's efficiency.

There has always been a minimum conforming efficiency for every class, but there is no maximum permissible efficiency, except for certain cases, most of which were the Class Cs which wanted to use the automatic increase from 0.25 kW to 1 kW.

If you were a Class III licensed at 5 kW into a 225 degree stick, you were allowed to radiate about 440 mV/m/kW at 1 km, for your 5 kW input.

If you subsequently moved to a conforming radiator, 281.40 mV/m/kW at 1 km, then you could, as a Class B, increase your input power to just above 12 kW in order to maintain the same horizontal field.

There would be vertical angle considerations nights, and that would complicate matters.

In this specific case, the 225 degree tower was day only, and there were no changes to the night array.

If you were a Class I licensed at 50 kW into a minimum conforming stick, and you were internationally notified with that efficiency, and you later moved to a very tall stick, you would have to reduce power input by some means.

As Class As must operate with 50 kW, unless grandfathered at a lower power, you would operate with 50 kW TPO and dissipate the excess into a resistor, thereby maintaining the same horizontal field days and nights. The benefits are the "anti fading" characteristic of some types of tall towers.

If you were a Class I with a non-conforming stick (KNBR comes immediately to mind), you would be grandfathered at 362.10 mV/m/kW at 1 km, even though your stick clearly was not performing to that level.

If you subsequently increased the height of your stick from its 500 feet to something like 660 feet, which is what it would actually take to produce 362.10 mV/m/kW at 1 km, then there would be no impact.

However, if you installed a taller stick there would be an impact.

Likely there is no place in the S.F. area which would permit a stick taller than 500 feet, anyway. KCBS's towers in Novato are also 500 feet, and they can't go any higher because of FAA restrictions. But KCBS is a Class B.

Most non-directional Class As have 195 degree sticks (that's the most common value, there are some which are slightly taller and some which are slightly shorter).

165 degrees is about the shortest that will produce conforming efficiency.

There are Class As with sticks as tall as 300 degrees (WHO) and 360 degrees (KFBK and KSTP).

Well, KFPK and KSTP are using Franklins, and those are actually classified as a 180 degree stick, even though the overall physical height is 360 degrees.

Franklins can radiate about 500 to 510 mV/m/kW at 1 km.

50 kW into a Franklin is about the same as 99 kW into a minimum conforming stick.

Didn't "get it" - or didn't bother to apply for it? The realized increase in coverage on those frequencies is frequently not worth the bother, although they obviously already have the 1kW transmitter.

The only thing that happened when the "graveyard" channels were authorized full 1kW at night was an increase in the noise level from a soft grumble to a loud grumble. Unless you happen to live within a few miles of the tower, of course.

"radiofun" radiofun@charter.net commented ...

>>
A 5/8 wave is better locally and will give you 3 DB of gain doubling your power level.
>>

3 dB over what?

I would presume 3 dB over the minimum conforming efficiency for the class.

But, there are three classes:

1) Class A: 225 mV/m/kW at 1 mile (362.10 mV/m/kW at 1 km),

2) Class B/D:175 mV/m/kW at 1 mile (281.63 mV/m/kW at 1 km), and

3) Class C: 150 mV/m/kW at 1 mile (241.40 mV/m/kW at 1 km).

If your station is a Class B with a minimum conforming radiator (281.63 mV/m/kW at 1 km) and you install a 5/8-wave radiator (225 degrees), you would expect 440 mV/m/kW at 1 km from that 5/8-wave.

That is a 1.562 field ratio, or a 2.441 power ratio. More than twice the power ratio is indeed more than 3dB.

But, FM and TV are measured in dB (dBk, dB above 1 kW, to be specific), whereas AM is measured in kW into the antenna system, and also by antenna system efficiency in mV/m per kilowatt input at 1 km from the antenna.

If your station is a class A with a minimum conforming radiator (362.10 mV/m/kW at 1 km) and you install a 5/8-wave radiator (225 degrees), you would also expect 440 mV/m/kW at 1 km from that 5/8-wave.

However, this is a 1.215 field ratio, or a 1.477 power ratio. Hardly 3 dB in this case.

Whenever one uses dB, the reference must be specified. And for MW, the appropriate references are those identified in (1) through (3), above.

I suppose one could use an idealized, infinitely small radiator (a point source) as a reference. Smith talk about that in one of his books.

For most acedemic purposes, an ideal 1/4-wave radiator over a perfectly conductive, infinitely long ground system is an appropriate reference.

But, for practical purposes, and for legal purposes as well, those identified in (1) through (3), above, are probably the best available.

>>
I don't think AM station power is listed as ERP, so you will be ahead.
>>

Is is sometimes useful to talk about equivalent or effective power, but that's a separate issue from effective radiated power, ERP, which is, again, an FM and TV "term of art".

KSTP (AM) could claim to have 99 kW effective power if the reference was the minimum conforming for its class (A).

KSTP could also claim to have 163 kW effective power if the reference was the minimum conforming for the next lower class (B/D).

KSTP could also claim to have 223 kW effective power if the reference was the minimum conforming for the lowest class (C).

But, KSTP simply claims 50 kW transmitter power output, which is certainly true, and neglects to mention that it has a superior radiator, as that was not relevant issue when that station was built, just so the minimum conforming efficiency for its class was met, which it most certainly was (510 mV/m/kW at 1 km, actual, versus 362.10 mV/m/kW at 1 km, minimum).

Peter.

I only have two comments:

1. This really is NOT a For Sale group; it's a discussion group. While
his posts may not be totally out of line, perhaps he should be
encouraged to post them in the correct newsgroup.

2. He posts stations as "For Sale", when he is actually looking for
silent investors. That could be misleading to some people. Is there a
"alt.radio.investment.opportunities" group?

Beyond that he doesn't seem to hurt anything. But do there have to be
multiple posts for the same deal(s)?

512. "Amerian Bizarre" Sat. 8 PM EST On 9335

Just a reminder to tune in to my show "American Bizarre" tomorrow night on WBCQ frequency: 9335 Mhz in the 31 meter band. Time: Saturday Feb 16 ay 8 PM EST, 7 Central, etc. (That's Sunday 0100 UTC) Thanks! We QSL. I want to see who's out there. Had a lot of fun with Mardi Gras and some real blasts from the past (Anyone remember "Bertha Butt"?
Thanks , Larry Pritchard (Larry Paul on the show- easier to remember!)

I hope you stuck it out on FM. I remember many of the pioneers sold out too quickly before it took off. Many advertisers back then wouldn't even want to advertise on simulcasters (even at no added cost) because they feared some of the listeners would drift away from MW. There's no mindset like that today!
I worked on some pre-1970 FMs that literally operated sans commercial spots of any kind.

Thank you. I learned considerable, as I hope others do.

Am I correct in assuming that a 5/8 antenna helps to eliminate the skywave that will come down on usable groundwave at the far reaches of the ground coverage?

OK Peter, help me understand something.

I use a program by Neil Adams (FCC Database Reader) which has a list of the radio stations and a diagram of the antenna patterns. You can see these patterns in a field plot, ERP, and a db plot. The ERP show the power sent in the direction.

How can the ERP change when (in my little mind) it should be a constant, since it is the EFFECTIVE radiated power? I can see that a change would happen if measuring in db and changing the reference.

Also, according to this program (which uses FCC data), KSTP has a maximum ERP (in the major lobe) of about 140kW. FYI KFAN has a lobe of about 410kW(!!!).

Thank in advance for the explanation.

Well--I'm surprised to hear that Dan Ingram, Larry Lujack, Alan Freed, Cousin Brucie, Jack Armstrong, John Landecker and scores of other great Top 40 jocks didn't have much talent.

And the long and distinguished list of successful Top 40/CHR stations over the years proves that a lot of people want to hear their favorite songs and hear them NOW!

All throughout this whole thread (and after reading the "sign the petition" thread at a.r.b), the Four Truisms of Music Radio Programming come to mind again:

1. There are two kinds of listeners to music formats--the Actives and the Passives.
2. There are always a lot more Passives than there are Actives.
3. Therefore, radio stations generally program music for the Passives, because there are more of them.
4. This pisses off the Actives royally.

What we often tend to forget (and particularly in these groups, which are primarily made up of musical Actives) is that most people want nothing more of radio than their definition of a pleasant background sound and whether it's going to rain today. And most commercial radio stations basically have provided those two things in one form or another, because that's what

potentially brings in the most money. Always have, always will. And before Lowry Mays and Mel Karmazin began playing Monopoly with radio stations, the FCC deregulated radio and Mr. and Mrs. Mom and Pop started cutting back to make money. And musical Actives have always complained about radio--beginning with classical music buffs back in the 40s and joined by other musical Actives as music balkanized itself into innumerable sub-genres. People were complaining about how bad radio was when Randy Michaels was still in grade school.

The only differences between now and then is that fewer companies own the radio stations and the companies that do don't seem to have the best people skills. Also, the formats like classical that used to be programmed to Actives--even on commercial stations--are being programmed to Passives--even on noncoms. Thus, the Actives complain even more--and despite the development of Actives-friendly satellite radio, some Actives either don't want to spend the money or have become so radicalized that they'd rather play Junior Anarchist by breaking the law and running a pirate station.

What I guess I'm getting at is that it doesn't matter if Lite Rock 98 is owned by Clear Channel or Mom and Pop and has a live local midday jock or a jock Propheting in his or her liners from a remote location--they're still going to play "I Hope You Dance" and 499 other consulted and tested songs because that's what gets the ratings. Kool Oldies 100 will continue to just play "You've Lost That Lovin' Feelin'" and "Satisfaction." Classic Rock 106 will keep playing "Stairway to Heaven." Continuous Country 94.5 will keep playing Garth and Faith instead of George and Merle. Hot 93.1 will still play Destiny's Child rather than the local punk band. And Classical 107 (if you have a commercial classical station) will play Strauss waltzes instead of Stockhausen and Cage. Not because Randy Michaels is an evil corporate asshole. It's because the majority of the American public doesn't want to be challenged when they turn on the radio--they want something comfortable and familiar. If the owner wants to make money, that's what they provide to the listener. And that's not going to change in the foreseeable future.

When it comes to commercial music radio, the Passives will beat the Actives every time. Count on it.

I never said the jocks didn't have talent. I said the basis of the Top
40 format sucked. The same crap, over and over and over and over and
over - well you get the drift. The jocks on 77-WABC obviously had to
have talent or they never would have gotten thru the format to display
their personalities.

> And the long and distinguished list of successful Top 40/CHR stations over

That's a lame excuse for torturing the rest of the population. And
what they have always wanted is VARIETY, not repetition.

Another blatant assumption. Pirates can be broken down into three
groups of people: Kids playing radio, frustrated ham ops, and
frustrated professional broadcasters.

> the listener. And that's not going to change in the foreseeable future.

Precisely my point. Broadcasters will do what it takes to MAKE
MEGA-PROFITS. They don't give a r@t$ @$$ about the audience. Their
attention is to the advertisers.

> When it comes to commercial music radio, the Passives will beat the Actives
> every time. Count on it.

But that too is an assupmtion on the part of the broadcasters. There
is NO WAY to accurately determine the listenership of any station;
Arbitron (and the others) are rough estimates. That's why most
stations "assume" that for every caller or letter-writer there are 10
listeners. And that's what they feed the advertisers. Assumptions - to
make more money. And, unfortunately, the listeners LOSE every time.

It is not only moronic, it's boring. "Those folks" may or may not have
been idiots; they were New Yorkers, after all.

FYI: Good old "77, WABC" was rated #1, but they drew their listeners
in the 'burbs and surrounding states. Within the City, WMCA (on 570)
was actually rated #1. BTW, NYC had four (count 'em) AM rock stations
at the time.

And the fact is that their format sucked. They played exactly 13
records (these were 45 rpm singles!) per hour, and 11 of them were the
same ones: The "Top 10" and the station pick hit of the week. I can't
deny that they had some of the best announcers, in that they were able
to come through the heavily restrictive format despite having exactly
20 seconds to say something at the end of each record.

The best WABC ever sounded was during the announcer union (AFTRA?)
strike in early 1967, when the management scrapped the format
completely and took over announcing duties. They actually played music
that was new and different (and a lot more of it) for a change.

Yes, I listened to them prior to moving West.

There were many, much better, stations around, but they were probably
inaudible in NYC. WMEX-1510, in Boston, with Arnie "Woo-Woo" Ginsberg.
WKBW-1520, Buffalo, with Joey Reynolds or Dick Biondi. WARM-590, in
Scranton. WNDR-1260, in Syracuse. WLS-890, Chicago. WFIL-560, Philly.
WIBG-990, Philly. WCAO-600, Baltimore. All played a greater variety of
music than WABC ever played. And that's part of what radio
broadcasting is all about: Not playing the same drivel over and over,
but possibly *educating* the listeners by playing things they haven't
heard before.

> > Since you don't know what kind of music I like, that's a totally

>
> I am willing to bet that I hate it. My preference is, in somewhat of an
> order, vallenato, cumbia, tango, rock argentino and a few other lesser
> gennres. These are your favorites? I think not.

Of course not, but all that does is reflect our ethnic differences.
Doesn't mean your taste in music is bad, wrong, or better than mine.
Doesn't prove anything, in fact.

> Your experience as a listener? You obviously don't work in radio or, if you
> do, should consider an alternative career.

Since the only jobs available in radio today are in sales and I'm not
a pushy sales-type, and management is still afraid to do anything that
hasn't "worked in (insert city name here)", I am strongly considering
it.

I've thought awhile about this before posting, because really there is no one single answer... everyone has their own tastes, mine happens to be in Modern AC/AAA music. One of my best friends listens to Hip-Hop/Urban and another one listens to everything from Britney Spears to Ludacris to Ani DiFranco, and I have one other friend who is into the whole punk-alternative indie scene. But for the majority.. the in thing is hip-hop.

WTHU was for many years one of only a few 100 watt Class IV stations in the country in the 60's and 70's. There was one in Wildwood, NJ, on 1230 I believe. Another somewhere in Iowa I can recall. And a few regionals had 100 ND night power... Piqua, OH, on 910 and WMAM-570 in Wisconsin were a couple.

Let me know what you do like, if there is anythingthat does appeal to you.
The website profiles the kid of music played on US Spanish language stations
by format, but has a section on Latin-American music form Colombia, where
Cumbia and Vallenato are originally from. The Pop/Rock format selections
have a bunch of Argentine rock in the selections.

> >

I wanted to re-visit my original query, now that I've had the pleasure of reading all the rants and raves (didn't know I'd be starting something here). With specific regard to the radio station in question - Houston's 106.9 The Point - I can tell you that there are live DJ's, they have sponsored a couple of city-wide events/concerts, and in almost every other respect, they sound like your everyday radio station (traffic updates, listener requests, etc.). But the issue of how they came up with their programming is still unsettled in my mind. Granted, I am just a simple listener, and by limiting my own rant to such a decade as the 80's I may be losing credibility with the forum here, but I cannot fathom a true 80's station not playing Michael Jackson in plentiful doses (I think the ONLY song they have played by him is "The Way You Make Me Feel"). Even if a survey or poll was done, could an 80's station in good conscience leave out an artist with such an indelible mark on the music they represent? Even if a survey came back labeling Lionel Richie or New Kids on the Block as taboo, could the random airing of an isolated song by one of these turn off that many listeners. If such a sampling of the general Houston audience did in fact occur, I would question the survey itself. Suppose the survey asked listeners to rate particular groups or even particular songs, but left off key artists such as the ones mentioned above (I'm not saying I WANT to hear NKOTB, but hey they were popular, just like Debbie Gibson, who they also don't play). If we the listeners aren't even asked to comment on such artists/groups/songs, they obviously don't show up in the sample and therefore no one at the station has an objective view of how they would be received. At that point, airplay of any of them would be up to the programming director, and if he already has a bias against them, listeners who would really like to hear some of that stuff (anyone remember "Perfect Way" by Scritti Politti - no one at the Point does apparently) are screwed because it would take a disproportionate amount of requests for a particular as-yet-unplayed artist or song to convince them that it's worth playing.

This all assumes that the director/manager ISN'T in some advertiser's back pocket, which would mean that no amount of requesting/pleading/screaming would change his mind about what gets played. Still, I'll give them the benefit of the doubt, as a naive listener, since they do appear to take phone requests. Then again, when they "play back" a request today for "Mony, Mony" it could be the same request they taped 6 months ago and they just keep repeating it as if callers are constantly requesting that song.

Who knows if it's all a big conspiracy? Maybe I'm just trying to make sense of an inherently screwed-up system. I just cannot ignore questions like, "why on EARTH do you announce an upcoming concert by a band you will likely NEVER play (Gene Loves Jezebel)?" or "what makes one song by an artist ("Uptown Girl") more desirable than an equally successful song by the same artist ("Tell Her About It") - both reaching #1 in '83, both staying there for 1 week, and both spending 15 weeks in the Top 40?"

I guess I just don't get it. Guess I'll head back down to MIX 96.5 for a more "normal" listening experience, at least one from which I know what to expect.

533. Interference with 89.1 in Portland

Newsgroup: rec.radio.broadcasting
Date: 2002-02-15 23:08:58 UTC
From: usbcpdx@my-deja.com
Message-ID: <u6r58a5hch9755@corp.supernews.com>
Source record: 12095

The longer I pull out the antenna on several radios (some spendy) I have, the more interference I get with 89.1FM in Portland, Oregon. THis does not occur with hi-fi receivers, and occurs less with my new (Henry Koss-designed) Tivoli Audio Model One. If I reach over and touch the antenna, the static interferes.

The same problem occurs at my downtown Portland 7th floor office.

My theory is one of the other stations is interfering... and I seem to recall there's an intermediate frequency in most radio sets which makes them also receive stations 8mHz or so off the desired frequency.

Don't know if that's the cause; I just want more interference-free reception. My home is about 4 miles LOS to the mountaintop where most stations site their towers, with no other broadcast towers nearby.

selected Portland stations

95.5 FM -- KXJM Portland -- 100,000 watts
97.1 FM -- KKSN Portland -- 100,000 watts
98.7 FM -- KUPL Portland -- 37,000 watts
99.5 FM -- KWJJ Portland -- 50,000 watts
100.3 FM -- KKRZ Portland -- 95,000 watts
101.1 FM -- KUFO Portland -- 100,000 watts
101.9 FM -- KINK Portland -- 100,000 watts
103.3 FM -- KKCW Beaverton -- 100,000 watts

Please allow me to thank you in advance for your kind and on-topic responses.

The only thing that happened when the "graveyard" channels were authorized full 1kW at night was an increase in the noise level from a soft grumble to a loud grumble. Unless you happen to live within a few miles of the tower, of course.
>>

1240 and 1340 here in the Monterey Bay Area are pretty good.

1240 is sited in Cannery Row and has a salt-water ground.

1340, which lost its site after the 1989 Loma Prieta Earthquake, is now co-located with 1080 and is diplexed into one of 1080's three towers, all of which are in Cochran Lagoon, and hence also has a salt-water ground.

1340 operates with 1 kW into a 111 degree tower days (319.00 mV/m at 1 km), and 0.85 kW nights (230.49 mV/m at 1 km) into the same tower.

This operation essentially duplicates the old, condemned site's efficiency, nights.

1 kW into a minimun conforming tower on 1340 would be 241.40 mV/m at 1 km.

Urban sucks (assuming Rap here), but "Classic" does to!! not due to the era, but to the same 30-songs and no b-sides. I'd love to have a "classical" that played stuff that I"m not tired of.

I'd prefer an Alternative Rock station - but Urban has killed them too!!! ;-(. that really sucks!

No. Listeners want repetition of their favorite songs. They are favorite songs because they enjoy hearing them. That is variety. Definition: variety is all my favorite songs with none that I do not like. Repletion is any playing of any song I don't care for, even if 90 days transpire between plays.

> Arbitron (and the others) are rough estimates.

Arbitron is an estimate, as are all polls. If you want closer accuracy, do a census. However, a census would be far too expensive, so we use statistical sampling, which has totally tolerable margins of error. Error, by the way, is not a dirty word in statistics or in research. It is a fact. The issue is to control and stabilize error within acceptable parameters. Arbitron does this quite will nearly all the time.

> That's why most
> stations "assume" that for every caller or letter-writer there are 10
> listeners.

I have never, ever, ever, heard that. I would say, at a certain LA station, we get maybe 100 letters a year from listeners (other than contest registrations). That makes every letter representative of 11,000 listeners.

Where _do_ you come up with this BS? I've never, in 43 years in radio, heard calls or letter equated to anything standardized.

> And that's what they feed the advertisers. Assumptions - to
> make more money. And, unfortunately, the listeners LOSE every time.

Stations do not use mail pull of contest phone activity to sell advertisers. Advertisers use ratings to determine CPP or CPM and make reasoned ad buys.

| This really is NOT a For Sale group; it's a discussion group. While
| his posts may not be totally out of line, perhaps he should be
| encouraged to post them in the correct newsgroup.

Doing a groups.google.com search on "rec.radio.broadcasting
charter" was instructive. The charter isn't conclusive about the
matter at hand - commercially oriented posts were let through as
long as there weren't a lot of them. So Steve's request seems
reasonable: it's a gray area in the charter.

When amplifying on the charter, Bill P. essentially described four
categories of posts that would definitely be kicked out:

a) not on-charter (but somewhat loose about this)
b) repetitive posts or followups to a post
c) articles with too much quote text
d) contentiousness for the sake of being contentious (i.e. flaming)

(I remember only one post of mine that Bill kicked out...for being
off-charter)

The posts in question may well qualify under (b) above.

And, ultimately, Your Killfile Is Your Friend.

....

> 101.9 FM -- KINK Portland -- 100,000 watts

This sounds like a classic receiver overload / intermod issue:
2 x 95.5 - 101.9 = 89.1.

You might try moving the radio around and seeing if you find spots where the interference is less. Local shielding by water pipes etc. may be used to advantage.

Good luck!

The Iowa station was KBAB (now KXLQ) in Indianola, Iowa. Later, their
daytime power was raised to 500 watts and 100 or 250 nighttime. Now,
the station is licensed for 500 watts daytime and 1000 watts night. It
doesn't get out much better with the 1000 watts at night than it did in
the 60's with 100 watts. The co-channel interference has increased.

>>
Am I correct in assuming that a 5/8 antenna helps to eliminate the skywave that will come down on usable groundwave at the far reaches of the ground coverage?
>>

Any radiator 180 degrees or shorter has no theoretical radiation at 90 degrees.

Any radiator taller than 180 degrees has theoretical radiation at 90 degrees, and this minor lobe increases in size as the height increases towards 360 degrees, where the vertical field equals the horizontal field.

200 degrees is a damn good radiator. Ideal, actually. And the impact on any "fringe" ground wave is usually acceptable.

225 degrees has a lot of high-angle radiation, but this height is still OK for those stations which are limited in power, such as Class IIIs and Class IVs.

The tallest Class A radiator I am aware of ... one which is not also a sectional ... is 207 degrees.

The most popular Class A radiator is 195 degrees.

The minimum conforming Class A radiator, over a very good ground system, is about 165 degrees.

Bottom line ...

One must carefully consider the station's class, the soil conditions, and the intended market, and then select the radiator height which leverages all of the relevant technical and economic considerations.

One generally cannot go wrong with 180 degrees.

Taller than 200 degrees would be a situational decision for a Class A.

225 degrees would make sense for some Class Bs and Class Cs.

A Franklin would make sense for any Class A which was high enough in frequency so that the radiator was affordable (and would be approved by the FAA and any local regulatory agencies).

KSTP/1500's and KFBK/1530's Franklin's are both over 625 feet tall.

A Franklin for KFI/640 would be over 1500 feet tall.

A Franklin for XEWA/540 would be over 1800 feet tall.

The full story: HCTM1 in Quito, Ecuador, went on as Northern South America's first FM in 1966. It ran 250 watts at about 800 feet from a site just over 10,000 feet AMSL. The format was Latina and International instrumental music mixed with Latin folklore... Peruvian vals, Argentine Tango, Chilean Cueca, Colombian Bambuco, Ecuadorian Pasillo, etc. No commercials were offered or sold.

After about a year or so on the air, a friend, the distributor of Ecuador's only instant coffee, asked me at a party whether he could advertise on the station. I told him I did not sell time; he asked why. I said that were I to sell time on that one, it would be so expensive he would be offended. At that point, he said, "go on... how muuch?" and I quickly gave a rate that was 4 times higher than that of the highest rated AM in the market. He agreed! He asked for one thing: exclusivity in his product category (since he was the only one, that was easy).

I then decided to offer only 6 20" spots an hour, one every 10 minutes. So there were 3-song sets with one 20" spot. Within a few months, using the low load and exclusive product category protection, the station sold out and made more money than any of my other stations. In 1997, the station was honored by the Ecuadorian Association of Broadcasters as the pioneer FM in the nation; it was on long before Colombia and Venezuela ever had an FM.

>Many advertisers back then wouldn't even
> want to advertise on simulcasters (even at no added cost) because they
> feared some of the listeners would drift away from MW. There's no mindset
> like that today!

My station was #2 in upper income listeners by 1968; it was top 10 in middle income listeners, too.

> I worked on some pre-1970 FMs that literally operated sans commercial
> spots of any kind.

That is what I wanted to do. I had hoped to keep the station non-commercial for a long time. I ended up building a second FM to do that, playing classical music. I built a half-dozen FMs in Ecuador before a nasty and leftist military regime offered to shoot me if I did not leave. I left.

Before leaving, I had put the original FM, which still survives and is owned by my oldest daughter, on a mountainside nearly 4000 feet above the city. We

used mechanical beam tilt and vertical-only polarization to cover that piece of the high Andes.

In your opinion. In fact, the core principles of Top 40 are the basis of every form of _successful_ radio programming, from classical to all news. That is, play the hits (of whatever musical style--and yes, there are even hit news stories and talk topics), play nothing but the hits, surround them with entertainment and information elements targeted to the audience. And when hits burn out, play the new hits.

It has always worked and it always will. Whether you or I think it "sucks" or not.

>>
I use a program by Neil Adams (FCC Database Reader) which has a list of the radio stations and a diagram of the antenna patterns. You can see these patterns in a field plot, ERP, and a db plot. The ERP show the power sent in the direction.
>>

Perhaps you mean a *logarithmic* plot, not a *dB* plot.

A dB plot is always with respect to some reference, and that reference must be specified.

>>
Also, according to this program (which uses FCC data), KSTP has a maximum ERP (in the major lobe) of about 140kW. FYI KFAN has a lobe of about 410kW(!!!).
>>

>From FCC data, KSTP's day radiator's efficiency is 511.77 mV/m/kW at 1 km and WFAN's radiator's efficiency is 379.81 mV/m/kW at 1 km.

Since the reference for all Class A's is 362.10 mV/m/kW at 1 km, one must compute the effective power with respect to that reference power.

Therefore, KSTP's effective (day) power is 99,876 watts,and WFAN's effective (day and night) power is 55,010 watts.

I guess you were talking about KSTP's *night* facilility and KFAN's *night* facility, not KSTP's *day" facility and WFAN's *day and night* facility.

Oh, well, too much good California Chardonnay at work tonight ;-)

Remember, KSTP is a Class A, and the reference is 362.10 mV/m/kW at 1 km, while KFAN is a Class B, and the reference is 281.63 mV/m/kW at 1 km.

Take the respective pattern maximums, the respective reference fields, and take the ratio of the two. Then square that ratio thereby giving the power ratio. Finally, multiply by the licensed power, thereby giving the effective power (with respect to the reference) in the main lobe.

FYI, the highest power gain is 1190 in Dallas. A close second is 1070 in Houston.

Peter ... feeling no pain ...
... in Monterey Bay

80's?? himmmmmmmmm, I remeber some stuff that was ok ;-/ a little ;-/

Bet they don't play "Boy George" either - I never liked him, but hell he was
big, yet to heard him since the 80's.

I bet they don't play Icehouse - they were big, yet not heard them since
"Crazy" in 89?.

I bet they don't play the Hooters! (they ruled!)

Do they play the Fix?
Missing Persons (I like the "new-wavish" 80's stuff) - too radical for 80's
radio?
Men without Hats?
Devo?
SoftCell?
StrayCats? (they ruled!)
IndigoGirls?
Tears without Fears?
DepecheMode? (I like)
Cure? (I like)
Cult?(Good rocken)
the Call?
SimpleMinds(surely they play them! - their good)
Smithereens (Great Rock - bet they are never played!)
Big Country?
U2 (old school stuff?)

Cant think of any others right now.

I miss the Cult/old-U2 ;-(.

HAving built a Top 40 that was the first all-music station in a large market
with 33 other stations, and having seen shares as high as 80's at night, I
can guarantee you that people like Top 40. People like their favorite songs.
Exceptions of course just make the rule stronger.
>

> at the time.

Concept. (Are you paying attention) radio audience now and then was measured
in a particular city's metropolitan area, now called an MSA or, sometimes,
CMSA. Audience for WABC was measured in the NY metro and the figures I
quoted are for the NY book. In additonal, WABC got lots of listening outside
their home market, but few stations ever have made much in sales on out of
market listening.

I am with one gorup of stations that shows up strongly in three different
MSAs and slightly in another. The only one they get any revenue from is th
home market, which is the biggest anyway.
>
> And the fact is that their format sucked. They played exactly 13

You are right and 4,000,000 regular listeners are morons. What sounds wrong about this picture?

Oh, there were more than 10 songs. A number of us here have had a chance to talk with or have had to compete with Mike Joseph either at WABC or later in his Hot Hits consulting days. The rotations ran like multiple gears in a fine Swiss watch, and there were always infinite combinations; if you had a favorite song in the lower chart postitions, you might have had to wait as much as 3 hours to hear it!

I grew up on Top 40 and it was my love of the excitement, the innovation and the energy in this format that got me into radio.

> Yes, I listened to them prior to moving West.

You mean when you were in San Francisco when KEWB changed formats in '67 or '68?

>
> There were many, much better, stations around, but they were probably

> WIBG-990, Philly. WCAO-600, Baltimore. All played a greater variety of
> music than WABC ever played.

None were anywhere nearly as successful witht he exception of WLS, which was owned by the same folks as WABC. Do you see a commanality here? WNDR was one of the most overcommercialized staitons in NY state; WCAO was one of Plough's rather imitative Top 40's... good but never great.

Nearly all plaed about the same size list. WABC was just the most exciting.

>And that's part of what radio

I'm not Colombian (cumbia, vallenato) or Argentine (tango and local rock).
No station in my hometown ever did or does now play that music.

What ethnic differences? You do not know what ethnicity I even am!

You are jumping to conclusions again.

> > Your experience as a listener? You obviously don't work in radio or, if

I don't work in sales, I have a job. I have also hired or approved at least
50 people in programming positions in the last year. You can't find a job
because you would not fit in, you don't know what radio is about and you
believe you bear the holy grail. I wouldn't hire you, either.

Proving my point that you are not in radio.

Otherwise, even if you don't want to reveal the calls, you could say "I am
with a/an AM/FM in (insert name of city) and have also been in a, b, c and
d cities."

Most every FM radio uses 10.7MHz for the IF, with the local oscillator
positioned 10.7MHz higher in frequency than the radio station carrier.
So 89.1 +10.7 = 99.8MHz. But this would be an issue if you
wanted to listen to KWJJ and a neighbor had 89.1 playing. Another
possibility is that there is a transmitter near the airport (for aviation
uses)
on 89.1 +(10.7 * 2) = 110.5MHz. This is known as an image frequency,
The small portable radios are likely to have poorer ability to filter out
the image than your nice hifi systems.

Try moving the portable radio to another location a few feet away
from the old location. This should cause the signal strengths of the
desired and undesired stations to vary in your favor. FM radio has
"capture effect" which means that the undesired signal need only be
about 3 to 6dB lower for the desired signal to sound interference free.

>>
WTHU was for many years one of only a few 100 watt Class IV stations in the country in the 60's and 70's. There was one in Wildwood, NJ, on 1230 I believe. Another somewhere in Iowa I can recall. And a few regionals had 100 ND night power... Piqua, OH, on 910 and WMAM-570 in Wisconsin were a couple.
>>

The Class IV in Mojave, CA was the last 100 watter in CA, excepting for the specified-hours operations of 1230 and 1240 in the L.A. area when 1240 in Pasadena was operating Wednesday evenings and Sunday days.

Mojave increased to 250 W, then to 1000 W/250 W and finally to 1000 W/1000 W, all without a DA or reduction in antenna efficiency.

Other Class IVs on the same frequency were not as fortunate. And at that time there were two Class IVs in Santa Paula and Oxnard which operated with DAs, days.

Those stations on 570 and 910 are special cases ... they're Class IVs "grandfathered" on Class III channels.

If they could install a DA and increase to at least 250 W, or at least to 281.40 mV/m/kW at 1 km, then they could be changed to Class B.

Formerly, Class IIIs had to be at least 500 W and at least 281.40 mV/m/kW at 1 km.

> plays, but everyone else just starts looking for something else.

This is one of the issues that radio has to deal with... and maybe it simply can't. The last several days of my life were spent reviewing Arbitron diaries in Columbia, MD. Many teens and young adults under 21 or 22 would write down a list of frequencies, not specific stations. For example, a young person who listened between 7 and 8 AM might write:

93.1
99.7
100.3
103.5
105.5
107.7

So what is happening is what you describe: these are the stations that person searches to find at any one moment in time a song that they like.

What we have is a new form of listening behaviour where a person will not sit through one bad song or one commercial. I have no idea how to deal with that. We have all read about the national "attention span" decreasing over the years and the increase in the desire for instant gratification... here it is!

I smell a logical fallacy here. First you say "some folks", then turn
around and apply it to everyone in general. Don't wash. I suppose
you've talked to everyone in all your markets and absolutely know
you're correct?

I did say 13 records, not ten.

> I grew up on Top 40 and it was my love of the excitement, the innovation and
> the energy in this format that got me into radio.

I did also, and it did the same thing. But all that's gone now. Too
much centralization and too much "sameness".

>
> > Yes, I listened to them prior to moving West.
>
> You mean when you were in San Francisco when KEWB changed formats in '67 or
> '68?

I've already said that I was in the Bay Area at that time. By the time
I moved there (late 1963) KEWB was irrelevant - noone listened to them
anymore. The dominant rocker was KYA until KFRC blew them outta the
water. KLIV (1590, San Jose) was "surf" rock but didn't factor into
the scene with only 1 kW at night.

> > There were many, much better, stations around, but they were probably

Only in ownership. The formats didn't sound anything alike (although
they may have used the same general formula).

WNDR was one
> of the most overcommercialized staitons in NY state; WCAO was one of
> Plough's rather imitative Top 40's... good but never great.

Again, you mistake "successful" for "good". Successful is only good to
the stockholders, not to the listeners. WCAO was actually the best
sounding station in the B'more/DC area, considering they were only up
against WEAM (full automation) and WPGC (daytime).

> Nearly all plaed about the same size list. WABC was just the most exciting.

And restrictive.

Your opinion. If you never play more than 40 or 50 songs, how does the
audience ever know if they like something else? You do realize that
there are hundreds, maybe even thousands, of records (now CDs)
released every month, don't you? You automatically assume that all but
40 or 50 are not worthy of air play?

> > > I am willing to bet that I hate it. My preference is, in somewhat of an

Irrelevant. I wasn't talking about you - I was responding to your
suggestion that I find a new career. And I most likely wouldn't want
to work for you anyhow.

"Holy grail"? To you that's making maximum money at the expense of
your audience.

And I consider you quite lucky to have a job in radio today. Given the
mass consolidation, there are many fewer jobs available than there
used to be.

> Proving my point that you are not in radio.

Proving nothing, except that you assume an awful lot.

> Otherwise, even if you don't want to reveal the calls, you could say "I am
> with a/an AM/FM in (insert name of city) and have also been in a, b, c and

All I've seen from you is generalities. Why should I be different? For
all you know, I could be the person signing your paychecks.

561. MotherRadio.com presents: "Rock 50 - A Rock History"

Newsgroup: rec.radio.broadcasting
Date: 2002-02-17 02:56:47 UTC
From: Michael Stark <res08elc@verizon.net>
Message-ID: <u6u6vfmstotfcd@corp.supernews.com>
Source record: 12023

Beginning February 15th, MotherRadio.com presents "Rock 50", a gumbo of music and sounds from the fifty year history of rock 'n roll.

>From Elvis to Metallica and into the new millennium, "Rock 50" will include airchecks of legendary rock broadcasters, rare interviews with some of the most important artists of rock and the some of the best music of the past five decades.

Included in the mix are full shows from:

* Alan Freed's "Rock 'N Roll House Party" with live performances from Bill Haley, Chuck Berry, Frankie Lymon and many more.

* Wolfman Jack on XERB.

* Robert W. Morgan on Boss Radio 93 KHJ (from the "Crusin' Series").

* The "Real" Don Steele on KHJ, including a montage of his Friday afternoon sign-off.

* Jim Ladd on 94.7 KMET.

* Mary Turner on KMET.

* B. Mitchell Reed on WMCA (from the "Crusin' Series") and on KMET.

* Tom Donahue on KSAN.

* Flo and Eddie on KMET.

* The best of the "Crusin' Series" featuring the greatest air personalities in the history of rock radio.

Also included are rare interviews with Elvis, the Beatles, Bob Dylan, the Rolling Stones, Led Zeppelin, Bruce Springsteen and Metallica.

"Rock 50" is an overview of the programming MotherRadio.com will continue to present, as the Internet's only "full service rock 'n roll" audio stream.

But: He's NOT selling anything. He's looking for investors/silent
partners. That's a bit different, isn't it?

Is there an "investments.wanted" group? ;)

XEVIP in Mexico City was one of my clients when I was programming XTRA
and syndicating the format. I went to the station to install the
format and was astonished to find such a huge spot load. I recall one
hour when 10 Ford spots aired. If you ever run into Kathy Loretta I'd
love to talk to her again.

You're absolutely correct that there was no limit to the number of
stations a person could own. I remember a story my boss at the time
told me of visiting Guadalajara and watching the owner of most of the
stations "rearrange" the formats on the dial by repatching the feeds
at a patch bay.

Maybe consolidation doesn't surprise me so much because I saw it so
long ago in Mexico.

This philosopy don't work with us "classical" folks. We like to hear diverse
songs. The best classical stations are NOT "top-40" I assure!! I'm right WRT
the listeners of classical.

Hi Ray,

The Pepper material I have was before Mars, Pams, it was some of the very early stuff.

I had an audition scheduled for KIOA as an announcer in, I think 1963. The day I was to cut a tape, they had a major fire in their studios and had to move to the transmitter site near Hartford. I went to the site where a black jock, Adams Jones, was singing the Coke commercials, Dove soap and couple others. I remember he did a great job, in fact it sounded better I thought than the original. They suggested I apply an an engineer, and I already was one, but wanted to advance more in announcing. That was the era Coke would duplicate the cut on an ET and asked they not be dubbed to cart tape. They wanted to maintain the crisp sound.

Remember KSO and Frank N Stein and when he read the news he was Frank Stein. I still enjoy tuning in to the old 940 when the are running oldies. I haven't in the last year, but most of the time its talk or sports. Doug McKinnon was another good job. Its amazing that Dick Young is still on the air.

In much later years, I looked at a burned up FM transmitter from the KIOA sister FM. That must have been about 1992. The engineer took me to their FM site and back out to the old Hartford site. I think 940 is a 9 tower parallelgram pattern.

I sincerely hope your refering to RM with this vective. I'm not in the biz, but have read enough stories about the man to know who is the DH bet Mr. Cranium and Mr. Micheals. Stories about subversive cell-phone recordings, and obscene phonecalls to folks who criticize this tin-star self appointed god (lower-case "g"). ;-/

Not to mention the guy appears to have the maturity of a pre-pubescent 10-yr old little boy.

> you've talked to everyone in all your markets and absolutely know
> you're correct?

A statistical sample, or poll, will give you very accurate information on
what is within the range of acceptablity. Anything missed by a well
constructed poll is probably statistically insignificant.

While a political poll that is off by a percent or two can miss the outcome
of an election, in radio there are many winners and few absolute losers
since most stations in larger markets make money. Therefore, if you are
within statistical bounds that are acceptable, you have in fact talked with
everyone int eh market. ANd people like to hear their favorite songs.
Period. Very few people like to hear lots of unfamiliar songs one after
another... so that group that does is statistically insignificant. And since
radi sells and programs to a mass audience, that group is irrelevant.

The Clear Channel stations that existed in the 60's all exist today.

And in the 60's, very, very few of them made any significant revenue from
out of town listening. I'm pretty sure WLS and WABC did not... and, other
than the Grand Ole Opry on WSM, I can not think of many 1-A's that did.

Until local Top 40's hit smaller towns, stations like KOMA got good night
revenue from mivies and record offers. But, when markets like Jamestown, SD
(KSJB-600 AM) and such got their own top 40's, even this faded away.

Which is just as wrong. While WABC did not play exactly 40 songs, over the
years it generally played more (flashbacks and gold included)

Unfortunately, unless I travel, I am like most Americans. I can't listen to local radio in two or more markets at the same time. To most folks, there is far more local variety than there was in the 60's.

KEWB was the leading Top 40 (anyone who played Bobby Vinton was not a "rocker") until KFRC knocked it off... and it continued as a Top 40 until around year-end 1967.

San Jose at that time was not a part of the SF market (it is now embedded) so KLIV was irrelevant. The SF market included the East Bay, where the KYA night signal was, well, lacking. It was 1 kw and the tower did not even have its feet wet.

> they may have used the same general formula).

Funny, I listened to both. Often. Incessantly. Each reflected the market with the talent, but they were pretty similar to me. In '59 I spent a day at WLS and got the autographs of everyone form Holman to Biondi, so I am vaguely familiar with the operation, the playlists and the style.

When? Through the time WEAM succumbed to WPGC (soon after when PGC kicked int he FM in about '69 or '70), WEAM was live 24/7. Harry Averil (sp?), the GM was famous for hotlining jocks from home, to. I hired a couple of ex-Weam Team members in 70 at "Million Dollar Music WEEL" in Fairfax... and they were not machines.

> > Nearly all plaed about the same size list. WABC was just the most exciting.

> 40 or 50 are not worthy of air play?

I have been through the learning curve. When one trys to outvariety another staiton by playing a longer list, they learn really fast that the variety image is generally achieved by playing fewer songs that are more popular and bigger hits.

There are hundreds of songs released in nearly every format each month. Some more, some less. I do two weekly new release CDs that go to a bit under 500 stations worldwide... and know that of every CD of 15 new songs, maybe one or 2 will ever get broad airplay. Not my decision... the decision on millions of listeners and hundreds of PDs.

> > What ethnic differences? You do not know what ethnicity I even am!

A sane decision on your part. Now I will guess: you probably are not fluent in any form of Spanish, are you?
>
> "Holy grail"? To you that's making maximum money at the expense of
> your audience.

Radio is a business. Wake up. Giving the audience what it wants makes more money, giving it w=hat it does not want makes no money.
>
> And I consider you quite lucky to have a job in radio today. Given the
> mass consolidation, there are many fewer jobs available than there
> used to be.

Several times I ahve asked you to indicate at least the type of job and the market, even if you for some reason don't want to list the station name or calls. You have not done this, have avoided the question, and have lead me to believe that this is an idle claim.
>
> > Proving my point that you are not in radio.
>
> Proving nothing, except that you assume an awful lot.

See above. I've asked, you have not responded. The evidence supports a conclusion that you are unable to answer the question. Prove me wrong, why don't you!
>
> > Otherwise, even if you don't want to reveal the calls, you could say "I am

> > d cities."
>

> All I've seen from you is generalities. Why should I be different? For
> all you know, I could be the person signing your paychecks.

I know that is not true. For a variety of reasons.

Most in this forum know where I work. I actually have 4 jobs, one as a VP with the largest Hispanic broadcaster in the US, another consulting the market leading group in Puerto Rico, another consulting the #1 AM and #1 FM in Argentina and yet another doing the aforementioned CDs for the leading international syndicator in the US (owned by the former PD of KFRC, FYI).

Your turn.

Yes it does work. Just ask the folks at KDFC, San Francisco, which is
the only classical station I've ever known to be the #1 rated music
station in its market.

The classical purists hate it. There are too few of them to matter.

I would hardly call button-pushing a "new form of listening behavior." That has been going on for decades in automobiles, a primary place for radio listening. It may be a newer phenomenon in the home, where remote-controlled radio receivers are still fairly new.

Amateur Radio Newsline Report 1279 – February 15, 2002

Amateur Radio Newsline report number 1279 with a release date of
Friday, February 15th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio helps in the face of a California wildfire and an appeals court says that pirate broadcasters cannot be banned from getting FCC licenses. These stories are first on Amateur Radio Newsline report number 1279 coming your war right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS AID AT FALLBROOK CA. FIRE

Ham radio was on the scene as a wind-whipped fire raced through the remote north-western portion of Fallbrook California on Sunday February 10th. Sixteen homes were destroyed along with one sheriff's vehicle and two fire trucks. Among the houses that suffered damage was that of Grammy winner Rita Coolidge. An estimate 2600 acres were burned as this report is being prepared. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the details:

--
According to Bob Gonsett, W6VR, Amateur radio operators were more than ready when the emergency the emergency hit. And so was their local repeater system:

--
W6VR: “We have two repeater systems that are tied together on Red Mountain that serve Fallbrook and Fallbrook is fortunately a hotbed of Amateur Radio activity. Lots of logistics communications took place in support of Red Cross activities, animal evacuations, people evacuations and it was a very, very busy repeater system which, incidentally, is backed up by emergency power.”

--

Gonsett, who is editor of the CGC Communicator broadcast industry newsletter says that hams were posted at key points in the community. This included the fire department, the sheriffs department, the hospital and the evacuation centers. Some hams provided mobile communications for animal rescue operations. Others, who specialize in evacuation matters and health and welfare traffic worked in conjunction with the American Red Cross to provide support. W6VR says that it was just about a textbook ham radio communications effort for both people and equipment.

--
W6VR: “Their performance was outstanding in every respect. The repeaters worked flawlessly. There was no jamming. The greater community pulled together on this one.”
--

Volunteers came from across the region. Bill and Wayne Dewey, WD6AHW and WD6AHX, served as the Net Control operators. A father and son team, the Dewey’s spent hours directing all radio communications on the Fallbrook Amateur Radio Club's repeaters. Another ham volunteer was Jess Mauk, KD6YEI, of San Diego. He manned a RACES van sent in from San Diego County. In all close to thirty radio amateurs served in the first wave of volunteer communicators. Gonsett says that hams were there because they wanted to help:

--
W6VR: “It was really heartwarming to find such an outpouring of devotion from the ham community in people coming up here and making their presence known and contributing as they could. They were all useful and the community leaders thanked us repeatedly for our roles.”
--

Most communications took place over the Fallbrook Amateur Radio Club’s dual redundancy repeater system This is actually two separate machines designed and built by Chris Durso, AA4CD. One outputs on 146.175 MHz and the other on 445.600 MHz. Both carry the same audio. In time of emergency anyone with a scanner radio in the Fallbrook and Temecula California area can tune to either frequency and hear all of the ham radio communications.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

One last note. According to Gonsett, one of the luckiest hams on Earth has to be Joel Brown, KE6FHS. Brown is the president of the Fallbrook Amateur Radio Club. His home survived the wildfire. Sadly, his immediate neighbor’s' house burned to the ground. (ARNewsline(tm), W6VR)

**

RADIO LAW: COURT THROWS OUR PIRATE RADIO LICENSING BAN

Just because a person one operated a pirate radio station is not enough reason for the FCC to ban him from ever getting a broadcasting permit. So says a Washington D.C. Federal Appeals court. Amateur Radio Newsline’s Paul Courson, WA3VJB, reports from the nations capitol:

--

The government is not allowed to use your past as a bootleg radio operator to block you from holding a legitimate broadcast license, according to a ruling from a federal appeals court February 8th.

But any victory might be short-lived for onetime pirate operators wanting to turn legit.

The case out of Washington DC involved Greg Ruggiero, a onetime bootleg radio station operator around New York. He challenged an FCC rule that bans those found guilty of pirate broadcasting from ever holding a license, or being formally associated with the recently-created low-power radio station service, an industry that has become known as FM microbroadcasting.

The appeals court agreed with Ruggiero's claim such a ban is unconstitutional as the law is now written. But the court also left open the possibility Congress could write a more narrow law in line with the First and Fifth Amendments. Part of the argument centered on a protest philosophy held by many unauthorized microbroadcasters, who see their bootleg ops as civil disobedience.

The appeals court, siding with the former bootlegger, said there was some evidence Congress, in writing the ban into broadcast law, meant to punish those with a protest message, without really improving future compliance with the law. They called it viewpoint discrimination, and said ... not allowed.

Communications law experts are mixed whether the ruling has implications beyond FM low-power broadcast licensing, including whether FCC can use violations in one service to administer broader punishment.

Traditionally, the FCC has kept open the option of revoking other licenses held by a violator, beyond the service where the violation took place. For example, someone in violation on the ham bands might have his commercial radiotelephone license pulled as well.

In Washington, Paul Courson, WA3VJB, reporting for the Amateur Radio Newsline.

--

And what might this decision mean to Amateur Radio? Especially those cases where ham licenses are challenged based on character issues. According to retired ARRL President George Wilson, W4OYI, probably very little. George, who is also an attorney, says that despite the ruling, the FCC still has the authority on a case by case basis to deny a license to a pirate broadcaster. They can also still designate for hearing the license of any station who breaks the law or violates government rules. (Published news reports)

**

RADIO LAW: FOIA BECOMING MORE DIFFICULT

Hams fighting the FCC over enforcement and other issues are finding it a lot more difficult to obtain government records under the Freedom of Information Act. This is because of an administration policy change made a month after the September 11th terrorist attacks. That’s when Attorney General John Ashcroft directed all agency leaders to be more cautious in releasing records.

Over the years, some hams who have been tagged with violations by the FCC have tried to use the federal Freedom of Information Act to try to get a line on their accusers. Most of the time the government refuses unless the person making the request can show good reason for the information to be released.

While not of a national security nature, none the less, bureaus like the FCC will most likely be heading the words of Attorney General John Ashcroft who says that agencies must carefully consider things including the effectiveness of law enforcement before releasing any documents. Ashcroft says that agencies that legitimately turn down requests made under the Freedom of Information Act will have the backing of the Justice Department in doing so. (Published news reports)

RAIN PROMO: HOW MANY HAMS ARE THERE IN THE USA?

I'm Greg Sperling, KB9DBC.

Just how many hams are there in the United States?

As you heard last week here on Amateur Radio Newsline, the picture is not a rosy one. You can hear Bill Pasternak, WA6ITF, interview with W5YI publisher and VEC Fred Maia this week on the RAIN Report. It is accessible in both Windows Media and RealAudio at www.rainreport.com and for the technologically challenged by telephone at 847-827-7246. (RAIN)

ENFORCEMENT: LOS ANGELES AREA PAROLED RADIO OPERATOR RE-ASSERTED FOR PROBATION VIOLATION

A Bell California man on parole for jamming police communications is now being held without bail for violating his probation and allegedly making death threats on the 2 meter band. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details.

--
You may remember that back on November 14, 2001, the FCC set aside an Amateur Service license and the call sign KG6IRO that it had issued to one Jack Gerritson. That grant was made only a few days earlier on November 8th. The Commission took action after it received information that Gerritsen had been arrested in 1999 and convicted in 2000 for interference to the Los Angeles Police Department radio system.

Gerritsen was out on parole after serving one year of a five year prison term on that conviction. On January 29, Los Angeles FCC agents participated in the pre-dawn re-arrest of Gerritsen after authorities received complaints of death threats allegedly made by him on several Amateur frequencies.

As Gerritsen was on parole in the earlier case, a no-bail search and arrest warrant was served. This is because the terms of his probation banned him from possessing any kind of radio transmitting equipment.

But at the time he was taken into custody Gerritsen reportedly had over twenty radios at his premises. Of these the FCC says that eight were capable of operating on frequencies in the Amateur, Marine, Land Mobile and Public Safety bands. The FCC says that Gerritsen even had a Marine radio with batteries connected to it, and a length of antenna line running outside his residence hidden in a closet.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The FCC says that after they set aside Gerritsen license that he continued operating and causing deliberate interference to numerous Amateur radio repeaters in the Los Angeles area. It acted on these complaints. Now Gerritsen may spend the next four years in jail. (FCC release, other sources)

**

ENFORCEMENT: FCC ORDERS POWER COMPANY TO HELP A HAM

The FCC has told an Alabama power utility that it has to clear up interference it is causing to a local ham radio operator. Amateur Radio Newsline's David Black KB4KCH, has the latest from our South East Bureau in Birmingham:

--

For more than two and a half years, Dan Jeswald, W4NTI, says his ham radio communications have been hampered by a pesky problem: interference. Jeswald moved to Anniston, Alabama, in June, 1999. It wasn't long after that, he says, that he began experiencing interference on numerous high frequency bands. He says 6 meters became unusable because of popping sounds and other interference Jeswald says sometimes rates full scale on his equipment. He says the noise is worst during cold weather and sometimes goes on for days.

Jeswald suspected a faulty transformer or other power company equipment. He says he contacted Alabama Power. Jeswald says the power company responded and began working on the problem. But in midstream before the problems were eliminated, Jeswald says there was a change of people he dealt with at the power company. Jeswald says his efforts to get help with the problem since then
have gone nowhere.

With few options left, Jeswald contacted the ARRL, which put him in touch with the FCC. On January 30th, Special Counsel Riley Hollingsworth sent a letter to Alabama Power's Chief Executive Officer. In the letter, Hollingsworth advises the utility about Commission rules governing equipment that generates unintended interference. And he informs the company of its responsibility to fix the problem, or possibly face fines if a violation is found.

A call to the power company seeking comment was not returned. Meanwhile, Dan Jeswald just hopes the airwaves clear up--and soon.

>From Birmingham, Alabama, David Black, KB4KCH, for the Amateur Radio Newsline.

--

Alabama Power was given thirty days to advise W4NTI as to what steps it was taking to solve the interference. (FCC release)

**

THE CHANGING OF THE GUARD: WAYNE WILLIAMS, K4MOB - S.K.

A radio amateur who dedicated almost a quarter of a century editing a ham radio magazine has crossed over to the other side of the Ethereal Abyss. This with word that Wayne Williams K4MOB, editor of the SouthEastern Repeater Association magazine "The SERA Repeater Journal" has passed away.

According to Gary Pearce, KN4AQ, Williams died at home early Tuesday morning, February 12th of complications from cancer. He was 65 years old.

Pearce says that Williams passion in Amateur Radio was FM and repeaters. He became active in SERA's predecessor, the Carolinas-Virginia Repeater Association, in the early 70's. This, at a time when two meter FM was just beginning to gain in popularity.

In 1977 Williams became the editor for the group's magazine, the Repeater Journal. The Journal was already a respectable size 44 page booklet, with regional advertising from local dealers and hamfests. But over the next 23 years, K4MOB built it into a quarterly magazine featuring full-color covers and both national and regional advertising.

--
Gary Pearce KN4AQ: “Through the Repeater Journal and through the coordination body Wayne helped to provide the infrastructure that we enjoy today on VHF and UHF FM. Repeaters that we can operate with a minimum of interference and maximum of range and quality of enjoyment.”
--

In parallel with his SERA activity, K4MOB also established Williams Radio. He started the business by amassing a huge inventory of crystals. In that pre-synthesizer era, two meter FM radios required a pair of crystals for each frequency used. Other crystal sources made hams wait days or weeks for delivery but Williams Radio was one of the few instant sources of crystals for almost every frequency, and for almost every radio. Later, the business added accessories and several lines of radios. It was a family affair, with Williams wife, brother and sons pitching in at hamfests across the region. K4MOB retired from Williams Radio in 1997.

Wayne Williams, K4MOB, is survived by his wife Gerry KB4SER, and two sons, Wayne Jr. and Chris. A third son, Greg, passed away in 2000. Pierce says that Wayne Williams was a very special man in ham radio. All that knew him say that he will be missed. (KN4AQ)

AWARDS: THE VITA WIRELESS SAMARITAN AWARDS

The Cellular Telecommunications and Internet Association along with the Cellular Telecommunications industry Association's Wireless Foundation have honored the winners of the 2001 VITA Wireless Samaritan Awards and the 2001 Wireless Industry Achievement Awards. Among the recipients are average citizens from Massachusetts, New Hampshire, Texas and South Dakota, who had the presence of mind to turn to their cellular telephones in emergency situations. The VITA Wireless Samaritan Awards are given annually to individuals from all 50 states, the District of Columbia, and Puerto Rico. (CTIA Release)

**

AWARDS: HAMAWARDS.COM

Hamawards.com is a new website that is currently under development. According to Anthony Farmer, KB3HGY, the mission of hamawards.com is to provide centralized on-line information regarding all awards that an Amateur Radio Operator can receive. The site is currently being developed. More information is at www.hamawards.com. (News release)

CONVENTIONS: HAMVENTION 2002 BANQUET MASTER OF CEREMONIES NAMED
The Master of Ceremonies for the 2002 Dayton Hamvention Banquet will be Carl Nichols, N8WFQ. Nichols is the Chief Meteorologist for WDTN channel 2 News in Dayton. This is a forth return performance for Nichols who served as Hamvention banquet Master of Ceremonies since 1998. (DARA)

**

CONVENTIONS: WIA IN MELBOURNE IN MAY

The 2002 Federal Convention and Annual General Meeting of the Wireless Institute of Australia is now slated for the city of Melbourne on the 17th, 18th and 19th of May. Among the many subjects to be discussed at the meeting will be a possible restructuring of the WIA and the possibility of a Foundation class license similar to that recently introduced in the U-K. (WIA)

**
HAM RADIO IN SPACE: HAMS ASKED TO HELP NANOSAT PROJECT

Ham radio is being asked to provide technical support for an upcoming satellite project. Jeramy Boot, G4NJH, says it is a bird called Nanosat:

--

John Heath, G7HIA, the Secretary of the National Space Centre Amateur Radio Society, reports that Bristol University is asking the world-wide amateur radio community to assist with data capture from their forthcoming Nano Satellite Project.

Hand-launched from the Space Shuttle during a space walk, the 6.5-kilogram satellite will send data that can be decoded with software available free from their web site. The software is not yet written because the university wants to give amateurs the chance to have input into how they would like the data stream: 1200 baud AX25 packet, 9K6 packet, Bell 202, or Soundcard etc. More information and an on-line survey form is available on the web at www.handsat.co.uk

Jeramy Boot, G4NJH

--

If you missed that website address you can find it in the print edition of this weeks amateur Radio Newsline report. (GB2RS)

**

INTERNATIONAL - ENGLAND: QUEEN ELIZABETH’S 50TH ANNIVERSARY

Thanks to the efforts of the Radio Society of Great Britain, UK Amateur Radio operators will be taking part in a very special celebration. On Wednesday the 6th of February, England’s Queen Elizabeth marked the 50th anniversary of her accession to the royal throne. The Queen's Golden Jubilee will be celebrated next June, and the RSGB has negotiated the use of a special prefix for the celebration. Starting June 1st and continuing through the 30th, UK hams will be permitted use of the 'GQ' prefix to help commemorate the event. (GB2RS)

**

DX

In DX, E20NGF says over the Internet that there is now a new Worked All Thailand Provinces award. There are currently 76 in Thailand and this particular awards requires that you contact and confirm each one. And while E20NGF calls it a great challenge to all award chasers, he also notes that its

not all that difficult to log 20 provinces these days with more than 1000 Thai hams already on H-F. Check the various DX and awards websites for full information. (RSGB)

**

THAT FINAL ITEM: THE NEW ZEALAND AREC AWARD

And finally this week, New Zealand's team of Amateur Radio Emergency Communications volunteers has received an important award. Its a special honor in recognition of their providing support of Search and Rescue efforts down-under. Amateur Radio Newslines Jim Meachen ZL2BHF in Auckland has more:

--

The inaugural presentation of the New Zealand National Search and Rescue Award for the year 2001 was made to AREC at a ceremony held in Wellington earlier this month.

The Award recognizing AREC's outstanding performance and contribution to search and rescue in New Zealand was made by Marion Hobbs MP on behalf of the Government Minister of Transport. In presenting the Awards Marion Hobbs said of AREC:

--
Sound Here
--

Brian Purdie ZL2ADL the National Director of Amateur Radio Emergency Communications accepted the Award on behalf of the AREC team and thanked the New Zealand National Search and Rescue Committee for the award.

--
Sound Here
--

The National Director of New Zealand's Amateur Radio Emergency Communications Brian Purdie ZL2ADL. Further detail of the award ceremony with photographs can be found on the NZART web site at www.nzart.org.nz.

>From Auckland New Zealand, I'm Jim Meachen ZL2BHF for Newsline.

--

By the way, ZL2BHF says that he will be a flying in from Kiwi Land to take part in this years Amateur Radio Newsline sponsored live Ham Radio Town Hall meeting. It takes place at the 2002 Dayton Hamvention at 1 p.m. Eastern time on Saturday, May 18th. (ZL2BHF)

To All Those Who May Have Been Listening For My New Show:

I announced the other day that my talk/ novelty music program "American Bizarre" began on Feb 9-I didn't hear it that day because of other obligations. Now I don't know it if played at all. I came to this newsgroup a few days ago to let you all know about it and that the second show would be broadcast Saturday night, Feb 16, at 8 PM (0100 UTC) on WBCQ at 9335. Instead, an old rerun of Alan Weiner Worldwide was heard, one in which, he incidentally mentions the Feb 9th debut of the comedy program American Bizarre!! I have contacted him by phone message and email and am awaiting a response as to why the show was not aired.

I want to thank those who tuned in only to hear the incorrect program. This is greatly discouraging and concerning to me, as I have worked hard on the show (not to mention paid for the airtime). I apologize for inconveniencing you and ask that you please tune in again once I have straightened the situation out. It may have been an unfortunate error by someone at the station. I'll come back and let you know what went wrong and when you can hear the program.
Once again, thanks for trying to tune in. I'll get to the bottom of it and hopefully try again.

--Larry Paul (Pritchard) host of
American Bizarre

It sure will. When the old WNCN, New York, pared down its playlist and got rid of vocal music they beat WQXR, both AM and FM. It shocked WQXR so much that they hired Mike Joseph, the "Hot Hits" guru, to revamp the format.

The PD who programmed WNCN is performing the same magic at WCRB, Boston. I was a sort of unpaid consultant to WNCN (they took me to lunch every once in a while) and advised them to get rid of the pomposity and become more human. It worked.

I actually made the same suggestion to the former GM of WQXR.

Rich

the population is regressing into a second childhood - lower attention span,
trivial pursuits, etc.

soon songs will be 20-seconds long, ads will be literally "in-your-face and
LOUDER than they are now!, etc...

sort of like the song 2525, only not just atrophy of the body, but of the
mind ALSO!! sad ;-(.

>>
I have plots of KFAN day and night pattern (from the Niel Adams program) on my web page. They can be seen at <A HREF="http://www.qsl.net/k9ez/kfan.htm">http://www.qsl.net/k9ez/kfan.htm</A> . I would be intereted in hearing your comments on what is shown.
>>

Pre-NARBA, WDGY was assigned to 1180, and it shared that frequency with WMAZ, Macon, GA, KOB, new College, NM, WGBS, New York City, and KEX, Portland, OR.

Post-NARBA, WMAZ was moved to 940 as a Class II-B, WDGY was moved to 1130 as a Class II-B, KOB was moved to Albuquerque and to 770 and which would ultimately be determined to be Class II-A after several decades of law suits, WGBS was moved to 1130 as a Class I-B (initially with CKWX, Vancouver, BC, and later with KWKH, Shreveport, LA, both of which were also Class I-Bs), and KEX was moved to 1190 as a Class I-B (KEX was then co-owned with Westinghouse, which was the "historical" owner of 1190, through a succession of frequency changes).

So, now we have WDGY on 1130 as a Class II-B, sharing that frequency with WNEW (ex-WGBS), CKWX and KWKH, these three being Class I-Bs.

My interpretation of the materials presented in you most interesting and informative KFAN web site is as follows ...

1) Days, KFAN has a predominate pattern equivalent power of 10 kW, reflecting a maximum permissible day power of 10 kW if operated non-directionally; yet the licensed day power is 50 kW; that power has to go somewhere in order to maintain an average maximum of 10 kW towards the three Class I-Bs, days, so that extra power is directed towards Minneapolis, the COL, with a local maximum effective power of over 400 kW; since there are no Class I-Bs towards the south, the maximum effective power towards the south is about 20 kW, days,

2) Nights, KFAN has a predominate pattern equivalent power of 0.1 kW (one-hundred watts), reflecting a very low maximum permissible night power towards the three Class I-Bs [*] which totally enclose KFAN's geographic location; the licensed night power is 25 kW; that power has to go somewhere in order to maintain an average maximum of 0.1 kW towards the three Class I-Bs, so that extra power is directed towards Minneapolis, the COL, with a local maximum effective power of nearly 250 kW.

There you have it.

Peter.

[*] Class II-Bs must have a minimum power of 0.25 kW (two-hundred-and-fifty watts) and operation with 0.25 kW non-directionally would likely be technnically impossible for WDGY, so a DA of some kind was obviously going to be required.

Does anyone have any opinion about the slow speed radio recorders that work like a VCR...to tape a specific radio program at a specific time?

I've heard of 2...the Reel Talk:

http://www.cover-ups.com/radio.htm

....and the VersaCorder by C Cran:

http://www.ccrane.com/versacorder.asp

The Reel Talk machine seems to be sold by re-sellers, radio stations and talk hosts.

I don't know anything about the companies...but I am wondering if anyone has experience and would recommend either or 'zing' either.

Thanks for your opinions.

Rob

Source record: 12049

I went to the attic and made three trips to bring the Pepper Library to the basement. I estimate there must be 75 pounds plus.
I did a fast count on just the Pepper (red label-the old original Pepper) and I came up with 161 ET's (33 1/3 LP size). I believe the set is complete, but without a better inventory we can't be absolute. There are a few green paper shucks that are torn and wrinkled, but the majority are in good condition. The sound effect ET's were used the most, but were still very usable. They were well taken care of, despite they were in use from about 1959 to 1993. Some ET's appear to have no use.

There are three Red Vinyl Pepper 3 ring binders. One shows a lot of wear, the other two are in very good shape. The one contains the categories such as Commercial Categories, Image Ideas, Holidays & Special Events, Goofy Gags & One Liners, National Retail Stores, Commercial Music Backgrounds, Sound Effects.

In the second binder there is Copy Service, Sales, Feature Formats and Contests.

In the Smaller Binder there is an Alphabetical Listing of Category Headings in the Creative Sales Service Catalog Index.

Not in the above count, I have about a dozen of the William B Tanner Sound effects (much newer vintage than the Pepper).
They show a lot of use. I am guessing they are late 70's.

I have a few RCA Thesaurus ET's with Christmas Programs. There is even a National Association of Broadcasters Radio Code ET dated May 1, 1962. I have 3 "Dark Blue" in color ET's with the name Lan-Worth. They are probably dated into the mid 50's.

I took some pictures if anyone is interested.

Dave

As the old patient joke goes, "Don't Do that" Instead leave the antenna short, and move it and/or the radio until reception improves. Longer may well mean more signal than than the radio's frontend can handle properly on a probably relatively weak signal.

True - what I mean is "America is not about ethnicities it is about a
philosophy". We aren't "serbia" (yet - though politically correct crusaders
try their hardest).

I've never said "he/she is an African american/Asian american/Native
American so and so" I have always said "he/she is an american" and never
even think of ones "ethnicity". It is totally irrelivant to my mentality - I
assume other Americans are the same - though impressionable folks may have
bought-into Pol. Correct indoctination over these last 15-years and I may be
a minority today!!!! Hope not! I hate PC - tribal mentality garbage.

I'm an "American" - never do I think "American-Scotch-Irish with
Welsh/English" --- thats just silly racist mindclutter to me.

I guess your "Irish-English" is my "American" : the "nationality" part is
not even contemplated by me.

This thread looks like it's having a strong case of
definitionitis.

There are at least three commonly used definitions of ``effective
radiated power'', and you appear to have now introduced a third.

The historic definition, as used by people who study theoretical EM
propagation, is: the power which would be required to be emitted by a
point source in order to achieve a given field at a specific location
relative to the transmitting antenna.

The second common definition substitutes a perfect omnidirectional
source for a point source. (Theoreticians would emphasize the
distinction between isotropic and omnidirectional. One can consider
the difference between a sphere and a cylinder.)

Your definition, so far as I can tell, substitutes a theoretical (but
not ideal) radiator, based on a particular set of government
regulations. This use makes some amount of sense, but would greatly
confuse a theoretician, since there is nothing inherent about those
particular radiation efficiency standards -- otherwise they would be
the same for all stations.

There is one more possible definition which would be relevant to this
discussion, and which from the sound of it is the one being used by
the program in question: given a particular bearing and distance
(relative to an antenna system's reference coordinates), how much
power would be needed to achieve the same field using a theoretical
radiator representing the average of all radiators in the array? The
program might calculate this as $P_{nom} * \(E_x \over E_{rms}\)^2$,
where E_x is the predicted field at the given bearing and distance.
This is similar to your definition, except that it uses the actual
pattern RMS field instead of the regulatory minimum RMS field for the
class, and is thus independent of what regulatory domain or model one
might be using. (Do Canada and Mexico observe the same class minima?
What about other countries which don't have any sort of class system
at all?)

Wasn't the RE-15 the replacement for the RE-666?

A 1974 era EV microphone product sheet I have doesn't list the 666, but does list the RE-15 and RE-20.

It also lists the 667A and 668 series mikes that were often used for movie and TV boom mikes, and studio voice over and control room mikes.

Trivia--

In the early 60's, KCBS used 666's as its news booth mikes and elswhere in the studios while still at the Shearaton Palace hotel.

EV used to tout the RE-15 as the boom mike used on ABC's "Hollywood Palace."

MGM used the 667A or 668 as the boom mike during on-location production for "Tick-Tick-Tick," shot in 1968 or 69 in Yuba, Sutter and Colusa Counties.

KUBA, 1600, Yuba City replaced RCA 77DX ribbon mikes with EV 668s sometime in the late 70's and then in the early 90's replaced the 668's with RE-20's when they EV couldn't rebuild the 668's, on which the foam had deteriorated and didn't sound quite as crisp as they once might have.

The degree to which it is being seen among 12-24 year olds is very new. I have been reviewing Arbitron diaries since 1970, and it has only been in the last several years that this type of behaviour has been prevalent rather than the exception.

The most interesting change is the failure to note the name, slogan, or calls of stations. Many teen diaries only have a list of frequencies, usually around a half-dozen, that are "used" for scanning in the interval of listening. This was not seen previously.

While button pushing is not new, the degree of it is and the lack of "affiliation" or partisanship for any particular station is very new, as is the amount and frequency of the punching.

595. Mary Chapin Carpenter appearance - research, anyone?

Newsgroup: rec.radio.broadcasting
Date: 2002-02-18 15:13:22 UTC
From: holychapin@hotmail.com
Message-ID: <u726gifke9erda@corp.supernews.com>

Hi Everyone:

Is there anyway to find out a station name that conducted an interview with Mary Chapin Carpenter on 2/4/02 ? The interviewer's first name is Anne.

>From this hopefully I can be provided with a RealAudio or Windows Media file of the interview and/or contact information of the station so I can get the interview on tape/CD. I suspect it may be in Birmingham, AL or Fairfax, VA or somewhere around there, but I can't be positive. Somewhere in the states, but that doesn't narrow it down much.

Here is a short transcript from a fan website where the fan has some sketchy details and is paraphrasing :

conversing about the "country music label":
Mcc: You can't fight it, just do what you do and hope people connect with you. We have a pretty healthy touring life these days.
Anne: I became aware of you at a Philadelphia Festival years ago.
Mcc: Yeah, somebody threw me up onstage !!(laughing)
Anne: I was thrilled to see you there and hear you--here was an intelligent woman in country music.
Mcc: Around the late '80s, Nashville it seemed like was embracing a lot of music--not so narrow--I found myself a little niche. Country doesn't totally define you--I have thought of myself as a singer-songwriter.
Anne: The song that started it all for you, "Down at the Twist and Shout", that you did with Beausoleil...
Mcc: Yeah, I was thinking of that last night (Beausoleil) because of the Super Bowl. Watching the Super Bowl last night was like time travel, was surreal. We performed that song in Super Bowl '96 and they had a mardi gras alligator dancing around. It was surreal. That song was a tribute to the old VFW in Maryland. A local promoter would book local acts and Beausoleil would play. I was living in Takoma Park in my slumhouse behind the firehouse and one gloomy weekend, I wrote that song--I went there once--it's just a great place to dance and hang out. When I wrote the song, I couldn't believe I'd have a chance to record it with Beausoleil !! I was working downtown(D.C.), had a deal with Columbia Records, and kept my day job for 2 and a half years !
Anne: Then "Come On Come On" came out, then "Stones in the Road", and one more album, then you took time off...
Mcc: I didn't really take time off, I had been with a manager that just did not work out, and I really didn't like what I was writing. The songs didn't speak to me. You write initially to yourself, then

you learn to say when it's not happening, you know when to pull back. "Party Doll" came out, and it was a celebration of 10 years of being with Columbia.
Anne: I've tried to do my homework..[Mcc laughing] when did you start writing authentic songs?
Mcc: I've been writing for many years, and sometimes you have songs that you just wouldn't say to your dog ! When I was a teenager, I had moments when I realized "oh this pleases me[writing songs] and you feel completed by it". Being 16, 17 years old, and the light bulb going off, it was something I wanted to do. I was playing local bars in D.C. and I met up with John Jennings and he really encouraged me to sing more of my own music at those places--I think when someone you really admire and respect taps you on the shoulder, it really encourages you.
Anne: You've also covered some great songs---"Downtown Train", "Passionate Kisses"...
Mcc: I heard it and just fell in love with the artist and her point of view and just wanted to sing it so bad. As a performer when you hear songs that appeal to you, I get to inhabit that song and it is such a gift ! I went on a songwriters tour in Australia in 1990 with Lucinda Williams and Roseann Cash, and we sang and harmonized. I would just slobber all over Lucinda and she goes "Oh,for God's sake, just cut the song yourself !", and it had her blessing and I was just thrilled that she suggested it. In a beautiful way it just took off.
Anne: What about this new record?
Mcc: It was a wonderful response["Time, Sex, Love"]--this record was a joy to me--it was such a great place to work[London]. I was used to working in a great studio in Virginia. Bob Dawson is great. I got to sleep in my own bed, be around my dogs, take my garbage out, etc.,--then Where in the world would you like to go? London is somewhere I like to go, we put it together, we came back here to__ and finished it up, vocals, here, and it was great to finish it here, hometown, new digs, here in ___, and it was just great.
Anne: Give me a description of the new record, it's informed about being older, it's your 'grown-up' record.
Mcc:[laughing] I like the sound of that, it's accurate. Just a check in with myself was this record.
Anne: I listened to all of your music over the weekend[Mcc laughing], and this record is just great. She does rock and roll, and she does soft music[more laughing], one song that stands out post-September 11, 2001, is "Maybe World".
Mcc: That is about living your life, just acknowledging regrets. Another song that says the same thing in a quiet way, is "Late for Your Life". It says what I feel and I was writing for me as much for the world. Oh, and I do listen to your show and I love it ![note that my friend heard Mary Chapin offer a personal contribution on air during this station's recent pledge drive.]
Anne: I look for songs that educate me and have a spiritual message and it's ok for songs to be fun !
Mcc: It's ok, [laughing]we all have those bubble-gum songs, or those

cavities for mature candy, also for bubble gum--also for being stopped in our tracks. Our poetry is what's thrilling about music.
Anne: Another song, "The Long Way Home", at the end you give a recipe for life.
Mcc: The list comes out--roll down the windows, turn off the cellphone, have a Martini was one phrase I had in there at one time-there's many ways of slowing down and stopping to smell the roses.
Anne: Have you?
Mcc: I've managed to--touring the last 20 years--I know how lucky we are to play music for a living. I'm so happy and blessed. I have family down here, and driving down here so long, I was just awestruck, and started dividing my time between here and D.C. I've met someone here and I'm engaged and we have set a date! I'm starting a new album next month- a record that brings together a lot of songs(like "Passionate Kisses") of other people, songs I"ve played in concert or privately, maybe collected together. It will be a spare and quiet record. I wasn't planning on an album this soon, but Sony called me up and said, "What've you got?"[Laughing]
Anne: Any songs on the cd that you can tell us about?
Mcc: I"m gun shy, I might change my mind about songs to put on the new one.
Anne: On Nancy Griffith's cd, her covers, she had a theme...
Mcc: I do have a theme to the cd... This may change, but John Gorka's song, "The Gypsy Life", as a title, and use that as an umbrella, because that is our life. We will pull together lots of tunes, songwriter people have fellowship-- maybe you could play that song["The Gypsy Life"]
Anne: I'll dig it out. How will you put your stamp on the covers?
Mcc: I think there are those times in your life when you made a record and years go by, and you hear it, and you say, "how did I put that song on there?". So be gentle. I'm not willing to share what those regrets are for me, but there are songs I regret[putting on albums].
Anne: What song of yours would you like us to play?
Mcc:[without hesitation] "Late for Your Life".
[plays "Late for Your Life".]
Anne: We're gonna talk about the title["Time Sex Love"] How it seemed to come up?
Mcc: It was a flip from John Jennings. I said it's like all these songs are about passing of time, relationships. John leaned back and said, "Well, Mary Chapin, Time is ....". So I said, "Is that right, John?". I feel like they are refrigerator magnets you can rearrange--time, sex, love.
Anne: In my look over your work, there hasn't been a cd where John is missing.
Mcc: Yes, that's right. Anytime you work with someone you haven't worked with you learn something. I sit down and write down who would best serve this song. As long as they stand me, I want to keep going.
Anne: Shawn Colvin, Kim Richey also on your cds...
Mcc: Yes, and Dave Mattacks, Duke Levine. They are all magical.

Anne: Where are you recording the new album?
Mcc: In a Secret location here in ___. They will all fly into ___ airport here.
Anne: How about the song "Swept Away"?
Mcc: I was in National Airport and saw a person that stomped on my heart 18 years ago. My first instinct was to turn and run--I just walked up to the guy--we had a wonderful reunion ! This song is a moment by moment account of running into him.
Anne: Good luck on the new cd.
Mcc: Thanks.

596. Re: Question: what influences a programmer's choices for his station's

Source record: 11958

Just for your info most of the "Top 40 " stations I was involved in copied the "Drake" format. Top 40 wasn't just this months Top 40 gack it was Oldies and Gold. WABC also played gold with hits, exception was when they played the number one song every hour on the hour, talk about burning a song out. We picked from 1955 through to the year we were currently in. (picked in real time, yes we did play requests) We had a top 10 (sometimes Top 7 during ratings) that played one every 1 1/2 to 2 hours. The top 10 might not reflect the chart, a really hot new record by a well-known group or artist might be also rotated in this group. Another twenty rotated about three, three and half-hours; usually a lot of OLDIES/GOLD were mixed in. Weekends hit gold, hit, gold hit gold etc. So it was 50% ratio hit to oldie/gold. Weekdays it was a fast paced Gold off the news, then a Top 10, then one of the other 20, then gold. Then Hit, Hit, Gold Hit, Hit, Gold etc. So it was 33.5% oldies. We did pick them as we went, usually leaving at least 1 1/2 hours minimum, but they were picked for pace, timing, (to hit the half-hour and hour) and whether a "bit" we had would fit over the intro. Pacing is what I miss most; it gave a station momentum, which was lost when the computer started to pick them.
Usually every third hit on the weekday rotation was a hitbound. As I remember no hitbounds were played on the weekends. So there were 30 "hits" plus hitbounds. The hitbounds varied depending on whether anything was worth playing. (Usually 7 to 10.) When a hit fell off the top 40 it was "rested " for 6 months and received no play. After that it was put in the "gold" book

It was nice to fit the "mood' of the day. (An extreme e.g.) When 911 happened I wonder if the computer even thought about what was suitable to play that day. Mind you we now are computerized after the morning show and it's programmed a month in advance with no time checks so I guess it is even less of an issue. In Canada, where I toiled, the Canadian content just about ruined pacing and timing and the repetition factor increased on the 30% Canadian oldies and hits. I used to stuff them in the last 1/4 hour, where they could do the least damage. When CKLW started playing Lightfoot (because it was the law) the Detroit side decided that they should as well. A year later CKLW was giving away freezers full of meat, and the station was packed in brown paper and in the freezer shortly there after.
Most consultants I worked with were bright guys in manipulation, but knew screw about music and for that matter communicating to an audience. They were great at focus groups, "don't talk on the intros, people don't like it." Yeah because the complainers were taping the music for free.
A live media turned into a dead media. This is why the record companies can't sell their product today. Vertical corporate agendas usually fall over. In the old days hits might start out in a minor market, then the medium markets would notice it, then the big markets would become aware of it. This is impossible today with the current ownership situation. Most

chains have one person usually a corporate wonk, who makes decisions for the whole chain, usually with the help of a consultant who can be blamed/fired if anything goes wrong. They only make safe decisions so they always lack creativity. Welcome to the bland New World of the corporations, where golden parachutes are the most important item in your life.

Care to explain, then, why WNCN has *dropped* classical for a rock format?

when did clear channels stop???????????

--
An unjust king asked a devotee what kind of worship is best? He replied:
'For thee the best is to sleep one half of the day so as not to injure the
people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;
But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

Why not use a VCR?

I've used VHS HiFi [and Beta HiFi before that] for almost 20 years for
timed recording of long-form radio shows. The 6-hour speed has always
worked for me, even with cheap $2 tapes. The longer tapes allow 8 hours
of recording.

Unfortunately all the recent VCRs have AGC on the audio, but I'm still
using my old one without that unwanted "feature".

> I presume you mean INexpensive, compared to 5/8ths.

Correct! and I have no illusions about the cost of erecting lattice steel towers. They have to be engineered to go up and stay up and we have to persuade council engineers they will do what we say they will do. This involves big dollars. My estimate is we will spend as much on permissions and clearances as we do on construction, including the cost of hardware.

> A 5/8ths vertical will have a lower angle of radiation than a 1/4
> wave. This may or may not benefit you in your application. The 5/8ths
> wave will get you out better into fringe areas, but if your purpose is

Our transmitter site will be 30km - 40km from the primary target area.

We need to be heard daytime at about 150km.

> Partially. A 5/8ths is more than twice as tall as a 1/4 wave, so there
> is more expense in the physical structure as well as the installation.
> Not to mention more possible problems with low-flying airplanes as
> another poster mentioned.

Fortunately it's a no fly zone.

> Hmmm. 1/4 wave should work fine. But a question: What will the total
> distance from town be? You only say 10km further out.

It's a bit over 30Km some water path, some urban and there is a reasonable ridge [800m] to get over at 20km.

Conductivity is OK.

There is a station to the south on 936 who are on the reverse side of our path and their 36dbw signal just runs out of puff. It's there but it's weak.

It may be that they just have a poor site but if we have to deliver more or less back over the same terrain it's likely we will have the same problems.

Most of the AM signals are located at a site that is 10km from the city centre and 20km from the south. This was "well out of town" 60 years ago. It's now in the middle of a new city, and no one wants to live next to a 200ft tower. in fact that city have a restriction on power output for any new transmitter reported at 25 watts but I think they mean 250.

Between that sort of thinking and something called the Resource Management Act AM construction just has to move further out.

I have a WorldSpace portable satellite radio, and have been
extremely pleased with it. They carry WRN, which has a large
amount of NPR as well as Radio Canada and a whole variety of
other countries' national radio.

Reception is great, far better quality than what's available
on shortwave. I'm in Africa, so options are more limited.
Note that WorldSpace is not available in the americas.

Mucho agreement! The HiFi tracks blow even 3.5ips cassette away. As far as
a slow speed cassette goes, I only imagine their quality is simmilar to VHS
EP linear audio, if that good.

Shouldn't be a problem, seeing most stations use Optimud anyway.

And the use of nicotine didn't help the sound of control room mics, either.

Before moving on... and South... I was in Cleveland, OH. There, ethnicity
was a very big issue. I spent Sundays running half-hour programs in Greek,
```

Serbian, Czech, Polish and other central European languages. Each group was proud of their heritage, and Cleveland was made up of neighborhoods that visibly showed the ethnicity of the majority of residents. This was true in most of the Northeast and Texas and the Southwest virtually since the founding of the US.

They did not stop. Additional and highly protective stations were allocated
to the channels at great distance.

Example: 880 WCBS New York got KRVN in Lexington,NE. At night, you can not
get KRVN 50 miles East of Lexington!

Two classical stations in most markets is one too many.

In some markets, one is one too many (said as former owner of a classical
station and former GM of another)

611. Re: sound board help

Newsgroup: rec.radio.broadcasting
Date: 2002-02-19 02:45:58 UTC
From: Robert Jeffares <robert@pnn.org.nz>
Message-ID: <u73f36ijcv2dee@corp.supernews.com>
Source record: 11973

You need to build a hybrid which enables you to connect the audio to an input on your desk so you can control the level from the phone.

It also enables you to send a feed from your mic down the line to the listener.

If you just hook a transformer across the phone line or the earpiece feed you also get some of your voice back on the "phone" feed and inevitably some of the local audio will be out of phase [because of what happens in the phone] making you sound muffled when the phone mixer is open.

You can make a hybrid with resistors, but it's better to use a transformer. You then don't have to worry about the dc on the phone line.

You can also set up the transformer hybrid so it's rejection of the local vs remote audio is very high, 30-40db.

You can buy an electronic hybrid which will deliver a very "clean" signal but they cost, and the old transformer hybrid produces a much better result.

The best transformer is one made for telco purposes, it has two primary windings and two secondary windings. The circuit is at

http://128.233.12.252/Dodds%20Transmission%20Lines/Hybrid

You will be amased how many ham junbk sales have this kind of transformer in the bottom of a box and how few people know what they are. You have to be a telco tech who worked in the exchange to recognise them.

If you can't find one, wreck a broken fax machine [brother make machines for home use that businesses buy to save money and the mechanism dies] the phone input board has two transformers on it you can unsolder and together they make the hybrid circut.

The same bits are fouind in many phones, but they don't have the bandwidth and rejection capability In a telephone some of the outgoing audio is fed to the earpiece ["side tone"] so the person hears enough of themselves so they don't yell and overload the circuit. You want none of that in a broadcast situation.

The last one i made was paralelled on the phone line with a regular phone we used to vet the calls. There was a 3 position key switch.

OFF was no connection

HOLD connected the transformer across the line

AIR added a connection that patched the audio to the desk mixer.

DON'T FORGET TO HANG UP THE PHONE

If you get a lot of hiss or noise on the incoming, install a low pass filter to lop off anything above 3.5kHz. There is nothing above 3.5 on the incoming line for any but local calls.

Remember the transformer across the line will have a DC current running through it in the HOLD and AIR positions. Thats why big telco type transformers which deal with the heat are best.

Most desks these days have a way of getting an audio feed of just the microphone(s) or MIX MINUS the phone line to send to the listener. Don't send too much! The telco level is supposed to be 0dbm. My way of setting it up is to get someone you trust on the other end of a phone, and get them to tell you when the level is OK. It's best if they are making the call to you through the same exchange, because all over level audio is "processed" at the telco switch.

If you don't have a feed available you need to pick up the microphone audio before the air switch, and run it through an amplifier to isolate the on air chain from the phone system. This way you can bring up the phone line on audition or cue.

You can get as exotic as you like with the circuitry. You can bounce one hybrid from one line to another by using resistors to "HOLD" the lines.

Some systems have audio levelling devices on the incoming line. Depends on the local phone system. You should not need any.

If you are running a talk show as opposed to callers for dedications, hook the incoming to a small speaker [cellular car kit ones are great] in the studio so guests can hear the incomiong without wearing headphones. You will be amazed how much this improves the audio coming out of the talk studio.

People used to hearing themselves in the earpiece when they are "on the phone" tend to yell because in a studio situation they don't hear themselves unless the headphones are incredibly loud. Get rid of the headphones and they can hear themselves in the room, and they can hear the caller and they stop yelling.

Make sure all the people who use the system understand that the phone call audio should be "peaked" at -6 compared to 0 for the studio audio. This because the phone system delivers almost no audio content below 125hz and the lower frequencies are the ones that show up on a vu meter. if you have peak metering they still need to keep the calls down a little because the narower bandwidth makes the phone caller sound louder than the studio audio.

Hope that all helps

Robert Jeffares

A better way is to go the software route where you are not limited to
6 hours. Cybercorder 2000 will allow to record radio programs on your
PC like a VCR. It is available at http://skyhawktech.com

> Bet they don't play "Boy George" either - I never liked him, but hell he was
> big, yet to heard him since the 80's.
All they ever played was "Karma Chameleon," and I don't even hear that
one much anymore.

>
> I bet they don't play Icehouse - they were big, yet not heard them since
> "Crazy" in 89?.
MAYYYYBE "Electric Blue," but certainly not "Crazy" or "No Promises."

>
> I bet they don't play the Hooters! (they ruled!)

Nope.
>
> Do they play the Fix?
Yes. "One Thing Leads to Another" and "Saved by Zero" but not "Stand
or Fall," "Red Skies at Night, "Deeper and Deeper," or "Are We
Ourselves." And you can forget about "Secret Separation."

> Missing Persons (I like the "new-wavish" 80's stuff) - too radical for 80's
> radio?
"Words" only.

> Men without Hats?
Actually yes. The one hit "Safety Dance." In fact, they abuse that
one.

> Devo?
Yup. "Whip It" is also overplayed.

> SoftCell?
Yes.

> StrayCats? (they ruled!)
They actually do a decent job of mixing in "Stray Cat Strut" and "Rock
This Town" but I think they forgot about "Sexy and 17."

> IndigoGirls?
Ummm, as if.

> Tears without Fears?
Tears for Fears gets plenty of airplay, at least their 3 big ones.
But I liked "Sowing the Seeds of Love" the best, and it did well in
'89, but I still never hear it.

> DepecheMode? (I like)
Yeah, a decent mix but too much "People are People" and "Strangelove,"
not enough "Personal Jesus" and zero airplay of "World in My Eyes."

> Cure? (I like)
Yeah, the obvious stuff. They won't play "Fascination Street" or
"Close to Me" or anything not sounding like "Just Like Heaven" or
"Lovesong."

> Cult?(Good rocken)
"Fire Woman" is it.

> the Call?
Nope. Their couple of good songs must've slid under their radar.

> SimpleMinds(surely they play them! - their good)
Yeah. But not "All the Things She Said" or "Sanctify." Again, they
really go out on a limb playing the obvious.

> Smithereens (Great Rock - bet they are never played!)
u got it - NEVER played

> Big Country?
"In a Big Country" but not "Fields of Fire."

> U2 (old school stuff?)
No older than "New Year's Day" or "Sunday Bloody Sunday."
>
>
> Cant think of any others right now.
Not that I was a huge fan of these, but they should be represented:

Stevie Wonder ("Part Time Lover," "I Just Called...")
Tina Turner
Billy Ocean
Jodi Watley
USA for Africa
Dionne Warwick & Friends
Milli Vanilli
New Kids on the Block
Debbie Gibson
Tiffany
Martika
Suzi Q
Asia (not just "Heat of the Moment" and "Only Time Will Tell")
Night Ranger (not just "Sister Christian")

Rick Astley
Miami Sound Machine (hello???? they were HUGE!)
Janet Jackson
Michael Jackson (I couldn't help reiterating this one - to be almost
completely unrepresented is TRAVESTY)
Robert Plant (not just "In the Mood")
David & David
Mike & the Mechanics (yes, Point, they did more than "The Living
Years")
10,000 Maniacs
The Smiths
Book of Love
The Waitresses
Tom Tom Club
Suzanne Vega (ok "Luka" was the only other hit besides "Tom's Diner."
But it WAS a hit!)

There's a lot more that I'm just not thinking of at the moment, since
I don't have my own mp3 collection handy to refer to. I can ALMOST
buy into the theory that the old Motown-ish stuff doesn't appeal,
assuming that's their theory and it's not racially motivated, but the
eternal cynic in me prefers to think that they ARE racist in their
choices because I promise you MSM and Michael would NOT have tested
badly, also assuming that they even surveyed a sampling of listeners.

If I go on much longer, I'm gonna bust a gut.

615. More Oldies online via Rock-it Radio

Newsgroup: rec.radio.broadcasting
Date: 2002-02-19 03:36:01 UTC
From: rockitradio@aol.com
Message-ID: <u73i11bg8bmd64@corp.supernews.com>
Source record: 11978

Hello Everyone,

Well we pulled ourselves away from the Winter Olympics just long enough
to put 3 more new shows in the Rock-it Radio archives. They are Rock-it Radio
shows
#410, #411 and #412. All these shows are in our archives and can be heard at:
http://www.palmsradio.com/rockittext.htm
Rock-it Radio show #410 features Otto Fuchs and his Rocket 88 show from Baden,
Austria and a tribute to Gene Vincent. Rock-it Radio show features more Doo
Wop
from Cool Bobby B and the Doo Wop Stop. And Rock-it show #412 features another
popular feature of Forgotten Top 25's of the 50s and Early 60s on the Memory
Lane
Show hosted by Lane Quigley. Here are all the playlists below.

==========

Otto Fuchs and the Rocket 88 show on Rock-it show #410

Not only is Austria a place of great Skiers they also have some great DJ's and
Rock-it Radio is lucky to have Otto Fuchs and his Rocket 88 show... Here is the
playlist of his latest show from Baden, Austria and a tribute to Gene Vincent.

01. Dance To The Bop --Stan Perkins
02. Fannie Mae --Dickie "Be-Bop" Harrell
03. I�m A Lonesume Fugitive-- Graham Fenton�s Matchbox
04. Gene Vincent Rock --Johnny Carroll
05. Gene�s On The Jukebox --Jean Vincent
06. Everybody�s Talkin' Bout Gene --Graham Fenton�s Matchbox
07. How I Love Them Old Songs --Gene Vincent
08. Be-Bop-A-Lula --Gene Vincent & The Blue Caps
09. The Day The World Turned Blue --Gene Vincent
10. Hound Dog --Gene Vincent & The Blue Caps
11. Jumpin' Jive --Crazy Cavan & The Rhythm Rockers
12. Baby Blue --Gene Vincent
13. Jumps Giggles & Shouts --Gene Vincent
14. Cruisin' --Stray Cats
15. Bluejean Bop --Paul McCartney
16. Double Talkin' Baby --Paul Burlison with the Dempseys
17. Time Keeps Movin'On --Firebirds
18. Dance To The Bop Gene Vincent & The Blue Caps
19. Lotta Lovin' --Gene Vincent & The Blue Caps
20. Woman Love -- Gene Vincent & The Blue Caps
21. By The Light Of The Silvery Moon --Gene Vincent

Otto always welcomes comments and loves to hear from his listeners you can e
mail him at:
o.fuchs@kabsi.at
also you can check out his latest biography in the Rock-it Radio DJ page at:
http://www.palmsradio.com/bio.htm

==========
Cool Bobby B and this week's Doo Wop Stop show on Rock-it #411

In Rock-it Radio show #411 Cool Bobby B and the Doo Wop Stop has come up with
more Group Harmony Doo Wop sounds here on Rock-it Radio. Here is the playlist
of this show.

1. Too Young -- Lewis Lymon & Teenchords
2. Ding Dong -- The Packards
3. Baby Baby -- Frankie Lymon & Teenagers
4. Walking along -- The Solitaires
5. Take me as I am -- The Duprees
6. Duke of Earl -- Gene Chandler
7. Seven Wonders of the World -- The Keytones
8. Once in a while -- The Chimes
9. Maybe you'll be there -- The Essentials
10. Yakety Yak -- The Coasters
11. Girl Named Lou -- The Cadillacs
12. I wonder -- The Pentagons
13. Glory of Love -- The Angels
14. Heart and Soul -- The Spaniels
15. The Wind -- The Jesters
16. Just a lonely Clown -- The Clowns
17. There's a moon out tonight -- The Capris
18. I laughed -- The Jesters
19. Eleventh hour melody -- The Rivieras
20. Please let me love you -- The Jesters
21. Book of Love -- The Monotones
22. Shirley -- The Rainbows
23. My Heart belongs to only you -- Mary Swan
24. Darling can't you tell -- The Clusters
25. Again -- The Universals
26. here Am I -- The 4 Jays
27. Scret love -- The Moonglows
28. Don't leave me baby -- The Camelots
29. Rock and Roll is here to stay -- The Cadillacs
30. Your other love -- The Flamingos
31. He's gone -- The Chantels
32. Only You -- The Platters
33. You're mine -- The Fireflies
34. The Angels listened in -- Percy Sledge
35. That's all -- Midnighters
36. Goodnight baby -- The Imaginations

Well there you have it 36 Doo Wop favorites and rarities in Rock-it show #411
we hope that you enjoy this one on Rock-it Radio!

==========
Lane Quigley and the Memory Lane show in Rock-it #412.

Lane Quigley returns to Rockitradio with the 23rd installment of his popular series of Forgotten Top 25's on The Memory Lane Show in our archives page under Rock-it show #412.
On the newest program, Lane features 30 great tunes from 1953 to 1964 - each one made the Top 25 in America,
and yet they're all ignored by oldies radio today. Check out this playlist:

Forgotten Top 25's #23

1. Searchin' - The Coasters 1957 #3
2. He's Sure The Boy I Love - The Crystals 1963 #11
3. Little Diane - Dion 1962 #8
4. Tear Drop - Santo & Johnny 1959 #23
5. I Can't Love You Enough - Lavern Baker 1956 #22
6. Hot Diggety - Perry Como 1956 #1
7. To Each His Own - The Platters 1960 #21
8. Not Me - The Orlons 1963 #12
9. Secretly - Jimmie Rodgers 1958 #3
10. Bongo Rock - Preston Epps 1959 #14
11. First Date, First Kiss, First Love - Sonny James 1957 #25
12. Don't Come Knockin' - Fats Domino 1960 #21
13. I Ain't Never - Webb Pierce 1959 #24
14. Kiddio - Brook Benton 1960 #7
15. My Wish Came True - Elvis Presley 1959 #12
16. Nadine- Chuck Berry 1964 #23
17. Reveille Rock - Johnny & The Hurricanes 1959 #25
18. Let The Bells Keep Ringing - Paul Anka 1958 #16

Buffering Problems in Rock-it Show #408.

We have been getting notices that we have been having buffering problems on Rock-it show #408 over the Internet.
We have re encoded and re sent the show to our server last night and it should now be fully functional. This is a great show featuring Cool Daddy Al from Brampton, Ontario Canada and Pt. 2 of his tribute to the Grandfather of Rock And Roll -- Louis Jordan and his Tympany 5.
It is still in our archives page and our apologies to our listeners and Cool Daddy Al.
==========

Welcome to the Club -- The Women of Rockabilly to air on TV in March

"The world may not have been ready for the likes of rockabilly queens Wanda Jackson, Brenda Lee, Janis Martin, and Lorrie Collins back in the '50s, but their
inspirational stories—both individually and collectively—will surely strike a chord with female artists today. Sassy and tough, the women profiled in the film were ahead of their time as players in rock's earliest days, and all are still making music today."
- ROCKRGRL magazine

This PBS Special will be airing here in the States and we have been promoting it in the last couple issues of the Rock-it Radio newsletter here. There is now a website
where you can check the local listings of this show and those Rockabilly lovers out there it is definetly a show you don't want to miss. The website of this ITVS release is:

http://www.itvs.org/search/ataglance.htm?showID=615

to check local listings click to the "broadcast Icon to the left of the page.
==========
The Rock-it Radio Survey -- Women of Rockabilly

In coordination with the above mentioned show of Women in Rockabilly. We have set up a survey of who our listeners like best as far as there favorite 50s Female
Rockabilly vocalists. Here is the latest results with 164 votes casted.

Wanda Jackson 62 votes 38%
Janis Martin 53 votes 32%
Brenda Lee 28 votes 17%
Lorrie Collins 13 votes 8%
Barbara Pittman 5 votes 3%
Other 3 votes 2%
(2 of the "other" votes mentioned they are for Rose Maddox in the comments section)

If you haven't voted and would like to you can by just going to our main page at:
http://www.rockitradio.net

and scroll down until you see the poll icon.

Welcome New Rock-it Radio Listeners...

We have another excellent showing of new members of our Rock-it Radio listeners club
that have joined this week from 8 to 14 of February. A big welcome to all and they are:

Davalee Siders of Arizona USA; Heff Alleyne-Hughes of Great Britain; Mark Kubancik of Kentucky, USA; Ron Maki of Ohio USA; Laura Lauth of Illinois, USA; Luciane Oliveira from Brazil; Jack Montgomery of Ohio, USA; Sam Sheppard of Louisiana, USA; Jim Stetler of North Carolina, USA; Donald Fetterly of New York, USA; Robert Evans
of Ohio, USA; Orlando Ramos of California, USA; Rod Robinson - Ontario, Canada; Pete Graveline - Vermont, USA; Jimmy Mitchell - Texas, USA; Mark Donders of The Netherlands; Don Surbaugh - Georgia, USA; and Terry Lane of Ohio, USA.

That would give us a total listeners club membership of 1073. This is probably the most new listeners club we have had the pleasure of welcoming in a single week and
we hope that is a continuing trend. We would of been well over 1125 members in our listeners club but we lost about 50 listeners this week due to bounces. Remember if
you change your e mail address you have to re subscribe into our listeners club.

We hope that all of you enjoy our listeners club and remember we are here for YOU! and if you have any requests, dedications or comments you can e mail us here at the station at: Rockitradio@aol.com

Well that is about it for this newsletter we hope that you enjoy these great Rockin' shows here on Rock-it Radio.

Until Next time -- In Rockin' Harmony,

Bennie Dingo
Rock-it Radio

e mail: Rockitradio@aol.com
website: http://www.rockitradio.net

-- If you wish to join our listeners club and haven't yet -- it's easy to do... all you have
to do is go to our main webpage at: http://www.rockitradio.net
and at the top of the page click to the Icon that says to join our mailing list.... and enter your e mail address
and you are in!! and will receive the latest Playlists, shows and news of Rock-it Radio.

I don't understand how ASCAP/BMI fees could have skyrocketed if the station did not have sales.

Indeed. To this day, we still have our Little Italy, our Slavic Village,
and even a small Chinatown close to downtown. Without getting preachy or
diving into cliches, I really think our diversity gives us a strength many
other similarly sized cities might not have...

Proud? Fiercely so. In fact, we have broadcasters with ethnic names like Robin
Swoboda (longtime employee of WJW-TV and one of Cleveland's favorite
TV personalities) and the ultimate Jock-With-The-Ethnic-Name, WQAL morning guy
Danny Czekalinski (whose name I had to check on the Q104 website because
I couldn't remember the spelling :). Both Danny and Robin had used much more
ethnic-neutral surnames in other markets, but ethnic names are very acceptable
here. My name would work well. It's Polish, and there are a half-dozen spelling
variations plus a bunch of Sobolewskis, Sobieskys, etc...

(So David, when were you here and where did you work?)

>Care to explain, then, why WNCN has *dropped* classical for a rock format?

Actually, WNCN dropped the classical format twice. Once when it was owned by Starr broadcasting and the call was changed to WQIV, I believe, to emphasize its attempt at 4 channel programming. Remember the attempts at multiple channel records. Then it changed, for good, several years ago to WAXQ.

I remember being in a meeting at TM Programming (also owned by Starr at the time) where William F. Buckley, a Member of the Board, was horrified at the thought of the change. Listener response caused them to return to classical.

I suspect the reason was the same as any other format change away from classical: someone felt they could make more money. It was sold by Starr to GAF and is now owned by Clear Channel, according to BIA.

If you can make 6 million with classical and 20 million with classic rock. let's say, what do you think the decision will be?

Rich

other
> countries in the Americas.

One example: Colombia

540 to 1000 kHz are reserved for several non-DA 50's or one 100 to 250 kw AM. Regional or national coverage.1000 to 1250 are supposedly max 10 kw (with exceptions) and minimum 5 kw, as many as 8 in country. Department (like a state) coverage. 1260-1600, 1 kw to 10 kw, as many as 15 stations in country, some power exceptions. Metro coverage, more power given to larger metros in general.

All stations are non-directional except for a few (HJED-820) that are intentionally directional to cover an area that has unique population distribution.

Ecuador also has low frequency-high power, medium frequency medium power, high frequency low power rules. Argentina, Bolivia, Paraguay, Uruguay, Brazil and Chile have a regional frequency coordination system that generally works.Channels have nothing like the same classes as the US, but the system is similar.

> Billy Ocean
> Jodi Watley
> USA for Africa
> Dionne Warwick & Friends

Too "motownish" for me --- reminded me of the last legs of "disco" too much
I quess ;-) (just me ---- I fully support diverse radio playlists, whether I
personally like such music is not an issue......esp. if all stations play
more stuff, I can just change channels).

> Milli Vanilli

too fake!

> New Kids on the Block
> Debbie Gibson
> Tiffany

to kiddy. Tiffany was no Entertainment Tonight today (hell was it her or
Gidson??? - i don't know fromthe other ;-/). "I think we're alone now" was
the one.

> Martika
> Suzi Q

??

> Asia (not just "Heat of the Moment" and "Only Time Will Tell")
> Night Ranger (not just "Sister Christian")

Cronologically 80's, yet to me I think "classic rock" WRT sound style.

> Rick Astley

??

> Miami Sound Machine (hello???? they were HUGE!)

Forgot about them - they were big

> Janet Jackson
> Michael Jackson (I couldn't help reiterating this one - to be almost

> completely unrepresented is TRAVESTY)

well not a fan, but your right - they should get airplay.

> Robert Plant (not just "In the Mood")

I think "Classic rock" - due to who he is mainly.

> David & David

forgot about them - I still have an LP of thiers (not sure why ;-/)

> Mike & the Mechanics (yes, Point, they did more than "The Living

"see me running" or some such?

Same as above ;-/ - I have a working turn table so LPs are functional to me, though rarely played. Mostly Supertramp (talk about no-airplay on 70's stations!!), Queen LPs I play sometimes.

> 10,000 Maniacs

Oh yes --- to me they are more "alternative 90's" stuff (my favorite era - unfort. now passe) in sound although they started with Hope Chest in 1983. I have 6? of thier CDs

> The Smiths

hear of them.

> Book of Love
> The Waitresses
> Tom Tom Club

????

> Suzanne Vega (ok "Luka" was the only other hit besides "Tom's Diner."
> But it WAS a hit!)

Hell yes!! I was a big fan, not only "luka" but her 1985 album had "Marlina on the Wall" (or some such) and was sort of a "Cult-classic".

>
> There's a lot more that I'm just not thinking of at the moment, since
> I don't have my own mp3 collection handy to refer to.

Well I could do without Robert Palmer, and George Micheals

Maybe some Ramones, Red Rocker, Red Ryder, Genesis (preferable Gabriel),

Damn have'nt heard the Hooters in years, nor Smithereens ;-/ time to look for those LP's ;-).

I'm sure that the Indians will be interested to know that someone has decided to name them after a European who was part of the conquest of this particular Hemisphere!

Of course, your point can be used to show that "Hispanic," which is a totally invented term, is neither a nationality nor an ethnicity nor a race.

Last time I looked at their web page they promised coverage of Latin America, but not North America. There was some initial connection between World Space and XM, but that is no longer true AFAIK. Both are in Washington, DC, USA, even though WS has no US coverage.

I lived in Texas for nearly 10-years and no this is not what I've seen. i've not seen this in California nor Washington/Oregon either. I know not abotu the northeast nor such about Arizona/NewMexico.

But ones "ethnicity" was not an issue in Austin (and I lived on the South side with all the Hispanics - lower rent ;-)). The Eastside I lived in too, where alot of Black folks lived..... None were wearing "penta-cloths" nor "sombrarros"(sp).....all were "Joe Ave" Americicans and soem were illegal migrant workers, but they were not some folks obsessed with some obtuse cultural baggage.

That silliness may be a factor in the "ivy halls" and in the north East...i've never seen in in Austin , nor in Dallas/FW.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

WCBN FUN-Razor starts Feb 12 - tune in now and tune in then

I would suggest, if we are going to split hairs, that "native American" is an ethnicity, and "American" is a nationality. However, that may not satisfy those native Americans who subscribe to the idea (rightly so, IMO), that they are, as a group, composed of different ethnicities. Aleuts, I am sure, do not consider themselves to be in the same ethnic group as the Navaho, which, by the way, at one time were of the same ethnicity, but composed several nations. Just a thought or two, for what it's worth...

> (So David, when were you here and where did you work?)

I was a go-fer from about 59 to 63 at WJMO and WCUY. At WJMO, I was the token white at the studios next to the railroad tracks up Euclid from Severance Center; WCUY was an early jazz FM that operated M-F 5 PM to 11 PM when I was there. In early 63, I moved to Mexico and interned at Organizacion Radio Centro and then went to Ecuador where I built a Top 40 station in the capital.

My father had many friends who were Italian who spoke little English and with whom he was able to get along with a combination of English and gestures! I remember riding the bus and many times finding myself the only one that was speaking English, too! WZAP and another FM were all ethnic at the time.

I have not been back except for an occasional visit since then; it sure is a nicer town today than in the early 60's, though.

Yes, the beam will mostly cover central and some south america,
but ought to have some signal over most of north america.
Problem is, the satellite isn't launched yet. Perhaps later
this year or next, or perhaps they'll put it off to see how
well it all floats on "AsiaStar" and "AfriStar".

I personally find the "native" part offensive. I'm a Caucasion and was born
in this country. I'm every bit as "Native American" as any American Indian
(and American East Indian for that matter).

Ectually the "right" term for "A. Indians" is "Amerind" ------ but only
anthopologists use this term..... Wish others did too, I don't find it
offensive like I do the "native" one.

However, that may not satisfy

Hi Jim

I have an Ampro Scully Model 280B-2. I have spare parts, complete deck and electronics. The deck is fully functional. I remember when I took it out of service one of the solenoids was pulling in. I would consider this one as good condition but needing maintenance to repair a control function. The stereo electronics I recall had a glass broken on one of the record/play meters. I have the manuals and some extra parts.

I have an attic full of broadcast gear this is being cleared out. I also have a nice mono Ampex deck in a neat custom made cabinet that was functioning when taken out of service. The solid state Record/Play amp needs the caps replaced.

I want to make room in my attic for new central air-conditioning ducts. Some of the equipment was from stations that consolidated and were not junkers, they were in operating condition. Also several Delta, ITC and Tapecaster cart machines and tapes.

I also have a complete Pepper Production Sound Library. The Red label, before William B Tanner series or the Pepper/Tanner. I this was the first series out in the late 50's.

Frankly I get bored listening to both of them. More than 20 minutes
listening to either one is enough to make my ears bleed from hearing
so much pandering stupidity. However, if you're looking for a survey,
why not ask a ratings agency?

Remember that popularity and quality don't always coincide...

Would you care, then, to point out precisely which section of the FCC
rules applies the notion of ERP to AM facilities? It's not in 73.14
(``AM broadcast definitions''), where one would expect if it were
being used for regulatory purposes.

I replied at noon today that I have an Ampro Scully Model 280B-2. I didn't see it posted, so will also reply to you. My unit was taken out of service as a working model, but right at the time of removal, it seems one of the solenoids was pulling it. I would not consider mine beat up, in fact it has good appearance. The electronics are complete, but the glass on one of the Record/Play VU meters. I also have extra parts. I spent 35 years in broadcasting as a announcer, manager and corporate chief engineer. The attic is full of gear, ITC, Delta and Tapecaster cart machines. I have a mono AMPEX AG350 with solid state electronics that needs the caps replaced. I even have a couple of audio consoles a Sparta 8 channel and a Gates tube Yard, mikes and more.

I just want to clean out the attic to make room for a new central air conditioning unit and its duct work.

You can actually achieve the same goal for free by combining realplayer or another streaming player and one of several software recording programs available on the net.

I use realplayer and a program called OpD2d to record Rush Limbaugh off his website. OpD2d let's you record by the amount of minutes if you want.

While most of the world and even other Texans pronounce Houston
"HYOO-stun", native Houstonians say "YOU-stun". I've been surprised
to hear the local usage popping up occasionally on NPR. So far I've
only documented it from the mouth of Craig Windham, a top-of-the-hour
newscaster. I wonder whether he happens to be from Southeast Texas
(he doesn't otherwise sound like it)? Or do NPR newscasters follow
a stylebook based on research about local pronunciation that NPR
reporters don't follow? Is the local pronunciation creeping out into
the wider world via any other channels?

Hello there! My name is Bob Score. I'm a Graduate Student at Kutztown University of Pa. I am currently working on a Thesis dealing with XM Satellite Radio. Part of my Thesis requires a survey which I have developed online for XM subscribers. The survey consists of only 12 questions and takes about 2 minutes at the most to complete. If you ARE a XM Radio subsriber, I would greatly appreciate it if you would take a moment to complete the survey. Thank you! Remember, you must be an XM Satellite Radio Subscriber to complete the survey. Thanks.

Simply because broadcast radio is bad, that doesn't make XM or Sirius
good.

I think there's a market for really good audio-only programming, but
that costs money to produce.

Re: KRKO/1380 ...

<<A
HREF="http://seattletimes.nwsource.com/html/localnews/134407711_antennafig
ht20m.html">http://seattletimes.nwsource.com/html/localnews/134407711_ante
nnafight20m.html</A>>

States, in part ...

"Plans for guy wires have been removed out of fear they could trap birds. The original proposal for four 466-foot and four 425-foot antennas has been scaled down to a single 425-foot antenna (about the height of 10 telephone poles) and seven antennas under 200 feet."

Now, 466 feet is about 236 electrical degrees and 425 feet is about 215 degrees, while 200 feet is about 101 degrees.

200 degrees is pretty much ideal for any power, and is about the tallest which is useful for a 50 kW station.

What the above-referenced article failed to mention is that this is a 27 kW-D, 50 kW-N, DA-N application, not a 50 kW application, and that a total of four towers are involved, not eight.

Oh, and the radiators are 202.00 degrees (Tower 4 of the night array and also the only tower in the day radiator) and 88.40 (Towers 1 through 3).

It is actually KRKO's existing two-tower 5 kW DA-N facility which is using 101 degree radiators.

So much for accuracy in reporting.

But, it's good to see that the benefits of 200 degree radiators in the bad soil conditions of the Pacific Northwest are being recognized.

The proposed day efficiency is 414.32 mV/m/kW at 1 km, which is certainly consistent with a 202 degree radiator.

The proposed day efficiency is about 321 mV/m/kW at 1 km, which is certainly conforming for a Class B, but it would be a much better use of the 50 kW input power of those radiators were at least the average height of all radiators, 111 degrees and not a puny 88 degrees.

111 degrees is about 220 feet, while 88 degrees is about 175 feet ... a difference of 45 feet, or only two-and-a-quarter tower sections.

The neighbors can build resonant towers of their own instead of windmills,
and heat their homes free and in an ecologically friendly way.

This reduces the danger to birds from windmill blades.

Also it leaves KRKO-AM with a nice skywave.

I don't know if there's an NPR stylebook. Most news audio-only news
organizations don't have one anymore.

Its always a quandry. It seems to make sense to pronounce names the
way they are locally pronounced, but taken to extremes, that results
in some foreign city names that are almost unrecognizable to American
listeners.

Down here Miami is pronounced "mye-am-ah" by the older locals, and you
often hear Florida as "flah-tah."

Amazing how the old rules seldom apply anymore. 1380 is a "Regional" frequency, which always had a maximum power of 5KWs. Is that rule defunct now? I do know 610 WIOD Miami was authorized to increase to 10KW about 15 years ago, due to Cuban interference. 610 is also a regional frequency.

In the USA. In Canada and Mexico, the limit has been 50,000 watts on
regionals for several decades.

In Central and South American, this system never applied.

> Is that rule defunct
> now?

Yes.

>I do know 610 WIOD Miami was authorized to increase to 10KW about 15

620, a regional, has WTMJ in Milwaukee at 50 kw. You can now pretty much try
for whatever power you can up to the max on the regionals as long as
protection requirements are met.

>>
Amazing how the old rules seldom apply anymore. 1380 is a "Regional" frequency, which always had a maximum power of 5KWs. Is that rule defunct now?
>>

Yes it is. For more than a decade (see below).

>>
I do know 610 WIOD Miami was authorized to increase to 10KW about 15 years ago, due to Cuban interference. 610 is also a regional frequency.
>>

That was a special case, and only applied to WIOD.

The original North America Regional Broadcast Agreement (NARBA) established these classes, from their former de-facto classes ...

Class I-A, 50 kW "mimimum", but as a practical matter, this "minimum" was a mandatory and maximum power for the U.S. and Canada, and for no one else, exclusive use by one station at night,

Class I-B, 10 kW minimum, 50 kW maximum, shared with other Class I-Bs as specified in the treaty, and also by Class II-Bs,

Class I-N, not in the original treaty, but added for so-called non-contiguous U.S. states and territories, practically speaking this was to provide Alaska with Class Is where it had no Class Is before,

Class II-A, also not in the original treaty, this was the U.S.'s solution to a lack of Class Is on the west coast, and also in the mountain and plains states, the U.S. considers these to be equivalent to Class I-N in some documents, assigned to certain states and only to those states,

Class II-B, 0.25 kW minimum, 50 kW maximum, must protect all Class Is,

Class III-A, 5 kW maximum days, 1 kW minimum days, 1.0 minimum nights, non-directional (with some exceptions),

Class III-B, 5 kW maximum days, 0.5 kW minimum days, 0.5 kW minimum nights, non-directional (with some exceptions),

Class IV, 0.25 kW, later extended to 1 kW days/0.25 kW nights, late extended to 1 kW days and nights,

The "Rio" treaty wiped out all that and established a new class system ...

Class A, 50 kW "minimum" (see above), any Class I not already 50 kW was required to increase to 50 kW or would be "grandfathered" at 10 kW, all clears

may now be shared subject to protection of the Class As,

Class B, any non-Class I or Class IV, therefore clear and regional channels are treated identically and 50 kW is permissible on regional channels,

Class C, same as Class IV, if not in the contigulous U.S. a local channel may be used for a Class B station,

Class D, any daytimer.

Yup, they were scrapped a while ago. WRC/WWRC/whatever they are now on
980 in Wash, DC, is running 50kW. The old KDIA-1310, Oakland, CA, (now
Disney) is 25kW full time. I'm sure there are others. I sincerely hope
these applications are being considered on a case-by-case basis, but
in the spirit of deregulation coupled with a business-friendly
Republican administration, I also wonder if any applications will be
rejected.

www.radiospirits.com (button: On the Air, then scroll down to Superhero Week) is currently featuring the 11-chapter serial, Batman's Great Mystery. If you check it out today you can listen to chapters 7-10. Chaptesr 1-6 are gone from the site, but you can read the scripts, graciously provided from the Cairo SCript Library!

The URL is:
http://www.geocities.com/daggerofthemind2000/Radio/CairoScriptLibrary.html

then scroll down to Superman.

Or, if you've already heard Chapters 1-6, the URLs for Chapters 7-8 are:

http://www.geocities.com/daggerofthemind2000/Radio/Episodes/Superman/Great7.htm
http://www.geocities.com/daggerofthemind2000/Radio/Episodes/Superman/Great8.htm

It all began when Batman disappeared and Robin came to Clark Kent for help. Clark Kent, who is really Superman, goes into action.

This is a fun serial. Each episode is only 15 minutes long and since its for kids they do a bit of recapping at the beginning of each episode, but once you get into the spirit of the things its as much campy fun as the Batman tv series. All the actors do an excellent job.

Get hooked on Old Time Radio and The Adventures of Superman!

AM radio station interest for sale.

WARNING! JOINT VENTURE.

We are still looking for active or inactive investors to help our budding group acquire a first property. It is an AM station in Williamsport, PA.

1 KW days, 500 watts PSA and 36 watts nights.

$10,000 min. per investor, please.

Station is dark at present but went on the air in 1951. 10 acres of land are included along with the 220 ft. guyed/lighted tower and the transmitter shelter. NO STUDIOS or studio gear are inlcuded. We can get the station for a total consideration of $100,000 with $75,000 down. The land alone is almost worth the price.

This is a city of about 31,000 with a county population of over 120,000.

(478)741-1710.

The Brooklyn Bridge and/or beach property in AZ is NOT included! Hi Hi! I am not a crook! (grin) My last job in radio was CE for a 5 KW full-time AM in NYC.

73,

Meyer Gottesman, W6GIV
Macon, GA

I view it in the opposite way. Great DJs and production are the glue
that allows diverse music programming. CheapChannel is already
providing background music formats padded with meaningless chatter.
Dropping the meaningless chatter would be an improvement but not nearly
as much as a return to REAL radio where the jocks are just as much fun
to listen to as the music.

I also realize that there are now a few generations who have never
experienced how compelling music radio can be.

Joe Frank v7.2u
Frequently Asked Questions 2/02

------------------------------------------------------------------------

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr,
rec.radio.broadcasting, rec.answers and news.answers.
This document was created by Richard Looney with assistance from many Joe
Frank fans who are net.citizens. The latest version is also available on
the web at http://wfmu.org/JF/joe_fran.html .

Additional information is welcome - please send to richard@wunderland.com .
------------------------------------------------------------------------

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about CDs, video, writings and Internet?

4. Is he still on the radio?

5. Are tapes or CDs of the radio programs available?

------------------------------------------------------------------------

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a
different Joe Frank (Carollo) was responsible for those top-40 hits from
the early 1970s. Joe Frank is best known for the weekly radio show
```

called "Work In Progress" he created in the studios of KCRW, Santa Monica between 1986 and 1992. His programs are picked up by some of the more progressive public radio stations, since KCRW made it available 'on the satellite' via SASS.

The following biography from KCRW was dated April 1990:

Joe Frank was born in Strasbourg, France of a Viennese mother and a Polish father. His family immigrated to New York City where Frank was raised and educated. Frank, who received a B.A. from Hofstra University, attended the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches, and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

Starting in 1993, Joe changed the title of his weekly show to In The Dark. In early 1995 it was announced that Joe Frank would be 'taking a break' from In The Dark, and the program was removed from the KCRW schedule. Joe Frank began a new program called Somewhere Out There on KCRW in January 1996. The shows that year were all monologues, but afterwards, unlike previously, recycling of his old material became common. In August 1997 Joe announced his departure from radio. In 1999 he returned with a new series, The Other Side, which is more reality-based, more confessional, a window into Joe's life (as well as others). A cornerstone of this series is "Karma" -- its story spills over into many other programs. About the time of "Karma," The Other Side programs invariably began to contain excerpts from the lectures of Buddhist teacher Jack Kornfield.

2. What has he done? Chronological List of Joe Frank's radio programs

This listing began as the Work In Progress Program List received from KCRW in 1987. That list was then augmented by the author of this FAQ as new shows were broadcast. The productions were originally listed by KCRW as either monologues (M), dramas (D), or both (MD). This FAQ continues that tradition, but simplifies it such that programs with a single vocalist are listed as monologues (performed by Joe Frank unless noted otherwise) and programs featuring multiple performers are marked as dramas.

Additional information augments this listing:

[musical artist and title is noted between square brackets]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

>>> various NPR Productions <<<

1978

The 80 Yard Run
monologue - one hour
{ KCRW's program list placed this show in the middle of the 1979 entries, but a KCRW announcer's introduction to this program claimed this to be Joe Frank's very first show, initially broadcast in 1978. }

drama - one hour
cast: Arthur Miller, Joe Frank & Maude Davis

Anthology of Love

drama - one hour
cast: Part 1 - Tim Jerome & Beth Dixon, Part 2 - Tim Jerome & Arthur Miller

Jerry's World

drama - 1.5 hours
cast: Jerry Klein, Mannie Klein, and Meryl
{ During a KPFA fundraiser telephone interview Joe was aked who Jerry was, and what it was all about. His response was "Jerry was a man who lived in New York City. He lived in an apartment, alone and was very depressed; and what he did was record his phone conversations, with everybody, for years. and when people came over to visit at his apartment he'd record them, too. He bacame so depressed he couldn't leave his apartment. His brother Mannie (who

you also hear in that show) would come to his place with food, to keep him alive; and ultimately he died, a relatively young man in his early forties, of a brain aneurysm. After he died, his brother had all these tapes, hundreds of tapes of these phone conversations and he knew that his brother Jerry had been a fan of my program and he thought 'Well, maybe Joe can use some of this material maybe he'll put it on the air.' So he sent me a excerpts ... and I found this material very compelling and decided to make a radio series based on those recordings. So what you hear in 'Jerry's World' is Jerry, who is now dead, and his brother Mannie who very much admired him... and this girlfriend earlier of Jerry and then of Mannie and now she was going out on her own, and her name was Meryl, and there was another woman involved, but these were all tapes of real conversations and real life being played out from various times in the life of a man who died rather tragically." }

Loner

drama - half hour
{ vocalists unidentified }

The Last Run

drama - half hour
cast: David Cross, Ryan Cutrona & Joe Frank

Prayer

drama - half hour
cast: Grace Zabriskie & ?
{ contains material first heard in "A Natural Disaster" }

3. How about CDs, video, writing and Internet? Listing of non-radio work

Joe Frank on screen:

A short video was presented at the Santa Monica Public Library
in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a
pay phone and making the calls heard in "Thank You, You're Beautiful",
and material from "Pretender", including the scene of Joe with the
pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe
did a short for CBS for a late-night summer-replacement show called 'The
Midnight Hour'. The piece was 'Memories', a re-working of a WIP story.
It aired (as I recall) late August or early September 1990, on the final
night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station,
KCET, showing a montage of urban images (among which is Joe at the
microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series,
released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe provided the voice of the computer in "Galaxy Quest" (1999).

He also had a small role (just a few lines)
in "The Game" (a 1997 film), and has reportedly
provided narration for the following
cable television documentary programs:

"Wild Rescues" on Animal Planet
"Conspiracies" on A&E
"Ends of the Earth" on the Learning Channel
"Hurricane X" on the Discovery channel

Joe Frank in print:

An article about Joe called "Radio Noir", by Jamie Diamond, can be found
in the Los Angeles Times Magazine of Sunday, November 22, 1987. The
Wall Street Journal profiled him in an article in their March 15, 1988
edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching
Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more
verbiage (generally quite favorable) appeared in the wake of the release of
his book of short stories, _The Queen of Puerto Rico_, which was published
in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night
Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter
has similarities to "When She's Asleep, She Looks like an Angel" }

Joe Frank on disk - commercial recordings:

Commercial Recor4dings:

"Strange Cargo Hinterland" is a 1995 William Orbit production.
The track "Montok Point" contains some brief monologues by Joe Frank.

The group Brazzaville released a "2002" CD in 1998 which features Joe
on the "Ocean" track.

Other Recordings:
Some CDs issued on the European Moonraker label contain pieces of Joe Frank
programs.

The "Epilogue" on their First Sampler (Moonraker 050) is a piece from "Smile"
The "Segue" and the "Epilogue" on their Second Sampler (Moonraker 100) are from

"A Tour of the City"

And all his shows are available on CD from KCRW (see below).

Joe Frank Online:

KCRW's web page, not much text, but many links to shows in RealAudio:
http://www.kcrw.org/cgi-bin/db/kcrw.pl?tmplt_type=program&show_code=jf

The Joe Frank Network -- mailing list and message archive:
http://www.joefrank.net/

Pointers to many more sites are available at Joe Frank Link Central:
http://community-2.webtv.net/turbocrazed/JOEFRANKLINKCENTRAL/

The online magazine "Salon" featured an article by Susan Emerling
in March 2000, "Public Radio's Bad Dream":
http://www.salon.com/ent/feature/2000/03/07/joe_frank/index.html

4. Is he still on the radio?

Hear Joe Frank on the following stations:

KCRW 89.9 FM http://www.kcrw.org
Santa Monica College
Santa Monica, California
Sundays at 11AM, repeated Saturday at 7PM

WFMU 91.1 FM http://wfmu.org
WXHD-FM, 90.1
East Orange, New Jersey
Thursdays at 7PM

KDVS 90.3 FM http://www.kdvs.org
Davis, California
Saturdays at 11PM

KPFA 94.1 FM http://www.kpfa.org
Berkeley, California
Sundays at 7PM

5. Are tapes or CDs of the radio programs available?

Joe Frank's programs are available on CD from KCRW
(they no longer do cassette tapes). Write the station for
more information at:

KCRW
1900 Pico Blvd, Santa Monica, CA 90405
attn: Jennifer Ferro.

or call 310-450-5183 or 800-392-8855

Some of the programs are available on KCRW's Joe Frank
web page (http://www.kcrw.org/c/jfrank/jfrank.html) in the

Real Audio format.

You were CE in New York and you didn't save enough to be able to raise $100,000 on your own? And if the property is worth sooo much then why can't you get a bank loan? I don't think you are a crook, but I sure don't wanna fund your semi retirement... Let me see, if I wanted to buy a dark AM in a small market, why exactly would I need YOU? You have been posting these deals in here for about 2 years...have any of them worked out? Have you bought ANY of the stations you have posted? Or do you collect the money and then the deal suddenly falls through? I hope one of these deals works out for you, so you will quit posting them... Future Investers...READ BETWEEN THE LINES!

Dear Gregg:

With regard to your reply, you are one of the rudest detractors I have encountered.

I have not been posting these ads for 2 years.

I was not in NYC long enough to save $100,000. You try saving $100,000 on a salary of $75,000 a year! With the rent for a furnished ROOM being almost $1200 a month! I am not complaining but NYC is expensive.

I am not trying to fund my semi-retirement. Certainly NOT ON the backs of others. I resent your implications. My first thought, frankly was not to even dignify your remarks with an answer.

My take on this is either you are jealous or an AM basher or both! Why else would an honorable deal seemingly upset you so much?

As for a bank loan, where have you been? What have you been smoking? (grin!) Banks are hostile to AM stations and for that matter not much kinder to FM stations!

Yours truly,

Meyer Gottesman
Macon, GA

PS I held a secret level security clearance and have never been convicted of a crime in my life unless you count a traffic violation as a crime!

[Moderator's Note: Traffic violations *are* criminal. A traffic ticket is a citation accusing you of a criminal offense. However, most courts handle traffic violations separately from other criminal acts. This message has been sponsord by Pedants-"R"-Us, Inc.]

Gregg,

Do a little DejaGoogling. groups.google.com is your friend.

We discussed between us, very recently, whether Meyer's posts were appropriate.
Your opinion brings the total number of people who said "no" to 2.

Many more people said the posts were OK, and I said that whatever the majority
decided would be honored. The majority decided, and I'm honoring the decision.

Thanks,

Ye Olde Newsgroupe Moderator

I have been holding back on my comments about the new sattelite radio format long enough now. Call me old fashioned or what have you. But I grew up with AM rock radio along with the advent of this "new" medium called "FM". To say that radio jocks are meaningless chatter is way off base for someone of my generation. If they aren't a part of our daily lives if only by the fact that they talk TO us and not AT us, and tell us in an upbeat and energetic way what we are listening to and occaisionally a little byte of information about our favorite songs, then I don't know what is then (I've been in the broadcasting business for 20 years).Its been what, 30 years since the demise of the big time AM'ers now, and all (that can remember them) of still look back on the likes of Wolfman Jack, Larry Lujack, John "Records" Landecker, among many others with fond memories because they carved out a place in our hearts because of what they had to say, not because of the amount of continuous, commercial free, jockless music they played. Sattelite radio has the potential to be a great medium, if they don't lose sight of the fact that we as listeners actually like to be talked TO. Its the commercials that are so annoying. -Glen

I was reading something about retirement the other day that said that the vast majority of Americans enter retirement with either debts or no significant savings. Engineers are notoriously underpaid everywhere which is why so much engineering talent has defected to telecom companies.

>And if the property is worth sooo much then why can't
> you get a bank loan?

Banks don't as a rule like to loan for radio. There are only a few inthe whole country that will do full loan packages for radio stations. They tend to see no underlying assets and walk.

It is quite possible that Meyer may find someone with similar interests to his and they can eventually put something together. I for one am glad that there are still people thinking about buying and operating local radio stations.

I realize that I know nothing about the author of this post or owning a radio station, but have a large knowledge of criminal history as I am a Deputy Sheriff of 17 years with a interest in radio. (How do you think I stay awake all night in a squad car without radio?)

Most traffic offenses are "petty" in nature, that is punishable by fine only and not jail time (if found guilty of the offense). These crimes, such as speeding. stop sign violations and the like, will not show up in anyone's criminal history. Some states do not enter some misdemeanors into the data base as well.

Dave Nissen, Deputy Sheriff K-9
McDonough County Sheriff's Office

>>

Before, these offenses were classified with misdemeanors in California, and I actually have requested and have had granted a jury trial over a $1 parking meter violation in Santa Monica.

Needless to say, the district attorney was unhappy with this situation, but we did indeed go to trial, and moments before the jury was to be seated the assistant DA decided to dismiss the complaint.

These were made "infractions" many years ago in California, and a jury trial is no longer offered.

In California a simple traffic violation such as speeding is an
"infraction" and not a crime. It goes on your DMV record but will not
show up in a criminal database. Going to "traffic school" can even
keep it off your DMV record.

A "misdemeanor" is a crime, punishable by up to one year in a county
jail (NOT state prison) and/or a fine. In California, driving under
the influence is a misdemeanor.

A "felony" is a more serious crime punishable by a term in state
prison.

Disclaimer: I am not a lawyer and I do not play one on TV (or radio).

According to stats released so far, people in their 40's and early 50's as
well as young trend-setters are the two really active buyers.

You bet your sweet butt I am and I'm "old". I was toying between the
XM and Sirius, but, since Sirius is a NASCAR sponsor and has the
streaming radio on the website.....

About $225 at Circuit City and coming to a city near you. I'm waiting
for the Chicago-Detroit-Cleveland triangle.

The license was renewed 9/24/1997.

An STA was accepted for filing 3/13/2001. The reason for being silent was stated as being "unknown".

So, the station is indeed silent.

Why anyone would build a 0.25 kW three tower DA Class D station with no hope of Class B operation is anyone's guess.

Vanity, perhaps?

In Columbus Ohio, if I null away WDFN 1130 Detroit (50 kw, 150 mi), I'm left with WPKL FM99.3
Uniontown PA apparently being rebroadcast by WASP 1130 Brownsville PA (5kw, 146 mi) without ever giving their own ID.

http://rhhardin.home.mindspring.com/wasp.ra (65k)

Eaton Ohio would be 100 mi west, 250w according to the sheet.

I downloaded the FCC database this morning, it was thus the
end-of-Friday data.

WCTM is shown as "licensed but silent".

BTW, the Feb 22 FCC dataset (called Feb 25 bucause that is when they
released it), and my AMSTNS program to display it, are now available on

http://www.qsl.net/w3otc

This version has been tested by a few people, but YMMV.

How about WGFT 1500 Youngstown, OH. 4 towers 500W D 250W CH zero at
night because of WTOP, KSTP, etc. It's still operating.

Or class B WAQR 1560 Sycamore IL w/ 197W ND-D and 207W N 4 towers at
night w/ a flea-power synchronous at night. Two sites.

I imagine that there are numerous others that are hard to comprehend.

Way back when, before the bands were as crowded as they are now,
stations like that in small towns could work.

I worked for a number of years in a town in Indiana not too far from
Eaton. WCTM was pretty much a joke, but there was a time when it
served its community and provided its owners with a modest living.

Sadly, the days when such a thing was possible are long gone.

Why anyone would build a radio station in Eaton is beyond me.
Eaton is 25-30 miles west of Dayton OH on US 35 and is halfway between Dayton
and Richmond IN. I've driven through Eaton. There is nothing out there. Eaton
is a small, rural, one-horse town.

Eaton's only other license that I know of is for WGTZ 92.9, and WGTZ is
a Dayton station, serving the Dayton market, headquartered in downtown Dayton.
Dayton, by contrast, is a city of about 400K-500K people.

Which reminds me of my all-time favorite legal ID:

"WGTZ, Eaton Dayton alive!!"

Mark Howell

[Moderator's Note: Pedant alert. You got it wrong. :) It's WGTZ, Eaton, Dayton and Springfield Alive. (for everyone else, say it aloud if you don't get it, and then you *will* get it.)

It's my second favorite... second only to another Southwest Ohio radio station. "On the lunatic fringe of American FM.... W. E. B. N. Cincinnati." WEBN also has, with apologies to WMMS in Cleveland, the coolest mascot in the known universe. (It's a frog, for those who are curious.)

sigh ah, the days, when I was a comms student at U of Dayton, hanging out with the Z93 jocks because I had nothing better to do :)

oh, and I need to correct myself. The Dayton METRO area is 500K people.

If Dayton had 500K people in the city, it'd be as big as Cleveland. -SJS]

Some follow-up to earlier posts:

While WCTM is indeed listed as being silent since 3/2001, they were on the air late last year.

If you go back far enough, I believe 92.9 was WCTM-FM (and in fact, I think it was on the air before 1130).

I'm still interested in finding out what has happened to WCTM. The owner is in his 70's, and it occurred to me that he might have retired, or passed on.

Canada and perhaps other North American countries use 530 for commercial
broadcasting. The U.S. does not.

The FCC's official list of stations "notified" on 530 can be found at:

Actually, he probably is. There are channels on each service that
appeal to "old" people. The other thing is that he's probably, being
old, got more money than you do and can easily afford the receiver.

Agreed. It's a shame that the only people running radio these days are
huge corporations with no true commitment to their community.

And stations licensed to smaller towns near larger towns just rimshot
into the larger towns and mumble their city of license around the top
of the hour.

Steve at stevew625@nym.alias.net
was kind enough to send me this response to my satellite question
regarding receiving Muzak for home use. He asked me to post it here,
for the group. Thanks, Steve!

> Is there any way to monitor the current Muzak DBS without subscribing?
> This is not an effort to get something for free, but it's for home
> use and Muzak won't sell subscriptions for home use, and won't explain
> why.
>

I think the reason has to do with licensing. With most types of
music, the songs are licensed normally through BMI/ASCAP and it's
a simple matter of paying them the royalites. However, with
the original Muzak, they have to contract with *both* the original
songwriters and the musicians who perform the covers. The way
this contract is written they probably had no clause for selling
to home users, and I'm guessing it would be too much legal hassle
to rewrite it for the small amount they'd make from home
listeners.

I am a big fan of this style of music, and I harbor a grudge
against the broadcast industry for killing off this format.

Unfortunately, neither Sirius or XM satellite radio has a format
like this. I won't be putting one in my cars but I have an
interesting story to tell about Muzak and car audio.

Last weekend, I had a little fun. I was looking at car MP3 players
and took a CD with Muzak on it and turned it up loud.
Some it is fairly modern and sounds pretty good on a system like
this. I don't think anyone really noticed what it was but in
one place a couple of kids about 16-17 came while the Muzak was
playing and turned up one of those 12-inch super-woofers full blast
and about shook the walls of the place. I was having a hard time
keeping a straight face.

The in-dash car MP3-CD players run about $400-500. I think I'd rather
figure out a way to listen to the $100 portable I already have
through the car speakers.

Your best option today is to get one or more home satellite dishes
and receive the music this way. Dishes are a lot more reliable
and much better quality than internet audio.

There are three "elevator music" channels receivable with an 18-inch
dish. One is channel 833 on DirecTV (formerly known as DSS). Just

go to any store that sells these (quite easy to find) and punch in 833. This is wall-to-wall string "beautiful music" with about songs on the playlist and is quite good.

Similar to this is the Dish Network "Dish CD" music which would be on channel 973. The format is similar to the DirecTV but has different songs on the playlist.

A third thing you can receive is the traditional Muzak "elevator music". Although Muzak provides music to Dish Network, this is one channel they do not offer in the home subscriber package (which contains both about 30 stereo channels and about 20 mono channels which they offer to businesses). However, there is a way to receive this at home. What you would need is an "MPEG FTA" (free-to-air) receiver such as the DMT1000 which costs about $250US. You set up an 18-inch dish aimed at the main Dish Network satellite at 119W, then program the DMT1000 to find "radio stations" on EcHO1/2. The channel "ENVOE" is the Muzak elevator music, this stands for "environmental-east". Muzak used to program their environmental "elevator" music with both an east coast and west cost (US) feed which where the west coast feed was delayed by 2 hours. This is because they advertised that the music was programmed to either stimulate or soothe office workers based on what time of day it was. Presumably they would up the tempo at "slow" times of the day such as early morning or before lunch, or near quitting time. But they dropped having the dual feeds about a year ago, probably because most people don't work exactly 8-5 and hardly any offices play elevator music anymore. This elevator music is a true anomaly, it is the most listened to broadcast in history (as many as 90 million hear it every day) it dates back to 1929, yet everyone says they hate it.

You could also receive the elevator music with an SCA receiver but there is hardly any reason to do this because finding one costs as much as the satellite reciever, the antenna for SCA is much larger than the 18-inch dish, and the audio quality on SCA is atrocious. Likewise there is a way to receive this and other mono Muzak feeds with a 3-foot (90cm) dish and a Microsat 150 receiver but also there is hardly any reason to do this anymore.

Receiving the Muzak feeds off the MPEG FTA receiver will get you about 50 channels (mostly the same ones as Dish Network). There is no legal problem receiving these (or any other unencrypted satellite signals) at home for personal listening but of course playing them in a public place without licensing them would be illegal. On this setup, channel CD24 would be the same stereo EZ channel as 973 on the Dish Network. However, it is cheaper just to get a Dish Network receiver and pay a few dollars a month to subscribe, unless you particularly want some of the feeds which cannot be picked up via Dish Network.

Personally, I have both a DSS (DirecTV) receiver and a DMT1000, I used a "DirecTV plus" dish which can pick up both the 101W and 119W satellites, I feed the DTV with one and the DMT1000 with the other. This gives me all the music stations (about 80 total). Not only is there EZ music but a lot of other all-instrumental channels such as lite jazz and classical, etc.

This is what got me interested in satellite dishes in the first place, being able to listen to the music I like. I am very glad there is an alternative to broadcast radio for music.

Satellite music is programmed for what the listeners want to hear not what Madison Avenue wants. This means playing *all* music formats, playing long playlists (over 2000) so there is song variety, and making it totally commercial free, and the subscription cost is next to nothing. It is playing what people actually want to hear, not some game where they try to attract the maximum number of 25-54 people to fill out the station's call letters in some Arbitron diary, and get some whiny, irritating, fast talking announcer who sounds like he is in pain to rattle of some message as fast as he can in the 3-5 seconds the listener takes to reach for radio button.

It means playing EZ music the way it was meant to be played, which means the percentage of vocals is zero which is always what it should have been. If someone want to listen to vocals, they are totally free to change the satellite dish to a soft rock or standards station, but the vocals don't need to mixed in with and ruin the EZ music in an ever-increasing percentage. The satellite service doesn't care if you change the channel because they get paid at the end of the month, they want to make you happy which means giving you the choice of what you want to listen to. The radio station does care if you change the station, so they try to please everyone which often means they end up pleasing no one.

Anyway, if you have any questions about this stuff I will be glad to help, email me or better yet post them to the group as I would prefer to keep this discussion public so more people can benefit from it.

I had made quite a few tapes on beta hi-fi of EZ broadcasts back around the late 80's. There were about 150 tapes which were 4 1/2 hours long. I sent the tapes to a guy in Tennessee a year ago. There was some talk of putting some of these on a streaming web site, I don't know what progress was made on this. The VCR I used to create the tapes had a failed motor and I recently gave it away to a friend who like to fix broken electronics. I was able to convert a handful of this to CD's before the VCR failed.

706. ARNewsline 1280 - Feb 22 2002

Amateur Radio Newsline Report 1280 – February 22, 2002

Amateur Radio Newsline report number 1280 with a release date of Friday, February 22nd, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ultra-wideband is here and the fight to keep high power unlicensed devices off of 70 centimeters escalates. These stories are first on Amateur Radio Newsline report number 1280 coming your way right now.

(Billboard Cart Here)

**

SPECTRUM ALLOCATIONS: FCC APPROVES ULTRAWIDEBAND

The nation's communications regulators have approved limited use of a new technology that is actually capable of seeing through walls, finding disaster victims and even preventing car crashes. Known as ultra-wideband, is a new method of wireless transmission is being promoted as a potential solution to the squeeze on the nation's airwaves created by the explosion of mobile phone, pager and other wireless device usage. We have more in this report:

--

Ultra-wideband devices will for now operate only in 960 MHz and in the 1.99 to 10.6 GHz bands. In theory, at least, you should never even know that they are there. This is because proponents of ultra-wideband claim that interference to other spectrum users is virtually non-existent -- based on the ultra short duration and pulsed nature of the transmissions. And the Federal Communications Commission agreed when it voted unanimously about a week ago to allow the technology to be used on a limited unlicensed basis.

The FCC proceeded cautiously out of uncertainty whether ultra-wideband could coexist with other strategic services. In other words, it wanted to be certain that it would not cause harmful interference to military communications, cellular telephones and the Global Positioning System. So it only provided ultra-wideband access to a small portion of R-F real estate. None-the-less, the real-life implications of the limits of the FCC decision are far reaching.

Up to now the military has been the only ultra-wideband user. This FCC action will allow for wireless communications and accurate readings of location and distance that have a wide range of civilian applications. For the general public this includes wireless, high-speed transmissions over short distances. Possibly as a way of sending video from a camcorder to a television set or data from a personal digital assistant to a laptop computer. The technology might also include sensor systems in cars to alert a driver to movement near the

vehicle. This could prevent collisions and promote smart air bag deployment.

Otherwise, the FCC has limited use of ultra-wideband technology to public safety. Only police and fire officials, scientific researchers, mining and construction companies will be permitted the use of so-called ground-penetrating radar devices. These would only be permitted to radiate straight down with little or no signal leakage in any other direction. The FCC notes that this system could help rescuers find victims in rubble following a disaster or locate ruptured underground pipelines without digging up entire neighborhoods.

The FCC severely limited distribution of ultra-wideband devices that can see through walls and detect motion within certain areas. Only law enforcement and firefighters will be permitted to have them. In other words, you won't soon be buying a home camcorder that can peer through your wall and into your next door neighbor's apartment. And you probably never will.

Right now the introduction of ultra-wideband will have very little impact on ham radio due to the limited spectrum being allocated to it. But it's use could be expanded in the future if it's proved not to interfere with existing military and public service communications.

For the Amateur Radio Newsline, I'm Robert Sudock, WB6FDF, in Los Angeles.

--

If ultra-wideband is successful it could eventually open up a whole new world of communications for ham radio. For starters, think in terms of so-called smart software defined radios. Radio’s that are so smart that you tell it who you want to talk to and it calls you when that person is ready to hold a QSO.

More on this emerging technology in future Amateur Radio Newsline reports. (FCC and other published reports)

**

SPECTRUM SHARING: SAVI TECHNOLOGY VS. HAM RADIO

The fight to keep radio ID tags off the 70 centimeter ham band is entering the home stretch. This is because the FCC has set March 1st as the deadline for reply comments on RM-10051.

RM-10051 is the Rule Making designation given to a request from SAVI Technologies, Inc. As previously reported, SAVI has petitioned the FCC for it to be allowed to develop and market a family of Part 15 devices designed to operate on the amateur 70 centimeter band. These Radio Frequency Identification Tag devices would operate at a power level far higher than similar devices now marketed and that’s where the real problem with the proposal lies.

Ham radio educator Gordon West WB6NOA, is an expert in weak signal operations. West says that it will mean problems for weak signal and satellite operators:

--
WB6NOA: “I think that the presence of any strong; either continuous or intermittent signal near the weak signal portions of the [70 centimeter] band is going to dramatically cause interference to those of us that monitor for either weak signal beacons -- such as those heard on the West coast that come in from Hawaii -- or for those who operate weak signal SSB and CW satellite.”
--

West says that even some of the micro power Part 15 devices already sharing the 70 CM band are causing major problems:
--

WB6NOA: “Presently on the weak signal 70 centimeter band we are having to put up with low power, intermittent [home] weather stations. You know, those weather stations that you see advertised as transmitting in their data on 432 and 433 MHz. Even these weather stations when they transmit will cause the AGC in my receiver to pump and it takes two to three seconds before the AGC returns [to normal] before I can begin listening again for weak incoming beacons.

Those [transmitters] are just a few hundred milliwatts at about 300 to 500 feet away. You can imagine when these more powerful transmitters come on the air in the 70 centimeter portion of our Amateur Radio band.”
--

But exotic modes won’t be the only ones affected. There is more than ample reason to believe that FM repeaters, remote base and A-T-V operations could suffer as well. And with the reply comment deadline only a few days away Dick Isley, W9GIG, the Secretary of the National Frequency Coordinators Council says that an e-mail and fax campaign to congress may be the only way to get RM-10051 killed.

In an e-mail to the Amateur Radio Newsline and other Amateur Radio publications, Isley says that it is imperative that hams send electronic messages their elected federal representatives in opposition to RM-10051. Isley believes that if 10,000 or more hams respond to this call, the SAVI Technology proposal could become a political hot potato. Hopefully one that is so hot that the Commission drops it completely. (ARNewsline(tm))

**

SPECTRUM SHARING: THE ARRL VS. THE FCC ON SAVI TECHNOLOGY

As hams get ready to write e-mails to congress, the ARRL is following a different diplomacy. It is challenging the FCC’s authority in this matter saying that the agency 'cannot legally proceed with the rules proposed for unlicensed Radio Frequency Identification tags at 433 MHz. Jim Haynie, W5JBP, is the President of the American Radio Relay League:

--
W5JBP: “You have to go back and look at the Communications Act of 1934, as amended. What Congress said was that in equipment that puts out a signal at a certain level must be licensed. The FCC has said that they are going to make this a Part 15 device does not require a license.

Our [ARRL] argument is that they cannot do this by law. Congress would have to pass a law to allow them to make this powerful radiator a part 15 device. In other words, change the whole parameter of what Part 15 [devices] are."
--

Haynie says that the League has said it will 'do whatever it takes to keep the FCC from putting these Radio Frequency Identification tags in the 70 centimeter band. You can hear more from President Haynie by tuning in right now to the RAIN Report. It in streaming audio at www.rainreport.com and on the phone at 847-827-7246. (ARNewsline(tm), RAIN, ARRL)

PUBLIC SERVICE: HAM RADIO AT THE WINTER OLYMPICS

Ham radio was a major player at the 2002 Winter Olympics. Not competing in the games, but working in support of overall security. Amateur Radio Newsline's Norm Seeley, KI7UP, has more.

--

According to an ARRL bulletin, Amateur Radio volunteers assisted with security and were ready to provide back-up communication for the Winter Olympic games. According to Utah ARRL Section Manager Mel Parkes, AC7CP, a special public safety organization called the Utah Olympic Public Safety Command was created by the various local and national public safety organizations that provide the security necessary for the international event.

According to Parkes, Section Emergency Coordinator John Mabey, W7CWK, and Brent Thomas, AC7H, from the State of Utah Comprehensive Management Office began working on this effort over a year ago. Mabey, along with Davis County Emergency Coordinator Hall Blankenship, and several other hams headed up the effort to provide emergency backup communication for the Olympic Security Command. At its height the winter games the ham radio group numbered close to 200. These radio amateurs provided back-up communications with the ability to reach numerous Olympic venues 24 hours a day.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

Parks had some nice words for the corps of Olympics communications volunteers. He said that the hard work and dedication by all these dedicated Amateur Radio Operators certainly contributed to a very successful and safe Winter Olympic Games. (ARRL)

**

ENFORCEMENT: DON’T PLAY MUSIC ON THE AIR

The FCC has told three hams that they have been caught allegedly playing music on the air. In letters to the trio, FCC Rules Enforcer Riley Hollingsworth says that such transmissions are contrary to the Commission's rules regarding the Amateur Radio Service:

--

Hollingsworth: “We warned Ronald Marshott, N2NGY of Berkely Heights New Jersey, Frank Grzych W1FU of Johnston Rhode Island, Martin J. Bellingeri, W2OT, of Saddle Brook New Jersey and Zack Elliott K2BLU Haworth New Jersey about playing music on the 75 meter band.”

--

According to Hollingsworth the transmissions took place on 3.832 MHz on the evening of November 27, 2001. (FCC, RAIN)

**

ENFORCEMENT: FCC VS. K1MAN – CONTINUED

The saga of the FCC versus K1MAN continues. This as the FCC issues yet another letter to the Belgrade Lakes Maine ham. Among other things, this time the FCC is warning not to put phone recorded calls on the air. Riley Hollingsworth, is Special Counsel for Amateur Radio Enforcement the regulatory agency:

--

Hollingsworth: “We sent a combination warning letter and explanatory letter to Glen Baxter, K1MAN, of Belgrade Lakes Maine concerning deliberate interference, lack of station control, sending felony complaint affidavits to those whom he perceives were interfering with him; tape recording telephone conversations without permission and broadcasting them.”

--

In its letter the agency warned that it is also important for K1MAN to understand that if these matters are not resolved, his ham licenses will not be routinely renewed the next time he applies. Instead Baxter’s licenses will be designated for hearing before an Administrative Law Judge. In such a proceeding, the FCC says that Baxter would have the burden of proof to show that his licenses should be renewed. (FCC, RAIN)

**

ENFORCEMENT: ILLEGAL CORDLESS PHONE SELLER FINED

Remember those high power cordless phones that we reported on a few months ago. The ones found operating in the 2 meter and 220 MHz Amateur bands? Well an alleged source of some of these illegal devices has been told it will have to pay a hefty fine for selling them here in the United States.

On October 23, 2001, the Commission issued a Notice of Apparent Liability for Forfeiture in the amount of $7,000 to Electronics Unlimited of Miami Florida. This, for allegedly marketing of a non-compliant high-power cordless telephone called the Alcon AT 526.

The company was afforded ample time to reply to the allegations. The FCC says that Electronics Unlimited never did file a response. Based on the information before it on February 15th the FCC affirmed the forfeiture order and gave Electronics Unlimited 30 days to pay. If the Electronics Unlimited fails to pay the forfeiture within the specified period of time the FCC says that the case may be referred to the Department of Justice for collection. (FCC)

**

FM AND REPEATERS: UNYREPCO NEW MID VALLEY NY REPEATER COORDINATOR

Repeater owners and operators of other F M and packet relay devices in Orange, Putnam, and Sullivan counties in York State have adopted the Upper New York Repeater Council, Inc. to provide frequency coordination services. This was an area originally represented by the long defunct North East Repeater Association that went belly-up in the early 1970’s. It then used the services of the Tri State Amateur Repeater Council until that organization disbanded a few years ago. Since then the region has been on its own.

This process of the Upper New York Repeater Council adopting the region was completed following a review of the existing systems by the established and recognized adjacent region frequency coordination councils. The change became effective February 13th.
More information is on the available on the web www.unyrepco.org (UNYREPCO)

EMERGING TECHNOLOGY: SURFING AT 39000 FEET

The Federal Communications Commission has granted Boeing a license to provide high-speed Internet service to airline passengers. Boeing said the FCC approval clears the way for its planned in-flight Internet service called Connexion. Connexion -- Spelled C-O-N-N-E-X-I-O-N -- will enable airlines and other commercial jet operators to offer real-time, high-speed Internet and intranet access, television and e-mail. This, while flying over United States territory and waters. (Boeing)

**

HAM RADIO IN SPACE: A TEACHERS GUIDE TO ARISS CONTACTS

Tony Hutchinson, VK5ZAI, says that he has updated his web site with a "Teachers Guide" for schools that have been selected to speak with the crew on the I-S-S. On his pages, Hutchinson provides what amounts to a final check list of things that must be done in the weeks prior to the contact taking place. Also posted is a list of the actual questions that students have asked in the past.

Tony Hutchinson is the Amateur Radio on the International Space Station Coordinator for all of Australia. To find his very interesting resource, take your web browser http://www.electric-web.org/teachers_guide.htm. (AMSAT-NA)

**

INTERNATIONAL - SOUTH AFRICA: SARL READIES FOR WRC 2003

The Independent Communications Authority of South Africa has invited the South Africa Radio League to participate in the preparatory work for the World Radio Conference in 2003. SARL President Hans Potgieter ZS6ALJ will be joining I-C-A-S-A sub-committee 4 which is tasked to develop South Africa's position on Maritime mobile, Amateur and Amateur Satellite, and broadcasting services in the Medium Frequency and High Frequency bands. A number of specific amateur related items are on the W-R-C agenda, including the realignment of amateur and broadcasting allocations around 7 MHz, and possible revisions to articles S-1, S-19 and S-25 of the international radio rules. (SARL, Q-News)

**

CONTESTS: VHF SPRING SPRINTS

Attention VHF and UHF contesters. K4AR has announced over the VHF Reflector that the VHF Spring Sprints will be held again in 2002. The Sprints are sponsored by the East Tennessee DX Association. The dates, official rules and lots of other information can be found at www.etdxa.org/vhf.htm (VHF Reflector)

**

DX

In DX, 9V1YC reports that the 2002 South Sandwich and South Georgia DXpedition is now officially over with all operators are back home safe and sound. 9V1YC says that the DX-pedition achieved all of its goals and made an astounding 70,428 QSO's using SSB, CW and RTTY. On-air time was 80 hours at VP8THU, and 7 days, 10 hours at VP8GEO. (RSGB)

And husband and wife K1CN and N1EBL are in the Bahamas and signing C6AMM and C6AWW from now until the 2nd of March. Operation is from Harbour Island, which counts as Islands on the Air number NA-001. (RSGB)

**

THAT FINAL ITEM: HAM RADIO SEARCH AND RESCUE

And finally this week, ham radio played a big role during a simulated emergency that takes place in a somewhat unusual setting and at an unusual time. From Birmingham, Alabama, Newsline's David Black, KB4KCH, reports:

--
Most emergency drills take place during the day, maybe in a parking lot or open field. But volunteers in Alabama put on their jackets and hiking gear and grabbed their flashlights for an exercise near Birmingham February 8th. The setting: Oak Mountain State Park, Alabama's largest park with 60-thousand acres and dozens of miles of trails. Members of the Vulcan Trail Association practice what they might have to do for real. James Pilman, KA4ZQA, is event coordinator:
--
PILMAN
BITE IN This is a search
OUT a couple more
--
Pilman assembles teams of experienced hikers teaming with amateur radio operators.
--
SOT1 IN Earl
OUT you're goin' out.
--
This search takes place at night. With temperatures in the 40s, three teams head out into the wilderness, maintaining a 2 meter contact with a Net Control at the park headquarters. Team members get a briefing on their missing person.
--
SOT2 IN There's a gentleman, he's about 28 years old
OUT at the marina
--
The sky is full of stars as teams walk up and down trails, looking for evidence of their target.
--
SOT4 IN We're starting out on the trail
OUT W4CUE
--
After about an hour and a half, one team finds its man and radios back in. The net closes, but only after each team arrives safely back at headquarters. Kenner Morrow is a naturalist with the Park:
--
BITE/KEENER IN The value is being able to coordinate
OUT there are any emergencies.
--
Ken Moore AB4WL, provided communications for one team. He calls it a rewarding experience.
--
BITE/MOORE IN Just bein' able to help
OUT participate and volunteer.
--
For Chuck Arthur, KF4SSX, tonight's exercise was his first search and rescue practice:
--
BITE/ARTHUR IN To me as an amateur
OUT into ham radio
--

In the past, these hikers and hams have helped search for missing adults and children during real emergencies, sometimes dealing with extreme cold and the hazards of rugged terrain at night. Tonight's drill went just about flawlessly. The people who took part in this event know they might get called again for real -- this night in the cold wilderness has helped them to be a little better prepared.

>From Oak Mountain State Park, Alabama, I’m David Black , KB4KCH, for The Amateur Radio Newsline.

--

David says that the trail group usually holds two lost hiker searches every year. (KB4KCH, ARNewsline(tm))

I think ICAO was heard before the Turks station went on, and now, only when it is not operating.

CIAO is very low power, and the Turks station is very high power. There is also a Costa Rican heard occasionally on 530. Like CIAO, it was widely heard before the Turks station went on.

Hello:

Still here with the "hated" postings. I am not a crook! (disclaimer)

We are still seeking investors to help us acquire WLYC AM radio in Williamsport, PA. 1050 KHz, 1 KW days, 500 watts PSA and 36 watts at night. Non-directional at all times.

10 acres of land included. Station is dark now. No studios come with deal.

Total consideration is $100,000 with $75,000 down. We are about to go to contract. Our attorney is in Washington DC and I will identify him to interested investors.

I am NOT a crook! In fact I held a secret level security clearance in 1972 while working for the Feds. (Dept. of defense, baby!)

(478)741-1710.

Active or inactive investors with at least $10,000 are welcome. You must be a US citizen with no felony conviction and NO illegal drug mayhem ever!

73,

Meyer Gottesman, W6GIV
Macon, GA

KIEV seems to have a CP based on an application filed on Aug 24 2001 for COL Culver City, CA, with day power of 50 kW, 4.3 kW nights, 3 tower day, 4 nights. It specifies a location 20 miles southeast of the location in the Nov 02 1999 application resulting in a CP for Burbank.

The CP expiration dates in the FCC CDBS seem unreliable.

How many watts does this station broadcast at? I realize the lower the AM frequency, the less power you need to do what higher power stations do higher on the AM band, but this thing was strong, like a local station!

Also, since the US does not use 530 AM for commercial broadcasting, does the FCC expect these stations to limit power or anything to keep from overpowering our radio airspace? Does this US have a broadcasting treaty with these smaller countries like we do with Canada and Mexico in regards to power and frequencies?

Thanks to everyone who replied to my original message.

Mike

This is for the WSSR-11. You could be right about subsidy, but
I'd -NEVER- take the UK price for anything as having any grounding
in reality. Seems the first suggested list for that model was US$97.

http://www.tele-satellite.com/TSI/02/03/worldspace/

Generally what you'll find about world pricing is that prices are
not set according to cost, but rather according to what they can
get for it. That's why the WSSR-11 is only permitted to be sold
in very specific areas. It's also why companies like www.mec.ca
are not allowed to ship most of their goods outside Canada, but
that's a different gripe altogether.... 8-Q

Are you sure about this? I grew up a mere 50 miles south of Houston,
and only knew one family that pronounced it without the /h-/. Possibly
that 50 miles was far enough away to separate the speech communities,
but I went to Houston regularly as a youngster and don't recall ever
hearing it pronounced that way. For that matter I spend 2 years at
UofH fairly recently, and don't recall hearing it pronounced that way
there either. (UofH is primarily a "commuter university", so one would
expect to hear a lot of native speech there.)

I have a number of friends in Houston now and none of them pronounce it
that way either, though none of them are natives of the city.

Any of you broadcasters needing to equalize a pair of telephone lines for 50 to 15000 Hz for use as studio to transmitter stereo pair, or for a church remote, or off studio location?

I am cleaning out my attic from 35 years of broadcasting. After several years of paying ma bell the big bucks, I replaced an old Western Electric set installed and owned by the telephone company with the newer, better RF shielded Telabs equipment. I reduced the monthly cost at the time from the equalized rate to that of a plain, pair. For a distance of 5 miles with the 1/4 mile rate that was used to calculate the charge, the units quickly paid for themselves.

It uses a pair of the 4008 program amps
http://www.alltel.net/~dm05935/TELABAMP.jpg

The program amp equalizers are contained inside a RF shielded Telabs 248RF Assembly.
http://www.alltel.net/~dm05935/TELABCOV.jpg

I have more pictures if you are interested. I seem to remember at the time this was purchased for the stereo FM Studio to Transmitter left and right audio pairs, the price was somewhere around $400 to $500.

I am cleaning house, so I am open to any good offers.

Ancient history.

Many years ago there was once a station on 1490 (lkw-D, 250w-N)with transmitter and shunt-fed self supporting antenna located in a public park in Burbank. With freq. shift to 1500 a 6-tower mountain-top array was built which evidently did not perform as advertised. Different formats were tried including country (KBBQ) but eventually went silent.
>>

Here's more ancient, and current history ...

What would become KWIZ/1480 in Santa Ana started out as a local on 1500, back when 1500 was a local channel.

NARBA changed 1500 to 1490 on a one-to-one basis (and clears on 1460 through 1490 became clears on 1500 through 1530, also on a one-to-one basis, and the band was extended to 1600).

So, now we have the Santa Ana station on 1490 as a local.

That station applied for 1480 1 kW DA-N. Granted.

Someone in Burbank applied for 1490, 250 W. Granted.

Santa Ana applied for 5 kW days, 1 kW nights, DA-2, protecting 1490 in Burbank and perhaps 1460 in Inglewood. Granted.

Burbank applied for 1500, 10 kW DA-2. Granted.

Burbank constructed a 6-tower night array (4-towers days) in the Verdugo Hills.

Night wouldn't proof, so 10 kW days, 1 kW nights, DA-2 was applied for. Granted.

FM was added.

Santa Ana applied for 5 kW DA-2. Granted.

AM went dark.

License sold.

Times passes.

New owner, Royce, applied for 50 kW days, 14 kW nights, DA-2, from Tujunga Wash, which is a protected area, and which if granted could never be constructed.

A decade or so passes.

Royce applied for yet another site, this time diplexing into what was formerly KMPC (now KDIS).

More time passes.

Royce hired Carl Smith Engineers (Cleveland) to design yet a third site, this time in Montebello, and to change the COL to Culver City as it would be impossible to serve any other unserved city from that site (the last time Culver City had a station licensed to it was back when what is now KTNQ/1020 was on 1000, and that was pre-WWII).

Smith Engineers use soil conductivity data from the Tujunga Wash CP, plus numerous other public records, and some new measurements of the Santa Monica area to prove that the Montebello site will work. Temporary test transmitters are required to do this.

Royce submits application for 50 kW days into three towers, protecting 1480 in Santa Ana and 1510 in Ontario, and 4.3 kW nights into four towers, protecting 1500 in San Jose and St. Paul. Six total towers, one of which is a shunt-fed folded monopole constructed on an existing cell tower. The site is in an oilfield.

It is no accident that the deepest night pattern null is directly over Burbank, the original COL.

The low frequencies get better groundwave, but much poorer night skywave
skip coverage. THe 530 station is aimed at the DOminican Republic mostly, as
well as NW Puerto Rico; 530 over salt water gives great gorundwave.

Along the East coast, 530 is an easy catch. There is paractically no
interference on the channel.

>
> Also, since the US does not use 530 AM for commercial broadcasting, does
the

Turks are not a NARBA signatory. They can put anything they want on the air.
The FCC has no jusrisdiction. If they want ot go to 1 million watts, they
can.

> Does this US have a broadcasting treaty
> with these smaller countries like we do with Canada and Mexico in regards
to
> power and frequencies?

NARBA applies to pre-Castro Cuba, Bahamas, Mexico, US, Canada and the
Domincan Republic. All other countries can and do do whatever they want.

I'm a Florida native and I've always pronounced it "floorida."
"Flahrduh" is what people from South Alabama say! :-)

As for local pronunciation, what people not from the area will do to a
name. Mobile and Biloxi are two great examples. It's "Mo-BEEL" and
"Bih-Lucks-ee," not "MO-buhl" and "Buy-Lock-See," as some people want
to say.

FWIW.

I remember listening to "1500 KBLA" when they were rock. (Liked them
better than KRLA or KHJ!) It looked as though there were NINE towers
in a box formation back then.

> As to working, who ever expected an AM site on a mountaintop to really talk?

Ask WENE-1430, in Endicott, NY. They have five towers in an in-line
configuration (DA-N) and are regularly heard in Boston and points NE
at night. The ground conductivity is must better in that part of the
country than in SoCal, I would assume.

I thought it was KROQ (AM) when it was rock. You are speaking of the period
in about 73-75, right? Afet about 1975, it was Radio America and all
Spanish.

I don't believe they ever had 9 towers. There would be no place on the
mountaintop to put them. Interestingly, the transmitter "building" is
underground, in an effort to keep it from interferring with the pattern, I
was told.

Actually, New England is probably in general and on average possessed of some of the worst ground conductivity in the US.

If WENE is being heard in Boston and beyond, that is skywave reception. One thing hilltop and mountaintop sites have is an unobstructed skywave path at any angle of radiation. WENE, like 1500-Burbank, is on a high frequency, very prone to short-range skip even under bad conditions.

Ground conductivity has nothing to do with night propagation, since it
is by the ionosphere. The conductivity in parts of the Northeast is
really bad: 0.5 to as much as 4 some places vs. 30 in parts of the
plains states. Coastal southern California varies between 8 and 15
according to FCC Figure R4.

Yup, I could see the towers from my 11th floor office on top of L.A.'s Bunker Hill, too.

The towers still stand, but one is being used for FM.

I doubt if the array could be resurrected.

Did you notice that Royce's Montebello application is for a hilltop site?

>>
I remember listening to "1500 KBLA" when they were rock. (Liked them better than KRLA or KHJ!) It looked as though there were NINE towers in a box formation back then.
>>

Only six.

I you looked from one angle it appeared to be four rows, yet if you looked from another angle it appeared to be two columns.

Still only six, though, in a 3 by 2 orientation.

>>
> As to working, who ever expected an AM site on a mountaintop to really talk?

Ask WENE-1430, in Endicott, NY. They have five towers in an in-line configuration (DA-N) and are regularly heard in Boston and points NE at night. The ground conductivity is must better in that part of the country than in SoCal, I would assume.
>>

The problem with KBLA/KROQ was the Tx was sited in what was purportedly good soil, but it was on top of a mountain which was likely 1,000 feet higher than the immediately surrounding terrain (and the COL).

So, the good ground conductivity was essentially rendeded moot by the discontinuity associated with the mountain top site.

A perhaps similar effect can be observed between a station on one side of the San Andreas Fault and a receiver on the other side of the fault.

I can think of three stations ... two operational and one planned ... which have had to contend with this specific issue.

I thought it was KROQ (AM) when it was rock. You are speaking of the period
in about 73-75, right? Afet about 1975, it was Radio America and all
Spanish.

I don't believe they ever had 9 towers. There would be no place on the
mountaintop to put them. Interestingly, the transmitter "building" is
underground, in an effort to keep it from interferring with the pattern, I
was told.

Actually, New England is probably in general and on average possessed of some of the worst ground conductivity in the US.

If WENE is being heard in Boston and beyond, that is skywave reception. One thing hilltop and mountaintop sites have is an unobstructed skywave path at any angle of radiation. WENE, like 1500-Burbank, is on a high frequency, very prone to short-range skip even under bad conditions.

I suppose I'd better complete this last statement: WENE's five towers
are atop Pierce Hill, behind (South of) Vestal, NY, which is across
the Susquehana River from Endicott. I've never seen so many hill-top
swamps in my life as in NY State, although I don't recall that their
site is in a swamp.

My dear, we have no reason to even _mention_ the city.

(I do, though, have to go there next month for the AOS. It's the
lowest-registered meeting in the organization's [modern?] history --
only 100 scheduled papers.)

BTW naming rights for the former Enron Stadium are up for grabs. The
Astros are asking only $2 mil.

If Houston comes from French (it would be more likely to come from
Spanish but a word spelled <houston> would seem a bit odd in Spanish),
then the <ou> for the sound /u/ is normal orthography in French, i.e.
<mousse> for /mus/, <louvre> for /luvr/, so Houston with the vowel /u/
would be written 'correctly' to French eyes with <ou>.

When they were on 1490 - and at least for a while after moving to 1500
- they were KBLA. This would have been 1963 or 64. They had "Emporer"
Hudson and a few other "big" name DJs at the time. They were KROQ
later; maybe after trying country as KBBQ, but don't quote me on that.
I lost track of them when I left The Valley.

Maybe I was seeing it sideways (3 x 2)? Like I said, I never went up
to look more closely. I do know that at night they were allegedly
directional right across downtown LA and out to sea (to protect both
KSTP, St Paul, and KXRX in San Jose). That really didn't help their
ratings since most people didn't live in downtown LA at night.

540 Hesperia. The new 830 KPLS site?

I'm curious!

Where is the CP for KIRN-670 located vs. the fault?

And can you explain what the fault does to signals? I am totally ignorant on
this one.

Why would you think Sam Houston was Spanish?

And the standard pronunciation is "hyoo-stun."

Over here at sci.lang (was it on this word?) we were just talking about
how the "hy" sound in English can turn into either "y" (without the "h")
or the German "ich-Laut" sound (which isn't supposed to exist in
English, but many people use it at the beginning of words like "human").

But, in <Houston>. <ou> *doesn't* represent the vowel /u/, it represents
the sequence /ju/. This sequence is often derived from French /y(:)/
which is written <u>. Why /(h)ju:st@n/ should be written <Houston> and
not <Huston> (like the homophonic name of the director) is something of a
mystery.

It is not, however, unique in (American) English. At the very least,
there is /kju:pAn/ for <coupon> (though this is a variant--some would say
"mis-"--pronunciation). I'm sure a.u.ers will be able to think of more
examples, so I'm crossposting their way.

Sez who? It's not phonemic in English, but I've been using words like
<human> and <Hugh> to teach English-speakers how to pronounce the Ich-Laut
for years, and I can't be the only one who does this.

However, you're overlooking a third possibility: [j<vls>]. I often have
to instruct learners to add a little audible friction to /hj/ in order to
achieve the Ich-Laut.

>but many people use it at the beginning of words like "human").

Edward Maclysaght's "The Surnames of Ireland" lists HOUSTON as "a
well-known English name very numerous in Ulster."

As to "most of the world": I live in New York City and have never heard anyone accentuate the H in Houston. We say "YOU-stun" just as the natives do.

We do, however, differ when it comes to pronouncing Houston Street on the Lower East Side. The street is pronounced "HOW-stun" and was named after William Houstoun, a Georgia delegate to the Continental Congress. Houstoun was a member of an ancient and aristocratic Scottish family, according to "The Street Book" by Henry Moscow. There is no explanation as to why "HOW-stun" unless it is how the Georgia Houstoun's pronounced it. Although it is spelled HOUSTON now, it appears as HOUSTOUN in Common Council minutes for 1808 and on an official map drawn in 1811.

Considering the discussion above it may be possible that "HOW-stun" is the original English or Scottish pronunciation!

Peter, have you ever heard of a similar situation with a river in
between a transmitter and a receiver?

I engineered for a directional AM in the Omaha market a few years ago.
The transmitter site was on the Iowa side of the Missouri River. The
signal strength on the Omaha side was significantly less than what had
been predicted with M-3 values. We did a daytime power upgrade from
5kW to 25kW, which helped some.

I could take a field strength reading on the Iowa side of the river,
then travel to a point a couple miles further away on the Nebraska
side, and the reading would drop by as much as 100 millivolts per
meter.

There were a couple of other AMs on the Iowa side of the river that
had similar signal problems in Omaha. One explanation I have heard is
that the river tends to leach the ferrous minerals out of the soil and
wash them downstream, so the riverbed becomes a zone of very low
conductivity. I guess somebody with a transmitter site further down
river might benefit.

>>
540 Hesperia. The new 830 KPLS site?

I'm curious!

Where is the CP for KIRN-670 located vs. the fault?
>>

Definitely 540. COL is Costa Mesa, but the Tx site is near Hesperia.

I haven't looked into the 830 site. Incidentally, 830 was supposed to go to replace Avalon's 740, thereby allowing San Diego's 760 to increase power from 5 kW ND days/50 kW DA nights to 50 kW DA-N. I guess someone's money talks louder than others.

The hypothetical 670 site would be an unfortunate duplicate of the 540 site, just located in Palmdale instead of Hesperia. The same technical issues would prevail, however.

>>
And can you explain what the fault does to signals? I am totally ignorant on this one.
>>

There occurs a discontinuity in the ground.

When you drive from the San Francisco Bay Area across the Santa Cruz Mountains towards the Monterey Bay Area, you encounter this discontinuity at Summit, on state highway 17. This is the San Andreas Fault. The discontinuity runs the length of the continent, of course.

The groundwave almost immediately drops.

When you are about 20 miles away from the discontinuity, towards the Pacific Ocean, you can get some very weird effects, such as the groundwave being lower than the skywave. This results in considerable local fading. Obviously only dusk to dawn.

This effect is most apparent on 740 and 810, both of which are sending nearly 200 kW towards the south, and less on 680, which is sending only 50 kW in all directions.

So, under these conditions, the received 200 kW skywave can be higher than the greatly attenuated 200 kW groundwave received at the same point.

A solution would be to use tall sticks to reduce high-angle radiation. But it would take at least a 200 degree stick to do this, and 740 is limited to 500 feet (135 degrees) and 810 elected to install 90 degree sticks when it moved to

810 from its former frequency (960 ?) and it is stuck with that efficiency.

"David Eduardo" <A HREF="mailto:amdavid@pacbell.net">amdavid@pacbell.net</A>
asked ...

>>
Where is the CP for KIRN-670 located vs. the fault?
>>

KIRN's application and amended application site is located 40 miles due north of Los Angeles and 6 miles due west of Lancaster.

This site is in the Mojave Desert, and is therefore on the "wrong side" of the San Andreas Fault. On the wrong side of the mountains, too.

I would expect that this facility, if constructed, would have similar problems as the now dark Costa Mesa 540 facility (with transmitter site in Hesperia, nearly 90 miles from the COL).

Remember, Lotus paid beaucoup bux to KBOI to directionalize away from KIRN so that KIRN would have a substantial interference-free contour from any site in southern California.

>From the array parameters (the application and the amended application themselves do not contain any exhibits) one can deduce that the target city is Los Angeles itself as the pattern maximum will be at 190.0 degrees and Los Angeles is on a bearing of 189.9 degrees.

However, in the way of reaching Los Angeles is the San Gabriel Mountains (part of the Coast Range) and the dreaded San Andreas Fault.

The applicant has already been warned that this is a poor site, and I'm certain the applicant is aware of the technical infeasibility of the 540 site. Nevertheless, the application was tendered.

This application is for 35 kW days and nights.

The applicant is proposing 88 degree towers, which are just about the minimum for Class B.

The application and amended application efficiency confirms this as the proposed efficiency is 307.13 mV/m/kW, or about 9 percent greater than the minimum acceptable efficiency which is 281.63 mV/m/kW.

540's towers and phasor are reportedly available for a quick sale.

If 540's six nearly 99 degree towers were to be used on 670, they would be about 120 degrees tall, which would be a substantial improvement over the application's and amended application's 88 degree towers.

540's phasor was designed for 25 kW, and I'd bet it would be OK for 35 kW.

Purchase of 540's phasor and other equipment was already considered and rejected by another applicant which was for fewer towers but which was for 50 kW days and nights, hence my guess that this equipment could be useful at 35 kW.

Peter.

762. XLCN Baja San Diego

Newsgroup: rec.radio.broadcasting

Does anybody know how XLCN supports itself? I understand they run no commercials, but identify themselves four times an hour, once in English, once in Spanish, once in German and once in French. Curious at best. I understand the Spanish & English ID's. The German isn't too odd since there are quite a few Germans in the San Diego area, but French seems sort of out of place.

Any stories will be appreciated, amusing orotherwise.

Chuck

There are only about 3 C3s below 92.1 MHz within 25 miles of Orlando. One of them is, in fact, a C2 which is downgrading. One is owned by "Florida Public Radio" and the downgrading one by the "Univ of Central Florida".

Has the Univ come on hard times as the Univ of DC did, which had to sell WUDC (now WCSP)?

Did WWKQ's application to upgrade from A to C3 come through? They are about 25 miles from Orlando, and the proposed C3 antenna is very directional, having an average ERP of only 2.5 kW, 298 watts minimum, 9 kW max (limited by HAAT of 522 ft). The proposed C3 is vertical-only, a hint of real short-spacing problems. The FCC operates on the fiction that a vertical-only station will interfere less than a horizontal-only station. The opposite is probably true on car radios.

Beyond 25 miles, I wouldn't credit a C3 as being in the Orlando Market.

What is XLCN?

If it is a Mexican station, it has to start with either XH- or XE-.

What is its frequency?

Are you talking about XHLNC, the classical station? That is non-commercial, owned by Victor Diaz Room and run as a hobby or crusade. Victor is a long time supporter of Classical, and has a classical website station, too. The web effort makes the station "international"" and thus the snobbish multilingual IDs.

According to Black, the name comes from the old barony of the name in Lanarkshire. Finlay of Huwitston, witness to a late 13th c. charter, is probably Fynlawe de Hustone 1296 who sealed as <S' Finlay de Hovstvn>. Black further cites <John of Hoston> 1341, <Johannes de Howistone> 1406, <Patrick de Huyston> 1415, <Alan Hawystoune> 1435, <Alexander Howstoun> 1460, <James Howston> 1525, <Mungow Hawstoun> 1527, and <Thomas Hawstoune> 1550, not to mention <Hawistoun(e)> 1505, <Hostan> 1517, <Howystoun> 1425, and assorted others. If the first citation can be trusted, the first element of the place-name will have been 'Hugh's' or the diminutive 'Hughet's'. Judging by early spellings, the name had a variety of pronunciations even at an early date. These seem to have included at least versions with vowels something like [IU], [O:U], and [u]. Some of the later Scottish forms suggest [AU], and the earliest ones are probably consistent with [u].

I understand that it ultimately derives from "Hugh's Town", from
somewhere in Scotland.

Whatever the ultimate source, it migrated to Texas in the form of an
Anglo surname.

>>

In the Puget Sound area, there is a significant discontinuity between the several stations (570, 710, 770, 1000 and 1090) sited on Vashon Island and Seattle.

The depth of this discontinuity is perhaps 900 feet deep. Puget Sound itself.

However, the Sound is full of salt water.

1000 has its null which protects Chicago's 1000 directly over Seattle, yet 1000 can put a city grade signal over Seattle.

So, there is a counter example ... if the water is high conductivity, the geological discontinuity can be completely mitigated.

Be that as it may, it a yankee pronunciation limited to NYC in this hemisphere. The city was named for Sam Houston and his descendants, some of which I've met are around to testify to the pronunciation of their family name: `hews ton'. Period over and out. Anahuac, a neighboring small town in Chambers County is more debatable. On the coastal plain where indian, american, and mexican cultures mingled, there are a number of odd names regularly mispronounced by new comers.

Names were spoken more often than written in the foggy past and even the simplest name was apt to have many variations, often by same person on different days. This also applies to their children who immigrated to America, quite a few of which couldn't write. What their `name' was may have varied with whether they had a cold that day or were speaking to a slightly deaf person. Scotland has been almost as big a melting pot of tribes as America for much longer.

>Bobby Bryant
>Austin, Texas

Bobby, lad, it `migrated' to Texas with Sam Houston, and his family is still around. If you want to know how they pronounce their name they will be happy to oblige you. What you will hear, if you are not deaf, is hews-t'n or hews-ton if the question is put formally. It is in wide spread usage in streets and parks - and if you inquire about `house - ton', no one will know what you are asking.

Is this a pronunciation topic. `human' and `Hugh' could also be used
to teach the Mexican `j' Mejico = Me-he-co, thus the english Mexico.
Then one gets into the Mexican `x' and the plot thickens. The Aztecs
had an odd language to an English speaker.

Yeah. KPFK did not understand that grandfathered powers are not protected
beyond the regular contour of a standard class B.

I believe you are speaking of CIAO in Brampton, Ontario...a suburb of
Toronto. It is a multi-cultural format, featuring programs in dozens of
languages.

A website is currently under construction at:
http://www.radio530.com/

Paul,

The issue is more universal than just radio, about how there's always something new for people to complain about. Your observations are correct, I would add this however...

Radio poses as entertainment. As entertainment, it reqiures than that is entertains. And to do this it needs people-always has, always will.

However, the new culture of radio is that we can do it without people, or at least very many of them. I used to complain about this from the industry side, but since I don't work in radio anymore, I don't care.

As a listener now however, I can DEFINITELY complain. Radio is Booooooooooooring!

And it has 2 possibilities;

It is boring because radio cuts costs as people listen less...
Or
Radio cut costs (people), and people listen less...

Peter

For forenames this isn't really true, unless you're counting pet forms
(e.g., <Huet> for <Hue>, <Ebbot> for <Isabel>), irrelevant variation
caused by stopped-up noses and the like, and unnoticeable variations
caused by human inability to hit an articulartory target exactly the
same way twice running. It's true that many forenames existed in more
than one pronunciation, but there's no reason to suppose that one
person normally applied more than one of them to himself. In the days
when bynames were literally descriptive rather than inherited, they
were of course subject to variation, but again there's no particular
reason to suppose that a single individual would have pronounced a
single byname in significantly different ways.

> This also applies to their children who

We're talking about a time long preceding immigration to America,
however.

>were speaking to a slightly deaf person. Scotland has been almost as
>big a melting pot of tribes as America for much longer.

It is not at all clear that this has much to do with 13th century
pronunciation of the place-name that became the surname <Houston>,
however.

On the contrary, anyone in the world saying the name of the street
that's abbreviated in "SoHo" (South of Houston) better pronounce it
"house-ton," or they won't be talking about the street in Manhattan.

I believe it was Richard Nixon who also said: "I am not a crook." and look how that turned out...hmmm makes you wonder. Now you are using sexual slurs to blur the issue....Would you use the "N" word to blur the real issue too... You have a station for sale in florida for 4 million, yet you are looking for investors for your dark AM. or do you think you can bash gay people and nobody will respond...I don't work for clear channel and I don't like them either, but as a gay man I hate gay bashers even more... I think it's time the moderator stopped your mean spirited, questionable posts...It's guys like your that give Radio a bad name.

Proud to be Queer and Proud NOT to work for Clear Channel!

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

WCBN FUN-Razor starts Feb 12 - tune in now and tune in then

2002 is the 30th birthday year of WCBN-FM
AND
we celebrate 55 years of student broadcasting at UM

789. WTB - FM Stereo Generator, low distortion

Newsgroup: rec.radio.broadcasting
Date: 2002-03-05 00:45:04 UTC
From: Bob Fitzgerald <bfitzge2@nycap.rr.com>
Message-ID: <u8858g83bkgg99@corp.supernews.com>
Source record: 11801

I'm looking for a low distortion (less than .1% at 100% modulation) FM generator, like the Sound Technology ST-1000A or ST-1020A. Please reply to

newaag"at"yahoo.com

Also interested in opinions on lesser known low distortion FM generators that you have personally used. This is not used for broadcast, but for adjusting older FM stereo tuners. But if anyone knows of a kit or parts that will generate very low distortion FM, I'd love to hear about it.
Thanks,
Bob Fitzgerald

790. FA Broadcast Radio Vintage Pepper Sound Library

Newsgroup: rec.radio.broadcasting
Date: 2002-03-05 00:45:05 UTC

I have listed a Pepper Creative Library from the late 50's and early 60's. Stations traded ads and paid cash for the service. Most of contracts required the stations return the library at the end of the period. What makes this rare, the sale was made with the library service remaining the property of the station and making this set now available years later.

A certain individual had already made it into my killfile, but today I crashed my HD (just minor) and put my new 100GB file server online.

I loaded a new copy of Agent newsreader and I find that a good portion of the traffic is related to radio stations for sale and the free reign given to posting of same.

Majority still rules and I'm sure this is a bump in the road, but Meyer? It seems to me that you can just confine your listings to the facts and nothing else. Try to act like a newsman, not an engineer :-).

>
>

Interesting question!. Well what your thinking of are words with the "er" sound at the end and where the "o" is important (inversely in Houston the "u" is important of the two "ou" letters).

Your refereing to flavour vs flavor, colour vs color, honour vs honor, (and maybe 10? other words?) I personally allways spelled honour this way (i.e. the "English" way --- no I'm not English).

WRT these words I suspect that no English spell them the American way - but may a few American's spell them the English way? Maye some words are more "fluid" in this matter than others??? The Engish way was the first way.......so Americans maved away from the "ou" spelling sometime (17, 18, 19th century???????? I know not).

anyway your linking of the wor Houston really doesn't apply to the issue of "color vs colour" anyway.

Afterall "Huston" would be "huss- ton" and for Houston to sound the same and drop the "o" would be to spell it like: "Huseton"

Cool question though (tho???? or..........thoe???).

In alt.usage.english Brian Wickham <bwickham@nyc.rr.com> writes:

BW> As to "most of the world": I live in New York City and have never
BW> heard anyone accentuate the H in Houston. We say "YOU-stun" just as
BW> the natives do.

I'm a native Houstonion (well, a lifelong inhabitant of a suburb of Houston), and I've never heard a native Houstonion pronounce "Houston" without the "H" sound. I'm not sure where you and the other respondents to this thread got the idea that natives pronounce it "YOU-stun".

By the way, Houston is named for Republic of Texas hero Sam Houston, who lead the Texans in the Battle of San Jacinto, which achieved Texas' independence from Mexico. The battle, in which the Texans shouted the battlecries "Remember the Alamo" and "Remember Goliad", caught the Mexican army by surprise (during a siesta) and was over in 18 minutes.

Thanks,
Jon J.

BTW-- World Radio TV Handbook lists the Turks Islands station as 535 kHz-- not 530. Ity's licensed for 100,000 watts.

A previous post said it may be operating at 50,000 watts.

Much like XERF in Mexico which is licensed for 250,000 watts but is operating at 15,000 watts right now.

Yes, and perhaps you should look up 'surname' in the dictionary.

My point, which you may have missed if you did your snipping before you considered your reply, is that the name emphatically does *not* come from French.

> If you want to know how they pronounce their name they

If you read the thread you'll notice that I'm quite aware of how people in Houston pronounce it.

Maybe. More likely it's Voz Cristiana from Turks & Cacios Islands.
CIAO only runs 250 watts. The other one runs at least 50kW. Much more
likely.

Ok I was born in Texas City and lived in Houston as a small kid (my parents
were not born and raised in Houston - but Oklahoma). Later I lived in
Austin.

I have and allways will pronounce Houston with the "h".

Now as to "often"..... I claim "offen" is RIGHT and "often" is
NOT!! - i'm sick of the "literate" trying to sound educated by pronouncing
the "t" when glisten, christen are NEVER pronounced with the "t" and yet
spelled the same way!!! as often.....hhmmmmmmmmmm you think "offen"
might be right?? YES!

Hey Rich!!

Whats the deal??......I pronounce your native state and those two towns correctly all my life and never been to any of them!!! I'm an "okie" (this is ok word to use now since the derogatory intent is 80-yrs old now ;-)).

Wierd.........I've always had a "midwestern" accent yet never even gave it thought! I rarely miss-pronounce stuff either I just sort of take the national average and use it.

Actually, the station in question is Radio Vision Cristiana, affiliated
withthe 1330 AM in New York which it retransmits. 100kw transmitter, running
at more like 50 or 60 kw, from the Turks and Caicos Islands.

>From Memories 96.7's web page:

www.kmeo.com

Memories 96.7 is mourning the death of our morning drive host John LaBella. John was killed in a tragic traffic accident Monday morning, March 4 just after he finished his air shift on Memories. The accident occurred as a tractor-trailer carrying a forklift struck the top of the Fort Worth Avenue Bridge on Interstate 30 in Dallas. Police say the load was higher than the bridge and as the truck tried to drive under the bridge, the forklift was catapulted into the east bound lane of I-30 landing on LaBella's car, killing him instantly.

John LaBella has been a morning drive radio fixture in Dallas/Fort Worth for over 20 years with KZEW, KZPS, KRRW (Arrow 97.9), KBFB and Memories 96.7. He was morning drive host with Memories 96.7 since the station went on the air in November 1998.

John is survived by his wife Beth and daughter Elise.

Dear Gregg:

I must aplogize. I was "aiming" at the greed of Clear Channel. Not you. I could not care less what your lifestyle is. I pride myself on the fact that I am not any kind of bigot. I HAVE a problem with the greed of Clear Channel and their ilk. Okay?

When I said "Qweer Channel" I was poing good-natured fun at them. Nothing sexual in any way was intended. Queer simply ryhmes with Clear and I used it in that context. Obviously an inanimate object (i.e. radio station) has no sexual preferences.

So with all due respect, Gregg. Lighten up! The slur was against a greedy corporation not you nor any other gays!

Cordially,

Meyer Gottesman

RVC moved to 530 form 535 about 2 years or so ago. WRTVH listed me as owner of a b;unch of stations in Ecuador for 9 years after I had been kicked out of the place and had the stations nationalized! It's information is, shall we say, subject to question.

I did a count in the 1999 WRTVH and found 80% of the Puerto Rico listings had at least one error in them that did not represent a change in the prior year.

10 kW at last report, unless they replaced that old 50 kW Ampliphase with a
modern "dial a power" unit.

The 250 kW RCA didn't work very long if at all.

The reason given for operation at 10 kW is shortage of power in the area, plus
the small target market.

Promomedios is the "parent" group that split up when V&#65533;ctor D&#65533;az' father
died. V&#65533;ctor took the Tijuana station in the division of the estate.

815. SCA on cable-TV

Newsgroup: rec.radio.broadcasting
Date: 2002-03-05 14:04:58 UTC
From: John King <trexagirivopoulos@hotmail.edu>
Message-ID: <u89k4ackhdqgc4@corp.supernews.com>
Source record: 11827
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting

I would like to start an ethnic radio station and broadcast on cable-FM. The problem here in Canada is that our regulator won't allow us for an on-air SCA, FM nor AM license AND our cable company doesn't have any cable-FM frequency available. Getting a regulatr on-air AM, SW or FM frequency is out of the question.

After a couple of hours of thinking, I came up with something that doesn't exist BUT it might be technically possible. Get an SCA on an existing cable-FM frequency. For example, our local AM station 990kHz appears on the cable on 99.9 MHz caFM. 99.9's caFM both SCA (63kHz and 92kHz) are available!

For tuning in, the listener will have to plug in an SCA receiver to the cable and listen to whatever program is on 99.9 MHz on the 63kHz sub-carrier.

Problem is that nobody has ever done this and how it can be done? is my question. What are the possible costs that can be involved at the transmitting cable head-end?

Is it a matter of hooking up a Sidekick SCA generator to the cable FM modulator. Can this be done?

When I called our cable company programming and technical dept, they told me to submit a brief, they are open to the idea by condition that I will have to pay everything involved. This means that chances are, in addition for me to buy an SCA generator, I will also have to buy a cable-FM modulator that can be interfaced to the Sidekick SCA generator. Are there any such cable FM modulators available? If yes, which ones, and how much?

As a final note, SCA exists on cable! If an on-air arabic station is broadcasting say on 100.7 MHz 63kHz sub-carrier and the main carier is transcoded to cable on 90.3 MHz, if somebody will hook up an SCA receiver to the cable tuned in on 90.3 63kHz SCA, it will listen to arabic music! I tried this, so I know. The regulator says that FM stations have to be trancoded AS-IS on cable, without modification. So they basically take the RF signal as-is and they stp-up or stp-down the frequency without modifying the information. AM stations however feed the cable head-end with Audio Lines, and the regulator doesn't care much for their sub-carriers on cable. When I called the CRTC (our regulator here) I asked about if there's anything regulating cable-SCA. After a bit of search, they told me that there's nothing that prohibits it! This was their answer !!!....

Thanks for any feedback on this Newsgroup. I really appreciate since I'm trying to collect as much as info as possible to submit my brief for this

caFM SCA project. - A first in its kind.

I know this is a little far out, but it's a question I need answered:

Would there be any copyright violation involved in using Macintosh or other voice-emulation software to "announce" things on the radio? If you typed in a news broadcast (for instance) and had your iMac "read" it, then aired that sound clip, would it be illegal? The text sources with you; the software obviously does not.

The 250K ampliphase still exists but doesn't run after a fire in the
finals section a few years ago. I believe their current transmitter is
a CCA, which is a lot more efficient.

David Eduardo <radiodavid@yahoo.com> had written:

| RVC moved to 530 form 535 about 2 years or so ago. WRTVH listed me as owner
| of a b;unch of stations in Ecuador for 9 years after I had been kicked out
| of the place and had the stations nationalized! It's information is, shall
| we say, subject to question.

It's always been my observation that WRTH was much more oriented
toward European and African stations, given its origins in Denmark
and location in the Netherlands in recent years. This may have
given it an orientation toward broadcasting systems with fewer
stations and numbers of owners. (Really, until recent years, only
Spain had anything like the many owners, many stations paradigm
that is predominant in the Western Hemisphere.) I also occasionally
caught a whiff of Old World Snootiness in WRTH's editorial
selections and content, though perhaps that was just my own
perception otherwise ungrounded in any reality.

Even with a liberalization in station ownership in recent years,
Western Hemisphere broadcasting systems still are somewhat more
choatic and cover larger areas than those in Europe. And, in my
experience, people in Europe seem to have higher expectations of
their radio stations - and expect them to be organized in a more
systemic fashion - than do Americans (North or South).

Employed as an adjective, "queer" is a sexual slur only in its fifth or sixth meaning, both in Merriam-Webster and in American Heritage dictionaries. Prime meanings in M-W: worthless, counterfeit, questionable, suspicious, eccentric, unconventional, touched, obsessed. Same as bashers often write about CCU. Let's not queer our language where a word has a prior history of honorable use.

The information you typed in is what determines the copyright. If you
typed in an article from a local newspaper you'd be violating their
copyright. How you deliver the information is irrelevant.

Good point. I bought my first WRH in about 1961 and found the Latin American
listings so poor that in '63 I published my own directory of Latin American
stations. The problem with WRH was that they did not know how to get the
lists form the national licensing boards; their model was the SW broadcaster
anxious to get theword out and the state-run entity using tax dollars to do
most anything anyone wanted.

I'm about to take part in an amateur theatrical production in which I play the role of a radio newscaster. I'm supposed to enter carrying a length of teletype paper containing newswire stories I'm supposed to be reading.

We already have some perforated tractor-feed fanfolded white 8-1/2x11 continuous-form. Which is probably close enough.

But for authenticity, what I'd really LIKE is several approx-6-foot-long rolled lengths of CANARY (not white), ROLLED (not fanfolded), PLAIN-EDGED (friction-feed, not edge-perfed-for-tractor-feed) paper, WITH printing on it--printing that might pass for newswire stuff at a distance (i.e. not assemby code listings).

And, oh yeah, not so VERY old as to be brown and embrittled.

Anyone got anything suitable? I'd be glad to pay, I dunno, zero for the paper itself plus ten bucks for the shipping and handling...

You should consult with the production's lighting director to
see what color paper you really want.

Last time I looked it was still available from some office supply stores
for around $12 a roll. Or it's often available on ebay.com for less. Or
try Western Numerical Control (web search).

Obvously the audience won't be able to see what is printed on the paper
so you can use a typewriter or computer printer to print text on it.

The only Teletype paper I ever had was white.

Take some of that fan-fold paper, and tear off the form-feed strips.
Use enough to make the length you want/need. Then glue the sheets
together, using a bit of overlap.

Once the piece has dried, you might want to run it over some sort of
rod a number of times, for that "been on a roll" curly look.

Since you want something on it, run it through a form feed printer
before the operation. Use all-caps, since that was the norm for
a long time; the common (at least until towards the end of the
period when such machines were used) Teletype machines didn't even have
lowercase.

Realistically, once you get a long enough piece of paper, with some
sort of typing on it and that characteristic curl, surely the audience
won't be close enough to see the wizardry you've done to make up the

prop.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

2002 is the 30th birthday year of WCBN-FM
AND
we celebrate 55 years of student broadcasting at UM

Source record: 11606
Cross-posted to: alt.music.dance,alt.radio.broadcasting,rec.radio.broadcasting

There was a dance song that came out probably in the mid-late 80's....it had a dance beat (whomp-whomp-whomp)...but interspersed thru the song were what sounded like (Gregorian?) chants. i.e..old church sounding chants.

They were blended in the song (with the right chords/harmonies and timing)...so they actually almost sounded like they belonged there.

Anyone got any idea what this title is?

[Moderator's Note: The group's name is Enigma. They had a couple singles, at least. The one I remember is "Mea Culpa". The other big hit they had was "Return to Innocense"[sp?] - but that sounded more like a Native American song than a Gregorian chant... but anyhow, look up Enigma on the web...]

Thanks!

I taught school 1/2 mile away. I thought I counted 9 sticks. It's all
religious programming, and its strength is noticeable in cheap AM radios.

Source record: 11609

Charles,
Jensen Transformers has a repeat coil that's equivalent to the 111C but they are not cheap. They are over $100.00. Tellabs has a repeat coil that they use with their equalizers that is cheaper. It will not take over a odB level at 50 Hz. If that's not a problem, they would be cheaper. Tellabs has an office in the DFW area. Jensen is on the Web at www.jensen-transformers.com
The 111C was costing your local telco over $150.00 at the end of its production. It would take a + 26dB level over the 20 to 20khZ band with relatively low distortion for its day. I believe it was designed right after WW2 by Western Electric, but it might have been earlier than that.

"

I really don't know, but I'd guess either WEFM Chicago, owned by Zenith,
or WGFM Schenectady, owned by GE. It was doubtless on a station with an
experimental license before either of these commercial stations.

As our moderator said, the group is Enigma. The song the poster is thinking of is called "Sadeness Part I". My CD Single doesn't give the name of the album, only the stock number - Virgin Classics #VC 791110-2. It was big during my first year in college which was 1990-1991. Enigma also had another hit "Return to Innocence" which is from the alnum "The Cross of Changes".

R J Carpenter <rcarpen@erols.com> wrote:

"I really don't know, but I'd guess either WEFM Chicago, owned by Zenith, or WGFM Schenectady, owned by GE."

It was WGFM. WEFM had to wait an extra hour because of the difference in time zones.

"It was doubtless on a station with an experimental license before either of these commercial stations."

Doubtless? The system was created by FCC staff engineers by combining aspects of the GE and Zenith proposals, so it's possible that it was never air tested in its final form. (The GE, Zenith and Murray Crosby systems were tested in a "bake-off" at KDKA-FM in Pittsburgh; I don't know if there were any others in the test.)

Ah, but part of the fun is getting stuff Right just for the fun of
it. Last summer, my wife did props for a play that called for a
character to read a will. Did you know Elvis Presley's will is on
line?

The station, now religious WLQV, had 12 towers in the WJBK and WDEE
days. That array dated from early 60's, and allowed the station to run
50kw day and 10kw nights, a necessity in the cutthroat AM Rock'n'roll
competition of that time (had to get the night signal over to the East
Side!). A change in power and pattern by later owners (don't recall just
when) allowed the drop of 3 towers.

A top executive of Radio One Inc., the nation's largest broadcaster of black music, is roiling the industry with allegations of corruption in the music promotion business while generating criticisms of her own company's conduct.

Chief Operating Officer Mary Catherine Sneed said the music business is rife with payoffs to radio stations to guarantee airplay of songs. She alleged that some money is illegally being kicked back to record label executives.

Note, the name of the album is "MCMXC AD" (1990 AD). I remember this
song (Sadeness Pt. 1) just being Huge, both on the radio and in the
clubs. It was so unique and original at the time. Another band you may
like if you like this Genre is DEEP FOREST. They had a really good
song called "Sweet Lullaby", from 1993 I think.

Thanks for mentioning Austin's KMFA-FM! I remember when its predecessor, the original KHFI-FM, was founded in the 1950's (March 25, 1956): I would gather with a few of my friends, only one of whom had an FM tuner, and we would listen in awe, not believing all this was true! Alas, only ten years later, KHFI-FM went pop (it had always been commercial, btw.), and there was a brief hiatus until KMFA-FM was created. As you say, it's still on the air and still all-classical 24/7. When I had the privilege of speaking at the memorial service of the original PD of both stations, the late Leonard Masters, I made a point of thanking the people of Austin for continuing to support such a station for so prolonged a time. I wish it a very much longer life! --E.A.C. (who hopes you won't mind my crossposting this with rec.radio.broadcasting...)

863. New AMSTNS Data Available

Newsgroup: rec.radio.broadcasting
Date: 2002-03-11 13:43:19 UTC
From: R J Carpenter <rcarpen@erols.com>
Message-ID: <u8pd3nadto4nf9@corp.supernews.com>
Source record: 11625
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting

FCC data from end-of-day March 8 has been processed for AMSTNS and is now available for downloading from http://www.qsl.net/w3otc .

A slightly-revised version of AMSTNS is included. This revision contains "status" information on a per-record basis, rather than the overall status from the FCC's "facility" file. The "facility" file is often very misleading since it will show a status of CP OFF AIR for the station if it has an uncompleted CP, even if the station is well and truely on the air. The FCC's AM Query service uses the status from their "facility" file, and is thus misleading.

No new TVFM data has been uploaded since I've found another couple of hundred TV/FM records with questionable geographic coordinates. Many of these are are LPFM and TV translator applications, but they affect the overall operation of TVFMSTNS. I consider coordinates to be unreliable if they differ by more than 60 miles from the Census Bureau coordinates of the city of license. I haven't found the Census Bureau coordinates to be in error in the small sample I've examined.

Amateur Radio Newsline™ Report 1282 – March 8, 2002

Amateur Radio Newsline report number 1282 with a release date of
Friday, March 8th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The Dayton Hamvention announces the EMMY AND OSCARS of Amateur Radio. We have the winners on Amateur Radio Newsline report number 1282 coming your war right now.

(Billboard Cart Here)

**

HAMVENTION 2002: AWARD WINNERS NAMED

The Dayton Hamvention has named Radio Amateur Information Network founder Alanson “Hap” Holly, KC9RP, as its 2002 Radio Amateur of the Year. Holly received the news of his selection on Thursday evening February 28th in a phone call from Cathi Hoskins, N8ZCQ, who chairs the Hamvention Awards and Banquet Committee. KC9RP tells Amateur Radio Newsline that he was completely taken by surprise:

--
Holly KC9RP: “I was absolutely stunned! In fact, all I could say was me? I mean seriously, I was just absolutely floored.”
--

Holly, lives in Des Plaines Illinois has been licensed since 1965. He began his ham radio informational programming career in 1984 on a local Chicago Area repeater. This eventually lead him to become founder, moderator and guiding light of a weekly amateur radio audio feature magazine known as the RAIN Report.

--
Sample audio from Rain Report.
--

RAIN programming is distributed to hundreds of repeaters across the country via a telephone dial-up line, the rainreport.com website, by a subscription tape service and broadcast over W-A-Zero-R-C-R's weekly 160 meter informational net.

But that’s is only a small part of the Hap Holly story. Originally licensed in Escondido California at age 14, Holly who has been blind since age 7 served as a phone-patch station and net control for the famed WESTCARS traffic net until 1970. He then headed off to Principia College in Illinois and from 1970 to graduation in 1974, ran phone patches and kept radio schedules for many of

his fellow students.

Holly graduated Principia with a Bachelor of Arts degree in Sociology, and soon found himself in the Chicago area. There, he sought out world-class jazz accordionist Leon Sash, to pursue further training in music. As a professional keyboard player, Holly's diverse repertoire of American music of the past six decades has made him a popular choice in the Chicago area.

Hap met his wife-to-be while he was teaching a class in non-visual perception to high school students at a summer camp in Buena Vista, Colorado. The two were married in August of 1976. Stephanie, who is sighted, received her ham ticket and KA9WKD callsign in 1986.

Over the years, Hap Holly has written articles for the Spec-Com Journal, Radio Scan Magazine and occasionally reports for us here on the Amateur Radio Newsline. Holly is also a common sight at the Dayton Hamvention, taping forums which are then incorporated throughout the year into his RAIN Reports. And since 1975 KC9RP has been an honored member of the Des Plaines Lions Club. He has also been a member of the Des Plaines Toastmasters since 1976. He and Stephanie are also active with Des Plaines Illinois Emergency Medical Alert system.

Named as this years Hamvention Technical Excellence award winner is Alan Waller, K3TKJ, of Laurel, Delaware. Waller was chosen for his work that lead to the interfacing the Internet to Amateur Radio.

First licensed in 1961, Waller combined his decades-long love for Amateur Radio and a burgeoning interest in the then-new Internet to design and manage the www.qsl.net and www.qth.net web sites. That was back in 1993. Since that time, Alan Waller's web sites have come to serve the needs of tens of thousands of ham radio operators worldwide by providing a vast technical reference platform, an electronic mail service, web page hosting services, and links to thousands of other ham radio related sites. And in the true spirit of the Amateur Radio, Waller's initial work utilized leading edge experimentation to see what could be done with the technology then available. This has developed into a mature, reliable service to the world wide ham radio community.

Rounding out this seasons winners are a pair of pair of space exploring hams who have been named as co-recipients of the 2002 Hamvention Special Achievement Award. Former astronauts Owen Garriott, W5LFL, and Tony England, W0ORE, are being honored for paving the way for manned ham radio operations from the space shuttles that has made ham radio a permanent part of mans exploration of space.

Owen Gariott, W5LFL was first. On November 28, 1983, Garriott, was launched into space aboard the space ship Columbia for the STS-9 mission. It was the Spacelab 1 mission and Garriott brought along the first Amateur Radio station on a crew-tended space vehicle. It was a simple Motorola hand held transceiver connected to a special antenna designed to fit in the Space Shuttle's window.

Three days later, W5LFL came on the air and hams across the United States and around the world were witness to a historic radio transmission:

--
Owen Garriott W5LFL: “This is W5LFL in Columbia. W5LFL in Columbia orbiting the Earth at an altitude of 135 nautical miles passing over the U.S. West Coast and calling CQ.”
--

Among those who heard Owen Garriott's Amateur Radio transmissions from space was Lance Collister, WA1JXN of Frenchtown Montana. Collister, who is now W7GJ, is credited with being the first amateur to work an astronaut in orbit. Take a listen:

--
Lance Collister WA1JXN/W7GJ: “W5LFL on Columbia, WA1JXN, W-A-1-Japan - Xray-Norway, WA1JXN Frenchtown Montana standing by.”

Owen Garriott, W5LFL: “Hello W1JXN, WA1JXN, WA1-Juliet-Xray-November. This is W5LFL. You’re our first contact from orbit. WA1JXN, how do you read? Over?”
--

The success of Garriott’s mission lead to the development of SAREX -- The Shuttle Amateur Radio Experiment. And, over the years, SAREX permitted youngsters in classrooms around the world to speak directly with astronauts in space. But for this to happen, the technology of manned ham radio operations from space had to be enhanced. This aspect of the then new SAREX program fell to the next ham radio operator orbited: Tony England, W0ORE.

W0ORE flew into space on the shuttle Challenger in 1985. It was Mission 51F, Spscelab 2. In addition to the 2 meter FM voice gear, Tony England also had with him the first ever ham television station to go into space. Slow Scan yes, but capable of sending back high resolution images which hams on the ground equipped with SSTV gear could view live or record on a simple audio cassette for later viewing and historical archiving. From space, Tony England described the station he was using:

--
Tony England, W0ORE: “Essentially we’ve got a commercial TV camera that anyone could go out to their local radio store ant buy. We feed this into a scan converter built by a commercial outfit and modified by NASA Amateur Radio clubs and this takes a snapshot of the scene and digitizes it and put it in a memory.

Then its sent to a handie-talkie like this. From there we will send it over a wire up to the upper window upstairs and to this antenna when I get it up there in the window. Then it will be transmitted to the ground.

When we get going, we will be able to send color TV images of what we are doing on board as a series of snapshots updated every 10 or 20 seconds. Amateurs anywhere on the ground will be able to receive them, and ones with scan converters will see the pictures.”
--

That flight also marked another first. The first ever two way television -- ham radio television -- to and from space.

Tony England went on to flight prove both the improved FM voice and then new SSTV systems. The SSTV was so successful that NASA gave very serious consideration to a permanent installation on all shuttles for back up communications. More important, the early on-orbit operations by Own Garriott W5LFL and Tony England W0ORE made possible the thousands of educational contacts between children in school classrooms and the crews flying in space. First, on board the shuttles, and now as a permanent part of the International Space Station.

Hap Holly KC9RP, Alan Waller K3TKJ, Owen Garriott W5LFL and Tony England W0ORE will receive their honors at the Hamvention Awards Banquet slated for Saturday evening, May 18th at the Nutter Center in Dayton Ohio. Amateur Radio Newsline will be there to bring you this story and all the news about Hamvention 2002. (ARNewsline™ from Dayton Hamvention® news release. Some audio from "Amateur Radio's Newest Frontier" and "SAREX - The Shuttle Amateur Radio Experiment" video presentations)

RADIO RULES: FCC RESUMES VANITY PROCESSING

Vanity license processing is getting back on tract. According to a Legaue bulletin the FCC now has all outstanding vanity applications filed last October in hand and is ready to resume routine vanity processing. Until recently a single missing vanity application had been holding up a backlog of more than 2000 vanity applications. The FCC credits the ARRL in part with helping to locate applicants and resolving the problem. (ARRL, FCC)

**

RESCUE RADIO: AMATEUR RADIO EMERGENCY COMMS SUMMIT

The first ever Amateur Radio Emergency Communications summit was held in Indianapolis last week. Amateur News Weekly's Jack Parker, W8ISH, reports on the success of this first meeting.

--
They came from the Red Cross, Salvation Army, ARES, RACES and even CB-radio's REACT team. Two dozen representatives of different Amateur Radio emergency communications groups met in a Federal Building training room to find ways of helping local and state emergency management organizations. The summit was organized by Marion County ARES director Mike Palmer, N9FEB. Palmer cited a need to develop better communications and cooperation between the different groups.

Many amateurs wear two or three different hats when it comes to providing public service. Palmer wants to identify those who are willing to help and to better utilize the voice and data communications available in the Marion County Amateur Radio Community. Many of the summit participants agreed this type of effort is long overdue.

Members of Army-Navy and Air Force Mars, as well as the Indiana Wing of the Civil Air Patrol offered their services during times of disaster. Everyone agreed this was a good start and look forward to future efforts to better train and organize Amateur Radio Emergency Communications in Marion County and Central Indiana.

Reporting from Indianapolis for Amateur News Weekly, this is Jack Parker W8ISH.

--

According to Jack, everyone came away from the meeting knowing that cooperation between groups is a key element in providing better service to the public. (ANW)

**

RADIO RULES: FCC ADOPTS AMBER EAS EVENT CODE FOR CHILD ABDUCTION CASES
The Federal Communications Commission has announced the adoption of a Report and Order amending the Emergency Alert System rules. Included are several new EAS event and location codes, which broadcast stations and cable systems may use to alert the public in the event of state and local emergencies. Of these, a new Child Abduction Emergency event code may be the most interesting to hams involved in Search and Rescue and who have E-A-S decoders installed in their repeaters.

The plan is described as a voluntary partnership between law enforcement agencies and the media that will be used to alert the public of serious child abduction cases where police believe that the child is in danger of bodily harm or death. Under the plan, radio and television stations will be permitted but not required to interrupt programming to disseminate information concerning serious child abductions when the new Child Abduction Emergency code is received. It could also be used by hams as an automated call to action to help find a missing child if used to activate an E-A-S equipped Amateur Service repeater.

Police departments say that every minute counts in dealing with an abducted child situation. In adding the Child Abduction Emergency code the FCC says that its responding to public concerns. (FCC)

ENFORCEMENT: FCC COMPLETES GEORGIA ARRL VEC EXAM SESSION AUDIT

The FCC has wrapped up an investigation into apparent irregularities at five ARRL VEC-sponsored Amateur Radio examination sessions in Georgia during 2000 and 2001. As a result of the probe, FCC Special Counsel Riley Hollingsworth says that several examinees will be called back for partial retesting:

--
Riley Hollingsworth: “We determined reviewing all of the information that was brought to our by the League that eight examinees will have to be retested on the code element. The ARRL has also relieved ten VE’s of their duties as volunteer examiners.”
--

According to the ARRL Letter, all V-E’s who might have been involved were suspended after the FCC investigation began last year. (FCC, RAIN)

**

ENFORCEMENT: A REPEATER OUTSIDE OF THE BAND

The FCC is also looking at the operation of repeater in the Metro New York City area. Again, the FCC’s Riley Hollingsworth:

--
Riley Hollingsworth: “We opened an inquiry into allegations that an uncoordinated repeater operated by Thomas Batista, KC2DDD, and Gerardo Arias, N2IFU, in Corona and Staten Island New York. Now that repeater is not only causing interference to a coordinted repeater, but the input is apparently on a frequency not even allocated to the Amateur band. So, needless to say we are real interested in reviewing that response when it comes in.
--

What Hollingsworth will be looking for is an answer to why the machine is using 143.020 MHz as an input frequency as well as why its on the air without coordination. 143.020 MHz is a full 800 Kilohertz below the bottom edge of the 2 meter Amateur band. (FCC, RAIN)

**

CONVENTIONS: SOUTH EAST VHF SOCIETY CONFERENCE

On a far lighter note, the Sixth Annual Southeastern VHF Society Conference will take place April 26th through the 27th in Oak Ridge, Tennessee. And they too are putting out a call for papers. If you are interested in participating, please contact KG4QDZ by e-mail to kg4qdz@arrl.net. (VHF Reflector)

**

CONVENTIONS: CHARLESTON HAMFEST MARCH 16

And the 18th Annual Charleston Area Hamfest and Computer Show will be held Saturday, March 16, 2002 from 9 AM to 3 PM at the Coonskin Armory in Charleston, West Virginia. Talk-in is on the 145.35 MHz repeater. Admission is $5 and there will be free parking. More information is available by e-mail to n8tmw@arrl.net. (N8TMW)

HAM RADIO POLITICS: NCI LEADER CALLS FOR ELECTIONS

Bruce Perens, K6BP, the founder and an incumbent director of No Code International says that its time for new directions for the group and has called for elections. Amateur Radio Newsline’s Norm Seeley, KI7UP, has more:

--
According to Bruce Perins, K6BP, when he started NCI in 1997, he never dreamed that it’s goals would be achieved so quickly. But says Perins; “we are most of the way there.”

Perins notes that last year the International Amateur Radio Union voted to ask for the removal of the international treaty provision requiring Morse Code testing for Radio Amateurs. Now Perins observes that even ARRL has voted in favor of removing code requirements from the international Radio Regulations.

With what he terms as -- no remaining credible opposition to NCI's cause left on the international level -- Perins says that it is time to turn NCI’s focus to domestic policy. He says that for NCI to take an appropriate role in the end-game of the no-code battle means cooperation with national societies like the American Radio Relay League. And to do this, Perrins believes may take some new people.

So Perins has asked that an election for new directors be held no later than April 30th of this year. He also says that any person who was an NCI member on December 31, 2001 can be a candidate for director, and is eligible to vote in the election.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

More information about No Code International is on the web at www.nocode.org. (ARNewsline with information from K6BP)

WRTC-2002: ORGANIZING COMMITTEE ANNOUNCES THE COMPLETE LIST OF OFFICIAL ON-SITE REFEREES

The WRTC 2002 Organizing Committee has named a full list of on-site referees for the upcoming games. The committee says that it received more than 100 highly qualified applications and those chosen were from that group. A full list of referees and other information is available on the web at www.wrtc2002.org (WRTC2002)

**

DX

In D-X, word that Dave Cree, G3TBK, has returned to work in the Caribbean. Throughout March Dave will be active as J88DR from St. Vincent. For the first two weeks of April look for him J3 slash G3TBK from Grenada. Operations will be on all bands, but concentrating on the WARC bands, mostly on C-W, but with some SSB. QSL to Dave's home call either direct or via the RSGB bureau. (RSGB)

The New Zealand Amateur Transmitters Society is warning hams world wide of what they say is a pirate operation. According the NZART News, a maritime mobile station using the callsign ZL2TO and the name Tony has been heard recently operating on nets on 15 Meters. This station currently gives his location as the Cape Verde Islands. Only one problem. The ZL2TO call sign is allocated the Waitara Amateur Radio Club. (NZART)

And the South Africa Radio League news service says that anyone who has held a QSO's with 7Q8 slash ZS6GH or C9 slash ZS6GH should write them off . SARL says that these have been declared null and void because license or authorization to operate was issued by the telecommunications regulators in Malawi or Mozambique. (SARL)

**

THAT FINAL ITEM: NOMINATIONS SOUGHT FOR THE YOUNG HAM OF THE YEAR AWARD

And finally, we started this weeks newscast with a story about awards. Lets end it on a similar note as we here a Amateur Radio Newsline officially open the 2002 nominating season for our own Young Ham of the Year Award.

The Young Ham of the Year award was created in 1986 by amateur Radio Newsline producer Bill Pasternak, WA6ITF, to fill what he viewed as a void where younger members of ham radio society were often overlooked:

--
Bill Pasternak, WA6ITF: “When I was a young ham in the 50’s and 60’s the good deeds of young hams were often overlooked and ignored. When I grew up I was fortunate enough to be in a position to remedy this and thats how the Young Ham of the Year Award program came about. Thats how it came into being”
--

The award as originally envisioned as very low budget. One idea was for a certificate that would be mailed to a ham, age 18 or younger who had shown some exceptional ability or performed some heroic deed that set him or her apart from the crowd. When Bill mentioned the idea to Chip Margelli K7JA, of Vertex Standard back in the company’s days as Yaesu USA, the idea quickly expanded. Margelli offered company support on the spot:

--
Chip Margelli, K7JA: “When Bill Pasternak gave me a call and dsescribed the project to me in the tiniest bit of detail it was obvious that this was a no-brainer and something that we as a company at Yaesu wanted to encourage. So, I jumped at the opportunity to be a major contributor and it has been a great project ever since.”
--

The award now had substance, but it lacked a permanent home. One was found in 1993 when it was invited to the Huntsville Hamfest:

--
Bill Pasternak, WA6ITF: “The way we got to Huntsville? Simple. We advertised. We put a notice into the newscast that we were searching for a permanent home. The answer came in a note from Scotty Neustadter, now W4WW, who is the Huntsville Hamfest Chairman. Scotty basically said bring it to Huntsville. And we did.”
--

While the presentation ceremony did go to Seaside Oregon in 1994, it returned to Huntsville in 1995 where it has been ever since. And in 1996 a second major corporate underwriter came on board. C-Q Magazine. Rich Moseson W2VU, is editor:

--
Rich Moseson, W2VU: “We at CQ have always thought that it is very important to promote Amateur Radio to young people and we saw that co-sponsorship of the award was the way to help do that.
--

What CQ did was to add to the Young Ham of the Year awards chest something very special. A week of fun and excitement at Spacecamp. Today, with corporate sponsorship from Vertex-Standard USA and CQ Magazine, and support from countless others including the ARRL, Dave Bell Associates and Rosewood Communications the Young Ham of the Year Award continues to honor the Amateur Radio related achievements of those hams age 18 or younger. And now its time to find a fitting recipient for 2002.

Full details, rules and a nominating form are available right now on our website at www.arnewsline.org. Just scroll down to the Young Ham of the Year Award area and click to download. Or you can send a self addressed stamped envelope to the 2002 Newsline Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California 91350 and we will mail back the materials.

The Amateur Radio Newsline Young Ham of the Year Award is a one of a kind. It honors the youth of ham radio and in doing so, we hope it helps to insure a bright future for the hobby and the radio service that all of us love. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, another reminder that the nominating period for the 2002 amateur Radio Newsline Young Ham of the Year is now open. Nominees must be 18 or younger. Full rules and an application is on our website at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Roy Neal, K6DUE, thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

Is the 1190 reference below the Dallas 1190?? If so the day site is 50KW with 4 towers inline..
>>

You're quite right.

It's a 4-tower in-line, and the purpose of that array is to be sited midway between Ft. Worth and Dallas, and to send about 250 kW towards each of those cities, from 50 kW input.

In some ways this strategy was utilized at Tulsa's KRMG/740, where a 3-tower in-line was used days and a 6-tower 3 by 2 was used nights, sited between Oklahoma City and Tulsa.

But the Tulsa design was able to serve two cities day and night from a single site.

The old mountaintop KBLA / KROQ site (1200 Beaudry Fire Road, La Crescenta...also known as Mount Thom) consisted of six monopoles, four in-line with one on either side. The "shack" was, indeed, underground! By the time KROQ returned to the air in 1976, it was a real mess down there. The 10kw daytime rig was gone (repossessed, I was told) and only a 1kw Bauer was in place. Talk about underground radio...

Advertisers protest Clear Channel Radio Station

Do you remember the days when local radio was really "local"? When there was actually a live DJ in the studio?
Do you remember when there was more than two or three companies that owned radio stations in your market?
Those days are long gone. With corporations like Clear Channel Communications leading the way in
"how to kill local radio", the listening public is falling victim to manipulation and deception
motivated by personal greed.

Clear Channel Communications boasts being the largest radio group owner in the United States. They are
responsible for such hate infested programming like Rush Limbaugh and Dr. Laura, two exceedingly right wing
syndicated talk show hosts. The darker side of Clear Channel Communications is more than public deception and
right wing propaganda, it's much more disturbing and offensive. From mutilation, torture, harassment, and hostile
working environments, to actual deaths, Clear Channel has a lot of blood on it's hands.

Here are 6 examples of why you should boycott Clear Channel Communications and their advertisers:

1.) February 27th, 2001 - WXTB disc jockey Todd Clem, a.k.a. "Bubba the Love Sponge," and his producer Lee
Hatley, have been charged with felony animal cruelty for the torture and killing of a boar in the radio station's
parking lot.
http://www.peta.com/alert/00/288.html

2.) February 23, 2001 - Former KYLD DJ Joe Lopez recieved a jail sentence for a stunt pulled in the previous year.
Lopez and an intern for the station dressed up as convicts and harrased a bay area neighborhood pretending to be
escaped convicts as a station prank. The two were arrested for misdemeanor charges of inciting a false emergency.
Neighbors of the area have filed suits against the station for this act of harrassment.
http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2001/02/24/MNS4739.DTL

http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2000/12/31/MN112871.DTL

3.) June 13th, 2000 - WMRV-FM STAR 105.7 - Hoax turned deadly when a woman who was there with her family
under the pretense that pop star Brittney Spears was making an appearance at the station collapsed during the
excitement and later died. The promotion was a hoax, featuring a look-a-like model complete with limousine.
http://www.101britney.com/britneyspears/jun00/

4.) June 2000 - KBPI Denver disc jockey Willie B incites hundreds of 4x4 fans to tear up Rocky Mountian wetland
habitats with an illegal Mud Fest.
http://www.westweird.com/mudfest.html

5.) February 3rd, 2000 - KBPI in Denver is investigated for animal cruelty after a DJ (Willie B) droped a live chicken
off a building on the air and cited listeners to bring animals to an interstate and see how many make it across the
highway.
http://www.lineofduty.com/blotter/july00/jul-1-7/7100-40.htm

6.) December 3rd, 1999 - Three tower workers killed while working on WFMX antenna. Two of the victims were
teenagers. The fall occured due to outdated equipment that wasn't considered safe by current industry standards.
Clear Channel outsourced the antenna service most likely without proper consideration or research into the safety
practices of the contractor.
http://www.salisburypost.com/december99/120499c.htm

7.) Unfair LABOR , Clear Channel fails to pay overtime to radio workers in California.

8.)_____ (send us your reports to add to the list jhill_81@yahoo.com)_____

Not only does Clear Channel engage in these types of marketing and promotions, it tricks it's listeners into thinking
their local radio station is actually local. More and more stations are cutting programming staff. In many markets,
sister clusters are taking on more work providing 'voice tracking' for smaller sister stations. At these smaller clusters,
there may be only 1 live person in the complex for 5-8 different stations. That means there is a staff ratio of 1:6
where prior to 1996, the ratio was 1:1 for staffing stations.

Managment at the cluster level has it's share of secrets and skeletons. Unfair hiring practices, lack of workplace
safety, hostile working environments, allowing sexual harassment abusers to retain their jobs while terminating
others 'at will' . This is just some of the sick and twisted behavior that is consistent with
Clear Channel Communications.

Your local radio stations owned by CCU (their company stock symbol) which bring in advertising money from your local businesses doesn't stay in your local economy. It all gets funneled out of state to Texas and Wall Street. Is this the type of radio companies you want in your local community? If not, go to their advertisers and explain to them that they are supporting a corporation that commits heinous acts against the environment, animals and humans. Tell the business that you can not support them, if they continue to support a corporation that condones and promotes these types of activities and behaviors.

You can help make a difference in your community today by boycotting Clear Channel Communications radio and television stations and their advertisers. These are just a few of the more infamous reasons CCU should be boycotted. Use your power as a consumer and CHOOSE NOT TO SUPPORT CLEAR CHANNEL COMMUNICATIONS or it's family companies like SFX Entertainment, Premier Radio Networks, Eller Media (Outdoor Advertising, billboards,etc.), Katz Media, Rush , Dr Loura , Most of the morning shows , many FOX TV stations , Muzac, Texas rangers and others.

868. Anywone Have "History of Modern Music" special from late60s?

Newsgroup: rec.radio.broadcasting

Thanks for all the information about XHLNC. It's kind of refreshing to see a radio station that is run just for the love of it. Most people I know are in the broadcasting industry because they really like what they do, and are in love with broadcasting. The financial rewards, while sometimes very nice, are not usually their motovation for doing what they do.

There is nothing wrong with making money, but sometimes I think things have gone a bit too far since the Communications Act of 1996.

We neeed more prople who love radio, and fewer who are just in the business for financial gain. Just my humble opinion...

My name is Ralf from Minden,Germany. Since 1982 I'm keeping busy with the evolution of electronic dance music (special subject radiobroadcasting and remix-services).

Because of the terrible reporting in german publications about the development of dance music broadcasting, I'm planning a disssertation about this subject.

Naturally the main part belongs to the broadcast capital of the world - New York - with wich I like to start my research.

In the next months I like to collect as many informations as possible about the early days of Disco 92 KTU, WBLS and WRKS (other stations?).

What is important to know about DJs, Mix-Shows,Program, use of remix-services like for example Disconet, Hot Tracks etc.?

I'll be very happy about every answer. Thank you for your cooperation.

Ralf

> Hi, I am a college student doing a research paper
> on XM radio. Specifically I am looking into how
> it has been marketed/advertised. Can you tell me
> how you first heard of it?

I am a talk radio junkie and first heard of XM radio on AM talk stations. I was more aware of Sirius satelite radio in fact before Xm. As an amateur stock investor, I noticed a buzz in the investment press concerning Sirius. I feel that the "subscription" business model that these two companies use is a loser though.

The radio ads are upbeat and aired often enuogh that the marketing tune is still stuck in my head. If XM saturates FM and TV as much as they are saturating the AM band then perhaps they can generate sales.

If you spend some time reading Usenet postings though, you may discover that Xm (and Sirius most likely) are perceived as having poor sound quality. They need to address this issue if they wish to attract the music junkie - who is their most likely client.

Ok David, it was the 1978 version which has been posting in especially alt.binaries.sounds.mp3.1960s. We are not talking of 1969 versions. Considering 23 of the 52 hours have been posted already, I don't know if you can look on audio galaxy--and-grab them?

I agree with this assessment. I checked it out, and it does have a bit of a tinny quality, although I can't imagine being a trucker and NOT having it, anyway. I wasn't a trucker, but I used to spend tons of time driving through the West, and there are so many stretches where the only stations are scratchy country music, religion or extreme right wing talk radio (the kind that would make Rush seem downright liberal), I can't imagine that the $10 a month they charge would be considered too expensive (although the tuners have to come down a little.) to someone who does that for a living.

And I'll be quite honest; I live in the Baltimore/DC area, and the radio here is so horrible, I'm thinking of getting it when I get a new car next week. The homogenization of radio is going to drive us to that, and the Infinity/Clear Channel types out there should get that someday; hopefully not before it's too late. I already listen to MusicChoice on my cable system rather than them; if I could take that into my car, I would be in heaven.

I'm surprised that all the paid XM employee's that post here haven't regailed you with their hyperbole of promises!

For one thing both XM and Sirrius have commercials on their channels. Then I have to go out to a place like Best Buy, spend a couple hundred dollars, take time out of my day or days to get them to install it, then send a check every month for a subscription to get something that for the most part I get for FREE either on the AM/FM/CD or make my own CD-R's??????

I realize that most big business's like Sony who owns XM think American consumers are pretty stupid, but paying a monthly subscription so I can listen to more commecials? That kind of snake oil isn't going to fly!

If I want to listen to all Hungarian Fertility Music performed by Eric Burdon of the Animals channel, I can get a CD of it, and cut my own for a tenth the cost.

I suppose there will be those folks who have to have the latest gadgets, those same people you see standing in line to get the latest version of Windows to freeze up their computers, but most sensible consumers, those who make up the majority, aren't going to take on yet another monthly bill for something they essentially get for free now. Not to mention that as dense as commercial broadcasters are, they will eventually realize they have comptetition and will in some form or fashion rise to the occassion. I saw a post from someone who said he was an engineer post a while back that he had installed a repeater for XM and that he'd listened to all the channels during the install process and didn't hear anything he couldn't live without. Boy the XM employees came out of the woodwork attacking the poor guy.

I haven't seen any ads or information in my area about XM or Sirrius except what I've seen on the internet. I did see a post that XM had lost over $200-million last year so that can't be very promising. I would speculate that XM and Sirrius will have to do what the Direct Dish (little sat dishes) had to do. GIVE AWAY the receivers if you promise to subscribe for a year. Even with that kind of promotion, I'm still not going to pay to listen to commercials.

$250-$450 for a receiver + installation another $100, then $11-$15 a month subscription fee's. Thats $500 to $600 bucks a year. Sure could buy a nice collection of CD's for that or better yet, buy a CD-R deck and burn my own stuff. If you don't want music but Talk, heck most of the AM stations are nothing but Talk nowadays, no matter where you go. I'm still waiting for someone to tell me why I can't live

without XM and Sirrius.

Next thing you know the Billboard people will tell you, that you have to pay to look at their roadside advertisements as you drive down the interstate. "oh but these are quality programed Billboards with special messages directed to your particular tastes", honest.

Hi folks....

Maybe I don't have a sophisticted ear, but I find the audio quality of XM just fine. At this moment, this product's most compelling selling point is the wonderful choice of programming that is simply not readliy available to most listeners in most parts of the country. My own taste embraces it all: from jazz...world music...60's...blues...to "Frank's Room" (the vocal standards channel). Even here Los Angeles it's a real stretch to find ALL these choices available on AM & FM at any given moment.

I believe the receiver cost is an ephemeral issue. It will come down as time goes by. As for the monthly cost, well, I remember being horrified as a 60's teenager when hearing the term "pay TV." My god, how could they make us PAY for TV???? Now, for many Americans, paying the cable bill is as routine as paying for the phone. I believe that given good programming, Americans will be more than willing to pay for sattelite radio. Granted, it may be slow in coming. I hope that XM and Sirius will have the resources to hang in until demand is sufficient!

A final point regarding XM's advertising. I'm puzzled by XM's continued hammering away at being able to "drive from coast to coast without changing the channel." The day-to-day lives of most Americans don't involve driving from coast-to-coast. Aside from long-haul truckers, I can't think of a group for whom this is a compelling selling point. XM's marketing really ought to focus on the PROGRAMMING they offer that AM & FM listeners may by starving for. Better 60's stuff with far less repetition than the oldies FM!. Mainsteam jazz or blues ANYTIME you wanna hear it! Continuous hip hop. The country stuff your hometown country station just wont play!

XM's channels are already pretty decent and they will get better as time goes on. Let's hope the marketing improves as well, to make the public understand exactly what this product is.

Cross-posted to: alt.music.dance,alt.radio.broadcasting,rec.radio.broadcasting

The Return to Innocence song used Taiwanese chanters but did not pay them! - they won n a suite and got their deserved royalites.

Other groups/artists you may like with similar sound (I personally like this type music) are: 1. Hevia 2. ERA 3. Loreena McKinnett

good luck

--
An unjust king asked a devotee what kind of worship is best? He replied: 'For thee the best is to sleep one half of the day so as not to injure the people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;
But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

I don't have the time to browse the Internet for music, download it and
burn CDs. I buy a few CDs per month, mostly by artists I already know,
but am hungry for new music by new people that I've never heard before.
Searching for this type of music can be very time-consuming.

> I suppose there will be those folks who have to have the latest

Unfortunately, the majority of consumers don't find anything wrong with
commercial radio as it exists today. (That they put up with Windows is
a topic for another day.)

I don't see the satellite radio folks providing anything that I can now
get for free. I want someone to present music I might like but don't
know I like yet and I don't know how I'd get that any other way.
Progressive FM radio provided this service thirty years ago but there's
been nothing like it since except for college radio stations, which
aren't consistent enough to provide it.

Hello,

The web site, www.telejoke.com has been listed in a number of radio oriented web sites and lists as Alan Ray's website, home of his fax based tip sheet.

While we're honored to be confused with Alan, we have to confess that Telejoke.com is an independent site unrelated to Alan Ray Comedy.

Hopefully, radio professionals will find -- or post some great material there (www.telejoke.com/forums), but if you're looking for Alan's site, try araycomedy.com (the last we knew of his whereabouts.)

Thanks,

Tony Silva
Jokemaster,
Telejoke

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

2002 is the 30th birthday year of WCBN-FM
AND
we celebrate 55 years of student broadcasting at UM
join us for reunion festivities June 21-23 2002

What you say makes sence - BUT to me I have no faith that a
global-conglomerate outfit would know "Creative" if it bit them on the ass.

I believe they could have all the money in the world and still end up with
polster/consulatant-based drivel.

XM/Serious must be creatively limited by the vary nature of the entities and
their huge size.

A ma/pa and similar small (and thus human) outfit might not have more
"polish" - but it would have more character (and nearly by default more
"quality").

I hope XM/Serious fails totally. I just no longer listen to radio and I will
not pay a global media polster based parasite to force feed me more pap.

Until radio improves I will just do the usenet binaries and CDr thing ;-(.
Sad, I do miss radio ;-(.

Ya I quit listening when KNNC when it become a simulcast of 101X. Even worse when it became "the Eagle". I still have the KNNC "psyho baby" bumber sticker on my car - 8 years later!.

Radio ain't what it used to be. Tune out! thats what I did.

And support LPFM/free/micro-radio! ;-)

You imply that the CD costs about one dollar????

> $250-$450 for a receiver + installation another $100, then $11-$15 a
> month subscription fee's. Thats $500 to $600 bucks a year.

Do you intend to buy a new receiver every year? How about amortizing the receiver over 3 years, $100-150 or so a year. That plus the subscription would buy you perhaps 20 CDs in the year.

> Sure could buy a nice collection of CD's for that or better yet, buy a CD-R
> deck and burn my own stuff.

CD-R decks are free? You have to factor that cost instead of the sat receiver if you go the CD-R approach.

Where do you get the source for the CD burning if the music you want isn't on ANY terrestrial stations? Is the time you spend burning the CDs worth nothing? I like to think my time is worth more than $10 per hour, though I waste enough of it on the internet that one could question that assertion.

IMO, XM and Sirius are NOT for the 18 to 35 year olds who live in major cities and like foul-mouthed air-headed jocks. Both of the sat services are betting that enough other people will sign up within the next two or three years. That's the business plan, break even a couple of years from now.

And your point is simply cuz they are "exceedingly right wing" that it's
naughty of CC to put them on the air????

While they are both conservative...they are certainly not "exceedingly"
right wing.
(There are of course many, many people much more conservative than they.)

And...they prove that people WANT to listen to their programs.

Fan of Laura and Limbaugh or not...your points are flawed.

If you want to stomp out objectionable/offensive programs...then Stern and
Imus are next, right? (Or are they both OK with you...since they are not
conservatives?)

> CD-R's??????

AM/FM is free, but have you listened lately? There's a reason I make CD's.
But I would also point out a couple of things. One is that most people still
don't have the capability to make CD-Rs. Also, as much as I hate MP3 sound
at home, on a portable or in the car, it's not horrible. Nothing sounds that
great in the car, anyway.

> I realize that most big business's like Sony who owns XM think
> American consumers are pretty stupid, but paying a monthly
> subscription so I can listen to more commecials? That kind of snake
> oil isn't going to fly!
>
Why? I think it depends on how pervasive the commercials are, first of all.
But as for people willing to pay, if I can listen to good, entertaining
progressive rock or jazz or classical or whatever, and it is not available
to me otherwise, $10 a month is a deal. And as someone who spent a lot of
time out west, where 2-3 hours in a car is a normal commute in some cases,
and where stations fade in and out with the curves in the road, and where
there are vast stretches of hundreds of miles where there is no radio to
speak of, let alone decent FM, trust me; there's a market for this. Hell; I
live in the the Baltimore/DC area, and there are at best TWO stations that
are tolerable, and radio station owners change formats weekly. If XM catches
on, it'll be the fault of broadcast stations.

> If I want to listen to all Hungarian Fertility Music performed by Eric
> Burdon of the Animals channel, I can get a CD of it, and cut my own
> for a tenth the cost.

You obviously haven't been keeping up. A lot of new CDs are going to have
copy protection; those days may be numbered. Plus, I'd also like to hear new
music as it comes out; I can only listen to the stuff I already own so many
times. Plus, when you're talking about mass marketing, you must take into
account that a whole lot of people don't have the time or equipment to make
tons of discs of their own.

>
> I suppose there will be those folks who have to have the latest

Then don't. I'm thinking about it.
>
> $250-$450 for a receiver + installation another $100, then $11-$15 a
> month subscription fee's. Thats $500 to $600 bucks a year.

The receivers run $200-300, and can be installed by almost anyone in three minutes. I don't know the price of Sirius, but XM is $9.95 a month. That's $120 a year, after the initial purchase. A CD player for the car runs at least $150-200, and a CD player that will play MP3s, thus eliminating the need for radio, runs about $300, plus the cost of CDs.

Bottom line is, if radio didn't suck so bad, I would prefer radio to CD in the car, because it's easier to not have to change the CDs all of the time on a 3-4 hour trip. But the huge conglomerates show they don't give a rat's ass about listeners. They'll do anything to be number one among the listeners who are listening. I see none of them trying to get the listeners who are NOT listening. And I have a feeling we're in the majority.

> Sure
> could buy a nice collection of CD's for that or better yet, buy a CD-R
> deck and burn my own stuff. If you don't want music but Talk, heck
> most of the AM stations are nothing but Talk nowadays, no matter where
> you go. I'm still waiting for someone to tell me why I can't live
> without XM and Sirrius.

Don't get it. But don't assume there's no market for it.

One comment about talk radio, though. What if you're among the majoity who would like to listen to talk radio, but can't stand listening to the right wing garbage that dominates it these days? And have you ever tried to find NEWS on the radio these days?

> Next thing you know the Billboard people will tell you, that you have
> to pay to look at their roadside advertisements as you drive down the
> interstate. "oh but these are quality programed Billboards with
> special messages directed to your particular tastes", honest.

You already pay. They're called "taxes".

Ya that got airplay - and the Mystic's Dream too (a little). She's more
Celtic/Arabic/Instrumental/NewAge (difficult to pin down). Hevia is similar
(Celtic/Arabic/Spanish) He's actually Galasian(sp) (NW Spain so the Celtic
part makes sense).

I forgot to mention "Adiamous"(sp) - they had chant stuff. For anyone
interested goto:
alt.binaries.sounds.mp3.celtic.....and.....alt.binaries.so
unds.mp3.world-music

There's a crapload of cool music in those groups. I'm indepted to
"Celtophile" for posting most of it! ;-)

support free-micro-LPFM! ;-)

Wow, it sounds like Sabrina stepped into an XM Radio marketing convention or something.

I'm pretty much in agreement with what Sabrina said, except that I _have_ seen some promotion for XM and it has definitely turned me off the whole idea.

I think radio in general has devalued itself greatly, and anyone instituting pay radio is going to have to prove that it's worth paying for. XM hasn't proved that, and they have also set up a barrier of high startup costs. Yes, a CD burner or car CD deck also has installation costs, but they can be used for a lot of purposes--they're not tied to the fortunes of one company. I've seen a lot of hot new ideas have the plug pulled on them practically on a whim, so XM (and Sirius, which is even further behind, in my view) has to not only prove that they have a service worth paying for, but that my nice expensive new receiver will still have something to receive next year and the year after.

901. Service manuals required.

I have a couple of different STL systems in for repair and would like copied of the manuals.

If anyone can help me with the following I'd be happy to reimburse all costs.

The equipment is old so the manuals are probably collecting dust by now!

Micro Controls Inc (MCI) 900MHz RX, not sure which model but it's blue and early solid state. I think the TX is rated at 5w.

Moseley Model PCL 303 TX 900MHz. Not sue hat output power this thing should have and need a schematic and replacement crystal over octal housing.

Any help with the above would be most appreciated.

Thanks

Philip de Cadenet G4ZOW

I was working in a station in north western Australia when a report came through our sister station 80 km to the south that a whale had beached itself nearby.
there were on site reports phoned through by a staff member who also fed regular updates.
after a couple of hours...hundreds of people came to the beach to see the whale. Some listeners even drove a few hundred kilometres!
At the beach people were wondering where the whale was and often walked up down the long beach searching for it.
The staff member recorded the visitors' reactions to the situation which were replayed on air later. The punchline was always, "do you know what day it is?"
It was a brilliant stunt and hundreds of people including many staff, were sucked in.
Our man at the beach devised the stunt.
Sadly, I haven't known him to devise any April Fool's jokes since.

Opie and Andy, then on WAAF Worcester MA, reported that the mayor of Boston had died. Funny? Maybe to their target demographic, 11-15 males, but not to anyone else. It got them fired, but they landed on their feet -- in New York City! There was much speculation afterward that the whole thing had been a set-up, that they were assured of the New York job before the prank and that the prank was just a publicity-grabbing way to leave WAAF.

Also, not sure which one, but in the '80s some Boston TV station reported that Great Blue Hill had erupted, sparking a mini-War of the Worlds reaction. You'd think anyone the least bit familiar with the Boston area would realize that Great Blue Hill is as benign and non-volcanic a hill as you'll ever find, but I guess some folks are just ultra-gullible.

Howard

Mixed metaphore, anyone?

In any case, an important stoc analysit predicted 40 million subscriptions for the two services. See www.rronline.com where there is a synopsis of the analyst report.

And lots of people will pay to get their favorite music with very, very few commercials. In fact, an early buyer was one of my daughters who lives in Atlanta where there is no regular radio station playing slasa music; XM has a whole channel. Since that is her favorite, $10 bucks a month is a small fee.

And XM is far ahead of projections already.

If you don't like it, just don't buy it.

Tomorrow at 10AM pacific, I am to be a participant on the Forum program on KQED-FM, San Francisco (where I am an announcer by the name of Norm Howard). We are doing a tribute to Bay Area radio history.

We have lined up some interesting tidbits and people. Should be fun.

On 88.5 in the Bay Area, streaming audio at kqed.org, archived thereafter on the web site for your perpetual listening pleasure.

Lots of dumb and dangerous ones here in Canada such as a DJ faking
being shot on air.
The one that was the most fun was when we played "Harper Valley PTA"
for four hours.
We'd annouce different tunes on air but play "PTA" every time.
Listeners who phoned the station for an explanation heard the
announced song playing in the background.
We'd suggest their radio was too close to the sink or some other such
nonsense to explain why they were hearing only "PTA".

We ran a good one last year I copied from another station hundreds of miles away...
Involved sponsorship from Dolphin and Everedy...
At 5am we covered a beach with 100 Dolphin torch's and ran live x's from the beach with reports that 100 or dolphins had been washed up on the beach and volunteers were wanted to help get them back in the water...

worked well a couple of army trucks arrived with soldiers and their sergent we had vets and thousands of people...

they all thought the torches were a good laugh and forgot about how cheesed off they were that it all was all a prank, even interviewed listeners at the beach who carried the prank on, a huge success. Even the opposition station began running news reports on the dolphins until they realised 2 hours later it was the opposition station running an april fools..

For the life of me, guys, WHAT do you see in this Mitch Albom character?

This hypocrite is one of the meanest people that I have ever heard on the air and that includes Howard Stern and Rush Limbaugh. If it weren't for his cush-y time slot, he wouldn't be able to make it in any other market in the country.

What gets me is his relentless criticism of people based on their personal situation or physical characteristics. I realize that he's very wealthy and has had very good fortune in his life, but does that give him the right to be so smug about Paula Jones' "big nose" or Monica Lewinsky's "fat, ugly body".

What a jerk. Detroit, get with the program. Ditch Mitch!!

And the station manager even had the audacity to attempt to parlay it into a further publicity stunt (some screwy thing about throwing pies).

The city refused and filed the broadcast hoax complaint with the FCC. Of course, as far as I know, it went nowhere.

Bad taste sells better in New York, anyway.

And the station's news director was immediately fired, and the station issued an apology, IIRC. The station's management did not view it as a successful publicity stunt but an embarrassment.

Well, I would agree that stability is a major factor, but that has nothing
to do with the denial of a market, simply because YOU can't see the value in
it.

I like progressive rock, news and I'd like talk radio, if it was more
balanced. There is ONE STATION in the Baltimore Dc Market that caters to
many like me. It's an excellent station that can only be received north of
Annapolis and south of the northern Baltimore City line. And even within the
listening area, the signal is shaky, at best. There is one other, relatively
scratchy station from DC that is tolerable. That's it. Out of the 60-80
other stations around here, I get to choose from right wing talk radio, a
few dozen rap, top 40, classic (dinosaur) and hard rock stations, and a
smattering of religious stations. The airwaves are a vast wasteland right
now for people who like good music, and really don't want to listen to the
same stuff they listened to a while back all of the time. And news? Besides
WTOP, which is barely audible from my area most of the time, and NPR, there
is little news at all, and no news without a significant right wing bent to
it.

If satellite radio offers decent sound quality, (and let's face it; few broadcast stations are CD quality right now, anyway) a selection of stations with things I want to listen to (my car stereo has 30 presets, and I use TWO most of the time and 3-4 during football and baseball seasons), and air personalities like the old days, who actually sounded like they had a brain in their heads, why would it NOT be worth $10 a month to get that? And if I did a lot of driving (as I did out west; I used to drive from LA to Tucson twice a month) and I could listen to the same selection of stations the entire way, why would that not be worth it to me? And if I do a lot of camping, and would like to leave most of my CD collection home most of the time, but would like to listen to some good music or news while I'm there, why wouldn't it be worth $10 a month?

As for CDs, I don't expect my CD collection to stay static; I'd like it to grow. But it can't grow if I don't hear any new music, and today's radio doesn't do new music, unless it's pop or rap. So, when I'm home, my radio's rarely on. Most of the time, I listen to music coming from the digital cable (which I pay for, and which is accompanied by two small ads every time the song info comes up on the screen) or I listen to one of a myriad Internet radio stations (which I also pay for, courtesy my broadband connection, and which is also accompanied by ads.) I'm not the only one.

Don't go thinking there's no market for this stuff, just because you don't like it. Many of us do.

And FYI, I do not work for Sirius or XM, and I haven't purchased it yet. All I know is that the state of broadcast radio these days is dire, and I need a solution. If Clear Channel, Infinity, et. al. aren't going to solve this problem, by creating interesting radio that people are going to want to listen to, then someone else is going to come along and steal their market. And that's their fault.

AFAIK, XM has been very quiet about receiver sales and subscriptions since January 1, 2002. I assumed that they are holding the numbers back until Sirius releases some numbers - and XM's are sure to look much better in comparison because of their head start.

I see that Alpine has released a control unit that allows their XM box to be used with any make car radio. Also that Isuzu has XM available on a couple of models - not a big surprise since General Motors has money in XM and more-or-less controls Isuzu.

Let's say you are a reggae fan. And the work of downloading songs, burning CDs and such is not something you want to do. In other words, you have a life and are over age 25. And you like hearing a mix of new songs and special features plus djs. A satellite reggae channel is going to be a very good option. When you see that there are probably 5 or 6 other channels that you would also like to hear regularly, the deal looks pretty good.

Since there are many XM and Sirius channels that offer things not available in even the largest markets, there are many people who will want a professionally programmed channel fo their favorite music styles.

Just look at one "niceh market." There are around 10 million Hispanics in the US that do not have a local FM radio station playing their favorite type of music; XM and Sirius together have something like a dozen or so Spanish language channels, filling hits void for millions of people (Hispanics index way above non-Hicpanic whites in per capita music purchase expenditures, so it is logical to believe that $9.95 is not going to be onerous).

If people will pay $9.95 a month for TIVO, upwards of $40 for satellite TV, etc., then a small fee plus the required equipment is not exactly a business model unknown in the USA. Hey, over 20 millionpay $24 a month for AOL!

I remember when cellular phones came out that the same argument came out. Folks would not pay $500 or more for the phone and nearly $100 a month for the service. Well, enough did to bring the price down, and now there are a hundreds of millions of cell phones out there!

Does anyone know what the air staff line-up at WNEW was in 1977?

Who was doing nights...between 6 and Midnight?

Wasn't this the period that they tried to get somewhat 'contemporary'?

Anyone have some insight into what was happening there in 1977?

Thanks!

RP

Damn! your got that right! I like your "dinosaur" rock label (thanks Homer
;-)). I use "dinosaur" too

however I will never personally endorse satelite radio - doing that only
legitemizes the vast wasteland of terrestrial radio. (i.e. its ok that radio
sucks now because I can buy satelite radio instead).

Just promote free-micro radio and LPFM community based stations! ;-) in any
way possible ;-)

Actually, none are, and that's by definition. The specifications for FM
radio in the US filter out everything above 15 kHz (the stereo pilot tone
is 19 kHz), while CDs are capable of 22 kHz.

>And FYI, I do not work for Sirius or XM, and I haven't purchased it yet. All

IIRC, Clear Channel owns a stake in one of the satellite radio companies
(can't remember which one). Doesn't matter to them whether satellite or
broadcast is more successful; they profit either way.

95-pecent of the USA are radio listeners.!!! Keep smoking that doobie Dave - must be a good one ;-)

Again - I know many folks who quit listening in the late-90's. Combo if teenhop, hate-rant, snooze muzac, and dinosaur rock (and no, not the band by that name - they of course never get radio play!) ;-/

I listened to some of the latin stuff. I didn't care of Brazilian somba stuff. I am o fan of Hevia (but he is Galasian(sp) and is Arabic/Celtic/Afro/Newage - insrumental stuff).

Did you ever sample songs from the artists I listed as Alternative Rock and few weeks ago, and which are no longer played on the radio?

--
An unjust king asked a devotee what kind of worship is best? He replied:
'For thee the best is to sleep one half of the day so as not to injure the people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;
But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

And its people like you that make him rich and give him enormous ratings.

You obviously listen intently to his every word, your post reflects that. Its not about his opinions, or even what he says, its about RATINGS. The guy draws a big audience and will continue to as long as people like you make posts like yours to draw attention to him.

We have these remarkable high tech devices on radios in America. If you don't like what you hear, you can 1-turn it off 2-turn it to another station.

Nobody is making you listen to it. The fact that you now every detail of this guys show is living proof that you are hooked and contributing to his success.

What a maroooooon!

The Sennheiser is a studio standard and you can't go far wrong with it for just spoken-voice stuff and light singing. If it was me that's what I'd choose.

I also might add -- if you think of some stupid prank and use it on the air, your management might think it's a great idea and tell you to go for it.

Be advised, if it backfires, and there's any backlash (e.g., it causes a massive traffic jam, someone gets killed or injured, there is enormous financial mess because of a cleanup or police overtime, etc.) your management will likely pull a "Mission Impossible" and deny any knowledge, involvement, approval, or cooperation in the project.

If your management gives you a stunt to pull, and it looks like it could be a problem, get the order in writing! Even though I work in other areas, when I've been told to do something that could expose the company to liability, I always asked for the order in writing. Management turns yellow and backs down.

>Can any of the old timers here (like me) help in identifying this
>microphone?

I'm pretty sure the mic in question is a Capps DM 2050. It was made by Frank L. Capps & Co, Valley Stream, NY. The 2050 was an omnidirectional dynamic. They claimed 50-15,000 cps frequency response. It even came with an individual frequency response chart. This mic has very low output impedance, stated as 50 ohms. The "Net Price" at the time was $120.00.

I hope that helps.

Chuck

> the 2 i am intrested in are:
>>
>> Marshall MXL2001P
>> Sennheiser MD 421II (used this mic in radio at multiple stations and
>> really liked the sound of it)

Actually, they are both fine microphones, as are the others that were suggested.

The Marshall is a large diaphragm condenser, made in China. Similar mics are sold by a variety of vendors. Universally, they originate from the "Bejing 797 Audio Company," or come from "Sound King." They look very similar, so they are hard to tell apart. Some people think "797" makes better products.

You will need phantom power to run the Marshall, so that might be a consideration. The Sennheiser is a dynamic, and needs no power supply.

Condensor mics tend to be more sensitive than dynamics, so they can be a poor choice if you have to deal with computer fan noise or air conditioning in the same room. If this sounds like your situation, you can "close talk" a dynamic which will effectively mask a lot of unwanted background noise.

Another mic nobody has mentioned is the Audio Technica ATM 61HE. It is a wonderful sounding dynamic that I personally love. They aren't very popular because they just look like a generic "microphone." It has a very warm sound with a nice presence peak to help make your voice "pop out" of the mix. It works best when close talked, so it is a good choice in noisy environments.

The best advice is to listen to any of these mics and buy the one that pleases you most. If you buy any of the large diaphragm Chinese mics, be sure to listen to the one your are going to buy, before you leave the store. Some are very inconsistant in sound quality. The display model may sound great, but sometimes the one in the box doesn't sound as good in a side by side test. Marshal has pretty good quality control, but not everyone does, Buyer beware.

Have a listen to an Oktava MC012. Guitar Centres have them, or used to.
Close to the sound of a large condenser mic, and a wonderful price. 20 to
20K, also think about a small Mackie mixer. Just my 2 cents worth.

Hevia is Celtic music, not Latin. Celts settled both Ireland and galicia in
Spain.

>Be advised, if it backfires, and there's any backlash (e.g., it causes a massive traffic jam, someone gets killed or injured, there is enormous financial mess because of a cleanup or police overtime, etc.) your management will likely pull a "Mission Impossible" and deny any knowledge, involvement, approval, or cooperation in the project.<

Such a project will quickly attract the FCC's attention, because it violates the "hoax" rule, and therefore management will have no chance to deny it without lying to the FCC...an action that will get their license yanked.

More than likely, an air personality that pulls such a thing will quickly find him/herself asking, "Want fries with that?"

I haven't listened to Rush in a couple of months. Has he changed? Did he
become mean since he had his hearing problems? What in the world are you
talking about? Does Rush now want people to become dependent on government?
Now that would be hateful.

>these two companies use is a loser though.

Ya.... you might be right but living in Atlanta in the 70's and 80's I can remember when folks said the same things about Ted Turner and his CNN empire that was being built at that time. Heck, I even remember when folks said that about Cable TV. Think about it how many folks that you know have some form of subscription television today??? Don't discount the consumer's need to have a better selection. After all when a few large companies have all the broadcasting intrest in a town its quite obvious there will be a need for different taste. But what do I know ... I am just an observer...

I believe the questioner was asking about WNEW, not WNEW-FM.

The host at that time could have been either Ted Brown or Jim Lowe. But I am not sure. Marty O'Hara is another possibility.

Hope this helps.

For mics:
Sennheiser MD-421 MKII for $299.99 (list $485.00)(good, smooth sound);
Oktavia MC012 for $99.00 (list $499.00) (needs blast filter & phantom
power);
For mixers:
Behringer MXB1002 (10 channels, eq on each channel, phantom power, 100mm
sliders, XLR & TRS ins & outs) $119.00 (less expensive than Mackie and just
as good and feature packed) [I own one for sound reinforcement gigs and it's
very easy to use and the overall quality is great].
All of the products are available from www.musiciansfriend.com in Medford,
Oregon. Customer service is fast, complete, and won't take you for the
proverbial ride. (BTW: Musician's Friend is supposed to be owned by Guitar
Center, at least, that's what they told me.)

I agree with this. I would much rather have a regular radio, and I haven't
gotten the satellite radio fever yet. My only point was that there's a
market for it. Between NPR and one progressive station that's hard to get,
I'm still okay with broadcast radio. But I'm hanging by a thread. And it's a
shame, because WE own the airwaves, in reality.

The MC012 pops way too easily. If you want info on mics, check the Articles
Archive on my site.

Right now I'm using a Schoeps CMC6 body with MK41 hyper capsule a LOT for VO
work. It's the mic used most often as a boom mic for interior shooting on
movie sets.

WAAF is owned by Entercom, right? Is there any relationship between
Entercom and CBS/Infinity? It would seem odd that one company would help
another company, even in a different market. Or was Entercom unaware, and
this was Dopey and Anthony's way of giving notice?

> If you don't like it, just don't buy it.

I won't buy it, but whomever your "important stock analyst" is, he hasn't read the latest business news. He probably was pushing Enron last month too. Radioworld March 1, 2002 page 10 "XM RADIO'S LOSS WIDENS". XM Satellite radio said its net loss widened to $149.9-million in the rourth quarter of 2001. It posted a full year net loss of $284.4-million compared to $41.9 million in 2000". XM "expects" to have 70,000 customers by the end of March, but then they expected to be making money by now too.

Sorry but you XM employees who keep posting the rose colored glasses propaganda here aren't going to go unchallenged anymore. Not only won't I buy a receiver, I won't buy one because there may be no service to feed it by the time it gets installed and working. Losing at a rate of $284-million a year, this puppy ain't going to be around for much longer. But by all means Eduardo, buy that stock and install that reciever, you may not only be the first on your block, you may be the ONLY ONE on your block to have a receiver that picks up nothing.

The picture for XM by any stretch of the imagination is not good. You can't lose that kind of money every year and say, "hey the projections are good"!!! Where in the world did you get projections of "40-million" subscriptions??? Even the XM and Sirrius folks aren't telling that kind of story. The best case scenario I've seen anywhere is that they "expect" 350,000 subscriptions. 40-million? Whats your source. I've sited mine.

Yeah, hey, where do I line up to buy stock in this one? AHEAD OF PROJECTIONS????? My God what were the projections. $500-million loss?

Hey Eduardo, I've got an old Beta video machine, would you like to get a line on that one too? Honest, that VHS isn't going to be the one, Beta is the way to go! I'll sell it to you real cheap. $450 install, and then I'll only charge you $10 amonth for the tapes. What a deal!

I think your SHOULD support satellite radio.

Only through competition from sat radio will the values of ___real___
terrestrial radio stations be reduced to the point that "little people"
can again own stations.

Without this reduction in value, you will be left having to play "toy"
radio with Part 15, which can't be heard much outside your back yard, or
LPFM which won't find channels in most built-up areas even if allowed on
2nd adjacents.

Thanks Kimba, but you're using your intellect but if you'll notice, the XM employee's that post here are so defensive about any criticism, its actually entertaining to see how they react to facts. Here's why they are so afraid of any criticism.

Now Eduardo, I hate to contradict your well known "stoc (mean stock?) analyst", the facts are XM is in deep doo financially. Rather than quoting some un-named source, I'll give you my source. Radio World March 1, 2002 Page 10 "XM Radio's loss widens" (Washington) XM Satellite Radio said its net loss widened to $149.8-Million in the fourth quarter of 2001. XM POSTED A FULL YEAR NET LOSS OF $284.4-MILLION, compared to $51.9-million in 2000.

So they're "ahead of projections"????? What were the projections calling for, the $500-million in losses. "ahead of projections"???? How can you predict losing that kind of money?

I think anyone spending money on an XM reciever or buying programing for more than a week at a time is going to be stuck with a reciever that doesn't pick anything up and service they've paid for but can't get.

Clearly with loses at a 1/4 of a Billion dollars, this service is in serious trouble. I still can't find that projection of having 40-million listeners anywhere, did it come from that "Stock analyst" who recommended you buy this stock? By the way wasn't that they same analyst who said, BUY ENRON a month ago? Hey there's an "analyst" I want to put my money on. The only projections I can find for listeners come from XM and they're only saying they "expect" 70,000 customers by the end of March, and based on current sales, they ain't going to make that projection either.

You are right Eduardo, I'm not going to buy a reciever because at the rate the money is bleeding red at XM, there isn't going to be anything to hear with that expensive little add-on receiver or that multi-channel white noise you'll get when they turn off the switch.

$284.4-million in losses last year? Yeah, Sony is going to keep pumping money into this one. You know Sony loves to lose money. Its how they got to be such a big Corporation. Please, you're not posting in the XM lunchroom anymore Eduardo, you're posting on an International forum where your B.S. ain't going to go unchallenged. Where are your "70-million listeners" projections coming from? What were the "projections" for this year? $250-million in losses, so by being $284.4-million in losses is "ahead" of projections? The information is so confusing and contradictory!

And the devil is always in the details.

A lot of advertisers aren't very interested in people who "use the
radio." They want people who listen. Closely.

Just proving that someone was somewhere where a radio was on during a
168 hour period is not that astounding a feat!

Good points, all.

People think nothing of paying $4 to borrow a DVD or Video for a night, $4 to watch a movie on pay-per-view, or $150 to watch a season of football, basketball, baseball or hockey. They pay upwards of $40 a month for cable or satellite, and plop down $5-9 for a movie, or 5-20 times that much for a sporting event or concert. They pay $12-18 for a CD, and $22-70 a month for Internet access, and $30 a year for the average magazine. But they're going to balk at paying $10-15 a month for better radio than they get now for free?

Sorry, but someone will make money from this. unless we find some way to take back our airwaves.

I think that if they were able to remember enough to write it down or to
recall it in a personal interview, they were listening as opposed to
"hearing" radio.

Who's an XM employee? I know I'm not. I don't even own a receiver. But I
know I'm VERY close to ditching broadcast, because there is no content
useful to me anywhere on the dial. I don't care that statistics say that 95%
of the people listen to the radio; that's a crock. Yeah, when I drove to the
train station to go to work every morning, I listened to about 10 minutes in
the morning and 10 in the afternoon. Wow. Most of the time, if I'm going to
be in the car for more than half an hour, there's a CD in there. No one I
know listens to the radio; almost all of them listen to CDs.

Yeah, I remember they said the same thing when GM-Hughes came out with an
18-inch satellite dish.

XM (moreso than Sirius) has very deep pockets. I'm sure they will prject
losses for as much as a decade. But the thing is, if the radio thing doesn't

work out, they can use the transponder for something else. In the meantime, as their audience base grows, so will ad revenue. Most people are pretty sure we hit the bottom part of the advertising curve. If XM can get 10 million listeners, they'll do fine. And even if the market is a little soft on the East Coast, in the Southwest and the Rocky Mountain west, XM is a godsend. When receivers go below $100, they'll sell really well out there.

> So they're "ahead of projections"????? What were the projections

You might possibly be right. But don't speak as if it's a foregone conclusion. The pockets are deep enough to keep it going for at least five years, and in that time, anything can happen.
>
> Clearly with loses at a 1/4 of a Billion dollars, this service is in

Why? The companies that invested in it are heavily invested elsewhere, and they can write off these losses.

Well, it took DirecTv a few years to reach a million subscribers, and broadband Internet access is still behind projections. But it IS the future.

Satellite radio is very viable, if for no other reason than the huge radio conglomerates are screwing us royally with programming. Everything is homogenized, good air personaities are being squeezed out for people with no personality, talk radio has been taken over by people slightly to the left of Mussolini and there is little or no news or information content, except on NPR.

I would agree that 70 million listeners is a strecth in its current form,
but consider this;

When I'm home, and I want to listen wihtout putting in a bunch of CDs, I
listen to MusicChoice on the cable. Why is it inconceivable that they and XM
might merge, and create a listener base of 20-30 million overnight?

You're simply incapable of looking at the big picture. That doesn't mean
there isn't one. All new technologies lose money when they first appear.

XM does not expect to be making a profit until sometime in 2004 (late) or
2205.

I hope you don't invest on your own, because you certainly don't know how to
read financial reports or interpret financial data. XM was supposed to lose
moeny in Q-4 2001 because it had just started operations and had 0
subscribers going into the quarter. In business,that is called a "start up"
and startups are judeged on the cash burn vs. projections comparisons, not
on the bottom line as no money is comeing in.

In 2001, XM launched their satellites and built thier studios and
terrestrial repeaters; in 2000 they were barely operating temporating office
facilities. It is impossible to build a new technology business without
losing money at the beginning. All this was in thier business plan, open to
public scrutiny.

I bought XM shares last year; they are up over 300% since I bought them...

I've talked with employees at a variety of Best Bys, Good Guys and Circuit
City stores. XM equipment is moving at a higher rate than expected even in
radio-heavy LA where lots more formats are available than in most of the
USA. This sure looks like it is working to me.
>
> Sorry but you XM employees who keep posting the rose colored glasses

> that reciever, you may not only be the first on your block, you may be

> the ONLY ONE on your block to have a receiver that picks up nothing.

As stated, this loss was planned. Again: IT IS A START UP. SAtart ups burn cash and have no initial source of income. So they lose money. Have you priced a satellite launch lately?

> The picture for XM by any stretch of the imagination is not good. You
> can't lose that kind of money every year and say, "hey the projections
> are good"!!! Where in the world did you get projections of
> "40-million" subscriptions???

Kagen investors conference held in New York a bit over a week ago... some analysts looking for 40 million unites by 2010, others looking for about 60% of that. In either case, the break-even comes at less than a quarter of that level without factoring in ad revenues.

> Even the XM and Sirrius folks aren't
> telling that kind of story. The best case scenario I've seen anywhere
> is that they "expect" 350,000 subscriptions. 40-million? Whats your
> source. I've sited mine.

That is by mid-year 2002. Which is right on track with the business plans.
>
> Yeah, hey, where do I line up to buy stock in this one? AHEAD OF
> PROJECTIONS????? My God what were the projections. $500-million
> loss?

NO, the projections were for around $250 loss in 2001; they did pretty well considering that 9/11 pused back their service launch and ad campaign. You can buy XMSR or Sirius stock from any broker.
>
> Hey Eduardo, I've got an old Beta video machine, would you like to get

I think I understand what your saying. Basically if Satelite Radio takes-off
Terrestrial radio becomes Shortwave!! You might be right. Sort-of a slow
obsolesence where the $$$ is no longer there and thus lobbyists are no
longer interested!!

You know? your just might have something there.

I don't wont XM (I pay for internet already), but maybe I should hope it
does well for the above reasons. Thanks for making me see this, I think your
right.

You have some "facts" [some of them wrong] but you don't seem to
understand the reasons.

For the last year or two XM has projected a break-even date at the end
of 2003 or later, IIRC. Perhaps their introduction date has slipped a
year from some of the "facts" you have seen.

I'd certainly expect that XM's loss for last quarter 2001 to be WAY
higher than the last quarter of 2000, since they hadn't hired the
programming staff or launched their satellites until early/mid 2001. A
company that's actually operating spends more money than one that is
still mostly a shell as they were in much of 2000.

Since XM radios weren't available nationwide until half-way through the
last quarter 2001, how would you expect them to be gaining much
subscriber income in that quarter? It would be a miracle of the ages if
XM _WERE_ making money at the moment.

Will XM need more capital before they break even? Yes, they say they
will.

[You can generally substitute "Sirius" for "XM" in the above discussion,
except that Sirius is running 6 to 8 months behind XM in nationwide
receiver availability date, etc.]

I'm too conservative to invest in sat radio broadcasters, but I really
enjoy my XM receiver.

>Yeah, what was that McNobody's name again? Orson...uh...Welles?<

That was...what? 1938? Wrong example. In the aftermath of "War of the Worlds," there were lots of calls in Congress for CBS's "head" on a platter...and there was no "hoax" rule at the time. It was only when hoaxes began to appear regularly on radio that the FCC felt compelled to make a rule prohibiting such things.

Of course, in Dopey and Anthony's case, we can now see how hoaxes are rewarded...with a job in a larger market.

Geez... Ford lost a billion dollars a couple of years ago. Guess I'd better
dump my stock, huh?

Losses such as these are fairly common when a new technology is being
introduced. That's why huge companies finance the start-up. It costs money
to fly a satellite, hire talent, hire engineers and salesmen and all of
that, at a time when you can't expect any real income. Expect the cost of
receivers to be halved in a year or so, and the number of buyers will
increase, which will make for increased revenue from ads. And like I said
before; there are opportunities for relatively quick growth in several
areas. For example, if you have digital cable or satellite, there is a music
service on there that is excellent. There are about 40 channels of music

available, and there is room to expand it to talk or news or whatever, if need be. If I were XM or Sirius, I might think about merging with them, and taking advantage of the millions of listeners there, or even making deals with cable and satellite companies in some other way. There are many ways to sell this thing. Bottom line; any salespeople with large territories, truckers and people who spend a lot of time in their cars are a pretty large start-up market. And once they make the system more portable, to take to the beach or camping, or whatever, there's another large market.

This is a pretty viable idea, under the circumstances. And the more the large media corporations consolidate and homogenize, the more viable it'll become.

>Is there any relationship between Entercom and CBS/Infinity? It would seem odd that one company would help another company, even in a different market.<

One company fired them, and another company hired them, so the two must be in cahoots with each other? Please.

>Or was Entercom unaware, and this was Dopey and Anthony's way of giving notice?<

You misunderstand completely what this is all about. O&A's brand of radio is one in which there are absolutely no sacred cows. Nothing is above ridicule. Nothing. Announcing falsely that the mayor of Boston was dead was just another on-air prank to them, and their audience thought it was hilarious. I'm not defending them....I found it to be beneath contempt...but it obviously works for them and their audience. They were certainly not expecting to be fired.

A perfect example was what they did to Robert Clary, who played Cpl. LeBeau on "Hogan's Heroes," and who, as a French Jew, survived the concentration camps. He had just written an autobiography a little while back, and his agent booked him on O&A's show. He was treated to constant interruptions with questions about his sexual preference, and recordings of what sounded like Hitler in the background. (Actually, it sounded like Opie was a bit out of control on that one, and Anthony was trying to reel him in. But, for all I know, that could have been part of the act.) Clary was so angry and disgusted that he hung up on them. This was a serious subject, and they ridiculed a person who didn't deserve it. But, it was a perfect example of what they do on a daily basis.

See my other post. And then expelain how a start up with an expensive new product and no customers is supposed to make money in the period before beginning to offer the product to the public (or whatever consumer group it may be aimed at).
>
> So they're "ahead of projections"????? What were the projections
> calling for, the $500-million in losses. "ahead of projections"????
> How can you predict losing that kind of money?

Yes, the losses were soupposed to be greater. And the subscriptins by year-end were supposed to be fewer. They are ahead of projections on both counts.

>From the highly rated Morningstar review (and abbreviated since it is a paid service):

Valuation
Giving XM a market cap of more than $1 billion, investors appear to believe the firm will be a viable, cash-flow-generating business at some point. Without sales or earnings, though, there are few metrics to value XM.

Growth: NA
XM has only been operating its service nationally since November 2001, so growth measures are irrelevant. However, the firm has signed up 30,000 subscribers at $10 a pop per month, despite not yet offering the service via the carmakers.

Profitability: D
It'll probably take several years and a lot more subscribers for XM to break even. XM sustained operating losses of almost $150 million through the first three quarters of 2001; sales will only start hitting the books in

December.

>
> $284.4-million in losses last year? Yeah, Sony is going to keep

> information is so confusing and contradictory!

You just made the 40-million high end 2010 projection by an investment analyst into 70 million. No need to trust your analytical ability, as you have shown yourself to have none at all. In any case, I think I have said it before: XM and Sirius are start-ups and they were expected to lose money. The backers of XM are in for the long haul, and they have the capital commitments to continue to lose money until profitability is achieved about 3 years from now.

In a different light, consider whether we would have FM now if many station operators had not been willing to operate FM stations at a loss for many years until the band caught one. They had the money, they had the vision and they had the patience. I lived this era, and had the opportunity to put the first FM in another country on the air when the band was totally empty... I lost money for years. But when FM "happened" I was there with 5 operating FMs in one city! I knew I would lose money, and, like XM, I believed in the product. I believe in XM today. Predicting consumer behavior is risky in any case, but this one has a good product and a great launch.

I think all of this hyperbole about how XM is "ahead of projections" and expect 70-million listeners needs to be addressed. Like others here, I too have been amused by the number of XM employees who go into a feeding frenzy any time someone questions the service.

Here are the facts and I will cite my sources unlike those who have made these outlandous speculations about how "successful" XM is or will be.

Radio World March 1, 2002 (Washington, DC) XM RADIO'S LOSS WIDENS - XM Satellite Radio said its net loss widened to $149.8 million in the fourth quarter or 2001, from $19.8 million for the same period the year before with no reported revenues in 2000. XM POSTED A FULL-YEAR NET LOSS OF $284.4 MILLION compared with $51.9 million in 2000. It is expected to have 70,000 customers by the end of march and 350,000 by the end of the year.

Darn, I can't find that 70-million projected Eduardo claims. And if XM is "ahead of projections", one can only wonder if they were supposed to lose $300-million or 1/2 a billion????

With losses like this, one can only wonder how long Sony will bleed these kinds of losses before turning the switch "OFF". So go ahead Eduardo and you XM employees who pounce on anyone that doesn't give a glowing revue, but you better be getting your resumes together because you can't lose $284.4-million and stay in business.

Those receivers might come in handy for those who have trouble sleeping, as white noise is said to induce sleep!

XM ahead of projections? Not in your wildest dreams and that "stoc analyst" you quoted, wasn't he the same one telling everyone to buy "Enron" a few months back?

I could go on and on in agreement with you.

However ... different thread, different topic for another time.

I said this before -- when a new technology emerges, one has to think of the old expression 'Cui Bono'? Which means, "who's gonna benefit from this?"

If a new technology emerges - if the only people who benefit from it are the people who produce it and sell it, then the marketplace usually dictates that it will die out. Very quickly. One notorious example = the bizarro DivX video rental system. When competing against the local video shop, and pay-per-view -- it didn't fly. The marketplace didn't accept it.

Will the public accept subscription radio? It remains to be seen. Will they pay $300 for it? Will they perceive this to be better than what they have today?

Finally - will it be required that satellite radio be installed in all new cars? Does Sony have the clout to get Congress to require it? I don't think so....

This service is in its infancy even though it's been on the drawing board for a decade or more.

Right now, it's just too expensive for the vast majority of consumers (including me.)
Most new technolgies start out very expensive and drop in price over the next few years. I have no doubt that will be the case with satellite radio. When that happens, I'll likely get a radio.

I think it's far too early to predict either the demise or great success of this service.

I can tell you about May '78, with the help of my V1.N1 of the briefly published bimonthly NY Radio Guide.

WNEW-AM lineup is Ted Brown, Wm B Williams, Bob Fitsimmons at 1, Jay Lawrence at 4, Jonathan Schwartz at 8, and Bob Jones and Jim Lowe on the Milkman's Matinee.

WNEW's format is "Contemporary Adult MOR". I'm pretty sure Schwartz was rekindling interest in standards during the evening show by then. Email him at WNYC and ask. Wm B. Williams always played Sinatra and Bennett, but I remember some songs on his show summer of '79...Eddie Rabbit (Suspicion...he used to say "That's Edward Thomas Rabbit" in the Williams manner), Spiro Gyra, Dionne Warwick, Dr. Hook (he'd say "the good Doctor...and when you're in love with a beautiful woman, it gets pretty hard..."), and Vic Damone and Parker & Penney aka Steve & Eydie had a bit of play from new nostalgia LPs.

Some future stars in May '78...Stern at 10 AM on WRNW Briarcliff Manor...Bob Pittman, looking like your college roommate, advertising the new and different "like FM on AM" WNBC 66...27 year old John R Gambling just arriving at WOR...Ray Suarez doing afternoon rock on WNYU...Larry Kleinman, later my boss on computer projects, doing mornings on WLIR...future TV newscaster Bree Bushaw looking awfully fetching in a WYNY ad...Jay Thomas of sitcoms still morning man on WXLO...Sally J Raphael on WMCA.

Bill Fromm published the magazine out of Glen Head, any other questions from that period ask away and I'll check.

XM is not owned by Sony. Sony is a shareholder, as are Huges
Satellite/Boeing, GM, etc. Even Clear Channel has 4%.... there are a
half-dozen mutual funds with over 3% each, with 3 over 5% and one over 7%.

Hmm. I looked at the major non-fund investor list and Sony is not even there! Sony is a marketing partner, not an investor. "Marketing Partner" is just a name XM invented to describe the car manufacturers, after market retailers and receiver manufacturers who are providing product and sales for the system. Check it out:

http://www.xmradio.com/corporate_info/strategic_partners_category.jsp?catego

It depends. For salesmen and truckers, it seems like it would be a godsend.
If I'm driving from St Louis to California, and I can listen to the same
stations in excellent stereo the entire way, I can see it being very viable.
Likewise, if I live in a small town, with two decent radio stations
available to me during the day, it's worth it to me, as well. Also, if I
live in a city with 25 radio stations, and the only news is NPR, and I might
want to listen to something else, it's a pretty good deal. Not only that,
but if I like differnet music than the homogenized drivel that comes from

most radio stations these days, which is most of the rest of the population, it's very viable. I'm not sure I buy the 70 million number, but I see 20-30 million being realistic.

Dear Robert:

As I checked out your geocities page, I noticed you had the 'PLJ "collage" as you called it. It was properly called a "Montage" and they used it as their TOH ID during their AOR days in late 79 and 80. The station was very compressed to a point of pumping and breathing. (The engineers affectionately called it, "Pulsating DC") They would play about 30 seconds and follow it with "My Sweetheart" by Focus and voice over as a setup for the next hour of music. They were hot and ran all over WNEW-FM at the time. I have a copy of Pat St. John playing it all the way through one October evening in 1979. It runs about 20 minutes and I have been considering donating a copy to 440. There was an updated copy as they got studio time to cut some more but it was a variation on a theme still very well done.

Apparently losing $284-million a year, NO ONE IS MAKING ANY MONEY from this XM venture. I'm surprised that all the folks who keep hyping it, won't comment on the factual financial information that a couple of us have posted here. There is no comparison to Turner in the 70's or DVD's or renting Ski equipment at Big Sky or Bowling Shoes. The fact is, XM is losing money at a rate of over 1/4-Billion Dollars a year. No one is making any money except the retailers and if the service goes south, as its looking like it will, there are going to be a lot of Circuit City and Best Buy folks who want their money back on a receiver that doesn't pick up anything.

So what do the Rose Colored Glasses of the XM employees see in the future of a company that loses $284-million a year? You guys really aren't expecting Christmas bonuses this year are you?

Dear Chuck:

With regard to Mexican calls, you are correct the XE- and XH- are the agreed on standard for Mexican calls. The E and H are dropped because nobody can relate to 5-letter calls. They barely tolerate 4-letters. However what is interesting is that Baja is still being used as the COL. We started that back in 1978 on 91X/690XTRA. As soon as we turned the FM blow torch on, we went from a 1kw downtown Tijuana antenna to the 100kw up the muddy hill, we went from "XETRA Tijuana, Mexico" to "XETRA-FM, Baja California, Mexico." This was done in Spanish with a female voice. We ran it at :20 and :50. It was the only recorded legal ID I know of that long ago that had a female voice. It may have been the first. But I may be mistaken.

My son graduates from the Marine Corps Boot Camp at MCRD in San Diego on March 29th so I am looking forward to the excuse to go back there for a couple of days. I am going to tax the patience of both of my digital camera and audio tape recorder.
:-)

998. KKEZ/Fort Dodge, Iowa TOWER COLLAPSE!

Newsgroup: rec.radio.broadcasting
Date: 2002-03-20 02:16:49 UTC
From: mnmaniac@aol.com
Message-ID: <u9fs8h5dm2jnb4@corp.supernews.com>
Source record: 11560

This apparently happened yesterday. Not a huge tower, but at nearly 700 feet, it was certainly a landmark around the Fort Dodge area. You can see pics at their website (www.kkez.com)

Of interest to DX'ers: this tower also served as part of KWMT-AM 540's 2-tower directional array. As many of you know, KWMT has a sharp null to the north, protecting CBK in Regina, Saskatchewan. This is why KWMT has huge coverage south, but not much to the north.

Now using just the one tower, KWMT is apparently non-directional. If you're in Minnesota or western Wisconsin, dial up 540 during the daytime and you should be able to hear a strong signal from KWMT, which is usually non-existent in your area.

Also, since KKEZ is operating at severely reduced power, KS95/St. Paul/Minneapolis should now be able to be heard in much of north Iowa.

5-letter calls.

Of course, this applies to English usage only. In Spanish, no one uses the calls as an identifier anyway, so the calls don't matter.

XE is the prefix for all AMs and early FMs. All FMs int he last 30 years have calls that start with XH-.

Mexico allows up to 6 letter calls, an example being XERASA.

> They barely tolerate 4-letters. However what is interesting is that Baja
is still being
> used as the COL.

And, in fact, "Baja" is neither a city or a state. It is a peninsula. "Baja California Norte" is the state that those stations are in, and the license is to Tijuana. They are breaking Mexican regulations, but I doubt that anyone really cares. The IDs on the Spanish stations in Mexico are strictly enforced.

Of course they aren't, not yet.

> I'm surprised that all the folks who keep hyping it,

> have posted here.

We have. It's a start-up. Any financials will include heavy losses. And
there is a good chance XM may go down. But there's no way satellite radio's
going away.

All start-ups that have to put a satellite into orbit and place a ton of
hardware and software into the market just to get it to work, and have to
hire personnel to man it and run it are going to spend a lot of money before
they start seeing revenues. If you think the financials of a company that
has the enormous start-up costs this has, and has only been generating
revenue for a quarter, is relevant, then you are ignorant when it comes to
investment. XM won't go under; if anything happens, it will be bought out or
merged into somehting else.

> There is no comparison to Turner in the 70's or
> DVD's or renting Ski equipment at Big Sky or Bowling Shoes. The fact
> is, XM is losing money at a rate of over 1/4-Billion Dollars a year.

No, it lost that much in one year. That's not a rate.

> No one is making any money except the retailers and if the service
> goes south, as its looking like it will, there are going to be a lot

Okay, I'll bet you an XM receiver that the company, at worst, gets bought
out or merges. The technology isn't going anywhere.

Think about it another way; if they lost this kind of money, someone put
that money up. Know what that means? Those people will be working hard to
get their investment back.

I doubt that anyone here works for XM, and it's becoming obvious that you're
a troll, so this will be my last response.

> DVD's or renting Ski equipment at Big Sky or Bowling Shoes.

The comparison is with CATV (now called Cable) or with DTV. The start up subscription rate for XM has been described by Fortune Magazine as the fastest out of the gate in the field ever seen.

DVD's are a product while XM is a service; Turner's Channel 17 in Atlanta was a local UHF station that uplinked and introduced the idea of second tier channels to cable. Neither are comparable with satellite radio.

> The fact
> is, XM is losing money at a rate of over 1/4-Billion Dollars a year.

The folks at XM and thier investors knew this years ago. What took you so long to pick up on it?

> No one is making any money except the retailers and if the service
> goes south, as its looking like it will, there are going to be a lot
> of Circuit City and Best Buy folks who want their money back on a

Do a refresh on the posts in this group. I have answered your erroneous assumptions several times with cold, hard facts. Please read before posting again, OK?

Or go to any entrepreneurial website and look at how long start up businesses with new products usually spend losing money. I think one example often cited is Cordis, an early manufacturer and designer of pacemakers; they lost money for over 5 years.

>
> So what do the Rose Colored Glasses of the XM employees see in the

> aren't expecting Christmas bonuses this year are you?

I'll bet those who do work at XM (I don't) do get bonuses based on the faster than anticipated subscription rates. Since XM only started selling subscriptions 4 months ago, how could they NOT have lost money in 2001? Have

you priced a satellite launch lately? They plan to lose money for 3 more years. It is a start up.

My 1997 Ford Explorer pickup truck has developed an RF buzz that has made AM listening all but impossible unless I am within sight of the station's tower. Whenever the engine is on, the pitch of the static buzz increases and decreases with the acceleration. When the engine is shut off, the buzz goes away. I'm assuming it is caused by some component aging because when I first bought the truck it didn't have this problem.

My question is: what part of the engine and/or electrical system could be causing that sound? What part should be replaced? Is there an available patch for the electrical system that would remedy this problem? Any information from someone who knows about engine RF would be greatly appreciated.

>I have answered your erroneous
>assumptions several times with cold, hard facts.

Just because I don't agree with your pie in the sky predictions doesn't mean anything I've posted is either an "assumption" or "erroneous". In other words Eduardo, you aren't the last word on XM and I HAVE POSTED FACTUAL FINANCIAL INFORMATION ABOUT THE INCREDIBLE LOSSES this company is suffering. I've cited my sources, YOU HAVEN'T. You keep making references to "stoc analysts'" but won't name them.

I know XM is a "start up" but not even you can convince me or anyone else that has a working brain cell that they expected to be losing over a 1/4-Billion Dollars at this point. What is "Fortune" basing its analysis on since they've only been on by your own admission 4-months? XM itself was predicting only 70,000 subscribers by the end of March. They ain't going to make it at this rate. You huffed-n-puffed about 70-million subscribers but never shared where that figure came from either.

If you don't work for XM, why all the "don't look at the man behind the curtain" predictions? Sorry but your busted. And the XM hype ain't making money and the sorry promotional campaign isn't going to get you close to projections. I love the disclaimer at the end of the ads, "special equipment and subscription sign up fee, additional installation plus monthly fees are required". To try to compare what Turner did to XM is laughable. Hell, to think anything bleeding $284-million in losses is going to work is making my sides hurt, I'm laughing so hard.

You haven't refuted anything with any facts at all. I've been the only one to cite my sources and XM is so far in the Red Ink I understand the CIA thinks the KGB is running the place. Come back when you've got more than hype and tripe. With only 30-commercial free channels, out of over 100? Remember Lincoln said, "you can fool some of the people some of the time, but you can't fool all of the people all of the time". You haven't fooled me!

Try this release from Tuesday for "fact content."

Tuesday March 19, 5:55 pm Eastern Time
Press Release
SOURCE: XM Satellite Radio
XM Satellite Radio Statement in Response to Today's Wire Service Stories
WASHINGTON, March 19 /PRNewswire-FirstCall/ -- The following was released by
XM Satellite Radio (Nasdaq: XMSR - news) today:

a.. (Photo: http://www.newscom.com/cgi-bin/prnh/20000724/XMSATLOGO)
Today, a Dow Jones reporter who does not regularly cover XM Satellite Radio
wrote a story quoting an auditor's opinion contained in XM's 10K for 2001,
which included a standard phrase for companies that do not have 12 months of
funding, noting the company's ability to ``continue as a going concern''
depends on continued fundraising.

The story and particularly its headline prompted other stories, leaving the
impression that there was a new and troubling financial development at XM,
causing a drop in the stock. In fact, the auditor's opinion contained in
this year's 10K is identical to those that have appeared in every XM 10K
since it went public in 1999. The same language has also accompanied every
offering document, and has been a part of all of XM's public financings.

XM wishes to reaffirm the company's confidence in its ability to raise
sufficient capital to fund its operations on an ongoing basis.

XM encourages investors to read its full 10K filing, in which the company
reported on its activities in the last year, during which XM successfully
launched its service nationwide, raised $382 million in financing, and
acquired approximately 28,000 subscribers ending December 31, 2001, ranking
as the fastest selling audio product introduction in the last 20 years
according to the Yankee Group.

The company also reaffirms today its confidence it will hit its 1Q ending
subscriber target of 70,000 customers.

Factors that could cause actual results to differ materially from those in the forward-looking statements in this press release include uncertainties associated with demand for the company's service, the company's dependence on third party vendors, its continuing need for additional financing, as well as other risks described in XM Satellite Radio Holdings Inc.'s Form 8-K filed with the Securities and Exchange Commission on 12-6-2001. Copies of the filing are available upon request from XM Radio' s Investor Relations Department. ``

Read XM's 10-K whihc is available via Edgar or through Yahoo Financial. They predited these loses, they are normal for a start up and the company is ahead of projecitions on revenue as it begins to market the service. I also quoted Morningstar's analysis overview which also confirmed that the business was a startup. Startups lose money. Period.

The info you posted is consistent with what SM projected two years ago! That is the information investors used to buy stock which is the principal way that XM has financed its operation to this date.

>
> I know XM is a "start up" but not even you can convince me or anyone
> else that has a working brain cell that they expected to be losing

> 4-months? XM itself was predicting only 70,000 subscribers by the end
> of March. They ain't going to make it at this rate.

Thay had that by the end of January.

XM's pullic filings with the SEC and in thier IPO and subsequent equity offerings showed they would lose hundreds and hundreds of millions on operations, and need over 1.5 billion in capital for non-expensible start up capital expenses. Go to a financial page and look for the 10-k and the stock filings. All the information has been in the public domain for years. Including the projeciton of a loss of around a quarter billion in 2001. Hey, Amazon lost 4 times that in 2000.

>You
> huffed-n-puffed about 70-million subscribers but never shared where
> that figure came from either.

I never quoted 70 million. You invented the number in one of your posts. The 40 million figure I mentioned is the high end estimate by one analyst at the

Kagan conference held in NY a couple of weeks ago. DO some research; there are extracts available on theweb, although the full transcript costs a couple of $thousand. The low end estimates were 25 to 30 million subscribers.

>
> If you don't work for XM, why all the "don't look at the man behind
> the curtain" predictions?

I don't. I work for several radio owners and for a syndicator. But I have never received a single cent form XM. I don't work for them.

>Sorry but your busted. And the XM hype
> ain't making money and the sorry promotional campaign isn't going to
> get you close to projections.

Wrong. they are ahead of projections.

> I love the disclaimer at the end of the
> ads, "special equipment and subscription sign up fee, additional
> installation plus monthly fees are required". To try to compare what
> Turner did to XM is laughable. Hell, to think anything bleeding
> $284-million in losses is going to work is making my sides hurt, I'm
> laughing so hard.

You brought up Turner: I told you that that is a very inappropriate comparison. The right ocmparison would be with CATV or DTV. Both required hardware at an initial high cost, plus monthly fees. Still do, too. And very successful they are.
>
> You haven't refuted anything with any facts at all. I've been the
> only one to cite my sources and XM is so far in the Red Ink I
> understand the CIA thinks the KGB is running the place.

I told you the loses were predicted and are normal. Again, go look for the XM For 10-k report and look at the disclosure that says that they willnot be making money for a significant period of time.

> Come back
> when you've got more than hype and tripe. With only 30-commercial
> free channels, out of over 100? Remember Lincoln said, "you can fool
> some of the people some of the time, but you can't fool all of the
> people all of the time". You haven't fooled me!

No one is trying to fool you. You have some kind of misunderstanding about how entrepreneurial business work. Did you read my statement about Cordis? Or look at the financials via Yahoo? All the stuff I'm saying is in plain view. In fact, if you go to "investors" on the XM website, it says the same thing. It is not supposed to make money yet. It could not possibly do so. It will have a high burn rate for several more years. The business model contemplates this.

I have a 89 Ford Aerostar. The whining which increases with acceleration is comming from the altenator. Most other whistles come from the computer. You probably developed bad grounds and/or your stock rf filtering is failing. I'd take this complaint to a Ford dealership. They should know what areas to check.

Amateur Radio Newsline Report 1283 – March 15, 2002

Amateur Radio Newsline report number 1283 with a release date of Friday, March 15th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Restructuring at the FCC should not impact on Amateur Radio and a first for the Dayton Hamvention. These stories are first on Amateur Radio Newsline report number 1283 coming your way right now.

(Billboard Cart Here)

**

REGULATORY ISSUES : FCC REORGANIZES LATER THIS MONTH

A reorganization of the Federal Communications Commission is set to become final later this month. This, as the agency stresses that realignment of responsibilities between various bureaus will make it more efficient and help it better respond to a changing technological marketplace. Amateur Radio Newsline's David Black, KB4KCH, takes a look at some of the changes.

--
It's an independent government agency that reports directly to Congress. It's mission is to regulate communications. One of the services it oversees is Amateur Radio, but most observers of the reorganization of the Federal Communications Commission see little impact on hobby communications.

As part of the reorganization a new Media Bureau will combine the duties of the current Cable and Mass Media bureaus. The goal of the combined bureau? To treat competitors of multiple entertainment delivery systems equally and consistently. This includes broadcasters, cable operators and satellite service providers to name only a few.

Other changes include a renamed Consumer and Governmental Affairs Bureau. Also, a realigned International Bureau still will handle satellite licensing but most policy issues will now be the domain of the newly created Media Bureau.

These are just a few of many changes taking place. Most appear aimed at commercial interests. For ham radio, C-B, G-M-R-S and most two-way radio users the shift will probably be transparent. In other words, for these spectrum users and most others, it looks like business as usual within a soon to be restructured FCC.

>From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline. Don.

--

Congress endorsed the plan late last year. The FCC then approved the overhaul in January. The changes will take effect March 25th. You can read more on the web at www.fcc.gov. (ARNewsline (tm) from published news reports)

RADIO LAW: FCC REFUSES TO SIDE WITH CB'ER IN LOCAL CITATION CASE

The FCC has refused to hear an appeal by an Illinois C-B operator who was convicted of Disorderly Conduct for using an 11 meter Class D Citizens Band Radio. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--
Gary D. White is among the first C-B operators dinged under a new authority granted by the Federal Government to states and municipal law enforcement agencies. Authority to control interference caused by operators of Class D 11 Meter C-B radio sets.

White was convicted on a state Disorderly Conduct charge of operating his C-B equipment in an unreasonably loud, offensive, harassing or threatening manner. He was not convicted of violating any FCC rules. White believed that the citation was based on interference to a neighbors telephone and television receiver. This in itself is not a violation of FCC Part 95 rules. And because of this he also believed that local authorities had no justification to sanction him. So he appealed the conviction to the FCC.

But the FCC says that the proof of guilt on the Disorderly conduct allegation is not in its preview to consider. This is because no FCC rules were violated. Also, under a law enacted by Congress in November of 2000, state and local governments are free to enact laws to enforce existing Part 95 Citizens Radio Service rules.

Bottom line. The FCC will not interfere in the case and White will have to find other avenues if he wishes to continue his appeals.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

Congress enacted the law to give state and local authorities enforcement authority over 11 meter C-B operators due to the rising tide of unnecessary and harmful interference to other people using radio devices in near-by spectrum. This includes corded and wireless telephones, television receivers, stereo Hi-Fi sets and other consumer electronic gear. Ham radio is specifically exempted from the law and any ordinance it may be used to create. (W5YI Report)

**

HAM RADIO RIGHTS: NM. AND W.VA. JOIN THE PRB-1 BANDWAGON

The ARRL Letter reports that New Mexico and West Virginia have become the 14th and 15th states to adopt pro Amateur Radio antenna bills based on the limited

federal preemption known as PRB-1. Amateur Radio Newsline’s Jeff Clark, K8JAC, reports:

We have this report:

--
In New Mexico Governor Gary Johnson signed House Bill 314 on March 5th. This, after it easily passed both houses of the legislature last month with just two opposing votes during a short session that typically only deals with appropriations bills. Called New Mexico's "Emergency Communication Preservation Act" the measure was sponsored by State Representative Mimi Stewart and Senator Ramsay Gorham. It stipulates that municipal or county ordinances regulating Amateur Radio antennas cannot obstruct or preclude amateur radio service communications. Also, that such ordinances shall reasonably accommodate amateur radio service communications.

Here in West Virginia Governor Bob Wise signed House Bill 4335 into law on March 7th. The bill provides that antenna structures may be erected at heights and dimensions sufficient to accommodate amateur radio service communications but does not include a minimum regulatory height schedule. The measure also exempts Amateur Radio antenna towers constructed prior to the effective date from subsequent zoning regulation changes.

>From Charleston West Virginia, I’m Jeff Clark, K8JAC.

--

In signing the West Virginia bill into law, Governor Wise, whose late father held the call sign W-A-8-A-Y-P, also proclaimed March 7 as Amateur Radio Operators Appreciation Day across the state. (ARRL)

AMERICA AT WAR: NEW TERRORISM ALERT SYSTEM

The United States has a new color-coded terrorism warning system. It was revealed on Tuesday, March 12th by Homeland Security chief Tom Ridge.

The five-level system is a response to public complaints that broad terror alerts issued by the government since the Sept. 11 attacks raised alarm without providing useful guidance. The lowest-status warning is green, followed by blue, yellow, orange and red as the perceived dangers intensify.

As the terrorism warning system was unveiled, Ridge said that the nation is on yellow alert. This means that the United States is facing a significant risk

of danger but not the highest stage.

The alert system is in force immediately for federal agencies, and Ridge is urging state and local governments to adopt it, too. It will be subject to a 45-day comment period, after which it probably will be revised. It's not known what part if any Amateur Radio will play in the new enhanced terrorism alert scheme. (Published news reports)

**

ENFORCEMENT: TAKE THAT UNCOORDINATED REPEATER OFF THE AIR

The FCC has told the operator of an uncoordinated North Carolina repeater to stop interfering with a coordinated machine, even if it means immediately taking his system off the air. This is the edict handed down to the operators of the NY4X repeater by FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth, K4ZDH.

--
Hollingsworth: " We also notified Richard Howell, NY4X, of Greer South Carolina and John Parker, AG4AZ, of Brevard Norrth Carolina that upon reciept of the letter, the NY4X repeater that they operate had to either shut down, obtain coordination or submit a detailed plan to the Commission to prevent interference to the KU4OL [repeater]."

"Now this interference has been going on for quite some time. We notified Parker and Howell back in November that something had to be done. Nothing was accomplished in regard to coordination and nothing was done in regard to the interference."
--

Hollingsworth letter says that Howell and Parker had more than ample time to fulfill their obligation under Section 97.205 of the Commission's rules. And late word is that the repeater has been shut down. (FCC, RAIN)

**

ENFORCEMENT: TAKE THAT BROKEN REPEATER OFF THE AIR

The NY4X repeater is not the only machine currently under FCC scrutiny. Another one is in Northern California. This one is having technical problems and is causing interference to machines on adjacent channel pairs. Again, the FCC's Riley Hollingsworth, K4ZDH:

--
Hollingsworth: "We notified Wendall Peterson of Walnut Creek California, operator of the K6POU repeater that more than enough time has elapsed for him to correct the technical and control problems with the repeater. His earlier response to our inquiry showed that the bandwidth was indeed so wide that it caused problems to two other repeaters. We have gotten complaints about that. And the repeater system is just not operating in accordance with good Amateur practice."
--

Hollingsworth says that his office expects the problems with the repeater to be corrected or that the machine will be taken off the air. He also gave Peterson 20 days from the date of his letter to respond. (FCC, RAIN)

**

ENFORCEMENT: THE RESPONSIBILITY OF REPEATER OWNERS

The FCC enforcement involving the NY4X and K-6POU repeaters are just the latest in a series of actions aimed at cleaning up the problems that have been plaguing the F-M community. Whether it's an uncoordinated repeater causing havoc to a coordinated machine, or a long established system in need of maintenance, the FCC's Hollingsworth says responsibility comes with repeater ownership:

--
Hollingsworth: "We want to emphasize that repeaters are voluntary. Nobody has to put one up. But if you do put one up you have a responsibility to maintain it, to get coordination if that's necessary, and to operate in accordance with good Amateur practices, especially if other repeaters are being detrimentally affected."
--

In reality, the only things the FCC is asking of those who own and operate repeaters is to be good neighbors and to adhere to the proper technical standards. In this way, the repeaters themselves can better serve their service area and the ham radio community in it. (FCC, RAIN)

**

RESCUE RADIO: KNOWING WHERE YOU ARE IN THE MID WEST

If you drive the highways and by-ways of Kentucky, you need never worry again about where you are. And if you get in a bind, rescuers will be able to find you. That is, if you are a ham radio operator equipped with a mobile APRS station. Jack Parker, W8ISH, of Amateur News Weekly, says that in his part of the world it is a mode that is truly coming of age:

--
Good news from the Kentuckey Automatic Position Reporting Society" their network of APRS digipeters is growing like well bred Kentucky Race Horses.

According to Brian Walker, KC4FIE, several new sites will be coming on line very soon. New digi's are planned for Grand Rivers, Morgantown, Owensboro, Lawrenceburg, and Dry Ridge to name a few.

The Murry State University club has added a digipeter and two stations along the Kentuckey – Tennessee border have extended APRS coverage into that state. These efforts effective extend the Mid-West network of APRS digipeters established by the Tri-State Working Group in Ohio, Indiana and Illinois.

If you need more information on the Automatic Position Reporting System just check the APRS Working Group website at www.tawg.org.

Reporting for Amateur News Weekly, this is Jack Parker, W8ISH.

--

With interest in A-P-R-S growing and ham gear that includes the mode as a standard feature, look for a defacto nationwide network to be in place by the end of the decade. (ANW)

**

HAMVENTION 2002: HAM TESTS WILL BE AT THE HARA

The Dayton Hamvention has asked that we pass along a correction to some information in its recently mailed pre-show brochure. The pamphlet incorrectly lists Meadowdale High School as the venue for Amateur Radio license exams. This is incorrect. The Hamvention says that all license exams will be held at the HARA Arena Hamvention site. (Hamvention(r))

**

HAMVENTION 2002: QCWA BANQUET

And attention QCWA members. This years annual banquet in conjunction with the Dayton Hamvention will be hosted by the South West Ohio chapter and will be held on Friday, May 17th. The venue is Alex's Continental Restaurant near Miamisburg. Starting time is 7:30 P.M. and reservations are required.

This years speaker will be General Raymond Moorman. He will be talking about the United States Air Force Museum and plans for the upcoming Centennial of Flight celebration in 2003. For more information and to make reservations please contact Ed Sonnanstine by e-mail to EdSonny@aol.com (QCWA)

**

CONVENTIONS - UTAH: UTAH HAMFEST

The 2002 Rocky Mountain Division ARRL Convention and 2002 Utah Hamfest will be held July 12th to the 14th at Ruby's Inn at Bryce, Utah. The venue is near Bryce Canyon National Park. For more information please visit www.utahhamfest.org on the world wide web. (Utah Hamfest)

**

CONFERENCES: ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Technical papers are being solicited for presentation at the 21st Annual ARRL and TAPR Digital Communications Conference. The event will be held this September in Denver, Colorado. Presentations will also be publicized in the Conference Proceedings. Submission of papers is due by August 5th and in-person presentation at the conference is not required for publication. Conference registration and additional details are available on the web at www.tapr.org/dcc (TAPR, ARRL)

BREAK 2

Here when you need us 52 weeks a year. We are the Amateur Radio Newsline, with links to the world from our only official website at www dot a r newsline dot

o-r-g.

(5 sec pause here)

**

NAMES IN THE NEWS: HELPING HAND NET

We want to take a moment to welcome a new and very interesting net to the Amateur Radio Newsline family. It is on the AD6XK repeater here in Los Angeles California on 145.440 MHz.

What makes this net very special is that its Control Operator Simon Rosconi, K6DXN, is visually impaired. According to Dave Estrada, KD6HDX, Rosconi lost his vision at age 6. Estrada says that even without sight, Rosconi works 40 hours a week, and still finds time to volunteer his time as control operator for the nets.

But Rosconi is not the only vision impaired ham involved. Estrada tells Amateur Radio Newsline that Brian Coponiti, KG6BVO, who is also partially blind, has also volunteered. Coponiti downloads and plays back Amateur Radio Newsline to the net.

Estrada adds that this particular repeater group also has two other operators that are visually impaired. They are Gary La Duke, WB6WJW and Ivan Simer, K6TTA. (KD6HDX)

**

NAMES IN THE NEWS: EDWARD T. CLEGG, W8LOY FAMILY CELEBRATION

A few weeks ago we told you about plans by the family of the late Edward T. Clegg, W8LOY, to celebrate the life of this ham radio pioneer. The gathering is being planned by Ed’s widow Martie, her daughter Linda and Linda’s husband Rob Mc Guffie, K2HZN. Recently, RAIN producer Hap Holly, KC9RP, had a chance to speak with Rob about the upcoming event:

--
NO TEXT AVAILABLE – AUDIO ONLY
--

Hap conducted an extensive interview with Rob Mc Guffie. It really tells the whole story of Ed Clegg and his famed Clegg Labs. Part 1 is online right now at www.rainreport.com or by telephone at 847-827-7246. (RAIN)

**

RADIO REGULATIONS: AVOIDING A PHONE NUMBER CRUNCH

The nation's supply of telephone phone numbers is depleting rapidly and the government is taking steps to make sure what is left lasts longer. Amateur Radio Newsline’s Henry Feinberg, K2SSQ, has more:

--
Over the past several years, area codes have multiplied to cope with the

explosion in technology. Regions have responded by splitting up area codes among geographic areas or laying another area code over an existing one.

But in 1996 the Federal Communications Commission banned such overlays dedicated to specific kinds of technology. The Commission enacted the ban because it considered separate area codes for cellular telephones phones and pagers unfair to wireless companies and their customers. This is because everyone would have to dial 10 digits instead of seven to reach wireless customers.

But states including California, Massachusetts and Ohio had been been asking for ways to prevent existing area codes from running out of phone numbers, the agency said. The FCC says that it will now hear proposals from states on how they intend to conserve area codes on a case-by-case basis, including plans to use technology-specific area codes.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in West Orange New Jersey.

--

The FCC, which is responsible for overseeing the supply of phone numbers, says that without action the number pool will run out in less than ten years. (FCC)

**

HAM RADIO BUSINESS: A NEW HOME FOR VERTEX STANDARD/YAESU

Vertex Standard USA, better known in ham radio circles as Yaesu, is moving to a huge, beautiful new facility. The new address is Vertex Standard U-S-A, 10900 Walker Street, Cypress, California, 90630. The new main phone number is area code 714-827-7600. All e-mail addresses will remain the same but telephone extensions will change. Vertex Standard makes the move -- no joke -- on Monday, April 1st. (Vertex-Standard)

**

INTERNATIONAL-CANADA: VE7BFK IS NEW RAC ARDF COORDINATOR

Radio Amateurs of Canada has named Gordon Young, VE7BFK as it's news R-A-C National Amateur Radio Direction Finding Coordinator. Young replaces Perry Creighton, VA7PC who held that appointment for the past several years. (RAC)

**

CONTESTS: SOUTH WEST OKLAHOMA SPRINTS

The first ever South West Oklahoma Spring Sprints sponsored by the Lawton VHF Contesting Club will take place in just a few weeks. Sprints are short period contests held primarily on a specific band or using a specific mode. The South West Oklahoma Spring Sprints are band exclusive. The 2 meter sprint is on April 1st from 7 pm to 11 p.m. Central U-S time. The 70 centimeter sprint is April 13th also from 7 to 11 Central. Both are open to all Oklahoma hams living south of Interstate highway 40 and West of Interstate 35. For more

information e-mail ne0p@arrl.net (VHF Reflector)

**

DX

In DX, K8PT and K3PLV are in the Channel Islands and operating as MJ slash K8PT and MJ slash K3PLV from Jersey through the 19th of March. The emphasis is on CW and RTTY in the WARC bands during daylight and 30, 40 and 80 meters during the evenings. Q-S-L as directed on the air. (RSGB)

Also word that Laurence Howell, GM4DMA, who is now resident in Anchorage, Alaska, will be travelling to warmer climates. This, as part of his work for the youth development charity Raleigh International. Howell say that he plans to be active as V51 slash G4DMA from Namibia from the 16th of March for two weeks. Look for him on 160 through 6 meters as his work schedule allows. (RSGB)

**
THAT FINAL ITEM: A WEDDING AT HAMVENTION 2002

And finally this week, get ready for a first. The first ever wedding to be held at the Dayton Hamvention.

No, we are not kidding. For the first time in Hamvention history, wedding vows will be exchanged at the show. This as Cyndi Krieger and Mark Elliot, N8WZW, will be married Saturday, May 18th at the HARA Arena during Hamvention 2002.

Mark and Cyndi met about thirteen years ago through a mutual friend. On their first date Mark and Cyndi went out for dinner and a movie. According to Hamvention sources, they have been an "item" ever since.

Mark introduced Cyndi to amateur radio by going to a hamfest. Cyndi had no idea what a hamfest was, but it sounded interesting. It was and she was hooked! Cyndi is now studying for her license and may test for it before Hamvention weekend.

Why get married at Hamvention? Mark and Cyndi couldn't think of a better place to share their love for each other and for amateur radio than by getting married at the world's largest amateur radio trade show. The ceremony takes place at 3 PM in Forum Room 3 immediately following the Amateur Radio Newsline produced Ham Radio Town Meeting. (Hamvention (r))

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the Dayton Hamvention, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937,

Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2002 amateur Radio Newsline Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our website at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, KC5MFA saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,

hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I am in Des Moines and found KWMT's signal to be down somewhat today.
You could hear power line intererence, etc that normally isn't there.
According to the newspaper, they are running on reduced power. It would
be interesting to know the power level.

Ray in Des Moines

The rules and regs are now under the supervision of the SCT, the communications ministry. They have been fairly well codified and are available on the SCT site, in Spanish of course. I've been in a staiton that got inspected; they do today a better job of technical inspection than the FCC does!

I don't get it, lady... why does this burn YOUR toast so badly? What's it to
YOU?

Just for reference, In the industry I work in, $250M loss (all sunk costs) the
first year is often considered an inescapable part of an agressive and
far-reaching business plan.

[This poster neither holds investment in, listens to, plans to listen to, nor
gives a flying fig in any way about XM Satellite Radio.]

Read XM's 10-K whihc is available via Edgar or through Yahoo Financial. They predited these loses, they are normal for a start up and the company is ahead of projecitions on revenue as it begins to market the service. I also quoted Morningstar's analysis overview which also confirmed that the business was a startup. Startups lose money. Period.

The info you posted is consistent with what SM projected two years ago! That is the information investors used to buy stock which is the principal way that XM has financed its operation to this date.

>
> I know XM is a "start up" but not even you can convince me or anyone

> its analysis on since they've only been on by your own admission
> 4-months? XM itself was predicting only 70,000 subscribers by the end
> of March. They ain't going to make it at this rate.

Thay had that by the end of January.

XM's pullic filings with the SEC and in thier IPO and subsequent equity offerings showed they would lose hundreds and hundreds of millions on operations, and need over 1.5 billion in capital for non-expensible start up capital expenses. Go to a financial page and look for the 10-k and the stock filings. All the information has been in the public domain for years. Including the projeciton of a loss of around a quarter billion in 2001. Hey, Amazon lost 4 times that in 2000.

>You
> huffed-n-puffed about 70-million subscribers but never shared where
> that figure came from either.

I never quoted 70 million. You invented the number in one of your posts. The 40 million figure I mentioned is the high end estimate by one analyst at the

Kagan conference held in NY a couple of weeks ago. DO some research; there are extracts available on theweb, although the full transcript costs a couple of $thousand. The low end estimates were 25 to 30 million subscribers.

>
> If you don't work for XM, why all the "don't look at the man behind
> the curtain" predictions?

I don't. I work for several radio owners and for a syndicator. But I have never received a single cent form XM. I don't work for them.

>Sorry but your busted. And the XM hype
> ain't making money and the sorry promotional campaign isn't going to
> get you close to projections.

Wrong. they are ahead of projections.

> I love the disclaimer at the end of the
> ads, "special equipment and subscription sign up fee, additional
> installation plus monthly fees are required". To try to compare what
> Turner did to XM is laughable. Hell, to think anything bleeding
> $284-million in losses is going to work is making my sides hurt, I'm
> laughing so hard.

You brought up Turner: I told you that that is a very inappropriate comparison. The right ocmparison would be with CATV or DTV. Both required hardware at an initial high cost, plus monthly fees. Still do, too. And very successful they are.
>
> You haven't refuted anything with any facts at all. I've been the
> only one to cite my sources and XM is so far in the Red Ink I
> understand the CIA thinks the KGB is running the place.

I told you the loses were predicted and are normal. Again, go look for the XM For 10-k report and look at the disclosure that says that they willnot be making money for a significant period of time.

> Come back
> when you've got more than hype and tripe. With only 30-commercial
> free channels, out of over 100? Remember Lincoln said, "you can fool
> some of the people some of the time, but you can't fool all of the
> people all of the time". You haven't fooled me!

No one is trying to fool you. You have some kind of misunderstanding about how entrepreneurial business work. Did you read my statement about Cordis? Or look at the financials via Yahoo? All the stuff I'm saying is in plain view. In fact, if you go to "investors" on the XM website, it says the same thing. It is not supposed to make money yet. It could not possibly do so. It will have a high burn rate for several more years. The business model contemplates this.

1022. anyone make a radio with station AND band presets in one press?

Newsgroup: rec.radio.broadcasting

Source record: 11583
Cross-posted to: rec.audio.car,rec.radio.broadcasting

I want to preset the radio with

eg

button 5 = 909 on the AM band
button 4 = 97.4 on the FM band

at the moment, every radio (car or portable) I have ever seen demands that I first press 'band' to swap bands, and then press '4' (or whatever) to select that station. It can't be so hard to allow us to preset band AND station in one go, but so far as I know, no manufacturer does this.

Anyone think of a manufacturer who does?

(And if YOU'RE a radio manufacturer, you can have the idea for free, just so long as you send me one when they're ready!!)

tim

Can someone go over the rules about radio in public places again? I seem to remember that if the radio is a permanent installation (like speakers attached to the ceiling) that you need permission/licensing, but that if there's a portable radio just sitting there it's ok to play. I'm not a lawyer and I'm not expecting legal advice. :)

Try this release from Tuesday for "fact content."

Tuesday March 19, 5:55 pm Eastern Time
Press Release
SOURCE: XM Satellite Radio
XM Satellite Radio Statement in Response to Today's Wire Service Stories
WASHINGTON, March 19 /PRNewswire-FirstCall/ -- The following was released by
XM Satellite Radio (Nasdaq: XMSR - news) today:

a.. (Photo: http://www.newscom.com/cgi-bin/prnh/20000724/XMSATLOGO)
Today, a Dow Jones reporter who does not regularly cover XM Satellite Radio
wrote a story quoting an auditor's opinion contained in XM's 10K for 2001,
which included a standard phrase for companies that do not have 12 months of
funding, noting the company's ability to ``continue as a going concern''
depends on continued fundraising.

The story and particularly its headline prompted other stories, leaving the
impression that there was a new and troubling financial development at XM,
causing a drop in the stock. In fact, the auditor's opinion contained in
this year's 10K is identical to those that have appeared in every XM 10K
since it went public in 1999. The same language has also accompanied every
offering document, and has been a part of all of XM's public financings.

XM wishes to reaffirm the company's confidence in its ability to raise
sufficient capital to fund its operations on an ongoing basis.

XM encourages investors to read its full 10K filing, in which the company
reported on its activities in the last year, during which XM successfully
launched its service nationwide, raised $382 million in financing, and
acquired approximately 28,000 subscribers ending December 31, 2001, ranking
as the fastest selling audio product introduction in the last 20 years
according to the Yankee Group.

The company also reaffirms today its confidence it will hit its 1Q ending
subscriber target of 70,000 customers.

Factors that could cause actual results to differ materially from those in the forward-looking statements in this press release include uncertainties associated with demand for the company's service, the company's dependence on third party vendors, its continuing need for additional financing, as well as other risks described in XM Satellite Radio Holdings Inc.'s Form 8-K filed with the Securities and Exchange Commission on 12-6-2001. Copies of the filing are available upon request from XM Radio' s Investor Relations Department. ``

CONTACT: Press: Charles Robbins, +1-202-380-4316, or charles.robbins@xmradio.com, or Investors: Gary Tiedemann, +1-202-380-4396, or gary.tiedemann@xmradio.com, both of XM Satellite Radio.

I am in Des Moines and found KWMT's signal to be down somewhat today.
You could hear power line intererence, etc that normally isn't there.
According to the newspaper, they are running on reduced power. It would
be interesting to know the power level.

The two likeliest culprits are alternator hash and the sparkers. I would assume the former. Perhaps, the AM antenna lead is intermittent or has a constantly poor connection, attenuating the signal. If this is the case, the stronger signals should come in without much notice of the problem due to the AGC's masking of this when the connection is OK. See if distant signals can be copied.
However today's vehicles also have several onboard computer modules that run the engine. To narrow it down, you should do a better job of describing what this RF hash sounds like. Take something like a rubber mallet and try tapping on non breakable objects in the car. You might detect a poor ground or a faulty bypass capacitor.
I've operated ham shortwave mobiles since I started driving in 1960 while in high school and the sounds of RF interference all have their characteristic "sounds." See if any of your friends who operate ham SW mobiles or CBs for their assistance.

SNIP.....

<CONSPIRACY THEORY ON>

With the messages here on the Web, and the promulgating of old
information as !!!__NEWS__!!! by the Dow-Jones reporter, is there even
the slightest chance of a stock price manipulation attempt. Who sold
short????

<CONSPIRACY THEORY OFF>

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,

hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I have a 89 Ford Aerostar. The whining which increases with acceleration is comming from the altenator. Most other whistles come from the computer. You probably developed bad grounds and/or your stock rf filtering is failing. I'd take this complaint to a Ford dealership. They should know what areas to check.

it all.

The rules and regs are now under the supervision of the SCT, the communications ministry. They have been fairly well codified and are available on the SCT site, in Spanish of course. I've been in a staiton that got inspected; they do today a better job of technical inspection than the FCC does!

>
> > The IDs on the Spanish stations in Mexico are strictly enforced.

I don't get it, lady... why does this burn YOUR toast so badly? What's it to
YOU?

Just for reference, In the industry I work in, $250M loss (all sunk costs) the
first year is often considered an inescapable part of an agressive and
far-reaching business plan.

[This poster neither holds investment in, listens to, plans to listen to, nor
gives a flying fig in any way about XM Satellite Radio.]

Amateur Radio Newsline Report 1283 – March 15, 2002

Amateur Radio Newsline report number 1283 with a release date of Friday, March 15th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Restructuring at the FCC should not impact on Amateur Radio and a first for the Dayton Hamvention. These stories are first on Amateur Radio Newsline report number 1283 coming your way right now.

(Billboard Cart Here)

**

REGULATORY ISSUES : FCC REORGANIZES LATER THIS MONTH

A reorganization of the Federal Communications Commission is set to become final later this month. This, as the agency stresses that realignment of responsibilities between various bureaus will make it more efficient and help it better respond to a changing technological marketplace. Amateur Radio Newsline's David Black, KB4KCH, takes a look at some of the changes.

--
It's an independent government agency that reports directly to Congress. It's mission is to regulate communications. One of the services it oversees is Amateur Radio, but most observers of the reorganization of the Federal Communications Commission see little impact on hobby communications.

As part of the reorganization a new Media Bureau will combine the duties of the current Cable and Mass Media bureaus. The goal of the combined bureau? To treat competitors of multiple entertainment delivery systems equally and consistently. This includes broadcasters, cable operators and satellite service providers to name only a few.

Other changes include a renamed Consumer and Governmental Affairs Bureau. Also, a realigned International Bureau still will handle satellite licensing but most policy issues will now be the domain of the newly created Media Bureau.

These are just a few of many changes taking place. Most appear aimed at commercial interests. For ham radio, C-B, G-M-R-S and most two-way radio users the shift will probably be transparent. In other words, for these spectrum users and most others, it looks like business as usual within a soon to be restructured FCC.

>From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline. Don.

--

Congress endorsed the plan late last year. The FCC then approved the overhaul in January. The changes will take effect March 25th. You can read more on the web at www.fcc.gov. (ARNewsline (tm) from published news reports)

**

RADIO LAW: FCC REFUSES TO SIDE WITH CB'ER IN LOCAL CITATION CASE

The FCC has refused to hear an appeal by an Illinois C-B operator who was convicted of Disorderly Conduct for using an 11 meter Class D Citizens Band Radio. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--
Gary D. White is among the first C-B operators dinged under a new authority granted by the Federal Government to states and municipal law enforcement agencies. Authority to control interference caused by operators of Class D 11 Meter C-B radio sets.

White was convicted on a state Disorderly Conduct charge of operating his C-B equipment in an unreasonably loud, offensive, harassing or threatening manner. He was not convicted of violating any FCC rules. White believed that the citation was based on interference to a neighbors telephone and television receiver. This in itself is not a violation of FCC Part 95 rules. And because of this he also believed that local authorities had no justification to sanction him. So he appealed the conviction to the FCC.

But the FCC says that the proof of guilt on the Disorderly conduct allegation is not in its preview to consider. This is because no FCC rules were violated. Also, under a law enacted by Congress in November of 2000, state and local governments are free to enact laws to enforce existing Part 95 Citizens Radio Service rules.

Bottom line. The FCC will not interfere in the case and White will have to find other avenues if he wishes to continue his appeals.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

Congress enacted the law to give state and local authorities enforcement authority over 11 meter C-B operators due to the rising tide of unnecessary and harmful interference to other people using radio devices in near-by spectrum. This includes corded and wireless telephones, television receivers, stereo Hi-Fi sets and other consumer electronic gear. Ham radio is specifically exempted from the law and any ordinance it may be used to create. (W5YI Report)

**

HAM RADIO RIGHTS: NM. AND W.VA. JOIN THE PRB-1 BANDWAGON

The ARRL Letter reports that New Mexico and West Virginia have become the 14th and 15th states to adopt pro Amateur Radio antenna bills based on the limited

federal preemption known as PRB-1. Amateur Radio Newsline’s Jeff Clark, K8JAC, reports:

We have this report:

--
In New Mexico Governor Gary Johnson signed House Bill 314 on March 5th. This, after it easily passed both houses of the legislature last month with just two opposing votes during a short session that typically only deals with appropriations bills. Called New Mexico's "Emergency Communication Preservation Act" the measure was sponsored by State Representative Mimi Stewart and Senator Ramsay Gorham. It stipulates that municipal or county ordinances regulating Amateur Radio antennas cannot obstruct or preclude amateur radio service communications. Also, that such ordinances shall reasonably accommodate amateur radio service communications.

Here in West Virginia Governor Bob Wise signed House Bill 4335 into law on March 7th. The bill provides that antenna structures may be erected at heights and dimensions sufficient to accommodate amateur radio service communications but does not include a minimum regulatory height schedule. The measure also exempts Amateur Radio antenna towers constructed prior to the effective date from subsequent zoning regulation changes.

>From Charleston West Virginia, I’m Jeff Clark, K8JAC.

--

In signing the West Virginia bill into law, Governor Wise, whose late father held the call sign W-A-8-A-Y-P, also proclaimed March 7 as Amateur Radio Operators Appreciation Day across the state. (ARRL)

AMERICA AT WAR: NEW TERRORISM ALERT SYSTEM

The United States has a new color-coded terrorism warning system. It was revealed on Tuesday, March 12th by Homeland Security chief Tom Ridge.

The five-level system is a response to public complaints that broad terror alerts issued by the government since the Sept. 11 attacks raised alarm without providing useful guidance. The lowest-status warning is green, followed by blue, yellow, orange and red as the perceived dangers intensify.

As the terrorism warning system was unveiled, Ridge said that the nation is on yellow alert. This means that the United States is facing a significant risk

of danger but not the highest stage.

The alert system is in force immediately for federal agencies, and Ridge is urging state and local governments to adopt it, too. It will be subject to a 45-day comment period, after which it probably will be revised. It's not known what part if any Amateur Radio will play in the new enhanced terrorism alert scheme. (Published news reports)

**

ENFORCEMENT: TAKE THAT UNCOORDINATED REPEATER OFF THE AIR

The FCC has told the operator of an uncoordinated North Carolina repeater to stop interfering with a coordinated machine, even if it means immediately taking his system off the air. This is the edict handed down to the operators of the NY4X repeater by FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth, K4ZDH.

--
Hollingsworth: " We also notified Richard Howell, NY4X, of Greer South Carolina and John Parker, AG4AZ, of Brevard Norrth Carolina that upon reciept of the letter, the NY4X repeater that they operate had to either shut down, obtain coordination or submit a detailed plan to the Commission to prevent interference to the KU4OL [repeater]."

"Now this interference has been going on for quite some time. We notified Parker and Howell back in November that something had to be done. Nothing was accomplished in regard to coordination and nothing was done in regard to the interference."
--

Hollingsworth letter says that Howell and Parker had more than ample time to fulfill their obligation under Section 97.205 of the Commission's rules. And late word is that the repeater has been shut down. (FCC, RAIN)

**

ENFORCEMENT: TAKE THAT BROKEN REPEATER OFF THE AIR

The NY4X repeater is not the only machine currently under FCC scrutiny. Another one is in Northern California. This one is having technical problems and is causing interference to machines on adjacent channel pairs. Again, the FCC's Riley Hollingsworth, K4ZDH:

--
Hollingsworth: "We notified Wendall Peterson of Walnut Creek California, operator of the K6POU repeater that more than enough time has elapsed for him to correct the technical and control problems with the repeater. His earlier response to our inquiry showed that the bandwidth was indeed so wide that it caused problems to two other repeaters. We have gotten complaints about that. And the repeater system is just not operating in accordance with good Amateur practice."
--

Hollingsworth says that his office expects the problems with the repeater to be corrected or that the machine will be taken off the air. He also gave Peterson 20 days from the date of his letter to respond. (FCC, RAIN)

**

ENFORCEMENT: THE RESPONSIBILITY OF REPEATER OWNERS

The FCC enforcement involving the NY4X and K-6POU repeaters are just the latest in a series of actions aimed at cleaning up the problems that have been plaguing the F-M community. Whether it's an uncoordinated repeater causing havoc to a coordinated machine, or a long established system in need of maintenance, the FCC's Hollingsworth says responsibility comes with repeater ownership:

--
Hollingsworth: "We want to emphasize that repeaters are voluntary. Nobody has to put one up. But if you do put one up you have a responsibility to maintain it, to get coordination if that's necessary, and to operate in accordance with good Amateur practices, especially if other repeaters are being detrimentally affected."
--

In reality, the only things the FCC is asking of those who own and operate repeaters is to be good neighbors and to adhere to the proper technical standards. In this way, the repeaters themselves can better serve their service area and the ham radio community in it. (FCC, RAIN)

**

RESCUE RADIO: KNOWING WHERE YOU ARE IN THE MID WEST

If you drive the highways and by-ways of Kentucky, you need never worry again about where you are. And if you get in a bind, rescuers will be able to find you. That is, if you are a ham radio operator equipped with a mobile APRS station. Jack Parker, W8ISH, of Amateur News Weekly, says that in his part of the world it is a mode that is truly coming of age:

--
Good news from the Kentuckey Automatic Position Reporting Society" their network of APRS digipeters is growing like well bred Kentucky Race Horses.

According to Brian Walker, KC4FIE, several new sites will be coming on line very soon. New digi's are planned for Grand Rivers, Morgantown, Owensboro, Lawrenceburg, and Dry Ridge to name a few.

The Murry State University club has added a digipeter and two stations along the Kentuckey – Tennessee border have extended APRS coverage into that state. These efforts effective extend the Mid-West network of APRS digipeters established by the Tri-State Working Group in Ohio, Indiana and Illinois.

If you need more information on the Automatic Position Reporting System just check the APRS Working Group website at www.tawg.org.

Reporting for Amateur News Weekly, this is Jack Parker, W8ISH.

--

With interest in A-P-R-S growing and ham gear that includes the mode as a standard feature, look for a defacto nationwide network to be in place by the end of the decade. (ANW)

**

HAMVENTION 2002: HAM TESTS WILL BE AT THE HARA

The Dayton Hamvention has asked that we pass along a correction to some information in its recently mailed pre-show brochure. The pamphlet incorrectly lists Meadowdale High School as the venue for Amateur Radio license exams. This is incorrect. The Hamvention says that all license exams will be held at the HARA Arena Hamvention site. (Hamvention(r))

**

HAMVENTION 2002: QCWA BANQUET

And attention QCWA members. This years annual banquet in conjunction with the Dayton Hamvention will be hosted by the South West Ohio chapter and will be held on Friday, May 17th. The venue is Alex's Continental Restaurant near Miamisburg. Starting time is 7:30 P.M. and reservations are required.

This years speaker will be General Raymond Moorman. He will be talking about the United States Air Force Museum and plans for the upcoming Centennial of Flight celebration in 2003. For more information and to make reservations please contact Ed Sonnanstine by e-mail to EdSonny@aol.com (QCWA)

CONVENTIONS - UTAH: UTAH HAMFEST

The 2002 Rocky Mountain Division ARRL Convention and 2002 Utah Hamfest will be held July 12th to the 14th at Ruby's Inn at Bryce, Utah. The venue is near Bryce Canyon National Park. For more information please visit www.utahhamfest.org on the world wide web. (Utah Hamfest)

**

CONFERENCES: ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Technical papers are being solicited for presentation at the 21st Annual ARRL and TAPR Digital Communications Conference. The event will be held this September in Denver, Colorado. Presentations will also be publicized in the Conference Proceedings. Submission of papers is due by August 5th and in-person presentation at the conference is not required for publication. Conference registration and additional details are available on the web at www.tapr.org/dcc (TAPR, ARRL)

BREAK 2

Here when you need us 52 weeks a year. We are the Amateur Radio Newsline, with links to the world from our only official website at www dot a r newsline dot

o-r-g.

(5 sec pause here)

**

NAMES IN THE NEWS: HELPING HAND NET

We want to take a moment to welcome a new and very interesting net to the Amateur Radio Newsline family. It is on the AD6XK repeater here in Los Angeles California on 145.440 MHz.

What makes this net very special is that its Control Operator Simon Rosconi, K6DXN, is visually impaired. According to Dave Estrada, KD6HDX, Rosconi lost his vision at age 6. Estrada says that even without sight, Rosconi works 40 hours a week, and still finds time to volunteer his time as control operator for the nets.

But Rosconi is not the only vision impaired ham involved. Estrada tells Amateur Radio Newsline that Brian Coponiti, KG6BVO, who is also partially blind, has also volunteered. Coponiti downloads and plays back Amateur Radio Newsline to the net.

Estrada adds that this particular repeater group also has two other operators that are visually impaired. They are Gary La Duke, WB6WJW and Ivan Simer, K6TTA. (KD6HDX)

**

NAMES IN THE NEWS: EDWARD T. CLEGG, W8LOY FAMILY CELEBRATION

A few weeks ago we told you about plans by the family of the late Edward T. Clegg, W8LOY, to celebrate the life of this ham radio pioneer. The gathering is being planned by Ed’s widow Martie, her daughter Linda and Linda’s husband Rob Mc Guffie, K2HZN. Recently, RAIN producer Hap Holly, KC9RP, had a chance to speak with Rob about the upcoming event:

--
NO TEXT AVAILABLE – AUDIO ONLY
--

Hap conducted an extensive interview with Rob Mc Guffie. It really tells the whole story of Ed Clegg and his famed Clegg Labs. Part 1 is online right now at www.rainreport.com or by telephone at 847-827-7246. (RAIN)

**

RADIO REGULATIONS: AVOIDING A PHONE NUMBER CRUNCH

The nation's supply of telephone phone numbers is depleting rapidly and the government is taking steps to make sure what is left lasts longer. Amateur Radio Newsline’s Henry Feinberg, K2SSQ, has more:

--
Over the past several years, area codes have multiplied to cope with the

explosion in technology. Regions have responded by splitting up area codes among geographic areas or laying another area code over an existing one.

But in 1996 the Federal Communications Commission banned such overlays dedicated to specific kinds of technology. The Commission enacted the ban because it considered separate area codes for cellular telephones phones and pagers unfair to wireless companies and their customers. This is because everyone would have to dial 10 digits instead of seven to reach wireless customers.

But states including California, Massachusetts and Ohio had been been asking for ways to prevent existing area codes from running out of phone numbers, the agency said. The FCC says that it will now hear proposals from states on how they intend to conserve area codes on a case-by-case basis, including plans to use technology-specific area codes.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in West Orange New Jersey.

--

The FCC, which is responsible for overseeing the supply of phone numbers, says that without action the number pool will run out in less than ten years. (FCC)

**

HAM RADIO BUSINESS: A NEW HOME FOR VERTEX STANDARD/YAESU

Vertex Standard USA, better known in ham radio circles as Yaesu, is moving to a huge, beautiful new facility. The new address is Vertex Standard U-S-A, 10900 Walker Street, Cypress, California, 90630. The new main phone number is area code 714-827-7600. All e-mail addresses will remain the same but telephone extensions will change. Vertex Standard makes the move -- no joke -- on Monday, April 1st. (Vertex-Standard)

**

INTERNATIONAL-CANADA: VE7BFK IS NEW RAC ARDF COORDINATOR

Radio Amateurs of Canada has named Gordon Young, VE7BFK as it's news R-A-C National Amateur Radio Direction Finding Coordinator. Young replaces Perry Creighton, VA7PC who held that appointment for the past several years. (RAC)

**

CONTESTS: SOUTH WEST OKLAHOMA SPRINTS

The first ever South West Oklahoma Spring Sprints sponsored by the Lawton VHF Contesting Club will take place in just a few weeks. Sprints are short period contests held primarily on a specific band or using a specific mode. The South West Oklahoma Spring Sprints are band exclusive. The 2 meter sprint is on April 1st from 7 pm to 11 p.m. Central U-S time. The 70 centimeter sprint is April 13th also from 7 to 11 Central. Both are open to all Oklahoma hams living south of Interstate highway 40 and West of Interstate 35. For more

information e-mail ne0p@arrl.net (VHF Reflector)

**

DX

In DX, K8PT and K3PLV are in the Channel Islands and operating as MJ slash K8PT and MJ slash K3PLV from Jersey through the 19th of March. The emphasis is on CW and RTTY in the WARC bands during daylight and 30, 40 and 80 meters during the evenings. Q-S-L as directed on the air. (RSGB)

Also word that Laurence Howell, GM4DMA, who is now resident in Anchorage, Alaska, will be travelling to warmer climates. This, as part of his work for the youth development charity Raleigh International. Howell say that he plans to be active as V51 slash G4DMA from Namibia from the 16th of March for two weeks. Look for him on 160 through 6 meters as his work schedule allows. (RSGB)

**
THAT FINAL ITEM: A WEDDING AT HAMVENTION 2002

And finally this week, get ready for a first. The first ever wedding to be held at the Dayton Hamvention.

No, we are not kidding. For the first time in Hamvention history, wedding vows will be exchanged at the show. This as Cyndi Krieger and Mark Elliot, N8WZW, will be married Saturday, May 18th at the HARA Arena during Hamvention 2002.

Mark and Cyndi met about thirteen years ago through a mutual friend. On their first date Mark and Cyndi went out for dinner and a movie. According to Hamvention sources, they have been an "item" ever since.

Mark introduced Cyndi to amateur radio by going to a hamfest. Cyndi had no idea what a hamfest was, but it sounded interesting. It was and she was hooked! Cyndi is now studying for her license and may test for it before Hamvention weekend.

Why get married at Hamvention? Mark and Cyndi couldn't think of a better place to share their love for each other and for amateur radio than by getting married at the world's largest amateur radio trade show. The ceremony takes place at 3 PM in Forum Room 3 immediately following the Amateur Radio Newsline produced Ham Radio Town Meeting. (Hamvention (r))

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the Dayton Hamvention, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937,

Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2002 amateur Radio Newsline Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our website at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, KC5MFA saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

1035. Radio in public places

Newsgroup: rec.radio.broadcasting
Date: 2002-03-21 13:44:55 UTC
From: Inigo Montoya <usetheaddressinthesig@hotmail.com>
Message-ID: <u9joun4oh563a9@corp.supernews.com>
Source record: 11596

Can someone go over the rules about radio in public places again? I seem to remember that if the radio is a permanent installation (like speakers attached to the ceiling) that you need permission/licensing, but that if there's a portable radio just sitting there it's ok to play. I'm not a lawyer and I'm not expecting legal advice. :)

1036. anyone make a radio with station AND band presets in one press?

Newsgroup: rec.radio.broadcasting
Date: 2002-03-21 13:44:56 UTC
From: rdc86@dial.pipex.com
Message-ID: <u9jouokndpd1ac@corp.supernews.com>
Source record: 11597
Cross-posted to: rec.audio.car,rec.radio.broadcasting

I want to preset the radio with

eg

button 5 = 909 on the AM band
button 4 = 97.4 on the FM band

at the moment, every radio (car or portable) I have ever seen demands that I first press 'band' to swap bands, and then press '4' (or whatever) to select that station. It can't be so hard to allow us to preset band AND station in one go, but so far as I know, no manufacturer does this.

Anyone think of a manufacturer who does?

(And if YOU'RE a radio manufacturer, you can have the idea for free, just so long as you send me one when they're ready!!)

tim

pls email me if you have an answer, as this is not a newsgroup I follow.

>be interesting to know the power level.

KWMT uses a 2-tower directional array. This provides a "heart-shaped" pattern, with a null towards Regina. (Even with the null, you can hear a mix of KWMT and CBK in much of east-central South Dakota. Amazing soil conductivity up there!)

The KKEZ tower was also half of the KWMT array. With it gone, I'm guessing KWMT had to reduce power to minimize interference, since it is now apparently running an omni pattern off the one tower.

I believe KWMT was originally licensed as 1kW daytime, non-directional. They later added the second tower and went to 5kW daytime, directional. Still later (1986, I was there), they added nighttime service at 170 watts, directional.)

Is there anyone here located in Minnesota or western Wisconsin? These areas normally receive no signal from KWMT, as they are in the null. If you can now hear KWMT, this would indicate they are running omni-directional at reduced power.

It's just firmware written in the microcontroller. Should
be possible to do this, the hard part is convincing the
marketing department.

I have an Optimus (radio shack) that does something like this.

if all else fails, maybe you can try the Traffic report service there...not quite the same as working at a radio station, but they are closely connected to all the radio/tv stations so that if you hang around long enough, you might hear of something that you like.

at the bottom of the Florida pages on smartraveler.com, there are some phone numbers for traffic reports. one of those numbers has an option that will connect you to a live person and someone there can tell you who to contact for openings.

good luck

Subject: WorldSpace News Alert - Transmission on the AsiaStar satellite to boosts the audio fidelity

Date: Fri, 22 Mar 2002 17:21:40 -0500 (EST)

We have great news for WorldSpace listeners in Asia. The clear, digital sound of some of your favorite stations will soon be getting even better. We are changing the transmission on the AsiaStarT satellite to boost the audio fidelity of the exclusive music channels produced by WorldSpace. Additionally, the transmission assignments of several other channels will change to make the system more efficient. The changeover will take place at 0000 UTC (GMT) on Sunday, 24 March.

The upgraded/modified channels via AsiaStar will include:

East Beam (covering North Asia including China and Korea, and nations of the Pacific Rim)

1125 WorldSpace Branded BOB
1126 WorldSpace Branded ULTRA POP
1127 WorldSpace Branded 24X7
1128 WorldSpace Branded POTION
1129 WorldSpace Branded UPCNTRY
1130 WorldSpace Branded MAESTRO
1131 WorldSpace Branded RIFF
1132 WorldSpace Branded RITMO

1303 CNNI CNNI
1304 Bloomberg BLMBR PR
1305 Bloomberg BLMBR JP

South Beam (covering Indonesia, Singapore, Laos, Thailand, Vietnam, Malaysia)

1133 WorldSpace Branded VOYAGER
1303 CNNI CNNI
1304 Bloomberg BLMBR PR
1305 Bloomberg BLMBR JP

West Beam (covering India, Pakistan and Sri Lanka)

1133 WorldSpace Branded VOYAGER
1303 CNNI CNNI
1304 Bloomberg BLMBR PR
1305 Bloomberg BLMBR JP

When the changeover takes place the above stations will go off the air. We hope to execute the procedure in a matter of moments. At most, it will take 90 minutes. After the upgrading of these channels is complete, you should be able to tune to them as you always have. Should you encounter any difficulties in locking on to these channels, please run the "learn" procedure on your receiver.

If you have any questions or concerns, please do not hesitate to contact us at customerservice@worldspace.com.

We hope you enjoy the new higher fidelity of some of our most popular channels.

Most likely alternator noise. Usually caused by a failing diode. The
alternator will still charge fine and if you have a mechanic who tests it by
measuring the voltage output he will assure the alternator is fine.

Alternator noise has an almost musical pitch when compared to spark noise.
Spark noise is a very harsh, somewhat popping noise.

Does the following message mean that WorldSpace has a lot of empty
channels and they've decided to "donate" some of those bits to their
active music channels?

In theory, I'd suppose knowing something about the roads in an area
would help a traffic reporter.

The post appeared 3 times because of an on going problem resulting from the demise of excite@home and Comcast picking up other services, in this case, Giganews. I have not discussed the problem before with this group because it would have been off-topic. The "demon-dialer" has been working overtime with technical issues resulting from the switch over. It has been a month from internet hell.

The apologies should come from Comcast since they may also be drinking the water.

One would have the same expectation of a New York City taxi driver. I
can't count the number of times I've been asked to give drivers
directions.

This is the 21st century. The standards for such things are much
lower. When a kid at McDonalds can't make change and Arthur Anderson
can't find glaring irregularities in Enron's financials I wouldn't put
much faith in the expectation of increasing competence.

Amateur Radio Newsline™ Report 1284 - March 22 2002

Amateur Radio Newsline report number 1284 with a release date of
Friday, March 22nd, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio and the FCC join forced to find a wayward transmitter jamming a fire department radio. This story is first on Amateur Radio Newsline report number 1284 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS ASSIST IN TRACKING DOWN WAYWARD TRANSMITTER

Ham radio operators teamed up with the FCC to track down a wayward transmitter. One that was making communications very difficult for the Fallbrook California fire department. It took place the weekend of March 10th. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--

Milt Davies, KD6UBA, is Division Chief of the North County Fire Protection District. He was the first to identify the problem as radio frequency interference.

Davis described the annoying signal as being an unmodulated carrier pock-marked with strange data-like bursts. Sometimes the jamming transmitter was on-the-air all the time. Sometimes it was on and off. And at still other times the signal almost disappeared - transmitting only a few seconds in a 10 or 20 minute span.

Davies recognized the problem as on-channel jamming. He also knew that he needed outside help. That's when the FCC and the local ham radio community were notified.

First to try was the FCC. As you know, the agency has a series of permanent direction finding stations on the West Coast. These can be operated by remote control from Washington, D.C..

The FCC's weekend duty officer attempted to pinpoint the source of the interference using them, but with only partial success. Some of the locations were down for servicing. The result was a single line-of-bearing. This meant that the interfering transmitter could be anywhere along a 45 mile path.

To help home-in on the transmitter's location, members of the Palomar Amateur Radio Club were called out. They were asked to listen to the fire dispatch frequency and give signal strength reports on the unmodulated carrier. These

reports, coupled with the FCC's own line-of-bearing, pointed to the City of Vista, or vicinity.

Now the hunt again became the domain of the FCC. Bill Zears, the District Director in charge of the FCC's San Diego Field Office, arrived with a sophisticated direction finding vehicle. Zears drove to Fallbrook for his first good bearing. That sent him off toward the rugged eastern portion of Vista.

At about the same time, a fire broke out in the Camp Pendleton military complex which borders Fallbrook. The jamming signal was preventing firefighters working the Pendleton fire from communicating directly with their Dispatch Center.

Zears stayed on the job as Sunday afternoon turned into evening. Finally, enough direction finding bearings were available to pinpoint the wayward transmitter to a 30' tower atop a hill in east Vista.

The Vista Fire Department was called. The Battalion Chief on duty offered immediate help. It turns out that a local ham had brought him up-to-speed on the interference case earlier in the day.

Then another ham recalled that the City of Vista once had a transmitter up on the suspect peak. That old VHF transmitter dated back to the days before most communications had moved to the 800 MHz band. He also knew that the old box just happened to be tuned to Fallbrook's current VHF dispatch frequency - because that was Vista Fire's old frequency!

The crew lost no time in getting up the hill and confirming the location of the offending transmitter. Nobody knows why power was still connected. Probably an oversight by some long forgotten radio installer. None the less, it caused the Vista's Fire Department to unintentionally jam Fallbrook, but pulling the power plug made the interference go away.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

Thanks to the cooperation of everyone involved and the tenacity of FCC District Director Bill Zears, the situation had a happy ending. (W6VR)

**

OLYMPICS FOLLOW-UP: HANDI-HAM CARRIES OLYMPIC FLAME

The 2002 Winter Olympics may be over, but now comes word that a visually impaired ham radio operator was among those who had the honor of carrying the Olympic Torch.

Kitty Hevener, WB8TDA, and her trusty guide dog SunStar, carried the Olympic Flame on Saturday January 19th. This, as it made its way to Salt Lake City Uath. Kitty’s segment took the flame up to the gates of Fort Point, in the shadow of San Francisco California’s Golden Gate Bridge.

According to the Handi Hams, Kitty Hevener, WB8TDA, is active with that group as well. Handi Hams says that she is a regular volunteer at the annual California Radio Camp held at Camp Joan Mier in Malibu California every March.

You can see photos of WB8TDA carrying the Olympic Torch at www.graystuff.com/gallery/kitty. (HandiHams)

**

ECONOMICS: JAPANS ECONOMIC RECESSION MAY AFFECT RADIO PRICES

The price of ham radio gear and other goods manufactured in Japan may soon change, but its unclear if it will be up or down. This on word that Japan's economy has fallen into the worst recession in at least two decades. The last time the Japanese economy contracted for three quarters straight was in 1993, when it shrank at around 0.1 percent each quarter. Before that, Japan had never seen even two back-to-back quarters of contraction - the usual definition of a recession - since the government began keeping such records in 1980. (ARNewsline(tm) from published news reports and ARNewsline(tm)interviews.)

**

EMERGING TECHNOLOGY: WSJT TAKING ON THE WORLD

Meantime, a new mode of operation seems to be taking Amateur Radio by storm. We have reported on it before: WSJT. And it lets everyone get in on what used to be the esoteric operation called meteor scatter. Q-News Graham Kemp, VK4BB, looks at the way WSJT is taking on the world:

--

WSJT is a digital mode, designed specifically for meteor scatter communications. It stands for Weak Signal communications by Joe Taylor K1JT. Its advantage for is that it sends extremely fast in a standard SSB bandwidth at 147 characters per second or about 1700 words per minute. By virtue of this speed it is possible to send two call signs and a signal report in a tenth of a second meteor ping.

The equipment to make WSJT contacts is fairly modest. A two meter SSB transceiver and a computer -- a Pentium, at least 75 MHz is the main hardware required. Then you need a simple PSK-31 interface box, as described in March 2000 AR magazine and some WSJT software.

An RF power output of 50 is the practical minimum, with 100 watts providing a worthwhile improvement. A major advantage with WSJT is the small antenna system required. A five element Yagi will do as well as a 10 element Yagi.

>From Q-News Australia, I'm Graham Kemp, VK4BB for the Amateur Radio Newsline.

--

More information and the necessary software is at the official WSJT website. Its in cyberspace at pulsar.princeton.edu/~joe/K1JT. (Q-News)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the CARES repeater on 146.73 MHz and serving Gulfport Mississippi.

(5 sec pause here)

**

ENFORCEMENT: THAT CHARGE SHOULD NEVER HAVE BEEN FILED

The FCC has told a Midway, Tennessee ham that his complaint about a club repeater has no basis in fact:

--

Hollingsworth: “We dismissed a complaint filed by Jeffrey Bible, K4MFD, of Midway Tenneseee. His complaint was against the Andrew Johnson Radio Club repeater W4WC which is located on an adjacent tower.”

“We found that despite allegations, the W4WC repeater had not lost coordination just because of a move. The move was within the coordinators limits. In fact, the repeaters have been operating for years with no problems.”

--

That was the FCC’s Riley Hollingsworth, K4ZDH who also says that both parties are coordinated, so both will have to work together to solve any interference that might arise. (FCC, RAIN)

**

ENFORCEMENT: FCC REFUSES TO INTERVENE IN ATV REPEATER DISPUTE

The FCC has also declined to intervene in a dispute involving two Mid-West Amateur Television repeaters. One owned by a major radio club and the other by an individual. The main reason. There is no coordination for ATV in the area. The FCC’s Riley Hollingsworth explains:

--

Hollingsworth: We notified Adrian Oaks, KB8GRJ, of Xenia Ohio that we would not get involved in a dispute that he has with the Dayton amateur Radio Association over the operation of an ATV repeater. Dayton’s repeater, W8BI, has started occasionally operating on frequencies registered to Oaks. I emphasize registered nor coordinated. There is no coordination program there for ATV repeaters. But there’s no showing of actual interference.”

“DARA uses it for 20 to 45 minutes a week. It makes the repeater codes available to all so that anyone receiving interference can shut off the repeater. It is (also) willing to adjust operating times to accommodate other ATV users.”
--

Hollingswoth says that there is no real conflict and therefore the situation does not warrant any FCC enforcement action. (FCC, RAIN)

**

ENFORCEMENT: PRE OPERATION LEADS TO LICENSE SETASIDE

The FCC has told a newly licensed ham that his license grant has been set aside. In a letter to John A Green, KG4RFI, of Mobile Alabama, the commission says that it has information which indicates that he operated on the W4IAX repeater and was also heard at various times on repeaters on 146.685 and 147.090 MHz in the Baldwin County area. The FCC says that all of these transmissions were made during a time that Green did not hold am Amateur service license.

Green was given twenty days from the date of the FCC letter to him to write back and explain certain issues. This includes any instances between the cancellation of his General Class license on September 14, 2001 and the grant of his Technician Class license on January 24, 2002 in which he operated any Amateur Radio transmitting equipment. (FCC)

**

BAMES IN THE NEWS: KD7DDG LOOSES AZ MAYORAL RACE

A follow-up to the story of Tim Weaver, KD7DDG, who was running for the office of Mayor of Glendale Arizona. Well, the votes have been counted and Weaver was not successful in his bid to oust the eight year incumbent Mayor who had the backing of the firefighters union.

The count showed that Weaver had polled only about 24% of the votes needed. Weaver says that the results were disappointing, but respectable for someone outspent and out-volunteered. (RAIN)

**

NAMES IN THE NEWS: RAIN CONTINUES CLEGG RETROSPECTIVE

Hap Holly, KC9RP tells ius that this weeks RAIN Report is part two of a retrospective look at famed ham radio pioneer Edward T. Clegg, W8LOY. This as seen through the eyes of his son-in-law Rob Mc Guffie, K2HZN. Its on line right now in digital streaming audio at www.rainreport.com or analog telephone audio at 827-847-7246. (RAIN)

**

NAMES IN THE NEWS: N9RLA FIRST CENTRAL DIVISION ROVER CERTIFICATE

Some names in the news. First is Dan Evans, N9RLA, who has taken first place as a rover station in the ARRL Central Division. This in the June 2001 VHF contest. Dan is from Scottsburg Indiana. (VHF Reflector)

**

NAMES IN THE NEWS: K8JAC NAMED KANAWHA HAM OF THE YEAR

Also, congratulations to Amateur Radio Newsline's own Jeff Clark, K8JAC. This, after being named Kanawha Valley Amateur Radio Operator of the Year 2002.

A ham since 1981, Clark's Amateur Radio volunteer activities include the post of Emergency Coordinator of Kanawha County, West Virginia. He is also Publicity Director of the Kanawha Amateur Radio Club, editor of the clubs newsletter and technical coordinator of the W8GK repeater. But thats not all. The local ARES group, which Clark coordinates receives high marks from county officials and is often called on to provide communications during civic events and emergencies.

Clark received his award on Saturday, March 16th at Charleston Hamfest. Another Amateur Radio Newsline anchor, Jim Damron, N8TMW, had the honor of making the presentation to K8JAC. (ARNewsline(tm))

**

NAMES IN THE NEWS: WA6ITF TO SPEAK IN JOPLIN MO

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, will be the featured banquet speaker on Saturday April 13th at the Joplin Hamfest. The venue is the John Q. Hammon Trade Center in Joplin Missouri.

Situated about halfway between Tulsa Oklahoma and Kansas City, the Joplin Hamfest is a 200+ table event. It also features spacious parking with easy access, wide aisles, forums, ham radio testing and prizes.

Interested? More information is on the web at www.joplin-arc.org. (ARNewsline(tm))

**

BREAK 2

Here when you need us 52 weeks a year. We are the Amateur Radio Newsline, with links to the world from our only official website at www.arnewsline.org.

(5 sec pause here)

**

ANNIVERSARY: HAPPY 20TH ANNIVERSARY HEIL SOUND

This week marks the 20th anniversary of a very special company. We are talking about Heil Sound Limited. And when you talk about Heil Sound, you are really talking about its founder Bob Heil, K9EID.

Over the years, Bob Heil has been an audio consultant, an inventor, a musician and lots more. Looking back, He says that everything harkens back to his first love. His hobby. Amateur Radio:

--

Heil: "It's been an incredible ride from a little kid playing pipe organ in the Fox (theater)n through playing with my Harvey-Wells and SX-99 which I still have, and understanding what it took to make all of these things.

“Then I started building different transmitters and then started building sound equipment.”

“We actually changed the world. We are the guys that figured out how you stack and hang speakers. Why? Because I could set up a Rohn 25G (tower) and hang speakers higher than anybody else because of my ham radio.”

--

After years of touring with such number one acts as the Eagles, Bob decided to give something back to the hobby that had lead to his success. Thats how Heil Sound Limited was born.

--
Heil: My life has evolved around 45 years of being K9EID, and I will always be so grateful to everybody in this hobby for allowing me to do my thing and along the way to help someone. Thats the bottom line that we are able to help somebody and it makes me real happy to be able to do that.”
--

Bob is now celebrating the beginning of the company’s third decade with a number of new and innovative products for every aspect of ham radio voice operations. You will get to see all of them in a few weeks and meet Bob in person at Hamvention 2002. (ARNewsline(tm))

**

HANDI HAMS: E-NEWSLETTER MAILING CHANGE

The Handi Hams says that it is changing the way in which the groups weekly e-letter is being distributed in HTML format. According to Handi Hams Pat Tice, WAZ0TDA, constant barrages of virus threats to Microsoft Outlook makes it risky to continue maintaining the HTML list in Microsoft Outlook. So the group is moving its list to a mailer called Group Mail. This says Tice will be bring with it minimal risk of sending a virus to the group of HTML subscribers. The text subscribers continue to receive the e-letter through Yahoo Groups. (HandiHams)

**

EVENTS: 2002 WEAK SIGNAL BANQUET

Tom Whitted, WA8WZG, reports over the VHF Reflector that tickets are now on sale for the 10th annual Weak Signal Banquet. This year the gathering will again be held in Dayton Ohio on Hamvention weekend. If you are interested in attending, more information is in cyberspace at www.wa8wzg.com. (VHF Reflector)

**

INTERNATIONAL - CANADA: RAC SM ELECTION RESULTS

>From our neighbors to the North comes word that Tom Caithness, VE1GT is the interim Section Manager for Canada’s Maritime Provences. He was elected for a two-year term, which began March 1st.

Also, Derek Hay, VE4HAY was recently re-elected Section Manager in the Manitoba for a two-year term snd Joe Craig, VO1NA has been re-elected Section Manager for the Newfoundland and Labrador Section for a two-year term. Both take office on July 1st.

All three ran unopposed in their respective Radio Amateurs of Canada sections. This eliminated the need for a balloted election. (RAC)

**

DX

In D-X, the big story is of coarse Ducie Island. The VP6DI team came on the air on March 17th and its was bedlam. Take a listen.

--
audio here
--

Ducie Island is a small, uninhabited atoll in the South Pacific and is part of the Pitcarin Island chain. It is also among the rarest DXCC entities in the world as proven by the recording you just heard. It was made in Australia by VK4DX using a Kenwood TS-570D transceiver and posted to his contest website. (Audio courtesy VK4DX)

**

THAT FINAL ITEM: ARDF CHAMPIONSHIPS IN ATLANTA

And finally this week, the calendar says that its spring and hams around the country are turning to outdoor activities such as new antennas and hidden transmitter hunting. Here's your chance to prove you're the best at the latter activity, as Newsline's Joe Moell K0OV explains:

--

The biggest annual event in on-foot hidden transmitter hunting is early this year, so time is getting short if you want to take part.

The Second USA ARDF Championships will be April 19-21 at Franklin Roosevelt State Park near Pine Mountain, Georgia. That's about 70 miles southwest of the Atlanta airport. No matter what your level of skill or experience at radio-orienteering, you'll be welcome. Experts will be vying for positions on Team USA as it travels to Slovakia for the World Championships later this year. Beginners will be picking up the best RDF techniques from these experts, and learning how to put on similar events in their home towns.

The official deadline to register for the national championships is April 6, but Georgia Orienteering Club urges you to let them know you're coming by March 29, so they can plan food for the picnic supper on Friday and the spaghetti dinner on Saturday.

Learn more about what it's like to be in the ARDF Championships by reading about last year's event in the March issue of QST, and in December and January's issues of 73 Magazine. There's lots more on the subject at my Web site -- www.homingin.com -- plus a link to the registration site for the Pine

Mountain events. That's homingin -- one word -- homingin.com

>From sunny southern California, where we're soon having our third practice session of the year to get ready for the championships, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, that website is www.homingin.com (K0OV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. With one exception. 91X San Diego/Tijuana is actually XETRA-FM.

Like David, I know a lot of people at both XM and Sirius. None of them has ever told me they expected to do anything more, financially, than lose a greet deal of money in the first few years.

If these services are destined to fail, why do investors continue to pump money into them? Investments in the hundreds of millions at a clip. The investors in both services I know aren't stupid people. The employees at both companies aren't stupid, either. I've worked with many of them at other companies and find them to be among the best in the business.

I'll bet that at least one or both will begin to thrive within the next five years. Only time will tell.

Rich

I might ask the same of you! What do you care why it burns my toast?
Whats it to you?

I noticed back about a month ago, that an engineer, posted that he had
installed a terrestrial repeater for XM and that he had listened and
didn't find it to be anything special. I was somewhat surprised at
the feeding frenzy that the self professed XM employees went into
tearing this guy apart. All he said was the he had installed a
repeater, listened while doing the job and didn't think much of what
they had to offer. They questioned his integrity, honesty,
nationality, and police record over his simple factual post. I've
just been having fun ever since, watching them huff-n-puff and run in
circles everytime anyone says anything that isn't 100% PRO XM radio.

> Just for reference, In the industry I work in, $250M loss (all sunk costs) the
> first year is often considered an inescapable part of an agressive and

Good for you, but poses the same question you did to me, Whats it to
you? Why does this burn your toast Eric?
>
> [This poster neither holds investment in, listens to, plans to listen to, nor
> gives a flying fig in any way about XM Satellite Radio.]

I can say the same thing, I neither hold investment in, listen to, or
plan to listen to nor give a flying fig in any way about XM Satellite
Radio, but I sure am having fun watching them get their noses out of
joint everytime someone posts something they don't like about the
service, and the fact that they are losing over a 1/4-Billion Dollar$
this year, and the far fetched, imaginative explainations for it have
been a hoot. If they applied that kind of creativity to their ads,
they might stand a chance of staying afloat. I've also noticed how
many people post defenses of XM that claim they have no "interest" of
any kind in it. Which really does pose the question, "so whats it to
you?" Why would you care about my post if truly, "This poster neither
holds investment in, listens to, plans to listen to, nor
gives a flying fig in any way about XM Satellite Radio."??? Why would
you care at all?

I've been told by ASCAP and BMI representatives that the use of a
radio by an employee (the cook listening as he works) doesn't require
a license.

Any radio or sound system installed in the ceiling or otherwise
intended for the customer is subject to a license.

But didn't they get the calls form XETRA-690? Those calls were put on by
Gordon McLendon in about 60 or 61, I recall. Nearly all the "XE" Mexican FM
call letters were originally given to STL licenses that used FM frequencies
to link to the AM site.

For the same reason we care if someone says that AM stereo is still a valid option: we are here to discuss and debate things about radio. We care about radio, and we reject BS. Your posts are full of the latter, and you have demonstrated a humongous misunderstanding of business practices in general. In other words, you are the best kind of target. If you posted something besides totally inaccurate assumptions and illogical conclusions, you would not be nearly as fun to bait.

NRSC Endorses AM IBOC for Daytime Only
==========

Washington, DC - March 21, 2002 - The NRSC's AM IBOC working group will potentially recommend to the FCC that Ibiquity's AM IBOC is suitable for use during daytime hours only. The committee's results show that AM IBOC during the day yields performance comparable to that of FM IBOC. Nighttime operation of the AM IBOC system has outstanding issues due to first- and second-adjacent channel problems. Ibiquity has already stated that it does not expect AM IBOC to work via skywave signals because of the three subcarriers that occupy the 15 kHz mask. This means that AM IBOC will rely solely on groundwave propagation.

This may come as a big surprise to some if there is no nighttime operation. One has to ask if it will be worthwhile for stations to use the system only during the day. Overall, the AM IBOC signal is very robust, but it suffers from the usual AM problems and may limited by first- and second-adjacent problems. The NRSC committee will present its findings on April 6 at NAB for approval by the NRSC.

It can't be all that robust if it won't work via skywave, and it
suffers from first and second-adjacent problems.

What's the point of going digital if you don't get anything better
than the existing analog transmission?

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the

University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

1079. Expanded Band 5-year rule?

Newsgroup: rec.radio.broadcasting
Date: 2002-03-26 15:18:58 UTC
From: "Kevin T." <kevtronics@yahoo.com>
Message-ID: <ua14b2aq4ar659@corp.supernews.com>
Source record: 11540
Cross-posted to: rec.radio.broadcasting,alt.radio.broadcasting,alt.radio.broadcasting.open

Whatever happened to the FCC rule that when an AM station moves to the Expanded Band (1610-1700 kHz), the original AM frequency has to go off the air within 5 years? (Actually, stations also have the choice of shutting down the new *Expanded Band* frequency at the 5 year mark and keeping the *original* frequency, but that is obviously not a common choice.)

According to the documents on the FCC web site, this "5-year rule" is an inherent part of the whole concept of offering the Expanded Band in the first place: to lower interference and congestion levels on the "regular" AM band by having stations migrate to the Expanded Band and then shut down their original frequency, leaving one less transmitter on the air to clog up the channel, especially for the Class C and D stations.

Despite all this, there are stations that are clearly breaking this 5-year rule. 5 years has passed since their Expanded Band facility signed on, and yet the original station is still on the air. Two examples of this are 1530 WJDM in Elizabeth, NJ (parent of 1660 WWRU) and 1190 KDYA in Vallejo, CA (parent of 1640 KDIA), which both signed on their Expanded Band signals in early 1996. By the 5-year rule, both WJDM and KDYA should have been shut down in early 2001. But yet, a year later, both are still on the air!

The only possible loophole the FCC offers is if the regular band station cancels its license, and then another owner applies to recreate a "new" station on the same frequency at the same location. But that does not apply to either WJDM or KDYA, and it *cannot* apply, since both are daytimers and the FCC has not accepted any applications for new daytime-only AM stations in many years.

Another issue for Expanded Band stations is that many of them are failing to meet the FCC-required "Model I" technical facilities. Model I requires the Expanded Band station to broadcast in AM Stereo, and all Expanded Band stations were required to apply for Model I status, but yet many Expanded Band stations are not broadcasting in Stereo. Some used it for a while and then turned it off, while others have never been in Stereo since they signed on the air. This is effectively defeating another inherent goal of the Expanded Band: to provide a higher fidelity, higher quality AM signal through the use of AM Stereo and because of the naturally lower electrical interference levels at the top end of the AM band.

All of this makes one stop and think... if the FCC can't even manage the AM Expanded Band correctly, who thinks they can actually manage things

like LPFM, digital radio (IBOC), or digital TV without screwing up even worse?

OK the point is most likely it was the guy cables were cut OKAAAAAYYYYY who did it???

Is it a dry run for something else perhaps? I am haveing a feeling someone is useing the local fm as a cheapy test bed for something a little bigger and a little nastier if not for themselves at least to provide them a in for 'employment' in the future (crime is always a growth industry)

Interesting local point of issue, power pylons in many areas, mountainous areas, I remind you lads, are held up by guyed towers. I don't know if the guy wires are for stablization or for support as with radio towers.

The question falls upon the detial now of were they average vandals or are they 'vandals' who upon arrival to 'the academy' inpart there valuable info to those who should not have it bluntly put I mean 'the terrorists':)

Mir, how fun:(it always starts small doesn't it

OK I was wondering this dovetails nicely into my thought it is just a thought, um could one 'hack' (that is such a forceful word) into the XM net and possibly run a pirate radio station from it. Pirate radio via satellite. What a way to kill a weekend figure out how to broadcast on XM your stuff instead of there stuff:)

Mir, who is partial to the pirates:)

Many Mexican FM and TV stations use the calls of a co-owned AM station. That may explain their XE- call signs.

I currently have the following used items for sale:

(5) Dictaphone Digital Telephone Logger
with Dual DAT drives, 24 channels Model # 31211-024

(5) Dictaphone Digital Telephone Logger
with Dual DAT drives, 16 channels Model # 31211-016

These units are custom designed for law enforcement use. They have an extra row of green LED's that let you know that the unit is not recording on certain channels. These units are extremely expensive and priced to sell fast! I will also include all the software needed to get this unit in working order. We recently sold several of these to local jails, all have performed flawlessly.

I also have several different DVR's as well. Contact me with your specific needs, and for the best pricing available anywhere.

The first two X-Bands were exceptions based on "largest city with no service" and were the ones in New Jersey and Orange County, CA. The CA twin (540 in Hesperia) has shut down. The NJ twin, 1530 AM, still has about a year to go form the time that 1660 signed on.

None of the other staitons has been on the air 5 years. I believe that Vallejo was on an STA for about it's first year, and that does not count against licensed operation.

In all probablility, many of these creatures will get extensions. they will probably show that there are still lots of radios in use that don't cover the X-band, etc.

As I mentioned in another post, Fred, almost all these XE- FM calls go back to licensed STL transmitters in the late 50's and early 60's. I heard an amusing story from a PD at the Radio Centro group about how they "discovered" that they actually had 4 FM licenses that were being used as STLs... in the world's largest city!

Those 4 FMs are all in the top 10 stations in Mexico City in the Fall Arbitron.

91X was put on the air many years after Gordon McLendon severed ties
to XTRA. I was at XTRA when we put the FM on the air. When I first
started there the station was owned by Luis Carrillo. He sold it to
the Noble family (wide and kids, since Ed was American).

I believe the CP for the FM was granted to Carrillo.

It sounded to me like they were saying that if it were used at night it would create adjacent channel interference. It sounds like the issue was not so much that fewer people could pick it up, but that it would create too much interference. Just my take on it, probably wrong.

> intended for the customer is subject to a license.

ASCAP and BMI are conveniently overlooking the "homestyle equipment"
exception.

The statute states that any playing of radio or television in a public
place is a retransmission, and requires licensing, unless that playing of
radio or television in a public place is done using "homestyle equipment."
The definition of homestyle equipment changes as new technology becomes
cheap enough to be in people's homes regularly enough. In the mid-80s, a
court held that a satellite dish was not homestyle equipment. I'm pretty
sure that would change if that issue was reexamined today.

Generally, however, speakers in the ceiling is probably still not
"homestyle."

There are some specific definitions of what is homestyle directly in the
Copyright Act.

This is not legal advice, and I am not anyone's laywer :)

www.salon.com
Web radio's last stand
A new ruling involving the Digital Millennium Copyright Act is set to wipe out independent online music stations.

- - - - - - - - - - -
By Katharine Mieszkowski

March 26, 2002 | SomaFM is the kind of Internet-only radio station that offers a true alternative to the mainstream fare on the offline dial. About 20,000 listeners a day tune in to the URL to groove to the streams of ambient down-tempo electronica. In the mix: the Chemical Brothers, Mama Gravy, old Moby and obscure new discoveries like the German band Electroslide.

The San Francisco-based station, which began as a pirate radio operation in 1996 at the Burning Man festival, has been continuously broadcasting online for about two years. It runs completely on donations -- about $1,000 a month, plus some bandwidth -- from listeners.

But a new ruling under the Digital Millennium Copyright Act threatens to change the playlist at SomaFM and other stations like it, if not actually shut them down altogether.

The Copyright Arbitration Royalty Panel, a body appointed by the U.S. Copyright Office, ruled on Feb. 20 that under the DMCA, radio stations must pay a fraction of a cent per song, per listener, for every song they stream. Under the CARP ruling, Internet-only radio stations would pay a royalty fee of 14/100 of a cent per song, per listener, retroactively through October 1998. Webcasters are up in arms -- while they are not opposed to the principle of royalty fees, they say the rate structure is far out of balance to the economics of these tiny, often one-person operations.

In recent weeks, webcasters have started a Save Internet Radio campaign to try to amend the DMCA so they can stay on the Internet airwaves.

Rusty Hodge, the program director and general manager of SomaFM, spoke to Salon from his day job at a Web health insurance company to explain how the ruling will likely affect stations like his and what he's doing to fight it.

What fees were you already paying to play the music you air?

We pay ASCAP and BMI fees. Those are the fees that go to the authors of the songs. For a noncommercial station, like us, they're about $600 a year. It depends on how much traffic you get. This year, we're going to be paying close to $1,000. It's comparable to what a college radio station would pay. If you play back music, like in a restaurant or a nightclub, you have to pay those fees.

How will that change under the CARP ruling?

The new fees would be in addition to the ASCAP and BMI fees. We did some rough calculations and found that it would cost us under the terms of that ruling about $1,000 a day.

The problem with the CARP ruling is that everybody assumed that it would be kind of like the BMI and ASCAP fees were; [that] the fees would be reasonable. We figured for noncommercial broadcasters it would be like $1,000 or $2,000 a year, and while it would hurt some of the really, really small little guys, the more serious little guys -- like us, who have a community supporting them -- would still be viable.

Is there any way to avoid the fee?

There are a couple of things we'll do. Right now, we play mostly material that's on small independent record labels or artists that don't have record contracts in place. That's about half the music we play; the other half of the music is on more significant record labels, although it gets confusing to see what is on the top five record labels, because they've been acquiring a lot of smaller labels.

What the CARP ruling affects is what is known as the DMCA compulsory license, meaning that the copyright holders have to give it to you if you pay this amount. They can't selectively say: "You can't broadcast this on your radio station." So, as long as you pay these fees, you can play any material. The CARP ruling concerns what the cost is to play back copyrighted materials, if you sign this compulsory license agreement, which we actually did not sign.

Without that you have to negotiate deals separately with all the copyright holders. That's what we're doing. With about two-thirds of the music we play, we have asked permission from the copyright holders -- the smaller labels or independent artists themselves -- to play it on the air. The other third of the music, it's been hard to reach the people, and so we haven't asked, or we've asked and we've heard nothing back.

So, contacting the record labels and artists themselves is your other option?

That is a way out of it. But the problem with that is that the law is very vague about this. For example, I can go to someone and I can get permission from them to play their songs, but then they will go and sell the rights to their music to a major record label who will come back and say: "We didn't give you permission to play the songs."

You have to have a very detailed legal agreement with them, which isn't going to happen. Small record companies aren't going to sign a five-page legal agreement that defines them giving you rights to play their song in perpetuity. Quite often, they know that a lot of their money will be made when a major label comes to them in the future and says: "We want to buy the rights to this album."

In the early days when we had so many people coming to us asking us to play their music, a lot of it was from the underground music scene; it was kind of like an unspoken thing that everyone wanted as much exposure of their music as possible. A lot of them we had unspoken agreements with.

What stage is the ruling at now?

The DMCA is what makes CARP happen. So, the legislation is already in effect. But the CARP rulings just recently happened less than a month ago. It still has an approval phase to go through, but generally it's thought that the Copyright Office will approve whatever the recommendation is.

What do you think the effect is going to be on some of the smaller stations?

Well, now, when the fees suddenly go up to $350,000 a year or more, then it means basically that there's no way that a lot of stations can continue broadcasting. Their alternative is to move to start playing music purely by just unsigned artists.

Do you think that the Recording Industry Association of America is going to come after these tiny stations, run out of someone's bedroom, and actually try to enforce this?

It will probably be kind of like the way they've gone after people who have done pirate MP3 sites. If they're really small and they have a really small audience, the RIAA probably won't notice them. The ones that are going to get hurt the most are the ones that have an average audience of more than 100 people or so.

Already on the mailing lists that I'm on with a lot of other broadcasters, a lot of them just say: "Well, forget it. I'm shutting my station down. I can't risk any of this." I know of four or five smaller stations that have already shut down just out of fear right now.

What do you think the Save Internet Radio campaign can accomplish? Do you think that it can do anything, or is it already too late?

We realize that going after CARP is the wrong thing. That's like going after the punishment, when really what you have to do is go after the original law that put this in place. The DMCA dates from back in the late '90s, when the mind-set was, "Oh, it's digital, it means a perfect copy of something."

Congress didn't really think about how streaming audio broadcasts are using compressed audio and that they do not sound as good as the original CD. Streaming is not a way of actually distributing recorded music. And that's what the RIAA and the other copyright owners were concerned about when they were pushing for the passage of the DMCA. They were all scared that people would be able to distribute perfect copies of their sound recordings.

The key phrase there is "perfect copies." [The DMCA] talks about how digital allows "perfect copies" of an original. And therefore they had to be taxed or there had to be a royalty at a very high price, because these perfect copies would be taking away from record company sales.

But the truth is that with Internet radio, while the sound quality is good, in most cases, it's not as good as the FM broadcast. And in some cases when it is as good as an FM broadcast, we all know that an FM radio doesn't sound nearly as good as listening to the original CD.

So, there's a big letter-writing campaign going to amend the DMCA to separate systems that would distribute perfect digital copies vs. systems that distribute degraded digital copies. When you compress it using Windows Media or Real Audio, the copy you are distributing is no longer a perfect digital copy, it's a degraded copy. It's not the same as the original. We want to change the DMCA to reflect that Internet broadcasting is not distributing these perfect digital copies. We want to see the DMCA amended to state that Internet broadcasting, which is different than peer-to-peer file sharing or online musical distribution services, should be treated the same way as over-the-air broadcasts.

So, the fees that you're talking about from this CARP ruling, you would be paying them in addition to the ASCAP and BMI fees that you're already paying?

Yes. The fees are for distributing the recording of the song. Copyright law is kind of weird and confusing. There are a couple of pieces -- there is the recording, there is the song itself, which is generally considered the composition. The artist almost always owns the composition, but in most cases the record labels own the recording of that song.

So, you guys see this money as going to the record companies, not to the artists?

Yes. The ASCAP and BMI fees go to the artists, but the fees that CARP deals with go to the record companies.

What kind of fee do you think would be fair?

I think that it would be comparable to the BMI and ASCAP fees.

Do you think that these new fees will force indie Net radio stations to go more commercial with subscriptions or advertising or go underground, or do you just think they will shut down?

We think that some will go much more commercial, but then you play only the music the record companies want you to play. The record companies want to push a very limited number of records. They get like 90 percent of their revenue from probably less than 10 percent of the music that's out there. So, they would want to see Webcasters pushing the stuff that they want to push, and not all this other stuff, because they don't think that they're going to make as much money on the small independent artists.

The other direction that the independent stations could go is to start playing music by truly independent artists who are not affiliated with record labels, and that's what a lot of them have said that they'll start doing.

The only problem with that is that overall the quality of music goes down, and you're going to lose a lot of the audience. A real successful independent station will play a lot of obscure upcoming artists or unreleased artists on minor labels, but also mix in some stuff from some of the bigger labels.

I understand that you're making a big effort to separate this case from the Napster debate. What impact has the Napster case had on Internet radio?

The problem with Napster is that people think that Internet radio is just another way to get music for free. And, you know, in some ways it is. Some people who listen to the radio never, ever buy music, but I probably get like 20 e-mails a day from people trying to track down records that are hard to find.

And I've gotten other e-mails from people who say, "Oh my God! Since I've listened to your station, I've bought like 60 records. It's all this new stuff that I never knew existed before. Thank you for introducing me to it." It's not like people are coming to us to get music so they don't have to buy CDs. The core of our audience is people who are looking to discover new music.

Do you think that the whole Napster debate has made it more difficult to argue for the legitimacy of Internet radio?

Yeah, because Napster has sort of equated Internet music with stealing music. We just want to be treated as over-the-air broadcasters are treated.

One trick I learned years ago that will cut down on altenator whining is to attach the radio and any add-on amplifier to a solid chassis body ground, not the normal ground lead that's on the harness. Take your ground directly off the car's body.

No!

AM IBOC occupies at least half of each first-adjacent channel.

At night, AM stations have very little protection against stations on
their first-adjacent channels. Stations on those channels may be just
as loud as the local station at the limit of its "protected" ground-wave
service area - 2.5 mV/m or MUCH higher for many classes.

At least one person (not I) has calculated that one would need 26 dB
first-adjacent protection, not 0 dB, and that would be a matter of 2 or
3 miles for many stations.

1101. ATU or parts required

Would someone have a spare ATU or suitable parts for 1Kw power level at the HF end of the AM band running into a 90 deg stick?

Trying to help a friend up in PA.

Thanks

No I stopped listening to him when I grew out of my first decade of life. I think the mid-70's was the last time. You couldn't pay me to listen to him ;-/

--
An unjust king asked a devotee what kind of worship is best? He replied:
'For thee the best is to sleep one half of the day so as not to injure the people for a while.'

I saw a tyrant sleeping half the day.
I said: 'This confusion, if sleep removes it, so much the better;
But he whose sleep is better than his wakefulness
Is better dead than leading such a bad life.'

1103. Re: Howard Radio CO

I believe the Howard Radio Co was located on Howard street on the north side of Chicago on the Evanston border. An AM/FM type would be one of their later models. I've attended allot of antique radio swap meets and have never seen one of these. Certainly worth restoring. I would suggest posting this question to the "rec.antiques.radio+phono" newsgroup for more information.

Ross Hockenberry (rhock@westvirginia.net) wrote:

A company who could supply and install a temporary 1Kw AM transmitter at 'very short notice' in the PA area.

We're trying to stop a licence from being lost and need to get this station back on the air for a few days by next Wednesday. This should then give us some breathing space with the FCC.

Cost is not a problem, time is.

If you think you can help or know of someone that can we will be eternally grateful.

You can contact Bill on (361) 658 7921

Thanks

Hi guys,

I found out about this apparently new production company ... they make "hitmixes" and "introducks" ...

one of my co-workers (our production guy) told me about these guys, so I wanted to pass on the message ...

quite neat stuff, and sooooooo cheap !

they are on the web @ www.ppsoffice.com with demo's ...

demo's sound good ... anyone know more about these guys ?

Thanks

Johan

<snipped>

I don't know if this will pass the censors. My last post - which I thought was a reasoned and well-thought out response to Sid's commentary on the O&A situation, was submitted but never listed on the board. I am not going to question or even care why it was 'moderated' out. If I don't see this in rec.radio.broadcasting, I will take it to another group. Usually when a reasoned argument - which has no slurs, obscenities, etc. is not passed along, it's either a mistake, or someone has decided that the message is just too powerful to be heard.

In any event, the toned-down point I would like to get across - is that just because something 'crosses the boundaries' and sells doesn't necessarily validate it.

Re April Fool's hoaxes - the hoax of the Boston Mayor's demise was sick. The station should have been prosecuted. If anyone wants to see the full text of my response to Sid's post, Email me and I will send it to you privately.

The most important thing - if, hypothetically, I call someone on the phone and as a sick joke say "I'm sorry that (someone close to you) was killed in a car crash an hour ago?" -- that's an annoyance call, and a felony. However, some feel if the same message is conveyed over a radio station to cause alarm, or just for a sick joke, it's OK, it's entertainment. Even if it has the potential to cause considerably more discord and danger.

Is running a radio station - and holding a license - somehow a license to be immune from admonition for such behavior? I don't think so. Others will disagree.

April Fool's Day is approaching. If you work in the radio business -- THINK before you do something that could have a strong negative impact on thousands of people. Please.

Amateur Radio Newsline™ Report 1285 - March 29 2002

Amateur Radio Newsline report number 1285 with a release date of Friday, March 29th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Russia orbits a new but temporary ham radio satellite and the ARRL says its time to re farm the Novice bands. What is refarming? Find out on Amateur Radio Newsline report number 1285 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: RS-21 IN OBIT

Yet another ham radio satellite is now in space. This one is the Russian Radio Sport 21. Roy Neal, K6DUE, has the details:

--

Meet the latest ham radio satellite: RS-21. The newest ham radio satellite.

The satellite's formal name is the Russian-Australian Scientific and Educational Microsatellite Kolibri-2000. To most hams however, it is simply Radio Sport 21.

According to the AMSAT News Service, the new ham-sat was remotely launched on March 20th from a Russian Progress M-1-7 launcher that had brought supplies to the International Space Station. That launch took place after the Progress ship had un-docked from the I-S-S.

Alex Zaitzev, RW3DZ, the director of the Microsat Office of the Russian Space Research Institute, describes RS-21 as a non-government, non-commercial project, built with cooperation from students in Russia and Australia. It is currently in a circular orbit just over 200 miles above the Earth and on the air. Downlink frequencies are listed as 145.825 and 435.335 MHz.

The birds uses both CW and FSK for its telemetry transmissions, but it wont last very long. Zaitzev says that RS-21 was designed with a limited lifespan and that it will fall back into the atmosphere during the late winter or spring months. Till then though, RW3DZ, says that the satellite will send down data and digitally recorded voice messages.

For the Amateur Radio Newsline, Roy Neal, K6DUE.

--

Meantime, the L.A. Daily News reports that the current crew on board the International Space Station will be spending an extra month in orbit. Russian Cosmonaut Commander Yuri Onufrienko, RK3DUO along with American Astronauts Carl Walz, KC5TIE and Dan Bursch, KD5PNU will spend the time correcting problems with the Canadian built robotic arm used for ongoing I-S-S construction. This will mean the crew will be on board for a total of 189 days. This will be a new record for the US crew members on board the International Space Station. (AMSAT-NA)

**

HAM RADIO IN SPACE: HIGH SCHOOL CHEMISTRY EXPERIMENT TO THE ISS

A small science experiment at two Bloomington, Indiana High Schools is now headed for the International Space Station. A ham radio operator is helping to make it happen. Amateur News Weekly's Jack Parker, W8ISH, has the details from the home of Indiana University.

--

Eleven honors chemistry students from Bloomington North and Bloomington South High Schools have collaborated with NASA to prepare a protein crystal growth experiment. The protein, frozen since November, is now ready to be transported to the International Space Station.
